Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Atlanta, GA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to swais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial-in users should use communications software and modem to call (202) 512–1661 and login as swais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: September 12 at 9:00 am
WHERE: Office of the Federal Register Conference Room, 800 North Capitol Street NW., Washington, DC (3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

ATLANTA, GA

WHEN: September 20 at 9:00 am
WHERE: Centers for Disease Control and Prevention
1600 Clifton Rd., NE.
Auditorium A
Atlanta, GA
RESERVATIONS: 404–639–3528

Rules and Regulations

Federal Register
Vol. 60, No. 170
Friday, September 1, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 304

RIN 3206–AF37

Expert and Consultant Appointments

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is adopting regulations for the employment and pay of persons appointed under the expert and consultant authority. The Technical and Miscellaneous Civil Service Amendments Act of 1992 requires OPM to prescribe such regulations and to ensure agency compliance.

EFFECTIVE DATE: October 2, 1995.

FOR FURTHER INFORMATION CONTACT:

Employment and reporting requirements—Tracy E. Spencer or Christina Gonzales, (202) 606–0830, or fax (202) 606–2329;

Pay and leave administration—Frank Derby, (202) 606–1413, or fax (202) 606–0824.

SUPPLEMENTARY INFORMATION: A longstanding law, 5 U.S.C. 3109, authorizes agencies to make excepted appointments of qualified persons to perform expert or consultant work that is temporary (not to exceed 1 year) or intermittent. In 1991, the General Accounting Office (GAO) reviewed expert and consultant appointments made under section 3109 by nine installations during a 30-month period. GAO determined that almost one-third of those appointments were improper and recommended that Congress amend 5 U.S.C. 3109 to authorize OPM to regulate the employment of experts and consultants.

Section 2(8) of Pub. L. 102–378, October 2, 1992, requires OPM to regulate appointments under 5 U.S.C. 3109 and to collect data on pay and days worked. OPM issued proposed regulations to implement that requirement on December 29, 1994 (59 FR 67232). We received comments on those regulations from nine Federal agencies and one private firm.

Comments on Coverage

One agency suggested that the regulations use an alternative term for "consultant" to distinguish individuals who receive Federal civil service appointments from those serving under contracts for consulting services. We did not adopt that suggestion because the terms "expert" and "consultant," are contained in the law.

One agency asked whether the regulations cover appointments of advisory group members. The regulations cover all appointments made under 5 U.S.C. 3109, including those to advisory groups. Another agency asked how the regulations will affect current appointments of experts and consultants. Experts and consultants appointed without time limit will become subject to the new regulations immediately on the effective date. Those already appointed with time limits will become subject to the regulations upon expiration of their current appointment. We do not anticipate that the regulations will necessitate changes in employment conditions because the requirements either repeat or liberalize those contained in previous instructions and determinations issued by OPM and GAO.

Comments on Appointments and Reappointments (Section 304.103)

The law requires that experts and consultants be appointed on a temporary or intermittent basis. One agency suggested that the regulations should permit experts and consultants who work on a strictly intermittent basis to be appointed for periods longer than 1 year or without time limit. That has been done.

All other experts and consultants must be employed under temporary appointments. The proposed regulations included two options for limiting length of temporary service: By time (Option 1) or by cumulative earnings (Option 2).

Several agencies suggested that Option 1 should include the same flexibilities for extension or reappointment that are available for other temporary Federal appointments. We have adopted suggestions to permit reappointment to demonstrably different duties and to provide for OPM approval of exceptions to time limits.

Several agencies asked whether an individual's maximum lifetime earnings limit under Option 2 would increase to reflect increases in basic pay rates. One agency asked whether an individual who had previously exhausted his/her lifetime limit could be reappointed following such an increase. The final regulations permit, but do not require, agencies to raise an appointee's lifetime earnings limit to reflect statutory pay increases.

One agency suggested that OPM provide examples of situations in which Option 1 or Option 2 would be appropriate. We did not adopt that suggestion because we believe that each agency can best make that determination based on first-hand knowledge of its own work. Another agency suggested that the determination be required prior to any reappointment, rather than upon initial appointment, to reduce documentation requirements for appointments that are never renewed. We have adopted that suggestion although, in practice, we expect that many appointees will want to know the possibility for reappointment when deciding whether to accept the agency's initial offer.

Comments on Pay and Leave Administration (Sections 304.104 through 304.106)

The regulation stipulates that experts and consultants are not automatically entitled to pay rate adjustments at the time of general pay increases under 5 U.S.C. 5303 unless provided for in the appointment document. (See 5 CFR 304.106(a).) One agency suggested that entitlement to receive those pay rate adjustments be at the discretion of agency managers. That comment seems to be based on a misunderstanding. The regulations do not impair any agency's ability to make ad hoc adjustments in expert or consultant pay under its administrative pay setting authority. The provision in question simply states that experts and consultants have no entitlement to pay adjustments equal to those under 5 U.S.C. 5303, unless the agency has chosen to convey such entitlement in the appointing document. In the absence of a documented provision for such pay adjustments, they are at the employing agency's discretion. We have revised § 304.106(a) to make clear that agencies have discretionary authority to adjust the pay of experts and consultants.

One agency commented on the necessity for the use of an updated service computation date (SCD) for intermittent experts and consultants in the preparation of reports required under section 304.108. The concern was a need for the continuous updating of SCDs for intermittents. However, OPM does not require continuous updating of SCDs for intermittent employees. Agencies are required to update those SCDs if the employee leaves the agency (transfer, separation, retirement, etc.) or changes to a non-intermittent work schedule.

One consultants' organization commented that there should be no provision for overtime for experts and consultants. Entitlement to overtime pay and other premium pay is a matter of law, if applicable eligibility requirements are met. That organization also suggested that agencies engage in a pre-screening process whereby available experts and consultants could be listed by subject expertise and fee schedule. Agencies are free to do so based upon foreseeable needs and funds available.

One agency asked whether experts and consultants who are covered under the Fair Labor Standards Act (FLSA) overtime provisions are subject to the special FLSA rules applicable to General Schedule employees under title 5, United States Code, and OPM regulations. Those experts and consultants are subject to OPM's regulations on FLSA overtime pay. (See section 4(f) of the Fair Labor Standards Act of 1938, as amended.) To clarify this, we have added a reference to OPM's FLSA regulations (part 551) in section 304.106(c).

One agency recommended that § 304.105 be revised to make clear how daily and biweekly pay limits are to be computed in cases where an agency has authority to pay an expert or consultant above the GS–15, step 10, limitation. Since these regulations are limited to implementation of 5 U.S.C. 3109, we have not included rules on implementing a pay limit under other statutory provisions. However, all Federal employees covered under 5 U.S.C. 5504 would be subject to the rules therein for the computation of hourly, daily and biweekly rates of pay.

An agency asked how pay would be administered for experts and consultants who are paid on a daily basis in the event that they are assigned to established regular tours of duty (i.e., not intermittent) and who therefore have an entitlement to annual and sick leave. Since these employees have scheduled tours, they are accountable for their scheduled work hours by performing work or taking annual leave, sick leave, leave without pay, compensatory time, etc. Accordingly, OPM believes that such employees should be compensated on an hourly basis rather than on a daily basis.

We are considering adding a provision to these regulations that would establish a clear requirement that any expert or consultant with an established regular tour of duty must be paid on an hourly basis. However, we are interested in agency comments regarding such a requirement before proceeding with a regulatory change. Therefore, we invite agency representatives to provide comments by calling the Compensation Administration Division at (202) 606–2858 or by writing to Donald J. Winstead, Assistant Director for Compensation Policy, Office of Personnel Management, Room 6H31, 1900 E Street, NW., Washington, DC 20415.

Comments on Reporting and Compliance Requirements (Sections 304.107 and 304.108)

As revised, 5 U.S.C. 3109 requires agencies to report annually on their use of *paid* experts and consultants and to provide the controls and oversight necessary to ensure proper use of the appointing authority. We have adopted an agency's suggestion to clarify that the pay to be reported does not include reimbursement for travel and related expenses. We did not adopt a suggestion to delete requirements that agencies conduct appropriate training and oversight to ensure proper use of the appointing authority because Congress intended these elements to be part of agencies' compliance programs. We have, however, reworded the regulation to clarify that the specific procedures for meeting these requirements are up to each agency.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it applies only to Federal Government employment practices.

List of Subjects in 5 CFR Part 304

Administrative practice and procedure, Government employees.

Office of Personnel Management,

James B. King,

Director.

Accordingly, OPM is adding part 304 to title 5, Code of Federal Regulations, as follows:

PART 304—EXPERT AND CONSULTANT APPOINTMENTS

Sec.

304.101 Coverage.
304.102 Definitions.
304.103 Authority.
304.104 Determining rate of pay.
304.105 Daily and biweekly basic pay limitations.
304.106 Pay and leave administration.
304.107 Reports.
304.108 Compliance.

Authority: 5 U.S.C. 3109.

§ 304.101 Coverage.

These regulations apply to the appointment of experts and consultants as Federal employees under 5 U.S.C. 3109. They do not apply to the appointments of experts and consultants under other employment authorities or to the procurement of services by contracts under the procurement laws.

§ 304.102 Definitions.

For purposes of this part:

(a) An *agency* is an executive department, a military department, or an independent agency.

(b) A *consultant* is a person who can provide valuable and pertinent advice generally drawn from a high degree of broad administrative, professional, or technical knowledge or experience. When an agency requires public advisory participation, a consultant also may be a person who is affected by a particular program and can provide useful views from personal experience.

(c) A *consultant position* is one that requires providing advice, views, opinions, alternatives, or recommendations on a temporary and/or intermittent basis on issues, problems, or questions presented by a Federal official.

(d) An *expert* is a person who is specially qualified by education and experience to perform difficult and challenging tasks in a particular field beyond the usual range of achievement of competent persons in that field. An expert is regarded by other persons in the field as an authority or practitioner of unusual competence and skill in a professional, scientific, technical or other activity.

(e) An *expert position* is one that requires the services of a specialist with skills superior to those of others in the same profession, occupation, or activity to perform work on a temporary and/or

intermittent basis assigned by a Federal official. For example, a microbial contamination specialist may apply new test methods to identify bacteria on products, a computer scientist may adapt advanced methods to develop a complex software system, or a plate maker may engrave a novel design.

(f) *Intemittent employment,* as defined in part 340, subpart D, of this chapter, means employment without a regularly scheduled tour of duty.

(g) *Temporary employment* means employment not to exceed 1 year. An expert or consultant serving under a temporary appointment may have a full-time, part-time, seasonal, or intermittent work schedule.

(h) Employment *without compensation* means unpaid service that is provided at the agency's request and is to perform duties that are unclassified. It is not volunteer service.

§ 304.103 Authority.

(a) *Basic authority.* (1) When authorized by an appropriation or other statute to use 5 U.S.C. 3109, an agency may appoint a qualified expert or consultant to an expert or consultant position that requires only intermittent and/or temporary employment. Such an appointment is excepted from competitive examination, position classification, and the General Schedule pay rates.

(2) An expert or consultant who works on a strictly intermittent basis may be appointed under this authority without time limit or for any period determined by the agency. All other experts and consultants must receive temporary appointments. Temporary experts and consultants may be reappointed in the same agency only as provided in paragraph (c) of this section.

(b) *Inappropriate use.* An agency must not use 5 U.S.C. 3109 to appoint an expert or consultant:

(1) To a position requiring Presidential appointment. However, subject to the conditions of this part, an agency may appoint an individual awaiting final action on a Presidential appointment to an expert or consultant position.

(2) To a Senior Executive Service position (including an FBI or DEA Senior Executive Service position).

(3) To perform managerial or supervisory work (although an expert may act as team leader or director of the specific project for which he/she is hired), to make final decisions on substantive policies, or to otherwise function in the agency chain of command (e.g., to approve financial transactions, personnel actions, etc.).

(4) To do work performed by the agency's regular employees.

(5) To fill in during staff shortages.

(6) Solely in anticipation of giving that individual a career appointment. However, subject to the conditions of this part, an agency may appoint an individual to an expert or consultant position pending Schedule C appointment or noncareer appointment in the Senior Executive Service.

(c) *Reappointment.* An agency may reemploy an expert or consultant to perform demonstrably different duties without regard to the length of that individual's previous expert or consultant service with the agency. Reappointment to perform substantially the same duties is subject to the following limits:

(1) An agency may employ an expert or consultant who works on a full-time basis for a maximum of 2 years—i.e., on an initial appointment not to exceed 1 year and a reappointment not to exceed 1 additional year.

(2) An agency may reappoint an expert or consultant who works on a part-time or intermittent schedule in accordance with one of the following options. The agency must determine which option it will use in advance of any reappointment and must base its determination on objective criteria (e.g., nature of duties, pay level, whether or not work is regularly scheduled). Option 1 must be applied to reappointments of experts and consultants appointed without compensation.

(i) *Option 1—Annual service.* An agency may reappoint an expert or consultant, with no limit on the number of reappointments, as long as the individual is paid for no more than 6 months (130 days or 1,040 hours) of work, or works for no more than that amount of time without compensation, in a service year. (The service year is the calendar year that begins on the date of the individual's initial appointment in the agency.) An expert or consultant who exceeds this limit in his/her first service year may be reappointed for 1 additional year. An expert or consultant who exceeds the limit during any subsequent service year may not be reappointed thereafter.

(ii) *Option 2—Cumulative earnings.* Each expert or consultant will have a lifetime limit of twice the maximum annual rate payable under the annualized basic pay limitations of section 304.105. The agency may adjust this limit to reflect statutory increases in basic pay rates. The agency may reappoint an expert or consultant until his/her total earnings from expert or consultant employment with the agency reach the lifetime maximum, as determined by using the applicable maximum salary rate. At that point, the employment must be terminated.

(3) OPM may authorize reappointment of an expert or consultant as an exception to the limits in the section when necessitated by unforeseen and unusual circumstances.

§ 304.104 Determining rate of pay.

(a) The rate of basic pay for experts and consultants is set by administrative action. The head of an agency, or his or her designee, must determine the appropriate rate of basic pay on an hourly or daily basis, subject to the limitations described in section 304.105.

(b) The head of an agency, or his or her designee, shall consider the following factors in setting the initial rate of basic pay for an expert or consultant:

(1) The level and difficulty of the work to be performed;

(2) The qualifications of the expert or consultant;

(3) The pay rates of comparable individuals performing similar work in Federal or non-Federal sectors; and

(4) The availability of qualified candidates.

(c) An expert or consultant appointed under 5 U.S.C. 3109 may be employed without pay, provided the individual agrees in advance in writing to waive any claim for compensation for those services.

§ 304.105 Daily and biweekly basic pay limitations.

(a) Unless specifically authorized by an appropriation or other statute, agencies subject to chapter 51 and subchapter III of chapter 53 of title 5, United States Code, may not pay for any 1 day an aggregate amount of pay (including basic pay, locality pay under subpart F of part 531 of this chapter, and premium pay under subpart A of part 550 of this chapter) that exceeds the daily equivalent of the highest rate payable under 5 U.S.C. 5332—that is, the daily rate for GS–15, step 10, under the General Schedule (excluding locality pay or any other additional pay). The daily rate is computed by dividing the annual GS–15, step 10, rate by 2,087 hours to find the hourly rate of pay and by multiplying the hourly rate of pay by 8 hours.

(b) Unless specifically authorized by an appropriation or other statute, an expert or consultant shall not be paid for any biweekly pay period an aggregate amount of pay (including basic pay, locality pay under subpart F of part 531 of this chapter, and premium pay under subpart A of part 550 of this chapter) in excess of the biweekly rate of pay for GS–15, step 10, under the General Schedule (excluding locality pay or any other additional pay). The biweekly rate is computed by dividing the annual GS–15, step 10, rate by 2,087 hours to find the hourly rate of pay and by multiplying the hourly rate of pay by 80 hours.

§ 304.106 Pay and leave administration.

(a) The employing agency has the authority to adjust the pay of experts and consultants after initial appointment and to establish appropriate policies governing the amount and timing of any such adjustments, subject to the limitations of § 304.105. In addition to the factors listed in § 304.104(b), the agency may consider factors such as job performance, contributions to agency mission, and the general pay increases granted to other Federal employees. Experts and consultants are not entitled to receive automatic adjustments in their rates of basic pay at the time of general pay increases under 5 U.S.C. 5303 unless specifically provided for in the official appointing document. In the absence of such automatic entitlement, any pay adjustments are at the agency's discretion.

(b) Experts and consultants paid on a daily rate basis are not entitled to overtime pay under section 5542 of title 5, United States Code. Otherwise, experts and consultants qualify for premium pay under subchapter V of chapter 55 of title 5, United States Code, if they meet the applicable eligibility requirements (including the requirement that an employee have a regularly scheduled tour of duty, where applicable).

(c) Experts and consultants may be entitled to overtime pay under the Fair Labor Standards Act if they are nonexempt under OPM regulations implementing that Act for Federal employees. (See 5 CFR part 551).

(d) An expert or consultant may be paid for service on an intermittent basis in more than one expert or consultant position, provided the pay is not received for the same period of time (5 U.S.C. 5533(d)(1)).

(e) Experts and consultants are subject to the provisions of 5 U.S.C. 8344 and 8468 on reduction of basic pay by the amount of annuity received.

(f) Experts and consultants are subject to the provisions of 5 U.S.C. 5532 on reduction of retired military pay.

(g) Experts and consultants with a regularly scheduled tour of duty (i.e., not intermittent) are entitled to sick and annual leave in accordance with chapter 63 of title 5, United States Code, and to pay for any holiday occurring on a workday on which they perform no work, provided that workday is part of the basic workweek. Those employed on an intermittent basis do not earn leave and are not entitled to paid holidays.

§ 304.107 Reports.

As required by 5 U.S.C. 3109(e), each agency shall report to the Office of Personnel Management on an annual basis:

(a) The number of days the agency employed each paid expert or consultant; and

(b) The total amount the agency paid each expert or consultant so employed. (Do not include payments for travel and related expenses.)

§ 304.108 Compliance.

(a) Each agency using 5 U.S.C. 3109 must establish and maintain a system of controls and oversight necessary to assure compliance with 5 U.S.C. 3109 and these regulations. The system must include—

(1) Appropriate training and information procedures to ensure that officials and employees using the authority understand the statutory and regulatory requirements; and

(2) Appropriate provision for review of expert and consultant appointments.

(b) OPM will, as necessary—

(1) Review agency employment of experts and consultants and agency controls and oversight to determine compliance; and

(2) Issue instructions and guidance to agencies on employing experts and consultants and on reporting procedures.

5 CFR Parts 353, 870, and 890

RIN 3206–AG02

Restoration to Duty From Uniformed Service or Compensable Injury

AGENCY: Office of Personnel Management.

ACTION: Interim regulations with request for written comments.

SUMMARY: The Office of Personnel Management (OPM) is issuing interim regulations on the restoration rights of Federal employees who leave their employment to perform duty with the uniformed services. These regulations implement the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), Public Law 103–353, which was enacted into law on October 13, 1994. The new law revises and restructures the Veteran's Reemployment Rights law (codified in chapter 43 of title 38, United States Code), which governs the restoration rights of employees who perform military duty. USERRA clarifies, expands, and strengthens the rights and benefits of applicants and employees, alters the appeal procedures available to Federal employees, and, for the first time, provides Federal employees Department of Labor assistance in processing claims. USERRA also requires OPM to place certain returning employees when their former agencies determine that it is "impossible or unreasonable" to reemploy them.

Although the sections have been renumbered, and in some cases renamed, there is no substantive change in the regulations governing the restoration rights of employees who sustain compensable injuries. However, in § 353.301(a), the word "may" has been changed to "must" to make clear that an agency must place an employee who fully recovers from a compensable injury within 1 year, even if it means placing the person in a different location. Also, § 353.301(d) makes clear that partially recovered employees are entitled to restoration rights only in the local commuting area, not agencywide. (This provision was inadvertently omitted from the final regulations published in the **Federal Register** on January 13, 1995, that incorporated into the regulations various staffing provisions previously found only in the Federal Personnel Manual.)

These interim regulations also implement provisions that expand on the coverage of the affected employees under the Federal Employees' Group Life Insurance (FEGLI) Program and the Federal Employees Health Benefits (FEHB) Program. Both the FEGLI and the FEHB regulations are amended to show that employees who separate to perform military service under the provisions of this Act are considered to be employees in nonpay status. The FEHB regulations are further amended to show that FEHB coverage may continue for up to 18 months after the employee enters military service.

DATES: Effective: September 1, 1995. Comments must be received on or before November 30, 1995.

ADDRESS: Send or deliver comments to: Leonard R. Klein, Associate Director for Employment, U.S. Office of Personnel Management, 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: For part 353: Raleigh M. Neville, (202) 606–0830. For parts 870 and 890: Margaret Sears (202) 606–0004.

SUPPLEMENTARY INFORMATION: The job rights of employees who leave their employment to perform military duty have been protected under the Veterans' Reemployment Rights Act (chapter 43 of title 38, United States Code) since 1940. However, this law had become a confusing patchwork of statutory amendments, which, over the years, had been interpreted by over one thousand different (and sometimes conflicting) court decisions. It became increasingly difficult for employers and employees to understand their respective rights and responsibilities.

Thus, on October 13, 1994, President Clinton signed into law the new Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), Pub. L. 103–353. The new law completely rewrites the existing provisions of title 38, United States Code, governing the rights of employees who perform military duty and makes many substantive changes that will affect employees, agencies, and OPM.

Among the important changes made by the new law are the following:

—Coverage is broader. USERRA covers persons who perform duty in the "uniformed services." (Under the old law, coverage was limited to the "armed forces.") It also covers all employees except those serving in positions where there is "no reasonable expectation that employment will continue indefinitely or for a reasonable period." (The old law specifically excluded temporary service.) The interim regulations provide that all employees are covered. However, an employee on a time-limited appointment who enters uniformed service serves out any remaining unexpired portion of the appointment upon his or her return.

—Intelligence agencies are treated differently under the law. Although employees in these agencies (CIA, FBI, NSA, etc.) have substantially the same rights as other Federal employees under the law, they are not subject to OPM's regulations and do not have the same appeal rights as other employees.

—There is a 5-year cumulative total on uniformed service. For the first time, the law makes clear that it is intended to protect "noncareer" service and establishes a 5-year cumulative total on uniformed service. (Under the interpretations applied to the old law, a Federal employee could be absent on military duty for up to 4 years at a time and there was no cumulative limit.) However, there are important exceptions to the 5-year limit. These include initial enlistments lasting more than 5 years, periodic training duty, and involuntary active duty extensions and recalls. The new law expressly provides that an employee's job protections do not depend on the timing, frequency, or duration of uniformed service.

—Enhanced protections for disabled veterans. Agencies must make reasonable efforts to accommodate the disability. Servicemembers convalescing from injuries received during service now have up to 2 years to return to their jobs (as opposed to 1 year under the old law).

—New skills training required for some veterans. As under the old law, USERRA provides that returning servicemembers be reemployed in the job they would have attained had they not been absent for military service (the longstanding "escalator" principle). However, the new law also requires that reasonable efforts be made (such as training or retraining) that would enable returning servicemembers to refresh or upgrade their skills so that they might qualify for reemployment.

—The position to which the person has restoration rights is now determined by how long the employee has been gone. If the period of military duty is less than 91 days, the employee is entitled to the position he of she would have attained had the absence not occurred. If the military duty lasts more than 90 days, the person's entitlement is essentially the same except that he or she may be placed in an equivalent position. (Under the old law, restoration rights were based largely on the kind of military duty performed, for example, active duty, active duty for training, inactive duty, etc.)

—Similarly, the length of time an employee has to report back for duty following uniformed service is now determined by how long he or she has been gone. If the absence was for less than 31 days, the employee must return at the beginning of the next regularly scheduled work period on the first full day after release from service, taking account safe travel home plus an 8 hour rest period. For service of more than 30 days but less than 181 days, the employee must submit an application for restoration within 14 days of release from service. For service of more than 180 days, an application for restoration must be submitted within 90 days of release from service. Failure to return within these time limits does not mean that restoration rights are forfeited; it only means the agency can take whatever disciplinary action it would normally take for unexcused absences. (Under the old law, the length of time an employee had to apply for restoration was determined by the type of military duty performed.)

—Notice requirement. For the first time, the law requires that servicemembers provide advance written or verbal notice to their agencies for all military service. (Under the old law, notice was required only for training duty.)

—Appeal rights have changed. Federal employees and applicants with complaints under the new law may now seek assistance from the Department of Labor's Veterans' Employment and Training Service (VETS). VETS will attempt to informally resolve any disputes with the agency over military duty. If informal resolution fails, Labor will refer the case to the Office of the Special Counsel which is authorized to represent the employee before the Merit Systems Protection Board. Alternatively, an employee may still elect to appeal directly to MSPB and by-pass Labor and the Special Counsel.

—Special placement provisions are mandated for certain returning employees when their former agencies are unable to reemploy them. The new law requires OPM to place in the executive branch the following categories of employees when their former agencies determine that it is "impossible or unreasonable" to reemploy them:

(1) Executive branch employees whose agencies no longer exist and the functions have not been transferred, or it is otherwise impossible or unreasonable to reemploy the person;

(2) Legislative and judicial branch employees;

(3) National Guard technicians; and

(4) Employees of the intelligence agencies.

The interim regulations specify how this will be carried out.

—Status while absent. While on duty with the uniformed services, an employee is considered to be on a leave of absence (leave without pay) unless the employee elects to use other leave.

—Nondiscrimination. USERRA broadens the nondiscrimination provisions of the old law and expressly forbids any discrimination in employment or proportion because of uniformed service.

—Enhanced health and pension plan coverage. Employees performing military duty of more than 30 days may elect to continue their health benefit coverage for up to 18 months. Also under USERRA, to receive retirement credit for military service, employees under the Federal Employees Retirement System (FERS) are required to pay only what they would have paid had they not gone on military duty.

USERRA also expands retirement coverage to include all full-time National Guard duty if that duty interrupts creditable civilian service and is followed by reemployment that occurs after August 1, 1990. (Only National Guard service performed for the U.S. was covered under the old law.)

Under 38 U.S.C. 4316, employee benefits, other than health benefits, continue for employees covered by this Act in the same way as they do for other employees who are on leave without pay. Employees who leave their jobs to enter the uniformed services are considered to be employees on leave without pay so long as they meet the requirements for reemployment under this Act. Under the Federal Employees' Group Life Insurance (FEGLI) Program, employees may continue their life insurance coverage for up to 12 months in nonpay status at no cost to the employee. Therefore, the interim regulations amend 5 CFR 870.502 to show that an employee who separates from Federal service to enter the uniformed services is considered to be an employee in nonpay status for so long as the employee remains eligible for benefits under 38 U.S.C. 4316. As a result, life insurance coverage continues for up to one year for employees who do not separate, but go on military furloughs (nonpay status). For those who actually separate from their Federal jobs to enter the uniformed services, life insurance coverage continues for up to 12 months or until a date that is 90 days after the service with the uniformed services ends, whichever is earlier.

Under 38 U.S.C. 4317, employees who are covered by an employers' group health plan and who enter the uniformed services may elect to continue their coverage for up to 18 months after the date the absence to serve in the uniformed services begins. If the service continues for more than 30 days, the employee can be charged up to 102 percent of the premium. The Federal Employees Health Benefits (FEHB) law provides for continued coverage for up to 12 months for employees in leave without pay status. FEHB regulations provide that these employees may pay their respective shares of the premium; however, an employee may choose to incur a debt and postpone payment until he or she returns to pay and duty status. The employing agency must pay the Government contribution on a current basis. Therefore, for the first 12-months, employees entitled to benefits under 38 U.S.C. 4317 are charged only the employee share of the premium.

The interim regulations amend §§ 890.303 and 890.304 to provide that the enrollment of an employee who enters on military furlough (nonpay status) may continue an additional 6 months after the coverage would otherwise stop due to the expiration of 365 days in nonpay status if the employee's eligibility for benefits under 38 U.S.C. 4317 continues. The enrollment of an employee who separates to enter the uniformed services may continue for up to 18 months if the employee's eligibility for benefits under 38 U.S.C. 4317 continues. (Eligibility for benefits under 38 U.S.C. 4317 ends the earlier of 18 months after the date the employee's absence due to service in the uniformed services began or 90 days after the service ends.) Employees on military furlough or in nonpay status to serve in the uniformed services on the date of enactment of Pub. L. 103–353, October 13, 1994, are also entitled to continued coverage under 38 U.S.C. 4317 for the balance of the 18-month period after their absence to enter the uniformed services began. An enrollment that had already terminated due to the expiration of 365 days in nonpay status may be reinstated for the balance of the 18-month period.

The interim regulations also amend 5 CFR 890.502(g) to provide that employees whose enrollment continues beyond 12 months in nonpay status because of their eligibility for benefits under 38 U.S.C. 4317 must pay 102 percent of the premium (the employee share plus the Government share, plus 2 percent of the total). In addition, the interim regulations amend the provision for waiving the employee share of the health benefits premium for employees who enter the uniformed services in support of Operations Desert Shield and/or Desert Storm by limiting its application to those who enter before the effective date of these interim regulations.

—Enhanced thrift savings plan coverage. The new law allows employees to make up contributions to the thrift savings plan missed because of military duty. Under the old law, employees who went on military duty were ineligible to make contributions to the thrift savings plan. (The Federal Retirement Thrift Investment Board is issuing regulations on this aspect of the law.)

—Effective date. The new law applies to restorations effected on or after December 12, 1994.

Waiver of Notice of Proposed Rulemaking

Pursuant to 5 U.S.C. 553(b)(3)(B), I find that good cause exists for waiving the general notice of proposed rulemaking. Specifically, the law which these regulations implement was enacted in October 1994 and became fully effective as of December 12, 1994.

Regulatory Flexibility Act

I certify that this regulation will not have a significant impact on a substantial number of small entities because it pertains only to Federal employees and agencies.

Director.

Accordingly, OPM is amending parts 353, 870, and 890 as follows:

1. Part 353 is revised to read as follows:

PART 353—RESTORATION TO DUTY FROM UNIFORMED SERVICE OR COMPENSABLE INJURY

Subpart A—General Provisions

Sec.

353.101 Scope.
353.102 Definitions.
353.103 Persons covered.
353.104 Notification of rights and obligations.
353.105 Maintenance of records.
353.106 Personnel actions during employee's absence.
353.107 Service credit upon reemployment.
353.108 Effect of performance and conduct on restoration rights.
353.109 Transfer of function to another agency.
353.110 OPM placement assistance.

Subpart B—Uniformed Service

353.201 Introduction.
353.202 Discrimination and acts of reprisal prohibited.
353.203 Length of service.
353.204 Notice to employer.
353.205 Return to duty and application for reemployment.
353.206 Documentation upon return.
353.207 Position to which restored.
353.208 Use of paid leave during uniformed service.
353.209 Retention protections.
353.210 Department of Labor assistance to applicants and employees.
353.211 Appeal rights.

Subpart C—Compensable Injury

353.301 Restoration rights.
353.302 Retention protections.
353.303 Restoration rights of TAPER employees.
353.304 Appeals to the Merit Systems Protection Board.

Authority: 38 U.S.C. 4301 et. seq., and 5 U.S.C. 8151.

Subpart A—General Provisions

§ 353.101 Scope.

The rights and obligations of employees and agencies in connection with leaves of absence or restoration to duty following uniformed service under 38 U.S.C. 4301 et. seq., and restoration under 5 U.S.C. 8151 for employees who sustain compensable injuries, are subject to the provisions of this part. Subpart A covers those provisions that are common to both of the above groups of employees. Subpart B deals with provisions that apply just to uniformed service and subpart C covers provisions that pertain just to injured employees.

§ 353.102 Definitions.

In this part:

Agency means.

(1) With respect to restoration following a compensable injury, any department, independent establishment, agency, or corporation in the executive branch, including the U.S. Postal Service and the Postal Rate Commission, and any agency in the legislative or judicial branch; and

(2) With respect to uniformed service, an executive agency as defined in 5 U.S.C. 105 (other than an intelligence agency referred to in 5 U.S.C. 2302(a)(2)(C)(ii), including the U.S. Postal Service and Postal Rate Commission, a nonappropriated fund instrumentality of the United States, or a military department as defined in 5 U.S.C. 102. In the case of a National Guard technician employed under 32 U.S.C. 709, the employing agency is the adjutant general of the State in which the technician is employed.

Fully recovered means compensation payments have been terminated on the basis that the employee is able to perform all the duties of the position he or she left or an equivalent one.

Injury means a compensable injury sustained under the provisions of 5 U.S.C. chapter 81, subchapter 1, and includes, in addition to accidental injury, a disease proximately caused by the employment.

Leave of absence means military leave, annual leave, without pay (LWOP), furlough, continuation of pay, or any combination of these.

Military leave means paid leave provided to Reservists and members of the National Guard under 5 U.S.C. 6323.

Notice means any written or verbal notification of an obligation or intention to perform service in the uniformed services provided to an agency by the employee performing the service or by the uniformed service in which the service is to be performed.

Partially recovered means an injured employee, though not ready to resume the full range of his or her regular duties, has recovered sufficiently to return to part-time or light duty or to another position with less demanding physical requirements. Ordinarily, it is expected that a partially recovered employee will fully recover eventually.

Physically disqualified means that:

(1)(i) For medical reasons the employee is unable to perform the duties of the position formerly held or an equivalent one, or

(ii) There is a medical reason to restrict the individual from some or all essential duties because of possible incapacitation (for example, a seizure) or because of risk of health impairment (such as further exposure to a toxic substance for an individual who has already shown the effects of such exposure).

(2) The condition is considered permanent with little likelihood for improvement or recovery.

Reasonable efforts in the case of actions required by an agency for a person returning from uniformed service means actions, including training, that do not place an undue hardship on the agency.

Service in the uniformed services means the performance of duty on a voluntary or involuntary basis in a uniformed service under competent authority and includes active duty, active duty for training, initial active duty for training, inactive duty training, full-time National Guard duty, and a period for which a person is absent from employment for the purpose of examination to determine fitness to perform such duty.

Status means the particular attributes of a specific position. This includes the rank or responsibility of the position, its duties, working conditions, pay, tenure, and seniority.

Undue hardship means actions taken by an agency requiring significant difficulty or expense, when considered in light of—

(1) The nature and cost of actions needed under this part;

(2) The overall financial resources of the facility involved in taking the action; the number of persons employed at the facility; the effect on expenses and resources, or the impact otherwise of the action on the operation of the facility; and

(3) The overall size of the agency with respect to the number of employees, the number, type, and location of its facilities and type of operations, including composition, structure, and functions of the work force.

Uniformed services means the Armed Forces, the Army National Guard and the Air National Guard when engaged in active duty for training, inactive duty training, or full-time National Guard duty, the Commissioned Corps of the Public Health Service, and any other category of persons designated by the President in time of war or emergency.

§ 353.103 Persons covered.

(a) The provisions of this part pertaining to service in the uniformed services cover each agency employee who enters into such service. However, an employee serving under a time-limited appointment completes any unexpired portion of his or her appointment upon return from uniformed service.

(b) The provisions of this part concerning employee injury cover a civil officer or employee in any branch of the Government of the United States, including an officer or employee of an instrumentally wholly owned by the United States, who was separated or furloughed from an appointment without time limitation, or from a temporary appointment pending establishment of a register (TAPER) as a result of a compensable injury; but do not include—

(1) A commissioned officer of the Regular Corps of the Public Health Service;

(2) A commissioned officer of the Reserve Corps of the Public Health Service on active duty; or

(3) A commissioned officer of the National Oceanic and Atmospheric Administration.

§ 353.104 Notification of rights and obligations.

When an agency separates, grants a leave of absence, restores or fails to restore an employee because of uniformed service or compensable injury, it shall notify the employee of his or her rights, obligations, and benefits relating to Government employment, including any appeal and grievance rights. However, regardless of notification, an employee is still required to exercise due diligence in ascertaining his or her rights, and to seek reemployment within the time limits provided by chapter 43 of title 38, United States Code, for restoration after uniformed service, or as soon as he or she is able after a compensable injury.

§ 353.105 Maintenance of records.

Each agency shall identify the position vacated by an employee who is injured or leaves to enter uniformed service. It shall also maintain the necessary records to ensure that all such employees are preserved the rights and benefits granted by law and this part.

§ 353.106 Personnel actions during employee's absence.

(a) An employee absent because of service in the uniformed services is to be carried on leave without pay unless the employee elects to use other leave or freely and knowingly provides written notice of intent not to return to a position of employment with the agency, in which case the employee can be separated. (**Note:** A separation under this provision affects only the employee's seniority while gone; it does not affect his or her restoration rights.)

(b) An employee absent because of compensable injury may be carried on leave without pay or separated unless the employee elects to use sick or annual leave.

(c) Agency promotion plans must provide a mechanism by which employees who are absent because of compensable injury or uniformed service can be considered for promotion.

§ 353.107 Service credit upon reemployment.

Upon reemployment, an employee absent because of uniformed service or compensable injury is generally entitled to be treated as though he or she had never left. This means that a person who is reemployed following uniformed service or full recovery from compensable injury receives credit for the entire period of the absence for purposes of rights and benefits based upon seniority and length of service, including within-grade increases, career tenure, completion of probation, leave rate accrual, and severance pay.

§ 353.108 Effect of performance and conduct on restoration rights.

The laws covered by this part do not permit an agency to circumvent the protections afforded by other laws to employees who face the involuntary loss of their positions. Thus, an employee may not be denied restoration rights because of poor performance or conduct that occurred prior to the employee's departure for compensable injury or uniformed service. However, separation for cause that is substantially unrelated to the injury or to the performance of uniformed service negates restoration rights. Additionally, if during the period of injury or uniformed service the employee's conduct is such that it would disqualify him or her for employment under OPM or agency regulations, restoration rights may be denied.

§ 353.109 Transfer of function to another agency.

If the function of an employee absent because of uniformed service or compensable injury is transferred to another agency, and if the employee would have been transferred with the function under part 351 of this chapter had he or she not been absent, the employee is entitled to be placed in a position in the gaining agency that is equivalent to the one he or she left. It shall also assume the obligation to restore the employee in accordance with law and this part.

§ 353.110 OPM placement assistance.

(a) *Employee returning from uniformed service.* (1) OPM will offer placement in the executive branch to the following categories of employees upon notification by the agency and application by the employee: (Such notification should be sent to the Associate Director for Employment, OPM, 1900 E Street, NW., Washington, DC 20415.)

(i) Executive branch employees (other than an employee of an intelligence agency) when *OPM determines* that:

(A) their agencies no longer exist and the functions have not been transferred, or;

(B) it is otherwise impossible or unreasonable for their former agencies to place them;

(ii) Legislative and judicial branch employees when *their employers* determine that it is impossible or unreasonable to reemploy them;

(iii) National Guard technicians when *the Adjutant General of a State* determines that it is impossible or unreasonable to reemploy them; and

(iv) Employees of the intelligence agencies (defined in 5 U.S.C. 2302(a)(2)(C)(ii)) when *their agencies* determine that it is impossible or unreasonable to reemploy them.

(2) OPM will determine if a vacant position equivalent (in terms of pay, grade, and status) to the one time the individual left exists, for which the individual is qualified, in the commuting area in which he or she was employed immediately before entering the uniformed services. If such a vacancy exists, OPM will order the agency to place the individual. If no such position is available, the individual may elect to be placed in a lesser position in the commuting area, or OPM will attempt to place the individual in an equivalent position in another geographic location determined by OPM. If the individual declines an offer of equivalent employment, he or she has no further restoration rights.

(b) *Employee returning from compensable injury.* OPM will provide placement assistance to an employee with restoration rights in the executive, legislative, or judicial branches who cannot be placed in his or her former agency and who either has competitive status or is eligible to acquire it under 5 U.S.C. 3304(C). If the employee's agency is abolished and its functions are not transferred, or it is not possible for the employee to be restored in his or her former agency, OPM will provide placement assistance by enrolling the employee in OPM's Interagency Placement Program (or its successor) under part 330 of this chapter. This paragraph does not apply to an employee serving under a temporary appointment pending establishment of a register (TAPER).

Subpart B—Uniformed Service

§ 353.201 Introduction.

The Uniformed Services Employment and Reemployment Rights Act of 1994 revised and strengthened the existing Veterans' Reemployment Rights law, made the Department of Labor responsible for investigating employee complaints, required OPM to place certain returning employees in other agencies, established a separate restoration rights program for employees of the intelligence agencies, and altered the appeals rights process. The new law applies to persons exercising restoration rights on or after December 12, 1994.

§ 353.202 Discrimination and acts of reprisal prohibited.

A person who seeks or holds a position in the Executive branch may not be denied hiring, retention in employment, or any other incident or advantage of employment because of any application, membership, or service in the uniformed services. Furthermore, an agency may not take any reprisal against an employee for taking any action to enforce a protection, assist or participate in an investigation, or exercise any right provided for under chapter 43 of title 38, United States Code.

§ 353.203 Length of service.

(a) *Counting service after the effective date of USERRA (12/12/94).* To be entitled to restoration rights under this part, cumulative service in the uniformed services while employed by the Federal Government may not exceed 5 years. However, the 5-year period does not include any service—

(1) That is required beyond 5 years to complete an initial period of obligated service;

(2) During which the individual was unable to obtain orders releasing him or her from service in the uniformed services before expiration of the 5-year period, and such inability was through no fault of the individual;

(3) Performed as required pursuant to 10 U.S.C. 10147, under 32 U.S.C. 502(a) or 503, or to fulfill additional training requirements determined and certified in writing by the Secretary of the military department concerned to be necessary for professional development or for completion of skill training or retraining;

(4) Performed by a member of a uniformed service who is:

(i) Ordered to or retained on active duty under sections 12301(a), 12301(g), 12302, 12304, 12305, or 688 of title 10, United States Code, or under 14 U.S.C. 331, 332, 359, 360, 367, or 712;

(ii) Ordered to or retrained on active duty (other than for training) under any provision of law during a war or during a national emergency declared by the President or the Congress;

(iii) Ordered to active duty (other than for training) in support, as determined by the Secretary of the military department concerned, of an operational mission for which personnel have been ordered to active duty under 10 U.S.C. 12304;

(iv) Ordered to active duty in support, as determined by the Secretary of the military department concerned, of a critical mission or requirement of the uniformed services, or

(iv) Called into Federal service as a member of the National Guard under chapter 15 or under section 12406 of title 10, United States Code.

(b) *Counting service prior to the effective date of USERRA.* In determining the 5-year total that may not be exceeded for purposes of exercising restoration rights, service performed prior to December 12, 1994, is considered only to the extent that it would have counted under the previous law (the Veterans' Reemployment Rights statute). For example, the service of a National Guard technician who entered on an Active Guard Reserve (AGR) tour under section 502(f) of title 32, United States Code, was not counted toward the 4-year time limit under the previous statute because it was specifically considered active duty for training. However, title 32, section 502(f) AGR service is not exempt from the cumulative time limits allowed under USERRA and service after the effective date counts under USERRA rules. Thus, if a technician was on a 32 U.S.C. 502(f) AGR tour on October 13, 1994, (the date USERRA was signed into law), but exercised restoration rights after December 11, 1994, (the date USERRA became fully effective), AGR service prior to December 12 would not count in computing the 5-year total, but all service beginning with that date would count.

(c) *Nature of Reserve service and resolving conflicts.* An employee who is a member of the Reserve or National Guard has a dual obligation—to the military and to his or her employer. Given the nature of the employee's service obligation, some conflict with job demands is often unavoidable and a good-faith effort on the part of both the employee and the agency is needed to minimize conflict and resolve differences. Some accommodation may be necessary by both parties. Most Reserve component members are required, as a minimum, to participate in drills for 2 days each month and in 2 weeks of active duty for training per year. But some members are required to participate in longer or more frequent training tours. USERRA makes it clear that the timing, frequency, duration, and nature of the duty performed is not an issue so long as the employee gave proper notice, and did not exceed the time limits specified. However, to the extent that the employee has influence upon the timing, frequency, or duration of such training or duty, he or she is expected to use that influence to minimize the burden upon the agency. The employee is expected to provide the agency with as much advance notice as possible whenever military duty or training will interfere with civilian work. When a conflict arises between the Reserve duty and the legitimate needs of the employer, the agency may contact appropriate military authorities to express concern. Where the request would require the employee to be absent from work for an extended period, during times of acute need, or when, in light of previous leaves, the requested leave is cumulatively burdensome, the agency may contact the military commander of the employee's military unit to determine if the military duty could be rescheduled or performed by another member. If the military authorities determine that the military duty cannot be rescheduled or cancelled, the agency is required to permit the employee to perform his or her military duty.

(d) *Mobilization authority.* By law, members of the Selected Reserve (a component of the Ready Reserve), can be called up under a presidential order for purposes other than training for as long as 270 days. If the President declares a national emergency, the remainder of the Ready Reserve—the Individual Ready Reserve and the Inactive National Guard—may be called up. The Ready Reserve as a whole is subject to as much as 24 consecutive months of active duty in a national emergency declared by the President.

§ 353.204 Notice to employer.

To be entitled to restoration rights under this part, an employee (or an appropriate officer of the uniformed service in which service is to be performed) must give the employer advance written or verbal notice of the service except that no notice is required if it is precluded by military necessity or, under all relevant circumstances, the giving of notice is otherwise impossible or unreasonable.

§ 353.205 Return to duty and application for reemployment.

Periods allowed for return to duty are based on the length of time the person was performing service in the uniformed services, as follows:

(a) An employee whose uniformed service was for *less than 31 days*, or who was absent for the purpose of an examination to determine fitness for the uniformed services, is required to report back to work not later than the beginning of the first regularly scheduled work day on the first full calendar day following completion of the period of service and the expiration of 8 hours after a period allowing for the safe transportation of the employee from the place of service to the employee's residence, or as soon as possible after the expiration of the 8-hour period if reporting within the above period is impossible or unreasonable through no fault of the employee.

(b) If the service was for *more than 30 but less than 181 days*, the employee must submit an application for reemployment with the agency not later than 14 days after completing the period of service. (If submitting the application is impossible or unreasonable through no fault of the individual, it must be submitted the next full calendar day when it becomes possible to do so.)

(c) If the period of service was for *more than 180 days*, the employee must submit an application for reemployment not later than 90 days after completing the period of service.

(d) An employee who is hospitalized or convalescing from an injury or illness incurred in, or aggravated during uniformed service is required to report for duty at the end of the period that is necessary for the person to recover, based on the length of service as discussed in paragraphs (a), (b), and (c) of this section, except that the period of recovery may not exceed 2 years (extended by the minimum time required to accommodate circumstances beyond the employee's control which make reporting within the period specified impossible or unreasonable).

(e) A person who does not report within the time limits specified does not automatically forfeit restoration rights, but, rather, is subject to whatever policy and disciplinary action the agency would normally apply for a similar absence without authorization.

§ 353.206 Documentation upon return.

Upon request, a returning employee who was absent for more than 30 days, or was hospitalized or convalescing from an injury or illness incurred in or aggravated during the performance of service in the uniformed services, must provide the agency with documentation that establishes the timeliness of the application for reemployment, and length and character of service. If documentation is unavailable, the agency must restore the employee until documentation becomes available.

§ 353.207 Position to which restored.

(a) *Timing*. An employee returning from the uniformed services following an absence of more than 30 days is entitled to be restored as soon as possible after making application, but in no event later than 30 days after receipt of the application by the agency.

(b) *Nondisabled*. If the employee's uniformed service was for less than 91 days, he or she must be employed in the position for which qualified that he or she would have attained if continuously employed. If not qualified for this position after reasonable efforts by the agency to qualify the employee, he or she is entitled to be placed in the position he or she left. For service of 91 days or more, the agency has the option of placing the employee in a position of like seniority, status, and pay. (Note: Upon reemployment, a term employee completes the unexpired portion of his or her original appointment.) If unqualified (for any reason other than disability incurred in or aggravated during service in the uniformed services) after reasonable efforts by the agency to qualify the employee for such position or the position the employee left, he or she must be restored to any other position of lesser status and pay for which qualified, with full seniority.

(c) *Disabled*. An employee with a disability incurred in or aggravated during uniformed service and who, after reasonable efforts by the agency to accommodate the disability, is entitled to be placed in another position for which qualified that will provide the employee with the same seniority, status, and pay, or the nearest approximation consistent with the circumstances in each case. The agency is not required to reemploy a disabled employee if, after making due efforts to accommodate the disability, such reemployment would impose an undue hardship on the agency.

(d) *Two or more persons entitled to restoration in the same position*. If two or more persons are entitled to restoration in the same position, the one who left the position first has the prior right to restoration in that position. The other employee(s) is entitled to be placed in a position as described in paragraphs (b) and (c) of this section.

(e) *Relationship to an entitlement based on veterans' preference*. An employee's right to restoration under this part does not entitle the person to retention, preference, or displacement rights over any person with a superior claim based on veterans' preference.

§ 353.208 Use of paid leave during uniformed service.

An employee performing service with the uniformed services must be 6permitted, upon request, to use any accrued annual leave (or sick leave, if appropriate), or military leave during such service. (Note, however, that under 5 U.S.C. 6323, military leave cannot be used for inactive duty, e.g., drills.)

§ 353.209 Retention protections.

(a) *During uniformed service*. An employee may not be demoted or separated (other than military separation) while performing duty with the uniformed services except for cause. (Reduction in force is not considered "for cause" under this subpart.) He or she is not a "competing employee" under § 351.404 of this chapter. If the employee's position is abolished during such absence, the agency must reassign the employee to another position of like status, and pay.

(b) *Upon reemployment*. Except in the case of an employee under time-limited appointment who finishes out the unexpired portion of his or her appointment upon reemployment, an employee reemployed under this subpart may not be discharged, except for cause—

(1) If the period of uniformed service was more than 180 days, within 1 year; and

(2) If the period of uniformed service was more than 30 days, but less than 181 days, within 6 months.

§ 353.210 Department of Labor assistance to applicants and employees.

USERRA requires the Department of Labor's Veterans' Employment and Training Service (VETS) to provide employment and reemployment assistance to any Federal employee or applicant who requests it. VETS staff will attempt to informally resolve employment disputes brought to them. If informal dispute resolution proves unsuccessful, VETS may ask the Office of the Special Counsel to represent the individual in an appeal before the Merit Systems Protection Board (MSPB).

§ 353.211 Appeal rights.

An individual who believes an agency has not complied with the provisions of law and this part relating to the employment or reemployment of the person by the agency may—

(a) File a complaint with the Department of Labor, as noted in § 353.210, or

(b) Appeal directly to MSPB if the individual chooses not to file a complaint with the Department of Labor, or is informed by either Labor or the Office of the Special Counsel that they will not pursue to the case.

Subpart C—Compensable Injury

§ 353.301 Restoration rights.

(a) *Fully recovered within 1 year*. An employee who fully recovers from a compensable injury within 1 year from the date eligibility for compensation began (or from the time compensable disability recurs if the recurrence begins after the employee resumes regular full-time employment with the United States), is entitled to be restored immediately and unconditionally to his or her former position or an equivalent one. Although these restoration rights are agencywide, the employee's basic entitlement is to the former position or equivalent in the local commuting area the employee left. If a suitable vacancy does not exist, the employee is entitled to displace an employee occupying a continuing position under temporary appointment or tenure group III. If there is no such position in the local commuting area, the agency must offer the employee a position (as described above) in another location. This paragraph also applies when an injured employee accepts a lower-grade position in lieu of separation and subsequently fully recovers. A fully recovered employee is expected to return to work immediately upon the cessation of compensation.

(b) *Fully recovered after 1 year*. An employee who separated because of a compensable injury and whose full recovery takes longer than 1 year from the date eligibility for compensation began (or from the time compensable disability recurs if the recurrence begins after the injured employee resumes regular full-time employment with the United States), is entitled to priority consideration, agencywide, for restoration to the position he or she left or an equivalent one provided he or she applies for reappointment within 30 days of the cessation of compensation. Priority consideration is accorded by entering the individual on the agency's reemployment priority list for the competitive service or reemployment list for the excepted service. If the individual cannot be placed in the former commuting area, he or she is entitled to priority consideration for an equivalent position elsewhere in the agency. (See parts 302 and 330 of this chapter for more information on how this may be accomplished for the excepted and competitive services, respectively.) This subpart also applies when an injured employee accepts a lower-graded position in lieu of separation and subsequently fully recovers.

(c) *Physically disqualified*. An individual who is physically disqualified for the former position or equivalent because of a compensable injury, is entitled to be placed in another position for which qualified that will provide the employee with the same status, and pay, or the nearest approximation thereof, consistent with the circumstances in each case. This right is agencywide and applies for a period of 1 year from the date eligibility for compensation begins. After 1 year, the individual is entitled to the rights accorded individuals who fully or partially recover, as applicable.

(d) *Partially recovered*. Agencies must make every effort to restore in the local commuting area, according to the circumstances in each case, an individual who has partially recovered from a compensable injury and who is able to return to limited duty. At a minimum, this would mean treating these employees substantially the same as other handicapped individuals under the Rehabilitation Act of 1973, as amended. (See 29 U.S.C. 791(b) and 794.) If the individual fully recovers, he or she is entitled to be considered for the position held at the time of injury, or an equivalent one. A partially recovered employee is expected to seek reemployment as soon as he or she is able.

§ 353.302 Retention protections.

An injured employee enjoys no special protection in a reduction in force. Separation by reduction in force or for cause while on compensation means the individual has no restoration rights.

§ 353.303 Restoration rights of TAPER employees.

An employee serving in the competitive service under a temporary appointment pending establishment of a register (TAPER) under § 316.201 of this chapter (other than an employee serving in a position classified above GS–15), is entitled to be restored to the position he or she left or an equivalent one in the same commuting area.

§ 353.304 Appeals to the Merit Systems Protection Board.

(a) Except as provided in paragraphs (b) and (c) of this section, an injured employee or former employee of an agency in the executive branch (including the U.S. Postal Service and the Postal Rate Commission) may appeal to the MSPB an agency's failure to restore, improper restoration, or failure to return an employee following a leave of absence. All appeals must be submitted in accordance with MSPB's regulations.

(b) An individual who fully recovers from a compensable injury more than 1 year after compensation begins may appeal to MSPB as provided for in parts 302 and 330 of this chapter for excepted and competitive service employees, respectively.

(c) An individual who is partially recovered from a compensable injury may appeal to MSPB for a determination of whether the agency is acting arbitrarily and capriciously in denying restoration. Upon reemployment, a partially recovered employee may also appeal the agency's failure to credit time spent on compensation for purposes of rights and benefits based upon length of service.

PART 870—BASIC LIFE INSURANCE

2. The authority citation for part 870 continues to read as follows:

Authority: 5 U.S.C. 8716; section 870.202(c) also issued under 5 U.S.C. 7701(b)(2); subpart J is also issued under section 599C of Pub. L. 101–513, 104 Stat. 2064, as amended.

3. In § 870.501, paragraph (d) is amended by adding a sentence at the end to read as follows:

§ 870.501 Termination and conversion of insurance coverage.

* * * * *

(d) * * * For the purpose of this paragraph, an individual who is entitled to benefits under part 353 of this chapter is considered to be an employee in nonpay status.

* * * * *

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

4. The authority citation for part 890 continues to read as follows:

Authority: 5 U.S.C. 8913; section 890.803 also issued under 50 U.S.C. 403p, 22 U.S.C. 4069c and 4069c–1; subpart L also issued under sec. 599C of Pub. L. 101–513, 104 Stat. 2064, as amended.

5. Section 890.303 is amended by adding a new paragraph (i) to read as follows:

§ 890.303 Contination of enrollment.

* * * * *

(i) Service in the uniformed services. The enrollment of an individual who separates to enter the uniformed services under conditions that entitle him or her to benefits under part 353 of this chapter may continue for the 18-month period beginning on the date that the absence to serve in the uniformed services begins, provided that the individual continues to be entitled to benefits under part 353 of this chapter. The enrollment of an employee who enters on military furlough or is placed in nonpay status to serve in the uniformed services may continue for the 18-month period beginning on the date that the absence to serve in the uniformed services begins, provided that the employee continues to be entitled to benefits under part 353 of this chapter. An employee in nonpay status is entitled to continued coverage under paragraph (e) of this section if the employee's entitlement to benefits under part 353 of this chapter ends before the expiration of 365 days in nonpay status. The enrollment of an employee who is on military furlough or in nonpay status in order to serve in the uniformed services on October 13, 1994, may continue for the 18-month period beginning on the date that the absence to serve in the uniformed services began, provided that the employee continues to be entitled to continued coverage under part 353 of this chapter. If the enrollment of such an employee had terminated due to the expiration of 365 days in nonpay status, it may be reinstated for the remainder of the 18-month period beginning on the date that the absence to serve in the uniformed services began, provided that the employee continues to be entitled to continued coverage under part 353 of this chapter.

6. In § 890.304 paragraph (a)(1) is amended by revising paragraph (a)(1)(vi) and adding two new paragraphs (a)(1)(vii) and (viii) to read as follows:

§ 890.304 Termination of enrollment.

(a) * * *

(1) * * *

(vi) The day he or she is separated, furloughed, or placed on leave of absence to serve in the uniformed services under conditions entitling him or her to benefits under part 353 of this chapter for the purpose of performing duty not limited to 30 days or less, provided the employee elects, in writing to have the enrollment so terminated.

(vii) For an employee who separates to serve in the uniformed services under conditions entitling him or her to benefits under part 353 of this chapter for the purpose of performing duty not limited to 30 days or less, the date that is 18 months after the date that the absence to serve in the uniformed services began or the date entitlement to benefits under part 353 of this chapter ends, whichever is earlier, unless the enrollment is terminated under paragraph (a)(1)(vi) of this section.

(viii) For an employee who is furloughed or placed on leave of absence under conditions entitling him or her to benefits under part 353 of this chapter, the date that is 18 months after the date that the absence to serve in the uniformed services began or the date entitlement to benefits under part 353 of this chapter ends, whichever is earlier, but not earlier than the date the enrollment would otherwise terminate under paragraph (a)(1)(v) of this section.

* * * * *

7. In § 890.305 paragraph (a) is revised to read as follows:

§ 890.305 Reinstatement of enrollment after military service.

(a) The enrollment of an employee or annuitant whose enrollment was terminated under § 890.304(a)(1)(vi), (vii) or (viii) or § 890.304(b)(4)(iii) is automatically reinstated on the day the employee is restored to a civilian position under the provisions of part 353 of this chapter or on the day the annuitant is separated from the uniformed services, as the case may be.

* * * * *

8. In § 890.501 paragraph (e) is revised and two new paragraphs (f) and (g) are added to read as follows:

§ 890.501 Government contributions.

* * * * *

(e) Except as provided in paragraphs (f) and (g) of this section, the employing office must make a contribution for an employee for each pay period during which the enrollment continues.

(f) Temporary employees enrolled under 5 U.S.C. 8906a must pay the full subscription charge including the Government contribution. Employees with provisional appointments under § 316.403 are not considered to be enrolled under 5 U.S.C. 8906a for the purpose of this paragraph.

(g) The Government contribution for an employee who enters the uniformed services and whose enrollment continues under § 890.303(i) ceases after 365 days in nonpay status.

9. In § 890.502 paragraph (g) is revised to read as follows:

§ 890.502 Employee withholdings and contributions.

* * * * *

(g) *Uniformed services.* (1) except as provided in paragraph (g)(2) of this section, an employee whose coverage continues under section 890.303(i) is responsible for payment of the employee share of the cost of enrollment for every pay period for which the enrollment continues for the first 365 days of continued coverage as set forth under paragraph (b) of this section. For coverage that continues after 365 days in nonpay status, the employee must pay, on a current basis, the full subscription charge, including both the employee and Government shares, plus an additional 2 percent of the full subscription charge.

(2) Payment of the employee's share of the cost of enrollment is waived for the first 365 days of continued coverage in the case of an employee whose coverage continues under § 890.303(e) following furlough or placement on leave of absence under the provisions of part 353 of this chapter or under § 890.303(i) if the employee was ordered to active duty before September 1, 1995 under section 672, 673b, 674, 675, or 688 of title 10, United States Code, in support of Operation Desert Storm.

[INS No. 1404–95]

RIN 1115–AC34

Amendment of Filing Deadline for Naturalization for Philippine Veterans of World War II Based Upon Active Duty Service in the United States Armed Forces During Specified Periods of Hostilities

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final Rule.

SUMMARY: This final rule amends the date previously published in the Federal Register as the final date applications must be received by the Service in order to be considered applications for naturalization under section 405 of the Immigration and Naturalization Act of 1990. This rule is necessary to correct an oversight in the calculation of the filing deadline and to ensure that Philippine veterans of World War II who missed the originally published filing deadline are afforded the opportunity for naturalization under this provision.

EFFECTIVE DATE: September 1, 1995.

FOR FURTHER INFORMATION CONTACT: W.R. Tillifson, Adjudications Officer, Adjudications Division, Naturalization and Special Projects Branch, Immigration and Naturalization Service, 425 I Street, NW., room 3214, Washington, DC 20536, telephone 202–514–5014.

SUPPLEMENTARY INFORMATION: Under current regulations, the final date applications had to be received by the Service in order to be considered under section 405 of the Immigration Act of 1990, Public Law No. 101–649, was February 2, 1995. The correct date should have been February 3, 1995. Accordingly, 8 CFR 329.5 is being amended to reflect the correct final date for filing. Philippine veterans of World War II who failed to file applications on February 2, 1995, but filed applications on February 3, 1995, will be considered for naturalization under section 405 of the Immigration Act of 1990.

The Service's immediate implementation of this rule as a final rule is based on the "good cause" exception found at 5 U.S.C. 553(d)(3). This rule simply corrects the filing deadline for section 405 applications thereby benefitting applicants who were denied consideration for failure to apply by the February 2, 1995, deadline.

Regulatory Flexibility Act

The Commissioner of the Immigration and Naturalization Service, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this regulation and by approving it certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule simply corrects the filing deadline for 405 applications thereby benefitting applicants who were denied consideration for failure to apply by the February 2, 1995 deadline. This amendment has no financial impact on applicants eligible under this provision.

Executive Order 12866

This rule is not considered by the Department of Justice, Immigration and Naturalization Service, to be a "significant regulatory action" under Executive Order 12866, section 3(f), Regulatory Planning and Review, and the Office of Management and Budget has waived its review process under section 6(a)(3)(A).

Executive Order 12612

The regulation will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Executive Order 12606

The Commissioner of the Immigration and Naturalization Service certifies that she has assessed this rule in light of the criteria in Executive Order 12606 and has determined that it will not have a significant negative impact on family well-being.

List of Subjects in 8 CFR Part 329

Armed Forces, Citizenship and Naturalization, Veterans.

According, part 329 of chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 329—SPECIAL CLASSES OF PERSONS WHO MAY BE NATURALIZED: NATURALIZATION BASED UPON ACTIVE DUTY SERVICE IN THE UNITED STATES ARMED FORCES DURING SPECIFIED PERIODS OF HOSTILITIES

1. The authority citation for part 329 continues to read as follows:

Authority: 8 U.S.C. 1103, 1440, 1443.

§ 329.5 [Amended]

2. In § 329.5, paragraph (e) is amended by revising the date: "February 2, 1995" to read: "February 3, 1995"

Dated: August 25, 1995.

Doris Meissner,

Commissioner, Immigration and Naturalization Service.

RIN 0693–XX11

Policies and Procedures Governing the Appearance of NIST Employees as Witnesses in Private Litigation

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Final rule.

SUMMARY: The National Institute of Standards (NIST) hereby removes 15 CFR Part 275 which sets forth policies and procedures governing the appearance of NIST employees as witnesses in private litigation. This action is taken in keeping with the goals of the National Performance Review and in order to comply with recent Executive Orders that address regulatory reforms. Part 275 is removed because it is out of date and unnecessary.

The policies and procedures to be followed with respect to the testimony of all Department of Commerce employees regarding official matters, and the production of Department documents in legal proceedings is set forth at 15 CFR Part 15a.

EFFECTIVE DATE: September 1, 1995.

FOR FURTHER INFORMATION CONTACT: Michael Rubin, 301–975–2803.

SUPPLEMENTARY INFORMATION: On March 4, 1995, as part of the President's Regulatory Reform Initiative, the President directed agencies to conduct a page-by-page review of all regulations and eliminate or revise those that are outdated or otherwise in need of reform. After conducting a review of the NIST regulations, it was determined that 15 CFR Part 275 was outdated and should be removed because 15 CFR Part 15a sets forth current Department policies with respect to the testimony of employees regarding official matters, and the production of Department documents in legal proceedings.

BILLING CODE 3510–13–M

FEDERAL TRADE COMMISSION

16 CFR Part 600

Statement of General Policy or Interpretation; Commentary on the Fair Credit Reporting Act

AGENCY: Federal Trade Commission.

ACTION: Final amendment to commentary.

SUMMARY: The Commission is amending its Commentary on the Fair Credit Reporting Act ("FCRA"), 16 CFR part 600, to state that the FCRA does not require the disclosure of "risk scores" to consumers by consumer reporting agencies. This action responds to comments the Commission and its staff received from the public in response to its **Federal Register** publication on June 17, 1994.

EFFECTIVE DATE: September 1, 1995.

ADDRESSES: Federal Trade Commission; Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Clarke Brinckerhoff, Attorney, Division of Credit Practices, Federal Trade Commission, Washington, DC 20580, 202–326–3208.

SUPPLEMENTARY INFORMATION:

Background and Chronology

Section 609(a)(1) of the FCRA requires each credit bureau to disclose to a properly identified consumer "(t)he nature and substance of all information (except medical information) in its files on the consumer at the time of the request" by the consumer for such disclosure. A risk score is a statistical assessment of the data in the consumer's file that a credit bureau can provide to its customer. Credit bureaus did not provide such scores until the late 1980's, and thus they were not contemplated, when the FCRA was enacted in 1970.

On May 4, 1990, the Commission included in the final version of its Commentary on the FCRA (16 CFR part 600) a sentence in Comment 7 to Section 609 that adopted the position taken by an informal August 1988 staff opinion letter that the provision did not require disclosure of risk scores (55 FR 18804, 18822).

On February 11, 1992, the Commission reversed its position by publishing a notice in the **Federal Register** changing the sentence in Comment 7 to state the view that the provision required disclosure of risk scores, effective immediately (57 FR 4935). The Commission based its reversal on (1) Its subsequent investigations, which indicated that some credit report users got only a risk score, and (2) the legislative history of the FCRA, in particular a statement by Representative Leonor Sullivan that credit bureaus should have to disclose information "in any form which would be relayed to a (bureau client) in making a judgment as to the worthiness of the individual's application . . ." 116 Cong. Rec. 36572 (Oct. 12, 1970).

After the Commission amended the FCRA Commentary, several industry representatives requested clarification of the revision. Three principal issues arose concerning the applicability of the FCRA to risk scores: (1) When a consumer reporting agency must disclose a risk score, (2) what score(s) must be disclosed, and (3) what type of explanation of the score must be provided as part of the disclosure.

On June 17, 1994, the Commission published for public comment a proposed revision to the FCRA Commentary addressing these issues (59 FR 31176). The proposal, this time styled as an additional Comment 12 to Section 609, maintained the position set forth by the Commission in its February 1992 revision that risk score disclosure was required; it specified that the score needed to be computed and reported only as of the date of the consumer's disclosure request, that disclosure was required regardless of whether a credit bureau or a creditor created (or owned) the scoring system used to calculate the numerical score, and that only a brief explanation was required. In addition, it posed a number of questions on which it requested public comment.

Eighty parties responded with written submissions for Commission consideration. On the industry side, the record includes extensive comments filed by or on behalf of credit bureaus that supply risk scores, creditors who purchase and use such scores, and the companies that prepare scoring systems that they use to produce them. Consumer interests were represented by a consortium of state Attorney General offices and a major national consumer advocacy group, among others.

Summary of Comments and Final Interpretation

The industry commenters argued strongly that section 609 does not literally require the disclosure of risk scores. They contended that a credit bureau's risk score is not "information * * * in its files * * * at the time of the request" but rather is a system of analyzing that information for the credit bureau's client. For a fee, the credit bureau applies a statistical "model" to the information in its files and (generally combined with a full credit report) provides the resulting number ("score") to its client. The score does not exist in the file until that function is performed, and is not retained by the credit bureau after it is provided to the bureau's client.

The industry commenters also argued that the disclosure of risk scores would be costly to the credit-granting and credit-reporting industries, and further contended that the benefits to the public were uncertain and (if they existed at all) far outweighed by the costs. Finally, they noted that consumers already have access to information much more significant than a numerical score—the underlying information in the credit file (under Section 609) and a statement of the reasons why any user rejected their credit applications (under the Equal Credit Opportunity Act ("ECOA") and its implementing Regulation B).

The consumer representatives emphasized the quote from Rep. Sullivan on which the Commission had relied in its February 1992 opinion. They pressed the view that it is only fair for consumers to have risk scores if credit bureau users are receiving them, and contended that consumers should not be deprived of disclosure of risk scores simply because credit bureaus do not retain them.

Based on the comments, the Commission has decided to reinstate its original position that Section 609 does not require a credit bureau to disclose risk scores because they are not "information . . . in its files on the consumer at the time of the request" by the consumer for file disclosure. Section 603(g) defines the term "file" to mean "all of the information on (the) consumer *recorded and retained* by a consumer reporting agency regardless of how the information is stored." (Emphasis added). In analyzing the application of Section 609 to a risk score, the Commission has considered the process involved in generating a risk score. The comments indicate that a risk score is not "recorded and retained" by the credit bureau; rather it is produced when the bureau applies the scoring model to the actual data in the consumer's credit history and provides the resulting numerical score to its client who pays to have that function performed by the bureau. In addition to not being in the credit bureau "files", the score does not even exist "at the time of the request."

List of Subjects in 16 CFR Part 600

Credit, Trade practices.

For the reasons set out in the preamble, the Commission amends Title 16, Chapter I, Part 600 of the Code of Federal Regulations as follows:

PART 600—STATEMENT OF GENERAL POLICY OR INTERPRETATIONS

1. The authority citation for Part 600 continues to read as follows:

Authority: 15 U.S.C. 1681s and 16 CFR 1.73.

2. In the appendix to Part 600, the Commission amends Section 609 by revising comment 7 and adding a new comment 12, to read as follows:

Appendix—Commentary on the Fair Credit Reporting Act

* * * * *

Section 609—Disclosures to Consumers

* * * * *

7. Ancillary Information.

A consumer reporting agency is not required to disclose information consisting of an audit trail of changes it makes in the consumer's file, billing records, or the contents of a consumer relations folder, if the information is not from consumer reports and will not be used in preparing future consumer reports. Such data is not included in the term "information in the files" which must be disclosed to the consumer pursuant to this section. A consumer reporting agency must disclose claims report information only if it has appeared in consumer reports.

* * * * *

12. Risk Scores.

A consumer reporting agency is not required to disclose a risk score (or other numerical evaluation, however named) that is provided to the agency's client (based on an analysis of data on the consumer) but not retained by the agency. Such a score is not information "in (the agency's) files at the time of the request" by the consumer for file disclosure.

* * * * *

By direction of the Commission.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

24 CFR Parts 882, 887, 982, and 983

[Docket No. FR–2294–N–03]

RIN 2577–AB14

Section 8 Certificate and Voucher Programs Conforming Rule; Announcement of Effective Date and OMB Approval Number

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Announcement of effective date and OMB approval number to final rule.

SUMMARY: On July 3, 1995 (60 FR 34660), the Department published in the **Federal Register**, a final rule that combined and conformed rules for tenant-based rental assistance under the rental certificate and the rental voucher programs. The rule also amended requirements for project-based assistance under the rental certificate program.

The effective date section of that rule indicated that before the rule could become effective, the information collections contained in the rule must be reviewed and approved by the Office of Management and Budget (OMB), as required under the Paperwork Reduction Act of 1980. Since OMB has completed this process, the purpose of this document is to announce the effective date of the final rule, and also to announce the OMB approval number.

EFFECTIVE DATE: October 2, 1995.

FOR FURTHER INFORMATION CONTACT: Madeline Hastings, Director, Rental Assistance Division, Room 4204, Telephone numbers (202) 708–2841 (voice); (202) 708–0850 (TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: On February 24, 1993 (58 FR 11292), HUD published a comprehensive proposed rule to combine and conform the rules for tenant-based Section 8 rental assistance under the certificate and voucher programs. The matrix, contained in the preamble of that proposed rule (60 FR 11318), identified information collection requirements in §§ 982.53, 982.102, 982.151, 982.302, 982.305, 982.404, and 982.406.

The July 3, 1995 final rule contained additional information requirements from those mentioned above in §§ 982.52, 982.54, 982.153, 982.155, 982.156, 982.157, 982.158, 982.159, 982.160, 982.206, 982.301, 982.303, 982.304, 982.307, 982.310, 982.352, 982.403, 982.452, 982.455, 982.551, 982.552, 982.554, 982.555, 983.3, 983.12, 983.51, 983.52, 983.54, 983.55, 983.57, 983.103, 983.104, 983.151, 983.202, 983.203, 983.205, and 983.207.

A proposed information collection notice published simultaneously in the **Federal Register** on July 3, 1995 (60 FR 34729), with the final rule identified the numbers of the Forms to be used for submission of information to the Department.

This document announces the effective date of the July 3, 1995 final rule, and announces the approval number received from the Office of Management and Budget for these programs.

List of Subjects

24 CFR Part 882

Grant programs—housing and community development, Homeless, Lead poisoning, Manufactured homes, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 887

Grant programs—housing and community development, Rent subsidies, Reporting and recording requirements.

24 CFR Part 982

Grant programs—housing and community development, Housing, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 983

Grant programs—housing and community development, Rent subsidies, Reporting and recordkeeping requirements.

Accordingly, and under the Secretary's authority of 42 U.S.C. 3535(d), the final rule, "Section 8 Certificate and Voucher Programs Conforming Rule", published July 3, 1995 (60 FR 34660) that amended 24 CFR Parts 882, 887, 982, and 983, is effective October 2, 1995. 24 CFR Parts 982 and 983 are further amended by adding the OMB approval number, as follows:

PART 982—SECTION 8 TENANT-BASED ASSISTANCE: UNIFIED RULE FOR TENANT-BASED ASSISTANCE UNDER THE SECTION 8 RENTAL CERTIFICATE PROGRAM AND THE SECTION 8 RENTAL VOUCHER PROGRAM

1. The authority citation for part 982 continues to read as follows:

Authority: 42 U.S.C. 1437f and 3535(d).

§§ 982.52–982.54, 982.102, 982.151, 982.153, 982.155–982.160, 982.206, 982.301–982.305, 982.307, 982.310, 982.352, 982.403–982.404, 982.406, 982.452, 982.455, 982.551–982.552, 982.554–982.555 [Amended]

2. Sections 982.52, 982.53, 982.54, 982.102, 982.151, 982.153, 982.155, 982,156, 982.157, 982.158, 982.159, 982.160, 982.206, 982.301, 982.302, 982.303, 982.304, 982.305, 982.307, 982.310, 982.352, 982.403, 982.404, 982.406, 982.452, 982.455, 982.551, 982.552, 982.554, and 982.555 are amended by adding at the end of each section the phrase, "(Approved by the Office of Management and Budget under control number 2577–0169)".

PART 983—SECTION 8 PROJECT-BASED CERTIFICATE PROGRAM

3. The authority citation for part 983 continues to read as follows:

Authority: 42 U.S.C. 1437f and 3535(d).

§§ 983.3, 983.12, 983.51–983.52, 983.54–983.55, 983.57, 983.103–983.104, 983.151, 983.202–983.203, 983.205, 983.207 [Amended]

4. Sections 983.3, 983.12, 983.51, 983.52, 983.54, 983.55, 983.57, 983.103, 983.104, 983.151, 983.202, 983.203, 983.205, and 983.207 are amended by adding at the end of each section the phrase, "(Approved by the Office of Management and Budget under control number 2577–0169)".

Dated: August 28, 1995.

Joseph Shuldiner,

Assistant Secretary for the Office of Public and Indian Housing.

BILLING CODE 4210–33–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 8617]

RIN 1545–AS58; 1545–AT13

Accuracy-Related Penalty

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations implementing changes to the accuracy-related penalty under section 6662 of the Internal Revenue Code of 1986 that were made by section 13251 of the Omnibus Budget Reconciliation Act of 1993 (OBRA 1993) and Title VII of the Uruguay Round Agreements Act, implementing the Uruguay Round of the General Agreement on Tariffs and Trade

(the GATT Act). The final regulations also provide guidance as to when a taxpayer may rely upon the advice of others as evidence of reasonable cause and good faith within the meaning of section 6664(c) for purposes of avoiding the accuracy-related penalty of section 6662, and as to what constitutes reasonable cause and good faith within the meaning of section 6664(c) as applicable to the substantial understatement penalty of section 6662(b)(2) with respect to tax shelter items of a corporation. These regulations affect taxpayers subject to the accuracy-related penalty.

EFFECTIVE DATE: These regulations are effective September 1, 1995.

FOR FURTHER INFORMATION CONTACT: Rochelle L. Hodes, (202) 622- 6232 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

As part of OBRA 1993, Congress made certain changes to the accuracy-related penalty. These changes eliminated the disclosure exception for the negligence penalty (section 6662(b)(1) of the Internal Revenue Code (Code)) and raised the disclosure standard for purposes of the penalties for disregard of rules or regulations (section 6662(b)(1) of the Code) and substantial understatement of income tax (section 6662(b)(2) of the Code) from "not frivolous" to "reasonable basis."

On March 17, 1994, temporary regulations (TD 8533) reflecting changes to the accuracy-related penalty made by OBRA 1993 were published in the **Federal Register** (59 FR 12547). A notice of proposed rulemaking (IA–78–93) relating to the temporary regulations was published in the **Federal Register** for the same day (59 FR 12563). On March 30, 1994, a correction to the temporary regulations was published in the **Federal Register** (59 FR 14749) clarifying language in § 1.6662–7T(a)(2) of the temporary regulations. The same day a correction to the notice of proposed rulemaking was published in the **Federal Register** (59 FR 14810) correcting "RIN 1545–AS58" to read "RIN 1545–AS62" and other administrative matters and clarifying language in §§ 1.6662–2(d)(2) and 1.6662–7(a)(2) of the proposed regulations.

Section 744 of the GATT Act made further changes to the accuracy-related penalty. For corporate taxpayers, the GATT Act amended section 6662(d) of the Code to eliminate the exception to the substantial understatement penalty regarding tax shelter items for which the taxpayer had substantial authority and reasonably believed that its treatment was more likely than not the proper treatment. The legislative history of the GATT Act states that "the standards applicable to corporate tax shelters are tightened" and "in no instance [will] this modification result in a penalty not being imposed where a penalty would have been imposed under prior law." S. Rep. No. 412, 103d Cong., 2d Sess. 165 (1994); H.R. Rep. No. 826, 103d Cong., 2d Sess. 198–99 (1994).

On January 4, 1995, a notice of proposed rulemaking (IA–55–94) was published in the **Federal Register** (60 FR 406) implementing the changes made by the GATT Act and providing guidance with regard to reliance upon the advice of others as evidence of reasonable cause and good faith within the meaning of section 6664(c) of the Code for purposes of avoiding the accuracy-related penalty of section 6662, and what constitutes reasonable cause and good faith within the meaning of section 6664(c) as it applies to the substantial understatement penalty of section 6662(b)(2) with respect to tax shelter items of a corporation.

Written comments responding to these notices were received. A public hearing on the notices regarding changes made by OBRA 1993 was held on July 12, 1994. A public hearing on the notice regarding changes made by the GATT Act was held on April 28, 1995. After consideration of all the comments, the proposed regulations under sections 6662 and 6664 of the Code are adopted as revised by this Treasury decision.

Explanation of Provisions

Reasonable Basis Standard for Disclosure

With respect to the reasonable basis standard, the final regulations adopt the proposed regulations without substantive change. The regulations provide that the reasonable basis standard is "significantly higher than the not frivolous standard applicable to preparers under section 6694." In the preamble to the proposed regulations, Treasury requested comments on any additional guidance as to the reasonable basis standard for purposes of the negligence, disregard of rules or regulations, and substantial understatement penalties. Several commentators recommended adopting as the definition of reasonable basis the description that existed in § 1.6662–4(d)(2) of the regulations prior to amendment by these final regulations. Other commentators recommended equating the reasonable basis standard with the negligence standard and the realistic possibility of success standard, taking into account the relative knowledge and experience of the taxpayer. The IRS and Treasury are continuing to consider these comments in connection with a separate project to publish a notice of proposed rulemaking providing further guidance as to the reasonable basis standard. Treasury and the IRS invite additional comments and suggestions regarding this project.

Reliance on Tax Advisor

Under sections 6662 and 6664, and applicable regulations, a taxpayer's good faith reliance on the advice (including an opinion) of a professional tax advisor will generally be taken into account for purposes of determining whether the taxpayer will be subject to an accuracy-related penalty. See, e.g., §§ 1.6662–4(g)(4)(ii) and 1.6664–4(b). The proposed regulations clarify when a taxpayer may be considered to have reasonably relied in good faith upon advice (including an opinion provided by a professional tax advisor), for purposes of sections 6662 and 6664. In general, § 1.6664–4(c) of the proposed regulations requires advice to be based on all material facts (including, for example, the taxpayer's purposes for entering into a transaction) and to relate applicable law to such facts in reaching its conclusion. The advice must not be based upon unreasonable factual or legal assumptions (including assumptions as to future events), nor unreasonably rely on the representations, findings or agreements of the taxpayer or any other person. The proposed regulations also indicate that reliance may not be reasonable or in good faith if the taxpayer knew, or should have known, that the advisor lacked knowledge in the relevant aspects of Federal tax law.

Several commentators recommended changes to these provisions of the proposed regulations. For example, one commentator suggested eliminating language in § 1.6664–4(c)(1) of the proposed regulations that reliance on advice may not be reasonable and in good faith if the taxpayer knew, or should have known, that the advisor lacked knowledge in the relevant aspects of Federal tax law.

The final regulations do not adopt this suggestion. In requiring that reliance on advice must be reasonable in light of all of the facts and circumstances, the final regulations do not depart from prior law. In most situations it will generally be reasonable for a taxpayer to conclude that an attorney, an accountant, or an enrolled agent is qualified to give advice on Federal tax law.

Another commentator suggested eliminating the requirements that advice must be based on all material facts and reasonable factual and legal assumptions. The commentator stated that taxpayers are not in a position to determine what facts are material, particularly in complex transactions, nor are they in a position to determine whether the advisor based the opinion on material facts and reasonable factual and legal assumptions. An additional commentator requested guidance to distinguish the term *pertinent* as it is used throughout the regulations and the term *material* as it is used in § 1.6664–4(c) of the proposed regulations.

In response to these comments, and in order to resolve confusion, the final regulations provide that advice must be based upon all pertinent facts and circumstances and the law as it relates to those facts and circumstances. As used in this context, pertinent is intended to have the same meaning as it has in § 1.6662–4(g)(4)(ii), which provides that a taxpayer may satisfy the reasonable belief requirement of section 6662(d)(2)(C)(i) through reliance on an advisor's analysis of pertinent facts and authorities. To clarify that separate rules apply to taxpayers and advisors, the final regulations have also been revised to include a cross-reference to the preparer penalties under §§ 1.6694–1 through 1.6694–3 and Circular 230 (contained in 31 CFR part 10).

Another commentator recommended eliminating, or in the alternative revising and clarifying, the requirement that advice take into account the taxpayer's purposes for entering into a transaction or structuring a transaction in a particular manner. The final regulations do not adopt this recommendation. It is appropriate to consider a taxpayer's reasons for structuring a transaction in a particular manner in determining whether the taxpayer acted in good faith in its tax return treatment of items from the transaction.

Reasonable Cause for Tax Shelter Items of a Corporation

The proposed regulations provide that a corporation's legal justification may be taken into account, as appropriate, in establishing that the corporation acted with reasonable cause and in good faith in its treatment of a tax shelter item only if there is substantial authority for the treatment of the item and the corporation reasonably believes in good faith that such treatment is more likely than not the proper treatment. Under the proposed regulations, satisfaction of the substantial authority and reasonable belief criteria is an important factor to be considered in determining whether the taxpayer acted with reasonable cause and in good faith, but is not necessarily dispositive. The proposed regulations also provide that facts and circumstances other than a corporation's legal justification may be taken into account, as appropriate, in determining whether it acted with reasonable cause and in good faith, regardless of whether the substantial authority and reasonable belief requirements are satisfied.

One commentator urged removal of the special reasonable cause standard for corporate-tax shelter items under the proposed regulations. According to the commentator, there is no authority in section 6664 or its legislative history for a reasonable cause standard for tax shelter items of corporate taxpayers that differs from the standard for noncorporate taxpayers.

Other commentators recommended revising the legal justification test for determining reasonable cause. Particularly, these commentators recommended removing the objective requirement that substantial authority be present for the taxpayer's position (the authority requirement). Alternatively, one commentator suggested making the legal justification test a "safe harbor." Under this alternative, a taxpayer that satisfies the authority requirement and the belief requirement under proposed § 1.6664–4(e)(2) would be treated as having acted with reasonable cause and in good faith.

The final regulations do not adopt these suggestions. Treasury and the IRS continue to believe that the regulations, including the authority requirement, properly implement the statute and Congressional intent.

Satisfaction of the minimum requirements under the legal justification test is an important factor to be considered in determining whether a corporate taxpayer acted with reasonable cause and in good faith, but is not necessarily dispositive. For example, depending on the circumstances, satisfaction of the minimum requirements may not be dispositive if the taxpayer's participation in the tax shelter lacked significant business purpose, if the taxpayer claimed tax benefits that are unreasonable in comparison to the taxpayer's investment in the tax shelter, or if the taxpayer agreed with the organizer or promoter of the tax shelter that the taxpayer would protect the confidentiality of the tax aspects of the structure of the tax shelter. In addition, a taxpayer that does not satisfy the authority requirement may nonetheless demonstrate that it acted with reasonable cause and in good faith based on facts and circumstances unrelated to its legal justification (the other factors test).

Although several commentators requested additional guidance with regard to the other factors test, they provided no examples of factors (other than factors related to legal justification) that they would like to be included in the final regulations. The suggested factors were not adopted because legal justification is not relevant to the other factors test. While the final regulations do not provide additional guidance in this area, Treasury and the IRS continue to welcome comments on the issue.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notices of proposed rulemaking preceding these regulations were submitted to the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal authors of these regulations are Rochelle L. Hodes, Office of Assistant Chief Counsel (Income Tax and Accounting), and David Meyer formerly of that office. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.6662–0 is amended by:

1. Revising the introductory language.
2. Revising the entry for § 1.6662–2(d) and adding entries for (d) (1), (2), and (3).

3. Revising the entries for §§ 1.6662–3(b)(3) and 1.6662–4(g).

4. Adding an entry for § 1.6662–7.

5. Removing the entry for § 1.6662–7T.

The additions and revisions read as follows:

§ 1.6662–0 Table of contents.

This section lists the captions that appear in §§ 1.6662–1 through 1.6662–7.

* * * * *

§ 1.6662–2 Accuracy related penalty.

* * * * *

(d) Effective dates.
(1) Returns due before January 1, 1994.
(2) Returns due after December 31, 1993.
(3) Special rules for tax shelter items.

* * * * *

§ 1.6662–3 Negligence or disregard of rules or regulations.

* * * * *

(b) * * *
(3) Reasonable basis.
(i) In general [Reserved].
(ii) Relationship to other standards.

* * * * *

§ 1.6662–4 Substantial understatement of income tax.

* * * * *

(g) Items relating to tax shelters.
(1) In general.
(i) Noncorporate taxpayers.
(ii) Corporate taxpayers.
(A) In general.
(B) Special rule for transactions occurring prior to December 9, 1994.
(iii) Disclosure irrelevant.
(iv) Cross-reference.
(2) Tax shelter.
(i) In general.
(ii) Principal purpose.
(3) Tax shelter item.
(4) Reasonable belief.
(i) In general.
(ii) Facts and circumstances; reliance on professional tax advisor.
(5) Pass-through entities.

* * * * *

§ 1.6662–7 Omnibus Budget Reconciliation Act of 1993 changes to the accuracy-related penalty.

(a) Scope.
(b) No disclosure exception for negligence penalty.
(c) Disclosure standard for other penalties is reasonable basis.
(d) Definition of reasonable basis.
(1) In general [Reserved].
(2) Relationship to other standards.

Par. 3. In § 1.6662–1, the second and third sentences of the concluding text are revised to read as follows:

§ 1.6662–1 Overview of the accuracy-related penalty.

* * * * *

* * * The penalties for disregard of rules or regulations and for a substantial understatement of income tax may be avoided by adequately disclosing certain information as provided in § 1.6662–3(c) and §§ 1.6662–4(e) and (f), respectively. The penalties for negligence and for a substantial (or gross) valuation misstatement under chapter 1 may not be avoided by disclosure. * * *

Par. 4. Section 1.6662–2 is amended by:

1. Revising the heading of paragraph (d), redesignating the text of paragraph (d) following the heading as paragraph (d)(1), adding a new heading for newly designated paragraph (d)(1), and revising the first and second sentences of newly redesignated paragraph (d)(1).

2. Adding new paragraphs (d)(2) and (3).

The additions and revisions read as follows:

§ 1.6662–2 Accuracy-related penalty.

* * * * *

(d) *Effective dates*—(1) *Returns due before January 1, 1994.* Section 1.6662–3(c) and §§ 1.6662–4 (e) and (f) (relating to methods of making adequate disclosure) (as contained in 26 CFR part 1 revised April 1, 1995) apply to returns the due date of which (determined without regard to extensions of time for filing) is after December 31, 1991, but before January 1, 1994. Except as provided in the preceding sentence and in paragraphs (d)(2) and (3) of this section, §§ 1.6662–1 through 1.6662–5 apply to returns the due date of which (determined without regard to extensions of time for filing) is after December 31, 1989, but before January 1, 1994. * * *

(2) *Returns due after December 31, 1993.* Except as provided in paragraph (d)(3) and the last sentence of this paragraph (d)(2), the provisions of §§ 1.6662–1 through 1.6662–4 and § 1.6662–7 (as revised to reflect the changes made to the accuracy-related penalty by the Omnibus Budget Reconciliation Act of 1993) and of § 1.6662–5 apply to returns the due date of which (determined without regard to extensions of time for filing) is after December 31, 1993. These changes include raising the disclosure standard for the penalties for disregarding rules or regulations and for a substantial understatement of income tax from not frivolous to reasonable basis, eliminating the disclosure exception for the negligence penalty, and providing guidance on the meaning of reasonable basis. The Omnibus Budget Reconciliation Act of 1993 changes relating to the penalties for negligence or disregard of rules or regulations will not apply to returns (including qualified amended returns) that are filed on or before March 14, 1994, but the provisions of §§ 1.6662–1 through 1.6662–3 (as contained in 26 CFR part 1 revised April 1, 1995) relating to those penalties will apply to such returns.

(3) *Special rules for tax shelter items.* Sections 1.6662–4(g)(1) and 1.6662–4(g)(4) apply to returns the due date of which (determined without regard to extensions of time for filing) is after September 1, 1995. Except as provided in the last sentence of this paragraph (d)(3), §§ 1.6662–4(g)(1) and 1.6662–4(g)(4) (as contained in 26 CFR part 1 revised April 1, 1995) apply to returns the due date of which (determined without regard to extensions of time for filing) is on or before September 1, 1995 and after December 31, 1989. For transactions occurring after December 8, 1994, §§ 1.6662–4(g)(1) and 1.6662–4(g)(2) (as contained in 26 CFR part 1 revised April 1, 1995) are applied taking into account the changes made to section 6662(d)(2)(C) (relating to the substantial understatement penalty for tax shelter items of corporations) by section 744 of Title VII of the Uruguay Round Agreements Act, Pub. L. 103–465 (108 Stat. 4809).

Par. 5. Section 1.6662–3 is amended by:

1. Revising the second sentence of paragraph (a).

2. Revising paragraph (b)(3).

3. Revising paragraphs (c)(1) and (2).

The revisions read as follows:

§ 1.6662–3 Negligence or disregard of rules or regulations.

(a) * * * The penalty for disregarding rules or regulations does not apply, however, if the requirements of § 1.6662–3(c)(1) are satisfied and the position in question is adequately disclosed as provided in § 1.6662–3(c)(2), or to the extent that the reasonable cause and good faith exception to this penalty set forth in § 1.6664–4 applies. * * *

(b) * * *

(3) *Reasonable basis*—(i) *In general.* [Reserved].

(ii) *Relationship to other standards.* The reasonable basis standard is significantly higher than the not frivolous standard applicable to preparers under section 6694 and defined in § 1.6694–2(c)(2).

(c) * * * (1) *In general.* No penalty under section 6662(b)(1) may be imposed on any portion of an underpayment that is attributable to a position contrary to a rule or regulation if the position is disclosed in accordance with the rules of paragraph (c)(2) of this section and, in case of a position contrary to a regulation, the

position represents a good faith challenge to the validity of the regulation. This disclosure exception does not apply, however, in the case of a position that does not have a reasonable basis or where the taxpayer fails to keep adequate books and records or to substantiate items properly.

(2) *Method of disclosure.* Disclosure is adequate for purposes of the penalty for disregarding rules or regulations if made in accordance with the provisions of §§ 1.6662–4(f)(1), (3), (4), and (5), which permit disclosure on a properly completed and filed Form 8275 or 8275–R, as appropriate. In addition, the statutory or regulatory provision or ruling in question must be adequately identified on the Form 8275 or 8275–R, as appropriate. The provisions of § 1.6662–4(f)(2), which permit disclosure in accordance with an annual revenue procedure for purposes of the substantial understatement penalty, do not apply for purposes of this section.

* * * * *

Par. 6. Section 1.6662–4 is amended by:

1. Removing the third sentence in paragraph (d)(2).

2. Revising paragraph (e)(2).

3. Revising paragraphs (g)(1), (g)(4), and (g)(5).

The revisions read as follows:

§ 1.6662–4 Substantial understatement of income tax.

* * * * *

(e) * * *

(2) *Circumstances where disclosure will not have an effect.* The rules of paragraph (e)(1) of this section do not apply where the item or position on the return—

(i) Does not have a reasonable basis (as defined in § 1.6662–3(b)(3));

(ii) Is attributable to a tax shelter (as defined in section 6662(d)(2)(C)(iii) and paragraph (g)(2) of this section); or

(iii) Is not properly substantiated, or the taxpayer failed to keep adequate books and records with respect to the item or position.

* * * * *

(g) *Items relating to tax shelters*—(1) *In general*—(i) *Noncorporate taxpayers.* Tax shelter items (as defined in paragraph (g)(3) of this section) of a taxpayer other than a corporation are treated for purposes of this section as if such items were shown properly on the return for a taxable year in computing the amount of tax shown on the return, and thus the tax attributable to such items is not included in the understatement for the year, if—

(A) There is substantial authority (as provided in paragraph (d) of this section) for the tax treatment of that item; and

(B) The taxpayer reasonably believed at the time the return was filed that the tax treatment of that item was more likely than not the proper treatment.

(ii) *Corporate taxpayers*—(A) *In general.* Except as provided in paragraph (g)(1)(ii)(B) of this section, all tax shelter items (as defined in paragraph (g)(3) of this section) of a corporation are taken into account in computing the amount of any understatement.

(B) *Special rule for transactions occurring prior to December 9, 1994.* The tax shelter items of a corporation arising in connection with transactions occurring prior to December 9, 1994 are treated for purposes of this section as if such items were shown properly on the return if the requirements of paragraph (g)(1)(i) are satisfied with respect to such items.

(iii) *Disclosure irrelevant.* Disclosure made with respect to a tax shelter item of either a corporate or noncorporate taxpayer does not affect the amount of an understatement.

(iv) *Cross-reference.* See § 1.6664–4(e) for certain rules regarding the availability of the reasonable cause and good faith exception to the substantial understatement penalty with respect to tax shelter items of corporations.

* * * * *

(4) *Reasonable belief*—(i) *In general.* For purposes of section 6662(d) and paragraph (g)(1)(i)(B) of this section (pertaining to tax shelter items of noncorporate taxpayers), a taxpayer is considered reasonably to believe that the tax treatment of an item is more likely than not the proper tax treatment if (without taking into account the possibility that a return will not be audited, that an issue will not be raised on audit, or that an issue will be settled)—

(A) The taxpayer analyzes the pertinent facts and authorities in the manner described in paragraph (d)(3)(ii) of this section, and in reliance upon that analysis, reasonably concludes in good faith that there is a greater than 50-percent likelihood that the tax treatment of the item will be upheld if challenged by the Internal Revenue Service; or

(B) The taxpayer reasonably relies in good faith on the opinion of a professional tax advisor, if the opinion is based on the tax advisor's analysis of the pertinent facts and authorities in the manner described in paragraph (d)(3)(ii) of this section and unambiguously states that the tax advisor concludes that there is a greater than 50-percent likelihood that the tax treatment of the item will be upheld if challenged by the Internal Revenue Service.

(ii) *Facts and circumstances; reliance on professional tax advisor.* All facts and circumstances must be taken into account in determining whether a taxpayer satisfies the requirements of paragraph (g)(4)(i) of this section. However, in no event will a taxpayer be considered to have reasonably relied in good faith on the opinion of a professional tax advisor for purposes of paragraph (g)(4)(i)(B) of this section unless the requirements of § 1.6664–4(c)(1) are met. The fact that the requirements of § 1.6664–4(c)(1) are satisfied will not necessarily establish that the taxpayer reasonably relied on the opinion in good faith. For example, reliance may not be reasonable or in good faith if the taxpayer knew, or should have known, that the advisor lacked knowledge in the relevant aspects of Federal tax law.

(5) *Pass-through entities.* In the case of tax shelter items attributable to a pass-through entity, the actions described in paragraphs (g)(4)(i)(A) and (B) of this section, if taken by the entity, are deemed to have been taken by the taxpayer and are considered in determining whether the taxpayer reasonably believed that the tax treatment of an item was more likely than not the proper tax treatment.

Par. 7. Section 1.6662–7 is added to read as follows:

§ 1.6662–7 Omnibus Budget Reconciliation Act of 1993 changes to the accuracy-related penalty.

(a) *Scope.* The Omnibus Budget Reconciliation Act of 1993 made certain changes to the accuracy-related penalty in section 6662. This section provides rules reflecting those changes.

(b) *No disclosure exception for negligence penalty.* The penalty for negligence in section 6662(b)(1) may not be avoided by disclosure of a return position.

(c) *Disclosure standard for other penalties is reasonable basis.* The penalties for disregarding rules or regulations in section 6662(b)(1) and for a substantial understatement of income tax in section 6662(b)(2) may be avoided by adequate disclosure of a return position only if the position has at least a reasonable basis. See § 1.6662–3(c) and §§ 1.6662–4(e) and (f) for other applicable disclosure rules.

(d) *Definition of reasonable basis*—(1) *In general.* [Reserved].

(2) *Relationship to other standards.* The reasonable basis standard is significantly higher than the not frivolous standard applicable to

preparers under section 6694 and defined in § 1.6694–2(c)(2).

§ 1.6662–7T [Removed]

Par. 8. Section 1.6662–7T is removed.

Par. 9. Section 1.6664–0 is amended by revising the entries for §§ 1.6664–1(b) and 1.6664–4 to read as follows:

§ 1.6664–0 Table of contents.

* * * * *

§ 1.6664–1 Accuracy-related and fraud penalties; definitions and special rules.

* * * * *

(b) Effective date.
(1) In general.
(2) Reasonable cause and good faith exception to section 6662 penalties.

* * * * *

§ 1.6664–4 Reasonable cause and good faith exception to section 6662 penalties.

(a) In general.
(b) Facts and circumstances taken into account.
(1) In general.
(2) Examples.
(c) Reliance on opinion or advice.
(1) Fact and circumstances; minimum requirements.
(i) All facts and circumstances considered.
(ii) No unreasonable assumptions.
(iii) Law is related to actual facts.
(2) Definitions.
(i) Advice.
(ii) Material.
(3) Cross-reference.
(d) Pass-through items.
(e) Special rules for substantial understatement penalty attributable to tax shelter items of corporations.
(1) In general; facts and circumstances.
(2) Reasonable cause based on legal justification.
(i) Minimum requirements.
(A) Authority requirement.
(B) Belief requirement.
(ii) Legal justification defined.
(3) Minimum requirements not dispositive.
(4) Other factors.
(f) Transactions between persons described in section 482 and net section 482 transfer price adjustments. [Reserved]
(g) Valuation misstatements of charitable deduction property.
(1) In general.
(2) Definitions.
(i) Charitable deduction property.
(ii) Qualified appraisal.
(iii) Qualified appraiser.

* * * * *

Par. 10. Section 1.6664–1 is amended by revising paragraph (b) to read as follows:

§ 1.6664–1 Accuracy-related and fraud penalties; definitions and special rules.

* * * * *

(b) *Effective date*—(1) *In general.* Sections 1.6664–1 through 1.6664–3 apply to returns the due date of which (determined without regard to extensions of time for filing) is after December 31, 1989.

(2) *Reasonable cause and good faith exception to section 6662 penalties.* Section 1.6664–4 applies to returns the due date of which (determined without regard to extensions of time for filing) is after September 1, 1995. Except as provided in the last sentence of this paragraph (b)(2), § 1.6664–4 (as contained in 26 CFR part 1 revised April 1, 1995) applies to returns the due date of which (determined without regard to extensions of time for filing) is on or before September 1, 1995 and after December 31, 1989. For transactions occurring after December 8, 1994, § 1.6664–4 (as contained in 26 CFR part 1 revised April 1, 1995) is applied taking into account the changes made to section 6662(d)(2)(C) (relating to the substantial understatement penalty for tax shelter items of corporations) by section 744 of Title VII of the Uruguay Round Agreements Act, Pub. L. 103–465 (108 Stat. 4809).

Par. 11. Section 1.6664–4 is amended by:

1. Revising the last sentence of paragraph (a).
2. Revising paragraph (b)(1).
3. Revising the introductory language of paragraph (b)(2) and *Example 1.*
4. Redesignating paragraphs (c), (d), and (e) as paragraphs (d), (f), and (g), respectively.
5. Revising newly designated paragraph (d).
6. Adding new paragraphs (c) and (e).

The additions and revisions read as follows:

§ 1.6664–4 Reasonable cause and good faith exception to section 6662 penalties.

(a) * * * Rules for determining whether the reasonable cause and good faith exception applies are set forth in paragraphs (b) through (g) of this section.

(b) *Facts and circumstances taken into account*—(1) *In general.* The determination of whether a taxpayer acted with reasonable cause and in good faith is made on a case-by-case basis, taking into account all pertinent facts and circumstances. (See paragraph (e) of this section for certain rules relating to a substantial understatement penalty attributable to tax shelter items of corporations.) Generally, the most important factor is the extent of the taxpayer's effort to assess the taxpayer's proper tax liability. Circumstances that may indicate reasonable cause and good faith include an honest misunderstanding of fact or law that is reasonable in light of all of the facts and circumstances, including the experience, knowledge, and education of the taxpayer. An isolated computational or transcriptional error generally is not inconsistent with reasonable cause and good faith. Reliance on an information return or on the advice of a professional tax advisor or an appraiser does not necessarily demonstrate reasonable cause and good faith. Similarly, reasonable cause and good faith is not necessarily indicated by reliance on facts that, unknown to the taxpayer, are incorrect. Reliance on an information return, professional advice, or other facts, however, constitutes reasonable cause and good faith if, under all the circumstances, such reliance was reasonable and the taxpayer acted in good faith. (See paragraph (c) of this section for certain rules relating to reliance on the advice of others.) For example, reliance on erroneous information (such as an error relating to the cost or adjusted basis of property, the date property was placed in service, or the amount of opening or closing inventory) inadvertently included in data compiled by the various divisions of a multidivisional corporation or in financial books and records prepared by those divisions generally indicates reasonable cause and good faith, provided the corporation employed internal controls and procedures, reasonable under the circumstances, that were designed to identify such factual errors. Reasonable cause and good faith ordinarily is not indicated by the mere fact that there is an appraisal of the value of property. Other factors to consider include the methodology and assumptions underlying the appraisal, the appraised value, the relationship between appraised value and purchase price, the circumstances under which the appraisal was obtained, and the appraiser's relationship to the taxpayer or to the activity in which the property is used. (See paragraph (g) of this section for certain rules relating to appraisals for charitable deduction property.) A taxpayer's reliance on erroneous information reported on a Form W–2, Form 1099, or other information return indicates reasonable cause and good faith, provided the taxpayer did not know or have reason to know that the information was incorrect. Generally, a taxpayer knows, or has reason to know, that the information on an information return is incorrect if such information is inconsistent with other information reported or otherwise furnished to the taxpayer, or with the taxpayer's knowledge of the transaction. This knowledge includes, for example, the taxpayer's knowledge of the terms of his employment relationship or of the rate of return on a payor's obligation.

(2) *Examples.* The following examples illustrate this paragraph (b). They do not involve tax shelter items. (See paragraph (e) of this section for certain rules relating to the substantial understatement penalty attributable to the tax shelter items of corporations.)

Example 1. A, an individual calendar year taxpayer, engages B, a professional tax advisor, to give A advice concerning the deductibility of certain state and local taxes. A provides B with full details concerning the taxes at issue. B advises A that the taxes are fully deductible. A, in preparing his own tax return, claims a deduction for the taxes. Absent other facts, and assuming the facts and circumstances surrounding B's advice and A's reliance on such advice satisfy the requirements of paragraph (c) of this section, A is considered to have demonstrated good faith by seeking the advice of a professional tax advisor, and to have shown reasonable cause for any underpayment attributable to the deduction claimed for the taxes. However, if A had sought advice from someone that A knew, or should have known, lacked knowledge in the relevant aspects of Federal tax law, or if other facts demonstrate that A failed to act reasonably or in good faith, A would not be considered to have shown reasonable cause or to have acted in good faith.

* * * * *

(c) *Reliance on opinion or advice*—(1) *Facts and circumstances; minimum requirements.* All facts and circumstances must be taken into account in determining whether a taxpayer has reasonably relied in good faith on advice (including the opinion of a professional tax advisor) as to the treatment of the taxpayer (or any entity, plan, or arrangement) under Federal tax law. However, in no event will a taxpayer be considered to have reasonably relied in good faith on advice unless the requirements of this paragraph (c)(1) are satisfied. The fact that these requirements are satisfied will not necessarily establish that the taxpayer reasonably relied on the advice (including the opinion of a professional tax advisor) in good faith. For example, reliance may not be reasonable or in good faith if the taxpayer knew, or should have known, that the advisor lacked knowledge in the relevant aspects of Federal tax law.

(i) *All facts and circumstances considered.* The advice must be based upon all pertinent facts and circumstances and the law as it relates to those facts and circumstances. For example, the advice must take into account the taxpayer's purposes (and the relative weight of such purposes) for entering into a transaction and for structuring a transaction in a particular manner. In addition, the requirements of this paragraph (c)(1) are not satisfied if the taxpayer fails to disclose a fact that it knows, or should know, to be relevant to the proper tax treatment of an item.

(ii) *No unreasonable assumptions.* The advice must not be based on unreasonable factual or legal assumptions (including assumptions as to future events) and must not unreasonably rely on the representations, statements, findings, or agreements of the taxpayer or any other person. For example, the advice must not be based upon a representation or assumption which the taxpayer knows, or has reason to know, is unlikely to be true, such as an inaccurate representation or assumption as to the taxpayer's purposes for entering into a transaction or for structuring a transaction in a particular manner.

(2) *Advice defined.* Advice is any communication, including the opinion of a professional tax advisor, setting forth the analysis or conclusion of a person, other than the taxpayer, provided to (or for the benefit of) the taxpayer and on which the taxpayer relies, directly or indirectly, with respect to the imposition of the section 6662 accuracy-related penalty. Advice does not have to be in any particular form.

(3) *Cross-reference.* For rules applicable to advisors, see e.g., §§ 1.6694–1 through 1.6694–3 (regarding preparer penalties), 31 CFR 10.22 (regarding diligence as to accuracy), 31 CFR 10.33 (regarding tax shelter opinions), and 31 CFR 10.34 (regarding standards for advising with respect to tax return positions and for preparing or signing returns).

(d) *Pass-through items.* The determination of whether a taxpayer acted with reasonable cause and in good faith with respect to an underpayment that is related to an item reflected on the return of a pass-through entity is made on the basis of all pertinent facts and circumstances, including the taxpayer's own actions, as well as the actions of the pass-through entity.

(e) *Special rules for substantial understatement penalty attributable to tax shelter items of corporations*—(1) *In general; facts and circumstances.* The determination of whether a corporation acted with reasonable cause and in good faith in its treatment of a tax shelter item (as defined in § 1.6662–4(g)(3)) is based on all pertinent facts and circumstances. Paragraphs (e)(2), (3), and (4) of this section set forth rules that apply, in the case of a penalty attributable to a substantial understatement of income tax (within the meaning of section 6662(d)), in determining whether a corporation acted with reasonable cause and in good faith with respect to a tax shelter item.

(2) *Reasonable cause based on legal justification*—(i) *Minimum requirements.* A corporation's legal justification (as defined in paragraph (e)(2)(ii) of this section) may be taken into account, as appropriate, in establishing that the corporation acted with reasonable cause [illegible] in good faith in its treatment [illegible] shelter item only if the authority requirement of paragraph (e)(2)(i)(A) of this section and the belief requirement of paragraph (e)(2)(i)(B) of this section are satisfied (the minimum requirements). Thus, a failure to satisfy the minimum requirements will preclude a finding of reasonable cause and good faith based (in whole or in part) on the corporation's legal justification.

(A) *Authority requirement.* The authority requirement is satisfied only if there is substantial authority (within the meaning of § 1.6662–4(d)) for the tax treatment of the item.

(B) *Belief requirement.* The belief requirement is satisfied only if, based on all facts and circumstances, the corporation reasonably believed, at the time the return was filed, that the tax treatment of the item was more likely than not the proper treatment. For purposes of the preceding sentence, a corporation is considered reasonably to believe that the tax treatment of an item is more likely than not the proper tax treatment if (without taking into account the possibility that a return will not be audited, that an issue will not be raised on audit, or that an issue will be settled)—

(*1*) The corporation analyzes the pertinent facts and authorities in the manner described in § 1.6662–4(d)(3)(ii), and in reliance upon that analysis, reasonably concludes in good faith that there is a greater than 50-percent likelihood that the tax treatment of the item will be upheld if challenged by the Internal Revenue Service; or

(*2*) The corporation reasonably relies in good faith on the opinion of a professional tax advisor, if the opinion is based on the tax advisor's analysis of the pertinent facts and authorities in the manner described in § 1.6662–4(d)(3)(ii) and unambiguously states that the tax advisor concludes that there is a greater than 50-percent likelihood that the tax treatment of the item will be upheld if challenged by the Internal Revenue Service. (For this purpose, the requirements of paragraph (c) of this section must be met with respect to the opinion of a professional tax advisor.)

(ii) *Legal justification defined.* For purposes of this paragraph (e), *legal justification* includes any justification relating to the treatment or characterization under the Federal tax law of the tax shelter item or of the entity, plan, or arrangement that gave rise to the item. Thus, a taxpayer's belief (whether independently formed or based on the advice of others) as to the merits of the taxpayer's underlying position is a legal justification.

(3) *Minimum requirements not dispositive.* Satisfaction of the minimum requirements of paragraph (e)(2) of this section is an important factor to be considered in determining whether a corporate taxpayer acted with reasonable cause and in good faith, but is not necessarily dispositive. For example, depending on the circumstances, satisfaction of the minimum requirements may not be dispositive if the taxpayer's participation in the tax shelter lacked significant business purpose, if the taxpayer claimed tax benefits that are unreasonable in comparison to the taxpayer's investment in the tax shelter, or if the taxpayer agreed with the organizer or promoter of the tax shelter that the taxpayer would protect the confidentiality of the tax aspects of the structure of the tax shelter.

(4) *Other factors.* Facts and circumstances other than a corporation's legal justification may be taken into account, as appropriate, in determining whether the corporation acted with reasonable cause and in good faith with respect to a tax shelter item regardless of whether the minimum requirements of paragraph (e)(2) of this section are satisfied.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD07 95–028]

RIN 2115–AE46

Special Local Regulations; City of Miami Beach, FL

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: Special local regulations are being adopted for the Miami Offshore Grand Prix. The event will be held on September 3, 1995 from 11 a.m. EDT (Eastern Daylight Time) until 3 p.m. EDT. The regulations are needed to provide for the safety of life on navigable waters during the event.

EFFECTIVE DATE: These regulations become effective on September 3, 1995 at 10:30 a.m. EDT and terminate at 3:30 p.m. EDT that day. In the event of inclement weather, an alternate rain date of September 4, 1995 is established with these same times.

ADDRESSES: The Environmental Assessment and Finding of No Significant Impact for this rulemaking are available for inspection and copying at Coast Guard Group Miami, 100 MacArthur Causeway, Miami Beach, Florida.

FOR FURTHER INFORMATION CONTACT: LTJG B. E. Dailey, Coast Guard Group Miami, Florida at (305) 535–4492.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. § 553, a notice of proposed rulemaking has not been published for these regulations. Following normal rulemaking procedures would have been impracticable, as there was not sufficient time remaining to publish proposed rules in advance of the event or to provide for a delayed effective date.

Drafting Information

The drafters of these regulations are LTJG Bryan E. Dailey, Project Officer, USCG Group Miami, and LT Jacqueline Losego, Project Attorney, Seventh Coast Guard District Legal Office.

Discussion of Regulations

Offshore Power Boat Racing Association, is sponsoring a high speed power boat race with approximately sixty-five (65) race boats, ranging in length from 24 to 50 feet, participating in the event. There will be approximately two hundred (200) spectator craft. The proposed race course includes Government Cut, Miami, Florida, and the Atlantic Ocean offshore Miami Beach, Florida. The race boats will be competing at high speeds with numerous spectator craft in the area, creating an extra or unusual hazard in the navigable waterways.

Regulatory Evaluation

This regulation is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has been exempted from review by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this proposal to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. Entry into the regulated area is prohibited for only 5 hours on the day of the event.

Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard has considered the environmental impact of this action consistent with Section 2.B. of Commandant Instruction M16475.1B. In accordance with that section, this action has been environmentally assessed (EA completed), and the Coast Guard has determined that it will not significantly affect the quality of the human environment. An environmental assessment and finding of no significant impact has been prepared and are available for inspection and copying from LTJG B. Dailey, Coast Guard Group Miami, Florida, (305) 535–4492. As a condition to the permit, the applicant is required to educate the event participants regarding the possible presence of manatees and the appropriate precautions to take if the animals are sighted

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

Regulations

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended as follows:

1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233, 49 CFR 1.46 and 33 CFR 100.35.

2. A temporary section 100.35–T07–028 is added to read as follows:

§ 100.35–T07–028 City of Miami Beach, FL.

(a) *Regulated Area:*

(1) The regulated area begins from that portion of Miami Main Channel at approximate position 25°45′57″ N, 080°08′42″ W, thence to the southern entrance to the Miami Beach Marina

and approximate position 25°46′10″ N, 080°08′28″ W, thence south east along the shore to the Western end of Bar Cut to lighted buoy 10 (Light list number 9395) approximate position 25°45′39″ N, 080°07′29″ W, thence Westward along the Government Cut North Jetty to shore and the shoreline to approximate position 25°48′13″ N, 080°07′06″ W, thence east approximately 2.4 nautical miles to approximate position 25°48.13′ N, 080°05′51″ W, thence south to approximate position 25°45′05″ N, 080°06′45″ W, thence west bearing 295° true to Fisher Island. The regulated area then follows the shoreline of Fisher Island North and West to approximate position 25°45′51″ N, 080°08′42″ W, thence back to the starting point.

(2) In the Event that sea conditions make it unsafe for the race course to transit through Government Cut, an alternate regulated area has been established by a line joining the following points: 25°46′50″ N, 080°07′60″ W; thence to 25°46′50″ N, 080°07′80″ W; thence to, 25°49′20″ N, 080°06′80″ W; thence to 25°51′10″ N, 080°06′70″; thence to 25°51′00″ N, 080°07′10″ W; thence to along the shoreline to the starting point.

(b) *Special local regulations:*

(1) Entry into the regulated area by other than authorized parade participants or official patrol vessels is prohibited, unless otherwise authorized by the Patrol Commander. At the completion of scheduled races and departure of participants from the regulated area, traffic may resume normal operations. At the discretion of the Patrol Commander, between scheduled racing events, traffic may be permitted to resume normal operations.

(2) The regulated area will be enforced by a regatta patrol. The Coast Guard Patrol Commander will be monitoring VHF-FM channels 16 and 22A. Guide boats will be stationed along the parade route to mark the major course changes.

(3) A succession of not fewer than 5 short whistle or horn blasts from a patrol vessel will be the signal for any and all vessels to take immediate steps to avoid collision. The display of an orange distress smoke signal from a patrol vessel will be the signal for any and all vessels to stop immediately.

(4) Spectators are required to maintain a safe distance from the race course at all times, including 300 yards from those portions of the course where the participants will be engaging in high speed turns, and 100 yards to the Eastern side of the Atlantic Ocean portion of the course. Spectators shall maintain 100 yards distance on either side of participating vessels along the race route in Bar and Government Cuts as described in paragraph (a)(1).

(c) *Effective dates:* This section becomes effective on September 3, 1995 at 10:30 a.m. EDT and terminates on 3:30 p.m. EDT that day. In the event of inclement weather, an alternate rain date of September 4, 1995 is established with these same times.

Dated: August 10, 1995.

Roger T. Rufe, Jr.,

Rear Admiral, U.S. Coast Guard Commander, Seventh Coast Guard District.

33 CFR Part 165

[CGD09–95–009]

RIN 2115–AA97

Safety Zone; Lake Erie, in the Vicinity of Euclid, OH

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone on Lake Erie with a one quarter mile radius centered on 41–47.6′ N, 081–36.1′ W. This safety zone is needed in the warmer summer months to prevent recreational and commercial divers from tampering with the exposed valves on the sunken tank barge Cleveco. Such tampering may lead to the release of oil in quantities that may be harmful to the environment, as the Cleveco contains approximately 165,000 gallons of oil. In addition, the Coast Guard is making preparations to remove the oil from the tank barge this summer. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port.

EFFECTIVE DATES: This regulation becomes effective at 12 noon EST on May 29, 1995, and terminates at 12 noon EST on October 1, 1995, unless terminated earlier by the Coast Guard Captain of the Port, Cleveland, Ohio.

FOR FURTHER INFORMATION CONTACT: Lieutenant Eric M. King, Chief, Port Operations, Coast Guard Marine Safety Office Cleveland, 1055 East Ninth Street, Cleveland, OH 44114, (216) 522–4405.

SUPPLEMENTARY INFORMATION:.

Background and Purpose

On July 14, 1994, the Army Corps of Engineers and the Coast Guard located the tank barge Cleveco, sunk nine miles offshore from Euclid, Ohio in Lake Erie. The tank barge rests keel up in 70 feet of water and contains approximately 165,000 gallons of oil. On July 16, 1994 a safety zone was established for 180 days to prevent unauthorized personnel from conducting underwater activities on or around the Cleveco, and from impeding the preliminary salvage activities of the Coast Guard and those under their supervision (59 FR 44317; August 29, 1994). Now that the waters of Lake Erie are again warming, establishment of the safety zone is again required for the same reasons. Additionally, the Coast Guard will supervise the removal of oil from the Cleveco this summer. Commercial underwater salvage equipment will be utilized to remove the oil from the barge, requiring heavy equipment and diving apparatus to support below-surface operations. Therefore, persons and vessels will be prohibited from transiting this area.

Persons or vessels requiring entry into or passage through the safety zone must first request authorization from the Captain of the Port or one of his designated representatives. The designated representatives of the Captain of the Port are the senior Coast Guard commissioned, warrant, or petty officer on the vessel enforcing the safety zone, and the Command Duty Officer at Marine Safety Office Cleveland, Ohio. The senior officer on the vessel enforcing the safety zone can be contacted on VHF–FM Channel 16. The Captain of the Port, Cleveland, and the Command Duty Officer at Marine Safety Office Cleveland can be contacted at telephone number (216) 522–4405.

In accordance with 5 U.S.C. 553, a notice of proposed rulemaking was not published for this regulation and good cause exists for making it effective less than 30 days after **Federal Register** publication. There were no comments received for the July 16, 1994 safety zone covering the same geographic location. Publication of a notice of proposed rulemaking and delay in the effective date would be contrary to the public interest because the safety zone is necessary to prevent possible loss of life, injury, or damage to property or the environment. In the event that unauthorized recreational or commercial divers tamper with the barge and its associated valves, a major oil release could occur, threatening lives and the environment.

Drafting Information

The drafters of this regulation are Lieutenant Eric M. King, project officer, Chief, Port Operations, Marine Safety Office Cleveland, Ohio, Commander M. Eric Reeves, program staff officer, Chief, Marine Port and Environmental Safety Branch, Ninth Coast Guard District, and

Lieutenant Karen E. Lloyd, project attorney, Ninth Coast Guard District Legal Office.

Regulatory Evaluation

This regulation is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of the proposal to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

Collection of Information

This rule contains no information collection requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this rule under the principles and criteria contained in Executive Order 12612 and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this rule and concluded that, under section 2.B.2 of Commandant Instruction M16475.1B, this rule is categorically excluded from further environmental documentation.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirement, Security measures, Waterways.

For the reasons set out in the preamble, the Coast Guard amends 33 CFR Part 165 as follows:

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; and 49 CFR 1.46.

2. A new temporary section § 165.T09–009 is added to read as follows:

§ 165.T09–009 Safety Zone; Lake Erie, In the Vicinity of Euclid, OH.

(a) *Location.* The following area is a safety zone: one quarter mile radius centered on 41–47.6N, 081–36.1W, covering the surface waters of Lake Erie down to the lake's bottom. (CNAD 83)

(b) *Effective dates.* This section becomes effective at 12 noon EST on May 29, 1995, and terminates at 12 noon EST on October 1, 1995 unless terminated earlier by the Coast Guard Captain of the Port.

(c) *Regulations.* In accordance with the general regulations in § 165.23 of this part, entry into this zone is prohibited unless authorized by the Coast Guard Captain of the Port or his designated representative. The senior officer on the vessel enforcing the safety zone can be contacted on VHF–FM Channel 16. The Captain of the Port, Cleveland, and the Command Duty Officer at Marine Safety Office Cleveland can be contacted at telephone number (216) 522–4405.

Dated: May 12, 1995.

J.J. Davin, Jr.,

Commander, U.S. Coast Guard, Captain of the Port Cleveland.

33 CFR Part 165

[CGD01–95–137]

RIN 2115–AA97

Safety Zone; City of Gloucester Fireworks, Gloucester, MA

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone in Gloucester Harbor, Gloucester, MA, on September 2, 1995, from 8:30 p.m. until 10:30 p.m., in the vicinity of Pavilion Beach, Western Harbor. This zone is needed to protect the marine community from hazards associated with fireworks displays. Entry of vessels or persons into the zone is prohibited unless authorized by the Captain of the Port (COTP) Boston.

EFFECTIVE DATE: This regulation becomes effective at 8:30 p.m. on September 2, 1995, and terminates at 10:30 p.m. on September 2, 1995, or when the fireworks display is completed, unless extended or terminated sooner by the COTP Boston.

FOR FURTHER INFORMATION CONTACT: LT Gary Croot or MKC Larry Toler, Waterways Management Division, Coast Guard Captain of the Port Boston, 455 Commercial Street, Boston, MA 02109–1045, (617) 223–3000.

SUPPLEMENTARY INFORMATION:

Drafting Information

The drafters of this notice are LT Gary Croot, Waterways Management Division, Coast Guard Captain of the Port Boston, and LCDR S.R. Watkins, project attorney, First Coast Guard District Legal Office.

Regulatory History

As authorized by 5 U.S.C. 553, a notice of proposed rulemaking (NPRM) was not published for this regulation. Good cause exists for not publishing an NPRM and for making this regulation effective in less than 30 days after **Federal Register** publication. Due to the late date the application was received, there was not sufficient time to publish a proposed rule or a final rule 30 days in advance of the event. The delay to be encountered if normal rulemaking procedures were followed would effectively cancel the event. Cancellation of this event is contrary to the public interest since the fireworks display is in celebration of the Gloucester Boat Light Parade.

Background and Purpose

The Gloucester Fireworks Fund requested a fireworks display be permitted in Gloucester Harbor on September 2, 1995 to celebrate the Gloucester Boat Light Parade. The Captain of the Port (COTP) Boston is implementing this safety zone to protect mariners and the viewing public from the inherent hazards associated with a fireworks display in Gloucester Harbor. The fireworks display is scheduled to take place on September 2, 1995 from 9:15 p.m. to 10 p.m. in an area bound by a line drawn from a point west of the mouth of the Blynman Canal in position 42°–36′–33″N, 070°–040′–30″W, thence southeast to lighted buoy 11 in position 42°–36′–20″N, 070°–39′–52″W. The line then continues southward to Ten Pound Island Light in position 42°–36′–08″N, 070°–39′–56″W, then west to a point in position 42°–36′–08″N, 070°–40′–21″W. From this position the line continues northwest to the eastern most point of Stage Head Park at 42°–36′–18″N, 070°–40′–31″W, then northward along the shoreline to the starting position. The zone will be in effect from 8:30 p.m. September 2, 1995 until 10:30 p.m., September 2, 1995 unless extended or sooner terminated by the COTP Boston.

A Coast Guard Station Gloucester patrol craft and Gloucester Harbor Police craft will be on scene to enforce the safety zone. A Safety Marine Information Broadcast will be conducted prior to and during the event.

Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has been exempted from review by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this regulation to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. This is because the event is of limited duration, will be conducted at a late hour, and extensive public advisories will be made well in advance of the event.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this temporary final rule will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632).

For the reasons addressed under the Regulatory Evaluation above, the Coast Guard expects the impact of this regulation to be minimal and certifies under 5 U.S.C. 605(b) that this temporary final rule will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This rule contains no information collection requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this rulemaking under the principles and criteria contained in Executive Order 12612 and has determined that this temporary final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this rule and concluded that, under section 2.B.2. of Commandant Instruction M16475.1B, this rule is categorically excluded from further environmental documentation. An Environmental Checklist and Categorical Exclusion Determination are available for inspection in the docket.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons set out in the preamble, the Coast Guard amends 33 CFR Part 165 as follows:

PART 165—[AMENDED]

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; 49 CFR 1.46.

2. A temporary section, § 165.T01–137, is added to read as follows:

§ 165.T01–137 Safety Zone: City of Gloucester fireworks. Gloucester, MA.

(a) *Location.* The following area is a safety zone: All waters of Gloucester Harbor within the area bounded by a line drawn from a point west of the mouth of the Blynman Canal in position 42° – 36′ – 33″N, 070° – 40′ – 30″W, thence southeast to lighted bouy 11 in position 42° – 36′ – 20″N, 070° – 39′ – 52″W. The line then continues southward to Ten Pound Island Light in position 42° – 36′ – 08″N, 070° – 39′ – 56″W, then west to position 42° – 36′ – 08″N, 070° – 40′ – 21″W. From this position the line continues northwest to the eastern most point of Stage Head Park at 42° – 36′ – 18″N, 070° – 40′ – 31″W, then northward along the shoreline to the starting position.

(b) *Effective date.* This section is effective at 8:30 p.m. on September 2, 1995. It terminates at 10:30 p.m. on September 2, 1995, unless extended or terminated sooner by the Captain of the Port Boston.

(c) *Regulations.* In accordance with the general regulations in section 165.23 of this part, entry into or movement within this zone is prohibited except as authorized by the Captain of the Port Boston.

Dated: August 22, 1995.

D.M. Maguire,

Captain, U.S. Coast Guard, Captain of the Port, Boston, Massachusetts.

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[AD–FRL–5289–9]

Clean Air Act Final Interim Approval of Operating Permits Program and Approval of Delegation of Section 112(l); State of Iowa

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final interim approval.

SUMMARY: The EPA is promulgating interim approval of the Operating Permits Program submitted by Iowa for the purpose of complying with Federal requirements for an approvable state program to issue operating permits to all major stationary sources, and to certain other sources. EPA is also approving, under section 112(l), the state's program for accepting delegation of section 112 standards.

EFFECTIVE DATE: This rule will become effective on October 2, 1995.

ADDRESSES: Copies of the state's submittal and other supporting information used in developing the final interim approval are available for inspection during normal business hours at the following location: USEPA Region VII, 726 Minnesota Avenue, Kansas City, Kansas, 66101.

FOR FURTHER INFORMATION CONTACT: Christopher D. Hess at (913) 551–7213.

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

Title V of the 1990 Clean Air Act Amendments (sections 501–507 of the Clean Air Act ("the Act")), and implementing regulations at 40 Code of Federal Regulations (CFR) part 70 require that states develop and submit operating permits programs to EPA by November 15, 1993, and that EPA act to approve or disapprove each program within one year after receiving the submittal. The EPA's program review occurs pursuant to section 502 of the Act and the part 70 regulations, which together outline criteria for approval or disapproval.

Where a program substantially, but not fully, meets the requirements of section 502 and part 70, EPA may grant the program interim approval for a period of up to two years. 40 CFR 70.4(d)(3) sets forth the minimum requirements a state program must meet in order to be eligible for interim approval. The 11 minimum requirements include: (1) Adequate fees, (2) applicable requirements, (3) fixed term permits, (4) public participation,

(5) EPA and affected state review, (6) no permit issuance if objection by EPA, (7) basic enforcement authority, (8) operational flexiblity, (9) streamlined procedures for issuing and revising permits and for determining completeness of applications, (10) adequate permit application requirements, and (11) alternative operating scenarios. If EPA has not fully approved a program by two years after the November 15, 1993, date, or by the end of an interim program, it must establish and implement a Federal program.

On April 26, 1995, EPA proposed interim approval of the operating permits program for Iowa (see 60 FR 20465–20469). The EPA received no public comments on the proposal. In this notice, the EPA is taking final action to grant interim approval of the operating permits program for Iowa.

II. Final Action and Implications

A. Analysis of State Submission

In proposing interim approval of the Iowa program, the EPA determined that the state met the minimum requirements for interim approval outlined in 40 CFR 70.4(d)(3)(i)–(xi). In order to receive full approval, the EPA outlined specific requirements in 60 FR 20465–69 that the state must meet.

These requirements included:

1. Four specific rule revisions, as well as corrections to the acid rain regulations. The state adopted all required rule revisions and corrections on May 15, 1995, and submitted them to the EPA in a letter dated June 23, 1995. The rule revision and correction requirements therefore have been met.

2. Finalizing the operating permit fee and submission of a revised fee demonstration as necessary. In section II.A.2.a. of the April 26, 1995, notice of proposed interim approval, the EPA noted the state only collected half of its operating permit fee of $24 until it could be determined if the full amount was necessary to implement the program.

On March 20, 1995, the state elected to collect the full amount of $24 and submitted documentation of this action to the EPA on May 26, 1995. Since the EPA previously determined the adequacy of a $24 operating permit fee, this requirement has been met.

3. Hiring the originally forecasted amount of personnel to implement the Title V program or submission of a revised workload analysis that adequately describes how the program may be successfully implemented with fewer personnel.

Although the state has hired additional personnel for the purpose of implementing Title V since the April 26, 1995, **Federal Register** notice, the state has not met the original personnel forecast, nor has it submitted a revised workload analysis. This requirement for full approval has not been met; consequently, EPA is granting interim approval of the program.

B. Section 112(g)

To regulate hazardous air pollutants, the EPA will establish performance standards for each industry based on Maximum Achievable Control Technology (MACT) under section 112(g) of the Act.

On February 14, 1995, the EPA published an interpretation of section 112(g) applicability in 60 FR 8333. The notice postpones the effective date of section 112(g) until after EPA has promulgated a rule addressing that provision. The notice sets forth in detail the rationale for the interpretation.

The section 112(g) interpretive notice explains that EPA is still considering whether the effective date of section 112(g) should be delayed beyond the date of promulgation of the Federal rule so as to allow states time to adopt rules implementing the Federal rule, and that EPA will provide for any such additional delay in the final section 112(g) rulemaking. Unless and until EPA provides for such an additional postponement of section 112(g), Iowa must have a Federally enforceable mechanism for implementing section 112(g) during the period between promulgation of the Federal section 112(g) rule and adoption of implementing Federal regulations.

The EPA is aware that Iowa lacks a program designed specifically to implement section 112(g). However, Iowa has adopted a subrule amendment at IAC 567–22.3(6) that gives the state authority to limit emissions of hazardous air pollutants (HAP). Iowa may use this authority to establish case-by case MACTs as needed for the review of new or modified HAP sources until such time as it adopts section 112(g).

C. Section 112(l)

Requirements for approval, specified in 40 CFR 70.4(b), encompass section 112(l)(5) requirements for approval of a program for delegation of section 112 standards as promulgated by EPA as they apply to part 70 sources, as well as for sources not subject to part 70 requirements. Section 112(l)(5) requires that the state's program contain adequate authorities, adequate resources for implementation, and an expeditious compliance schedule, which are also requirements under part 70. Therefore, the EPA is granting full approval under section 112(l)(5) and 40 CFR 63.91 of these programs for receiving delegation of section 112 standards that are unchanged from Federal standards as promulgated.

D. Final Action

The EPA is granting interim approval of the operating permits program submitted by Iowa on November 15, 1993. In addition, the EPA is granting approval of the state's program for receiving delegation of section 112 standards. In order to receive full approval of the operating permit program, the state must hire the original amount of forecasted personnel or provide a revised workload analysis describing how the program may be successfully implemented with fewer personnel.

This approval includes the following regulations adopted by the state of Iowa:

1. Iowa Administrative Code 567–22.100–147, effective March 16, 1994;
2. Amendments to Iowa Administrative Code 567–22.3(6); 101–103; 105; 107–108; 110; 120; 123–124; 132; 134; 139; 141–142; 146; 147; adopted May 15, 1995, and effective July 12, 1995; and
3. Iowa Administrative Code 567–2 (effective September 7, 1988); 567–7 (effective September 7, 1988); 567–10 (effective September 16, 1992).

The scope of Iowa's part 70 program approved in this notice applies to all part 70 sources (as defined in the approved program) within Iowa, except any sources of air pollution over which an Indian Tribe has jurisdiction (see 59 FR 55813, 55815–18 (November 9, 1994)). The term "Indian Tribe" is defined under the Act as "any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village, which is Federally recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians." See section 302(r) of the CAA; 59 FR 43956, 43962 (August 25, 1994); and 58 FR 54364 (October 21, 1993).

This interim approval, which may not be renewed, extends until October 1, 1997.

During this interim approval period, Iowa is protected from sanctions, and EPA is not obligated to promulgate, administer, or enforce a Federal operating permits program in the state.

Permits issued under a program with interim approval have full standing with respect to part 70, and the one-year time period for submittal of permit applications by subject sources begins upon the effective date of this interim approval, as does the three-year time

period for processing the initial permit applications.

If Iowa fails to submit a complete corrective program for full approval by April 1, 1997, EPA will start an 18-month clock for mandatory sanctions. If Iowa then fails to submit a corrective program that EPA finds complete before the expiration of that 18-month period, EPA will be required to apply one of the sanctions in section 179(b) of the Act, which will remain in effect until EPA determines that Iowa has corrected the deficiency by submitting a complete corrective program.

Moreover, if the Administrator finds a lack of good faith on the part of Iowa, both sanctions under section 179(b) will apply after the expiration of the 18-month period until the Administrator determines that the state has come into compliance. In any case, if, six months after application of the first sanction, Iowa still has not submitted a corrective program that EPA has found complete, a second sanction will be required.

In addition, discretionary sanctions may be applied where warranted any time after the expiration of an interim approval period if Iowa has not submitted a timely complete corrective program or EPA has disapproved its submitted corrective program.

If EPA has not granted full approval to the Iowa program by the expiration of this interim approval and that expiration occurs after November 15, 1995, EPA must promulgate, administer, and enforce a Federal permits program upon interim approval expiration.

III. Administrative Requirements

A. Docket

Copies of the state's submittal and other information relied upon for the final interim approval are contained in a docket maintained at the EPA Regional Office. The docket is an organized and complete file of all the information submitted to, or otherwise considered by, EPA in the development of this final interim approval. The docket is available for public inspection at the location listed under the **ADDRESSES** section of this document.

B. Executive Order 12866

The Office of Management and Budget has exempted this action from Executive Order 12866 review.

C. Regulatory Flexibility Act

The EPA's actions under section 502 of the Act do not create any new requirements, but simply address operating permits programs submitted to satisfy the requirements of 40 CFR part 70. Because this action does not impose any new requirements, it does not have a significant impact on a substantial number of small entities.

D. Unfunded Mandates

Under sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to state, local, or tribal governments in the aggregate.

Through submission of these operating permit programs, the state of Iowa has elected to adopt the program provided for under Title V of the Clean Air Act. These rules bind the state to perform certain actions and also require the private sector to perform certain duties. To the extent that the rules being finalized for approval by this action will impose new requirements, sources are already subject to these regulations under state law. EPA has determined that this interim final action does not include a mandate that may result in estimated costs of $100 million or more to state, local, or tribal governments in the aggregate or to the private sector.

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Dated: August 16, 1995.

Dennis Grams,
Regional Administrator.

Part 70, title 40 of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

2. Appendix A to part 70 is amended by adding the entry for Iowa in alphabetical order to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permits Programs

* * * * *

Iowa

(a) The Iowa Department of Natural Resources submitted on November 15, 1993, and supplemented by correspondence dated March 15, 1994; August 8, 1994; October 5, 1994; December 6, 1994; December 15, 1994; February 6, 1995; March 1, 1995; March 23, 1995; and May 26, 1995. Interim approval effective on October 2, 1995; interim approval expires October 1, 1997.

(b) [Reserved]

BILLING CODE 6560-50-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 417

[OMC–011–FC]

Medicare Program; Contracts With Health Maintenance Organizations (HMOs) and Competitive Medical Plans (CMPs)

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule with comment period.

SUMMARY: This rule clarifies and updates portions of the HCFA regulations that pertain to the following:

- The conditions that an HMO or CMP must meet to qualify for a Medicare contract (Subpart J).
- The contract requirements (Subpart L).
- The rules for enrollment, entitlement, and disenrollment of Medicare beneficiaries in a contracting HMO or CMP (Subpart K).
- How a Medicare contract is affected when there is change of ownership or leasing of facilities of a contracting HMO or CMP (Subpart M).

These are technical and editorial changes that do not affect the substance of the regulations. They are intended to make it easier to find particular provisions, to provide overviews of the different program aspects, and to better ensure uniform understanding of the rules.

DATES: *Effective Date:* These rules are effective as of October 1, 1995.

Comment Date: We will consider comments received by October 31, 1995.

ADDRESSES: Mail written comments (1 original and 3 copies) to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: OMC–011–FC, P.O. Box 26688, Baltimore, MD 21207.

If you prefer, you may deliver your written comments to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201–0001, or
Room C5–09–26, 7500 Security Boulevard, Baltimore, MD 21244–1850

Because of staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code OMC–011–FC. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of the document, in Room 309–G of the Department's offices at 200 Independence Avenue, SW., Washington, DC, Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: (202) 690–7890)).

FOR FURTHER INFORMATION CONTACT: Tracy Jensen, (410) 786–1033.

SUPPLEMENTARY INFORMATION:

I. Background

This rule is the fourth in a series of technical amendments that aim to—

1. Make it easier to find particular provisions, for example, by providing paragraph headings to serve as sign posts, using more sections (their headings will appear in the table of contents), and by listing and designating separate provisions that have been "lost" in 90-word sentences.

2. Clarify, simplify, and update, for example—

a. By using—

- Shorter words, sentences, and paragraphs;
- The active voice—showing who does what; and
- The most precise terms available, such as "enrollee" (rather than "member") for a beneficiary enrolled in an HMO or CMP; "HCFA" (rather than "the Secretary") since the responsibility for the prepaid health care programs has been delegated to HCFA; "that" (rather than "which") when the term limits or defines.

b. By eliminating unnecessary verbiage and outdated provisions.

II. Changes Made by This Rule

1. This rule amends § 417.1 to revise the definition of "service area" and to remove from the definition of "health maintenance organizations" the reference to §§ 417.168 and 417.169. Those sections were removed by a rule published on September 30, 1994 at 59 FR 49834.

2. The changes in subpart J are purely editorial, such as providing paragraph headings in § 417.410, and using present indicative to describe what HCFA does on a continuing basis.

3. In subpart K—

a. Special rules are highlighted by upgrading paragraphs to section status (new § 417.423).

b. Excessively long sentences are broken down to list and designate the separate provisions (paragraph (c) of § 417.440).

c. In § 417.460 (Disenrollment and termination of payments), we have reorganized the content to specify separately the circumstances under which disenrollment is required and those under which it is optional. We have also used more sections and eliminated unnecessary verbiage.

4. In subpart L, we have made technical and editorial changes, changes that, for example—

- Provide additional headings and more precise cross references; and
- Avoid unnecessary repetition.

5. In subpart M, we eliminated a "definitions" paragraph because, of the three terms defined, one was never used in the subpart, one was unnecessary, and the third was better explained in the only place it is used.

III. Waiver of Proposed Rulemaking and Delayed Effective Date

The changes made by this rule are technical and editorial in nature. Their aim is to simplify, clarify, and update subparts J, K, L, and M without substantive change. They have no impact on program costs. Accordingly, we find that notice and opportunity for public comment are unnecessary and contrary to the public interest and that, therefore, there is good cause to waive proposed rulemaking procedures.

In addition, it is important, for the convenience of the public, that these changes be effective as of October 1, 1995, so that they will be included in the 1995 edition of Title 42 of the Code of Federal Regulations on which the public relies. Accordingly, we find good cause to waive the usual 30-day delay in the effective date.

As previously indicated, however, we will consider timely comments from anyone who believes that, in making the technical and editorial changes, we have unintentionally altered the substance. Although we cannot respond to comments individually, if we change these rules as a result of comments, we will discuss all timely comments in the preamble to the revised rules.

IV. Paperwork Reduction Act

These regulations contain no new information collection requirements subject to review by the Office of Management and Budget under the Paperwork Reduction Act of 1980.

V. Regulatory Impact Statement

Consistent with the Regulatory Flexibility Act (RFA), and section 1102(b) of the Social Security Act (the Act), we prepare a regulatory flexibility analysis for each rule, unless we can certify that the rule will not have a significant economic impact on a substantial number of small entities, or a significant impact on the operation of a substantial number of small rural hospitals.

The RFA defines "small entity" as a small business, a nonprofit enterprise, or a governmental jurisdiction (such as a county, city, or township) with a population of less than 50,000. We also consider all providers and suppliers of services to be small entities. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that has fewer than 50 beds, and is not located in a metropolitan statistical area. We have not prepared a regulatory flexibility analysis because we have determined and we certify that this rule will not have a significant economic impact on a substantial number of small entities or a significant impact on the operation of a substantial number of small rural hospitals.

We have not prepared a regulatory flexibility analysis because we have determined and certify that this rule will not have a significant economic impact on a substantial number of small entities or a significant impact on the operation of a substantial number of small rural hospitals.

In accordance with the provisions of Executive Order 12866, this rule was not reviewed by the Office of Management and Budget.

List of Subjects in 42 CFR Part 417

Administrative practice and procedure, Health maintenance organizations (HMOs), Medicare.

42 CFR Part 417 is amended as set forth below:

PART 417—HEALTH MAINTENANCE ORGANIZATIONS, COMPETITIVE MEDICAL PLANS, AND HEALTH CARE PREPAYMENT PLANS

A. The authority citation for Part 417 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (U.S.C. 1302 and 1395hh); Secs. 1301, 1306 and 1310 of the Public Health Service Act (42 U.S.C. 300e, 300e-5, and 300e-9); and 31 U.S.C. 9701.

B. Subpart A is amended as follows:

Subpart A—General Provisions

1. In § 417.1, the following changes are made:

a. In the definition of "health maintenance organization," the last comma and the words "and §§ 417.168 and 417.169" are removed.

b. The definition of "service area" is revised to read as set forth below.

§ 417.1 Definitions.

* * * * *

Service area means a geographic area, defined through zip codes, census tracts, or other geographic measurements, that is the area, as determined by HCFA, within which the HMO furnishes basic and supplemental health services and makes them available and accessible to all its enrollees in accordance with § 417.106(b).

* * * * *

§ 417.2 [Amended]

2. In paragraph (a) of § 417.2, "Subparts A through F" is revised to read "Subparts B through F".

C. Subpart J is amended as set forth below:

Subpart J—Qualifying Conditions for Medicare Contracts

1. Section 417.400 is revised to read as follows:

§ 417.400 Basis and scope.

(a) *Statutory basis.* The regulations in this subpart implement section 1876 of the Act, which authorizes Medicare payment to HMOs and CMPs that contract with HCFA to furnish covered services to Medicare beneficiaries.

(b) *Scope.* (1) This subpart sets forth the requirements an HMO or CMP must meet in order to enter into a contract with HCFA under section 1876 of the Act. It also specifies the procedures that HCFA follows to evaluate applications and make determinations.

(2) The rules for payment to HMOs and CMPs are set forth in subparts N, O, and P of this part.

(3) The rules for HCPP participation in Medicare under section 1833(a)(1)(A) of the Act are set forth in subpart U of this part.

2. § 417.401 is amended to add definitions of "cost contract", "cost HMO or CMP", and "risk HMO or CMP", in alphabetical order, and revise all other definitions except the definitions of "adjusted average per capita cost", "demonstration project", and "geographic area", to read as follows:

§ 417.401 Definitions.

* * * * *

Adjusted average per capita cost * * *

Adjusted community rate (ACR) is the equivalent of the premium that a risk HMO or CMP would charge Medicare enrollees independently of Medicare payments if the HMO or CMP used the same rates it charges non-Medicare enrollees for a benefit package limited to covered Medicare services.

Arrangement means a written agreement between an HMO or CMP and another entity, under which—

(1) The other entity agrees to furnish specified services to the HMO's or CMP's Medicare enrollees;

(2) The HMO or CMP retains responsibility for the services; and

(3) Medicare payment to the HMO or CMP discharges the beneficiary's obligation to pay for the services.

Benefit stabilization fund means a fund established by HCFA, at the request of a risk HMO or CMP, to withhold a portion of the per capita payments available to the HMO or CMP and pay that portion in a subsequent contract period for the purpose of stabilizing fluctuations in the availability of the additional benefits the HMO or CMP provides to its Medicare enrollees.

Cost contract means a Medicare contract under which HCFA pays the HMO or CMP on a reasonable cost basis.

Cost HMO or CMP means an HMO or CMP that has in effect a cost contract with HCFA under section 1876 of the Act and subpart L of this part.

Demonstration project * * *

Emergency services means covered inpatient or outpatient services that are furnished by an appropriate source other than the HMO or CMP and that meet the following conditions:

(1) Are needed immediately because of an injury or sudden illness.

(2) Are such that the time required to reach the HMO's or CMP's providers or suppliers (or alternatives authorized by the HMO or CMP) would mean risk of permanent damage to the enrollee's health.

Once initiated, the services continue to be considered emergency services as long as transfer of the enrollee to the HMO's or CMP's source of health care or authorized alternative is precluded because of risk to the enrollee's health or because transfer would be unreasonable, given the distance and the nature of the medical condition.

Geographic area * * *

Medicare enrollee means a Medicare beneficiary who has been identified on HCFA records as an enrollee of an HMO or CMP that has a contract with HCFA under section 1876 of the Act and subpart L of this part.

New Medicare enrollee means a Medicare beneficiary who—

(1) Enrolls with an HMO or CMP after the date on which the HMO or CMP first enters into a risk contract under subpart L of this part; and

(2) Was not enrolled with the HMO or CMP at the time he or she became entitled to benefits under Part A or eligible to enroll in Part B of Medicare.

Risk contract means a Medicare contract under which HCFA pays the HMO or CMP on a risk basis for Medicare covered services.

Risk HMO or CMP means an HMO or CMP that has in effect a risk contract with HCFA under section 1876 of the Act and subpart L of this part.

Urgently needed services means covered services that are needed by an enrollee who is temporarily absent from the HMO's or CMP's geographic area and that—

(1) Are required in order to prevent serious deterioration of the enrollee's health as a result of unforeseen injury or illness; and

(2) Cannot be delayed until the enrollee returns to the HMO's or CMP's geographic area.

3. §§ 417.404, 417.406, and 417.407 are revised to read as follows:

§ 417.404 General requirements.

(a) In order to contract with HCFA under the Medicare program, an entity must—

(1) Be determined by HCFA to be an HMO or CMP (in accordance with §§ 117.142 and 417.407, respectively); and

(2) Comply with the contract requirements set forth in subpart L of this part.

(b) HCFA enters into or renews a contract only if it determines that action would be consistent with the effective and efficient implementation of section 1876 of the Act.

§ 417.406 Application and determination.

(a) *Responsibility for making determinations.* HCFA is responsible for determining whether an entity meets the requirements to be an HMO or CMP.

(b) *Application requirements.* (1) The application requirements for HMOs are set forth in § 417.143.

(2) The requirements of § 417.143 also apply to CMPs except that there are no application fees.

(c) *Determination.* HCFA uses the procedures set forth in § 417.144(a) through (d) to determine whether an entity is an HMO or CMP.

(d) *Oversight of continuing compliance.* (1) HCFA oversees an entity's continued compliance with the requirements for an HMO as defined in § 417.1 or for a CMP as set forth in § 417.407.

(2) If an entity no longer meets those requirements, HCFA terminates the contract of that entity in accordance with § 417.494.

§ 417.407 Requirements for a Competitive Medical Plan (CMP).

(a) *General rule.* To qualify as a CMP, an entity must be organized under the laws of a State and must meet the requirements of paragraphs (b) through (f) of this section.

(b) *Required services*—(1) *Basic rule.* Except as provided in paragraph (b)(2) of this section, the entity furnishes to its enrollees at least the following services:

(i) Physicians' services performed by physicians.

(ii) Laboratory, x-ray, emergency, and preventive services.

(iii) Out-of-area coverage.

(iv) Inpatient hospital services.

(2) Exception for Medicaid prepayment risk contracts. An entity that had, before 1970, a Medicaid prepayment risk contract that did not include provision of inpatient hospital services is not required to provide those services.

(c) *Compensation for services.* The entity receives compensation (except for deductibles, coinsurance, and copayments) for the health care services it provides to enrollees on a periodic, prepaid capitation basis regardless of the frequency, extent, or kind of services provided to any enrollee.

(d) *Source of physicians' services.* The entity provides physicians' services primarily through—

(1) Physicians who are employees or partners of the entity; or

(2) Physicians or groups of physicians (organized on a group or individual practice basis) under contract with the entity to provide physicians' services.

(e) *Assumption of financial risk.* The rules set forth in § 417.120(b) for HMOs apply also to CMPs except that reference to "basic services" must be read as reference to the required services listed in paragraph (b) of this section.

(f) *Protection of enrollees.* The entity provides adequately against the risk of insolvency by meeting the requirements of §§ 417.120(a) and 417.122 for protection of enrollees against loss of benefits and liability for payment of any fees that are the legal responsibility of the entity.

§ 417.408 [Amended]

4. In § 417.408, the following changes are made:

a. In paragraph (a), the designation "(1)" is inserted before the first sentence, the designation "(2)" is inserted before the second sentence, and "will exempt" is revised to read "exempts".

b. In paragraphs (b)(1) and (c) introductory text, "will give" is revised to read "gives".

5. Section 417.410 is amended to revise the section heading and provide headings for paragraphs (a) through (f), to read as follows:

§ 417.410 Qualifying conditions: General rules.

(a) *Basic requirement.* * * *

(b) *Other qualifying conditions.* * * *

(c) *Standards.* * * *

(d) *Application of standards.* * * *

(e) *Requirements for a risk contract.* * * *

(f) *Requirements for a reasonable cost contract.* * * *

* * * * *

§ 417.412 [Amended]

6. In § 417.412, the following changes are made:

a. Paragraph (a) and the designation "(b)" are removed.

b. Paragraphs (b)(1) and (b)(2) are redesignated as paragraphs (a) and (b), respectively.

7. In § 417.413, paragraphs (b) introductory text, (b)(1), (b)(2), (c), (d)(2)(i), (d)(3), (d)(5), and (d)(6) are revised to read as follows:

§ 417.413 Qualifying condition: Operating experience and enrollment.

* * * * *

(b) *Standard: Enrollment and operating experience for HMOs or CMPs to contract on a risk basis.* To be eligible to contract on a risk basis—

(1) A nonrural HMO or CMP must currently have the following:

(i) At least 5,000 enrollees; and

(ii) At least 75 Medicare enrollees or a plan acceptable to HCFA for achieving a Medicare enrollment of 75 within 2 years from the beginning of its initial contract period.

(2) A rural HMO or CMP must currently have—

(i) At least 1,500 enrollees; and

(ii) At least 75 Medicare enrollees or a plan acceptable to HCFA for achieving a Medicare enrollment of 75 within 2 years from the beginning of its initial contract period.

* * * * *

(c) *Standard: Enrollment and operating experience for HMOs or CMPs to contract on a cost basis.* To be eligible to contract on a reasonable cost basis, an HMO or CMP must currently have enrollees sufficient in number to provide a reasonable basis for entering into a contract, as follows:

(1) At least 1,500 enrollees.

(2) At least 75 Medicare enrollees, or a plan acceptable to HCFA for achieving—

(i) A Medicare enrollment of 75 within 2 years from the beginning of its initial contract period; and

(ii) At least 250 Medicare enrollees by the beginning of its fourth contract period.

(d) *Standard: Composition of enrollment.*

(1) * * *

(2) *Waiver of composition of enrollment standard.* * * *

(i) The HMO or CMP serves a geographic area in which Medicare beneficiaries and Medicaid recipients constitute more than 50 percent of the population. (HCFA does not grant a waiver that would permit the percentage of Medicare and Medicaid enrollees to exceed the percentage of Medicare beneficiaries and Medicaid recipients in the population of the geographic area.)

* * * * *

(3) *Waiver granted on or before October 21, 1986.* An HMO or CMP (or a successor HMO or CMP) that as of October 21, 1986, had been granted an exception, waiver, or modification of the requirements of paragraph (d)(1) of this section, but that does not meet the requirements of paragraph (d)(2) of this section, must make (and throughout the period of the exception, waiver, or modification continue to make) reasonable efforts to meet scheduled enrollment goals, consistent with a schedule of compliance approved by HCFA.

(i) If HCFA determines that the HMO or CMP has complied, or made significant progress toward compliance, with the approved schedule, and that an extension is in the best interest of the Medicare program, HCFA may extend the waiver of modification.

(ii) If HCFA determines that the HMO or CMP has not complied with the approved schedule, HCFA may apply the sanctions described in paragraphs (d)(6) and (d)(7) of this section.

* * * * *

(5) *Notice of sanction.* Before applying the sanctions specified in paragraph (d)(6) of this section, HCFA sends a written notice to the HMO or CMP stating the proposed action and its basis. HCFA gives the HMO or CMP 15 days after the date of the notice to provide evidence establishing the HMO's or CMP's compliance with the requirements in paragraph (d)(1), (d)(2), or (d)(3) of this section, as applicable.

(6) *Sanctions.* If, following review of the HMO's or CMP's timely response to HCFA's notice, HCFA determines that an HMO or CMP does not comply with the requirements of paragraphs (d)(1), (d)(2), or (d)(3) of this section, HCFA may apply either of the following sanctions:

(i) Require the HMO or CMP to stop accepting new enrollment applications after a date specified by HCFA.

(ii) Deny payment for individuals who are formally added or "accreted" to HCFA's records as Medicare enrollees after a date specified by HCFA.

* * * * *

§ 417.414 [Amended]

8. In § 417.414, the following changes are made:

a. In paragraph (b)(1), the word "that" is revised to read "to the extent that they".

b. Paragraph (b)(4) is removed.

9. Section 417.416 is amended by revising paragraphs (b) and (d), to read as follows:

§ 417.416 Qualifying condition: Furnishing of services.

* * * * *

(b) *Standard: Conformance with conditions of participation, conditions for coverage, and conditions for certification.* (1) Hospitals, SNFs, HHAs, CORFs, and providers of outpatient physical therapy or speech-language pathology services must meet the applicable conditions of participation in Medicare, as set forth elsewhere in this chapter.

(2) Suppliers must meet the conditions for coverage or conditions for certification of their services, as set forth elsewhere in this chapter.

(3) If more than one type of practitioner is qualified to furnish a particular service, the HMO or CMP may select the type of practitioner to be used.

* * * * *

(d) *Exceptions to physician supervision requirement.* The following services may be furnished without the direct personal supervision of a physician:

(1) Services of physician assistants and nurse practitioners (as defined in § 491.2 of this chapter), and the services and supplies incident to their services. The conditions for payment, as set forth in §§ 405.2414 and 405.2415 of this chapter for services furnished by rural health clinics and Federally qualified health centers, respectively, also apply when those services are furnished by an HMO or CMP.

(2) When furnished by a risk HMO or CMP, services of clinical psychologists, and services and supplies incident to their professional services. For purposes of this section, a clinical psychologist is an individual who—

(i) Holds a doctoral degree in psychology from an educational institution that is accredited by an organization recognized by the Council on Post-Secondary Accreditation;

(ii) Is licensed or certified at the independent practice level of psychology in the State in which he or she practices; and

(iii) Has 2 years of supervised clinical experience at least 1 of which is postgraduate.

* * * * *

D. Subpart K is amended as set forth below:

§ 417.420 [Amended]

1. In § 417.420, the following changes are made:

a. In paragraph (b), "Medicare will make payments to the HMO or CMP" is revised to read "HCFA pays the HMO or CMP".

b. In paragraph (b), the phrase ", as described in § 417.440," is removed.

c. In paragraph (c)(1), the phrase "as authorized in § 417.440" is removed.

§ 417.422 [Amended]

2. In § 417.422, the following changes are made:

a. In paragraph (a), the designation "(a)" and the heading are removed and "§ 417.424 and paragraphs (b) and (c) of this section" is revised to read "§§ 417.423 and 417.424".

b. The designation of paragraphs (a)(1) through (a)(7), is changed to "(a)" through "(g)", respectively.

c. Paragraphs (b) and (c) are removed.

3. A new § 417.423 is added, to read as follows:

§ 417.423 Special rules: ESRD and hospice patients.

(a) *ESRD patients.* (1) A Medicare beneficiary who has been medically determined to have end-stage renal disease is not eligible to enroll in an HMO or CMP.

(2) However, if a beneficiary is already enrolled in an HMO or CMP when he or she is determined to have end-stage renal disease, the HMO or CMP—

(i) Must reenroll the beneficiary as required by § 417.434; and

(ii) May not disenroll the beneficiary except as provided in § 417.460.

(b) *Hospice patients.* A Medicare beneficiary who elects hospice care under § 418.24 of this chapter is not eligible to enroll in an HMO or CMP as long as the hospice election remains in effect.

§ 417.424 [Amended]

4. In § 417.424, the following changes are made:

a. In paragraph (b), the designation "(1)" is inserted before the first sentence and the designation "(2)" is inserted before the second sentence.

b. In newly designated paragraph (b)(2), the phrase "(as defined in § 417.413(f)(2))" is removed, and the phrase "its proportion to the general population" is revised to read "the subgroup's proportion of the general population".

c. The following parenthetical statement is added at the end of newly designated paragraph (b)(2): "(A subgroup is a class of Medicare enrollees of an HMO or CMP that HCFA constructs on the basis of actuarial factors.)".

5. In § 417.426, paragraphs (b)(2) and (c) are revised to read as follows:

§ 417.426 Open enrollment requirements.

* * * * *

(b) *Capacity to accept new enrollees.* * * *

(2) HCFA evaluates the HMO's or CMP's submittal under paragraph (b)(1) of this section.

* * * * *

(c) *Reserved vacancies.* (1) Subject to HCFA's approval, an HMO or CMP may set aside a reasonable number of vacancies for an anticipated new group contract or for anticipated new enrollees under an existing group contract that will have its enrollment period after the Medicare open enrollment period during the contract year.

(2) Any set aside vacancies that are not filled within a reasonable time after the beginning of the group contract enrollment period must be made available to Medicare beneficiaries and other nongroup applicants under the requirements of this subpart.

§ 417.428 [Amended]

6. In § 417.428, paragraph (c), "risk reimbursement" is revised to read "payment on a risk basis".

7. In § 417.430, the following changes are made:

a. Paragraph (b)(3) is revised to read as set forth below.

b. In paragraph (b)(6)(i), "accepted while the organization was enrolled to capacity" is revised to read "accepted (for future enrollment) while there were no vacancies."

§ 417.430 Application procedures.

* * * * *

(b) *Handling of applications.* * * *

(3) The HMO or CMP gives the beneficiary prompt written notice of acceptance or rejection of the application.

* * * * *

§ 417.432 [Corrected]

8. In § 417.432, the heading of paragraph (e) is corrected to read: "(e) *Expedited submittal of information to HCFA.*"

9. Section 417.440 is amended to revise paragraphs (b)(1), (c), and (d) introductory text, to read as follows:

§ 417.440 Entitlement to health care services from an HMO or CMP.

* * * * *

(b) *Scope of services*—(1) *Part A and Part B services.* Except as specified in paragraphs (c), (d), and (e) of this section, a Medicare enrollee is entitled to receive from an HMO or CMP all the Medicare-covered services that are available to individuals residing in the HMO's or CMP's geographic area, as follows:

(i) Medicare Part A and Part B services if the enrollee is entitled to benefits under both programs.

(ii) Medicare Part B services if the enrollee is entitled only under that program.

* * * * *

(c) *Limitation on hospice care*—(1) *Extent of limitation*—(i) *Basic rule.* Except as provided in paragraph (c)(1)(ii) of this section, a Medicare enrollee who elects to receive hospice care under § 418.24 of this chapter waives the right to receive from the HMO or CMP any Medicare services (including services equivalent to hospice care) that are related to the terminal condition for which the enrollee elected hospice care, or to a related condition.

(ii) *Exception.* An enrollee who elects hospice care retains the right to services furnished by his or her attending physician if that physician—

(A) Is an employee or contractor of the HMO or CMP; and

(B) Is not an employee of the designated hospice and does not receive compensation from the hospice for those services.

(2) *Effective date of limitation.* The limitation in paragraph (c)(1) of this section begins on the effective date of the beneficiary's election of hospice care and remains in effect until the earlier of the following:

(i) The effective date of the enrollee's revocation of the election of hospice care as described in § 418.28 of this chapter.

(ii) The date the enrollee exhausts his or her hospice benefits.

(3) *Payment to HMO or CMP.* For the period that the Medicare enrollee's election of hospice care is in effect, HCFA pays a cost HMO or CMP only as described in § 417.585.

(d) *Limitation on provision of inpatient hospital services.* If a beneficiary's effective date of coverage, as specified in § 417.450, in a risk HMO or CMP occurs during an inpatient stay in a hospital paid for under part 412 of this chapter, the HMO or CMP—

* * * * *

10. In § 417.442, the heading and paragraph (a) are revised to read as follows:

§ 417.442 Risk HMOs and CMPs: Conditions for provision of additional benefits.

(a) *General rule.* Except as provided in paragraph (b) of this section, a risk HMO or CMP must, during any contract period, provide to its Medicare enrollees the additional benefits described in § 417.440(b)(4) if its ACRs (calculated in accordance with § 417.594) are less than the average per capita rates that HCFA pays for the Medicare enrollees during the contract period.

11. In § 417.450, paragraph (c) is revised to read as follows:

§ 417.450 Effective date of coverage.

* * * * *

(c) *Notice of effective date of coverage.* For each beneficiary added to HCFA's records as an enrollee of an HMO or CMP, HCFA gives the HMO or CMP prompt written notice of the month with which HCFA's liability begins.

§ 417.452 [Amended]

12. In § 417.452, the following changes are made:

a. In paragraph (a)(1), "under § 417.442" is revised to read "under the additional benefits provision of § 417.442".

b. In paragraph (a)(2) "may be paid by the enrollee or on his or her behalf by another individual, organization or entity." is revised to read "may be paid by or on behalf of the enrollee in the form of a premium, membership fee, charge per unit, or other similar charge.", and the second sentence is removed.

c. In paragraph (b) introductory text, "provided under § 417.442" is revised to read "provided as additional benefits under § 417.442".

§ 417.454 [Amended]

13. In § 417.454, the heading of paragraph (a) is revised to read *"Limits on charges."*

§ 417.456 [Amended]

14. In § 417.456, in paragraph (f), "will reduce" is revised to read "reduces", and "arrange" is revised to read "arranges".

§ 417.458 [Amended]

15. In § 417.458, introductory text, "agrees to recoup" is revised to read "agrees not to recoup", and "only in the following circumstances" is revised to read "except in the following circumstances".

16. Section 417.460 is revised and new sections 417.461 and 417.464 are added, to read as follows:

§ 417.460 Disenrollment of beneficiaries by an HMO or CMP.

(a) *General rule.* Except as provided in paragraphs (b) through (i) of this section, an HMO or CMP may not—

(1) Disenroll a Medicare beneficiary; or

(2) Orally or in writing, or by any action or inaction, request or encourage a Medicare enrollee to disenroll.

(b) *Bases for disenrollment: Overview*—(1) *Optional disenrollment.* Generally, an HMO or CMP may disenroll a Medicare enrollee if he or she—

(i) Fails to pay the required premiums or other charges;

(ii) Commits fraud or permits abuse of his or her enrollment card; or

(iii) Behaves in a manner that seriously impairs the HMO's or CMP's ability to furnish health care services to the particular enrollee or to other enrollees.

(2) *Required disenrollment.* Generally, an HMO or CMP must disenroll a Medicare enrollee if he or she—

(i) Moves out of the HMO's or CMP's geographic area;

(ii) Fails to convert to the risk provisions of the HMO's or CMP's Medicare contract;

(iii) Loses entitlement to Medicare Part B benefits; or

(iv) Dies.

(3) *Related provisions.* Specific requirements, limitations, and exceptions are set forth in paragraphs (c) through (i) of this section.

(c) *Failure to pay premiums or other charges—(1) Basic rule.* Except as specified in paragraph (c)(2) of this section, an HMO or CMP may disenroll a Medicare enrollee who fails to pay premiums or other charges imposed by the HMO or CMP for deductible and coinsurance amounts for which the enrollee is liable, if the HMO or CMP—

(i) Can demonstrate to HCFA that it made reasonable efforts to collect the unpaid amount;

(ii) Gives the enrollee written notice of disenrollment, including an explanation of the enrollee's right to a hearing under the HMO's or CMP's grievance procedures; and

(iii) Sends the notice of disenrollment to the enrollee before it notifies HCFA.

(2) *Exception.* If the enrollee fails to pay the premium for optional supplemental benefits (that is, a package of benefits that an enrollee is not required to accept), but pays the basic premium and other charges, the HMO or CMP may discontinue the optional benefits but may not disenroll the beneficiary.

(d) *Enrollee commits fraud or permits abuse of the enrollment card*—(1) *Basis for disenrollment.* An HMO or CMP may disenroll a Medicare beneficiary if the beneficiary—

(i) Knowingly provides, on the application form, fraudulent information that materially affects the beneficiary's eligibility to enroll in the HMO or CMP; or

(ii) Intentionally permits others to use his or her enrollment card to obtain services from the HMO or CMP.

(2) *Notice requirement.* If disenrollment is for either of the reasons specified in paragraph (d)(1) of this section, the HMO or CMP must give the beneficiary a written notice of termination of enrollment.

(i) The notice must be mailed to the enrollee before submission of the disenrollment notice to HCFA.

(ii) The notice must include an explanation of the enrollee's right to have the disenrollment heard under the grievance procedures established in accordance with § 417.436.

(3) *Report to the Inspector General.* The HMO or CMP must report to the Office of the Inspector General of the Department any disenrollment based on fraud or abuse by the enrollee.

(e) *Disenrollment for cause*—(1) *Basis for disenrollment.* An HMO or CMP may disenroll a Medicare enrollee for cause if the enrollee's behavior is disruptive, unruly, abusive, or uncooperative to the extent that his or her continuing enrollment in the HMO or CMP seriously impairs the HMO's or CMP's ability to furnish services to either the particular enrollee or other enrollees.

(2) *Effort to resolve the problem.* The HMO or CMP must make a serious effort to resolve the problem presented by the enrollee, including the use (or attempted use) of internal grievance procedures.

(3) *Consideration of extenuating circumstances.* The HMO or CMP must ascertain that the enrollee's behavior is not related to the use of medical services or to mental illness.

(4) *Documentation.* The HMO or CMP must document the problems, efforts, and medical conditions as described in paragraphs (e)(1) through (e)(3) of this section.

(5) *HCFA review of an HMO's or CMP's proposed disenrollment for cause.* (i) HCFA decides on the basis of review of the documentation submitted by the HMO or CMP, whether disenrollment requirements have been met.

(ii) HCFA makes this decision within 20 working days after receipt of the documentation material, and notifies the HMO or CMP within 5 working days after making its decision.

(6) *Effective date of disenrollment.* If HCFA permits an HMO or CMP to disenroll an enrollee for cause, the disenrollment takes effect on the first day of the calendar month after the month in which the HMO or CMP gives the enrollee a written notice of disenrollment that meets the requirements set forth in paragraphs (d)(2)(i) and (d)(2)(ii) of this section.

(f) *Enrollee moves out of the HMO's or CMP's geographic area*—(1) *Basic rules*—(i) *Disenrollment.* Except as provided in paragraph (f)(2) of this section, an HMO or CMP must disenroll a Medicare enrollee who moves out of its geographic area if the HMO or CMP establishes, on the basis of a written statement from the enrollee, or other evidence acceptable to HCFA, that the enrollee has permanently moved out of its geographic area.

(ii) *Notice requirement.* The HMO or CMP must comply with the notice requirements set forth in paragraph (d)(2) of this section.

(iii) *Effect on geographic area.* Failure to disenroll an enrollee who has moved out of the HMO's or CMP's geographic area does not expand that area to encompass the location of the enrollee's new residence.

(2) *Exception.* An HMO or CMP may retain a Medicare enrollee who is absent from its geographic area for an extended period, but who remains within the United States as defined in § 400.200 of this chapter if the enrollee agrees. For purposes of this exception, the following provisions apply:

(i) An absence for an extended period means an uninterrupted absence from the HMO's or CMP's geographic area for more than 90 days but less than 1 year.

(ii) The HMO or CMP and the enrollee may mutually agree upon restrictions for obtaining services while the enrollee is absent for an extended period from the HMO's or CMP's geographic area. However, restrictions may not be imposed on the scope of services described in § 417.440.

(iii) HMOs and CMPs that choose to exercise this exception must make the option available to all Medicare enrollees who are absent for an extended period from their geographic areas. However, HMOs and CMPs may limit this option to enrollees who go to a geographic area served by an affiliated HMO or CMP.

(iv) As used in this paragraph, "affiliated HMO or CMP" means an HMO or CMP that—

(A) Is under common ownership or control of the HMO or CMP that seeks to retain the absent enrollees; or

(B) Has in effect an agreement to furnish services to enrollees who are on an extended absence from the geographic area of the HMO or CMP that seeks to retain them.

(v) When the enrollee returns to the HMO's or CMP's geographic area (even temporarily), the restrictions of § 417.448(a) (which limit payment for services not provided or arranged for by the HMO or CMP) apply again immediately.

(vi) If the enrollee fails to return to the HMO's or CMP's geographic area within 1 year from the date he or she left that area, the HMO or CMP must disenroll the beneficiary on the first day of the month following the anniversary of the date the enrollee left that area in accordance with paragraph (f)(1) of this section.

(g) *Failure to convert to risk provisions of Medicare contract*—(1) *Basis for disenrollment.* A risk HMO or CMP must disenroll a nonrisk Medicare enrollee who refuses to convert to the risk provisions of the Medicare contract after HCFA determines that all of the HMO's or CMP's nonrisk Medicare enrollees must convert.

(2) *Advance notice requirement.* At least 30 days before it gives HCFA notice of disenrollment, the HMO or CMP must give the enrollee written notice of the fact that failure to convert will result in disenrollment.

(h) *Loss of entitlement to Medicare benefits*—(1) *Loss of entitlement to Part A benefits.* If an enrollee loses entitlement to benefits under Part A of Medicare but remains entitled to benefits under Part B, the enrollee automatically continues as a Medicare enrollee of the HMO or CMP and is entitled to receive and have payment made for Part B services, beginning with the month immediately following the last month of his or her entitlement to Part A benefits.

(2) *Loss of entitlement to Part B benefits.* If a Medicare enrollee loses entitlement to Part B benefits, the HMO or CMP must disenroll him or her as a Medicare enrollee effective with the month following the last month of entitlement to Part B benefits. However, the HMO or CMP may continue to enroll the individual under its regular plan if the individual so chooses.

(i) *Death of the enrollee.* Disenrollment is effective with the month following the month of death.

§ 417.461 Disenrollment by the enrollee.

(a) *Request for disenrollment.* (1) A Medicare enrollee who wishes to disenroll may at any time give the HMO or CMP a signed, dated request in the form and manner prescribed by HCFA.

(2) The enrollee may request a certain disenrollment date but it may be no earlier than the first day of the month following the month in which the HMO or CMP receives the request.

(b) *Responsibilities of the HMO or CMP.* The HMO or CMP must—

(1) Submit a disenrollment notice to HCFA promptly;

(2) Provide the enrollee with a copy of the request for disenrollment; and

(3) In the case of a risk HMO or CMP, also provide the enrollee with a statement explaining that he or she—

(i) Remains enrolled until the effective date of disenrollment; and

(ii) Until that date, is subject to the restrictions of § 417.448(a) under which neither the HMO or CMP nor HCFA pays for services not provided or arranged for by the HMO or CMP.

(c) *Effect of failure to submit disenrollment notice to HCFA promptly.* If the HMO or CMP fails to submit timely the correct and complete notice required in paragraph (b)(1) of this section, the HMO or CMP must reimburse HCFA for any capitation payments received after the month in which payments would have ceased if the requirement had been met timely.

§ 417.464 End of HCFA's liability for payment: Disenrollment of beneficiaries and termination or default of contract.

(a) *Effect of disenrollment: General rule.* (1) HCFA's liability for monthly capitation payments to the HMO or CMP generally ends as of the first day of the month following the month in which disenrollment is effective, as shown on HCFA's records.

(2) Disenrollment is effective no earlier than the month immediately after, and no later than the third month after, the month in which HCFA receives the disenrollment notice in acceptable form.

(b) *Effect of disenrollment: Special rules*—(1) *Fraud or abuse by the enrollee.* If disenrollment is on the basis of fraud committed or abuse permitted by the enrollee, HCFA's liability ends as of the first day of the month in which disenrollment is effective.

(2) *Loss of entitlement to Part B benefits.* If disenrollment is on the basis of loss of entitlement to Part B benefits, HCFA's liability ends as of the first day of the month following the last month of Part B entitlement.

(3) *Death of enrollee.* If the enrollee dies, HCFA's liability ends as of the first day of the month following the month of death.

(4) *Disenrollment at enrollee's request.* If disenrollment is in response to the enrollee's request, HCFA's liability ends as of the first day of the month following the month of termination requested by the enrollee.

(c) *Effect of termination or default of contract*—(1) *Termination of contract.* If the contract between HCFA and the HMO or CMP is terminated by mutual consent or by unilateral action of either party, HCFA's liability for payments ends as of the first day of the month after the last month for which the contract is in effect.

(2) *Default of contract.* If the HMO or CMP defaults on the contract before the end of the contract year because of bankruptcy or other reasons, HCFA—

(i) Determines the month in which its liability for payments ends; and

(ii) Notifies the HMO or CMP and all affected Medicare enrollees as soon as practicable.

E. Subpart L is amended as set forth below:

Subpart L—Requirements for Medicare Contracts

1. Section 417.472 is amended to revise paragraphs (a) and (b) to read as follows:

§ 417.472 Basic contract requirements.

(a) *Submittal of contract.* An HMO or CMP that wishes to contract with HCFA to furnish services to Medicare beneficiaries must submit a signed contract that meets the requirements of this subpart and any other requirements established by HCFA.

(b) *Agreement to comply with regulations and instructions.* The contract must provide that the HMO or CMP agrees to comply with all the applicable requirements and conditions set forth in this subpart and in general instructions issued by HCFA.

* * * * *

2. Sections 417.474 and 417.476 are revised to read as follows:

§ 417.474 Effective date and term of contract.

(a) *Effective date.* The contract must specify its effective date, which may not be earlier than the date it is signed by both HCFA and the HMO or CMP.

(b) *Term.* The contract must specify the duration of its term as follows:

(1) For the initial term, at least 12 months, but no more than 23 months.

(2) For any subsequent term, 12 months.

§ 417.476 Waived conditions.

If HCFA waives any of the qualifying conditions required under subpart J of this part, the contract must specify the following information for each waived condition:

(a) The specific terms of the waiver.

(b) The expiration date of the waiver.

(c) Any other information required by HCFA.

3. Section 417.480 is amended to revise the heading and the introductory text to read as follows:

§ 417.480 Maintenance of records: Cost HMOs and CMPs.

A reasonable cost contract must provide that the HMO or CMP agrees to maintain books, records, documents, and other evidence of accounting procedures and practices that—

* * * * *

4. In § 417.481, the heading and the introductory text are revised to read as follows:

§ 417.481 Maintenance of records: Risk HMOs and CMPs.

A risk contract must provide that the HMO or CMP agrees to maintain and make available to HCFA upon request, books, records, documents, and other evidence of accounting procedures and practices that—

* * * * *

5. In § 417.486, the following changes are made:

a. In the introductory text, the word "agrees" is revised to read "agrees to the following:".

b. In paragraph (a)(1), "§§ 417.530 through 417.576" is revised to read "subpart O of this part".

c. At the end of paragraphs (b) and (c), periods are substituted for the ";" and "; and ", respectively.

d. Paragraph (d) is revised to read as follows:

§ 417.486 Disclosure of information and confidentiality.

* * * * *

(d) To meet the confidentiality requirements of § 482.24(b)(3) of this chapter for medical records and for all other enrollee information that is—

(1) Contained in its records or obtained from HCFA or other sources; and

(2) Not covered under paragraph (c) of this section.

6. Section 417.488 is revised to read as follows.

§ 417.488 Notice of termination and of available alternatives: Risk contract.

A risk contract must provide that the HMO or CMP agrees to give notice as follows if the contract is terminated:

(a) At least 60 days before the effective date of termination, to give its Medicare enrollees a written notice that—

(1) Specifies the termination date; and

(2) Describes the alternatives available for obtaining Medicare services after termination.

(b) To pay the cost of the written notices.

7. In § 417.492, the introductory text of paragraph (a)(1) is republished and paragraphs (a)(l)(iii) and (b) are revised to read as follows:

§ 417.492 Nonrenewal of contract.

(a) *Nonrenewal by the HMO or CMP.* (1) If an HMO or CMP does not intend to renew its contract, it must—

* * * * *

(iii) Notify the general public at least 30 days before the end of the contract period, by publishing a notice in one or more newspapers of general circulation in each community or county located in the HMO's or CMP's geographic area.

* * * * *

(b) *Nonrenewal by HCFA*—(1) *Notice of nonrenewal.* If HCFA decides not to renew a contract, it gives written notice of nonrenewal as follows:

(i) To the HMO or CMP at least 90 days before the end of the contract period.

(ii) To the HMO's or CMP's Medicare enrollees at least 60 days before the end of the contract period.

(iii) To the general public at least 30 days before the end of the contract period.

(2) *Notice of appeal rights.* HCFA gives the HMO or CMP written notice of its right to appeal the nonrenewal decision, in accordance with subpart R of this part, if HCFA's decision was based on any of the reasons specified in § 417.494(b).

8. Section 417.494 is amended to revise paragraphs (a)(3), (b)(1)(iv), (b)(2), (b)(4), (c)(4), and (c)(5), to read as follows:

§ 417.494 Modification or termination of contract.

(a) *Modification or termination by mutual consent.* * * *

(3) If the contract is terminated, the HMO or CMP must notify its Medicare enrollees, and HCFA notifies the general public, at least 30 days before the termination date.

(b) *Termination by HCFA.* (1) * * *

(iv) HCFA determines that the HMO or CMP no longer meets the requirements of section 1876 of the Act and this subpart for being an HMO or CMP.

(2) If HCFA decides to terminate a contract, it sends a written notice informing the HMO or CMP of its right to appeal the termination in accordance with subpart R of this part.

(3) * * *

(4) HCFA notifies the HMO's or CMP's Medicare enrollees and the general public of the termination at least 30 days before the effective date of termination.

(c) *Termination by the HMO or CMP.*

* * *

(4) The contract is terminated effective 60 days after the HMO or CMP mails the notice to Medicare enrollees as required in paragraph (c)(2) of this section.

(5) HCFA's liability for payment ends as of the first day of the month after the last month for which the contract is in effect.

§ 417.500 [Amended]

9. In § 417.500, the following changes are made:

a. In paragraph (a) introductory text, "termination" is revised to read "termination of contract", and "with a contract under this subpart" is removed.

b. In paragraphs (a)(3) and (a)(4), "this part" is revised to read "subpart K of this part".

c. The heading of paragraph (b) is revised to read "*Notice of sanction and opportunity to respond.*"

d. The heading "*Notice of sanction.*" is added to paragraph (b)(1).

e. The heading "*Opportunity to respond.*" is added to paragraph (b)(2).

F. Subpart M is amended as set forth below:

Subpart M—Change of Ownership and Leasing of Facilities: Effect on Medicare Contracts

1. Section 417.520 is revised to read as follows:

§ 417.520 General provisions.

(a) *What constitutes change of ownership*—(1) *Partnership.* The removal, addition, or substitution of a partner, unless the partners expressly agree otherwise as permitted by applicable State law, constitutes a change of ownership.

(2) *Unincorporated sole proprietor.* Transfer of title and property to another party constitutes change of ownership.

(3) *Corporation.* (i) The merger of the HMO's or CMP's corporation into another corporation or the consolidation of the HMO or CMP with one or more other corporations, resulting in a new corporate body, constitutes a change of ownership.

(ii) Transfer of corporate stock or the merger of another corporation into the HMO's or CMP's corporation, with the HMO or CMP surviving, does not ordinarily constitute change of ownership.

(b) *Advance notice requirement.* (1) An HMO or CMP that has a Medicare contract in effect and is considering or negotiating a change in ownership must notify HCFA at least 60 days before the anticipated effective date of the change.

(2) If the HMO or CMP fails to give HCFA the required notice timely, it continues to be liable for capitation payments that HCFA makes to it on behalf of Medicare enrollees after the date of change of ownership.

(c) *Novation agreement defined.* A novation agreement is an agreement among the current owner of the HMO or CMP, the prospective new owner, and HCFA—

(1) That is embodied in a document executed and signed by all three parties;

(2) That meets the requirements of § 417.522; and

(3) Under which HCFA recognizes the new owner as the successor in interest to the current owner's Medicare contract.

(d) *Effect of change of ownership without novation agreement.* Except to the extent provided in paragraph (b)(2) of this section, the effect of a change of ownership without a novation agreement is that—

(1) The existing contract becomes invalid; and

(2) If the new owner wishes to participate in the Medicare program, it must apply for, and enter into, a contract in accordance with subpart L of this part.

(e) *Effect of change of ownership with novation agreement.* If the HMO or CMP submits a novation agreement that meets the requirements of § 417.522, and HCFA signs it, the new owner becomes the successor in interest to the current owner's Medicare contract.

§ 417.521 [Removed]

2. Section 417.521 is removed.

§ 417.522 [Amended]

3. In § 417.522, the following changes are made:

a. In paragraph (a) introductory text, "will approve" is revised to read "approves".

b. In paragraph (a)(3)(iii), "under this part" is revised to read "under subpart J of this part".

§ 417.523 [Amended]

4. In § 417.523, the following changes are made:

a. In paragraph (a), the heading is revised to read "*General effect of leasing.*".

b. In the text of paragraph (a) and in paragraph (b)(2), "the lessee" is revised to read "the other entity".

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: May 22, 1995.

Bruce C. Vladeck,

Administrator, Health Care Financing Administration.

BILLING CODE 4120–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 649

[Docket No. 950824215–5217–02; I.D. 080195B]

American Lobster Fishery; Technical Amendment; Clarifies Eligibility Requirements

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: NMFS issues this final rule to amend the regulations governing the Fishery Management Plan for the American Lobster Fishery (FMP). This rule corrects the eligibility requirements for lobster limited access permits to allow permit applicants who own a vessel that was under written contract for purchase as of March 25, 1991, to qualify for the limited access permit.

EFFECTIVE DATE: August 31, 1995.

FOR FURTHER INFORMATION CONTACT: Paul H. Jones, Fishery Policy Analyst, 508–281–9273.

SUPPLEMENTARY INFORMATION: Currently, regulations provide that eligibility for a lobster limited access permit can be established by proof that the permit applicant owned a vessel that was under written agreement for construction or for rerigging for directed American lobster fishing as of March 25, 1991 (60 FR 21994, May 4, 1995). This action makes a correction to these eligibility requirements by allowing vessels owners who entered into a written contract to purchase a vessel for directed American lobster fishing as of March 25, 1991, to qualify for a lobster limited access permit. The New England Fishery Management Council clarified at its June 29, 1995, meeting that this provision of the eligibility requirements for a limited access permit was inadvertently omitted from the regulations implementing Amendment 5 to the Lobster FMP.

Classification

Because this rule only corrects an omission in an existing set of regulations for which full prior notice and opportunity for comment have been given, under 5 U.S.C. 553(b)(B) it is unnecessary to provide additional notice and opportunity for comment.

This action imposes no new requirements on anyone subject to these regulations, but instead relieves a restriction. Accordingly, under 5 U.S.C. 553(d), this action may be made immediately effective.

This rule is exempt from review under E.O. 12866.

List of Subjects in 50 CFR Part 649

Fisheries.

Dated: August 25, 1995.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 649 is amended as follows:

PART 649—AMERICAN LOBSTER FISHERY

1. The authority citation for part 649 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 649.4, the first sentence of paragraph (b)(1)(i)(C) is revised to read as follows:

§ 649.4 Vessel permits.

(b) * * *

(1) * * *

(i) * * *

(C) The vessel was under written agreement for construction or rerigging for directed American lobster fishing, or was under written contract for purchase as of March 25, 1991, and the applicant meets one of the eligibility criteria set forth in paragraph (b)(1)(i)(A) or (B) of this section. * * *

Proposed Rules

Federal Register
Vol. 60, No. 170
Friday, September 1, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95–ANE–15]

Airworthiness Directives; CFM International CFM56–2/–2A/–2B/–3/–3B/–3C/–5 Series Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to CFM International (CFMI) CFM56–2/–2A/–2B/–3/–3B/–3C/–5 series turbofan engines. This proposal would require part number reidentification of certain low pressure turbine rotor (LPTR) stub shafts and conical supports, and reduction of the low cycle fatigue (LCF) retirement lives for these reidentified parts. This proposal is prompted by the results of a refined life analysis performed by the manufacturer which revealed minimum calculated LCF lives significantly lower than published LCF retirement lives. The actions specified by the proposed AD are intended to prevent a LCF failure of the LPTR stub shaft and conical support, which could result in an uncontained engine failure and damage to the aircraft.

DATES: Comments must be received by October 31, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–ANE–15, 12 New England Executive Park, Burlington, MA 01803–5299. Comments may be inspected at this location between 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from CFM International, Technical Publications Department, One Neumann Way, Cincinnati, OH 45215. This information may be examined at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA.

FOR FURTHER INFORMATION CONTACT: Robert J. Ganley, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803–5299; telephone (617) 238–7138; fax (617) 238–7199.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 95–ANE–15." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–ANE–15, 12 New England Executive Park, Burlington, MA 01803–5299.

Discussion

This proposed airworthiness directive (AD) is applicable to CFM International (CFMI) CFM56–2/–2A/–2B/–3/–3B/–3C/–5 series turbofan engines. Numerous first production low pressure turbine rotor (LPTR) stub shafts and conical supports were machined from thick forgings. Parts machined from thick forgings have lower metallurgical properties than ones machined from near net shape forgings. A study performed by the manufacturer using updated lifing analyses revealed that these parts have minimum calculated low cycle fatigue (LCF) lives which are significantly lower than published LCF retirement lives. This condition, if not corrected, could result in a LCF failure of the LPTR stub shaft and conical support, which could result in an uncontained engine failure and damage to the aircraft.

The FAA has reviewed and approved the technical contents of CFMI CFM56–2 Service Bulletin (SB) No. 72–728, Revision 2, dated December 21, 1994, CFMI CFM56–2A SB No. 72–338, dated November 25, 1993, CFMI CFM56–2B SB No. 72–476, dated December 7, 1993, and CFMI CFM56–3/–3B/–3C SB No. 72–695, dated November 25, 1993. These SB's describe procedures for the part number reidentification of LPTR stub shafts and conical supports.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require part number reidentification of certain LPTR stub shafts and conical supports, and reduction of the LCF retirement lives for these reidentified parts. The actions would be required to be accomplished in accordance with the SB's described previously.

The FAA estimates that 41 engines installed on aircraft of U.S. registry would be affected by this proposed AD, that it would take approximately 0.25 work hours per engine to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Assuming that the parts cost is proportional to the reduction of the LCF retirement lives, the required parts would cost approximately $6,687 per engine. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $274,782.

The regulations proposed herein would not have substantial direct effec on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

CFM International: Docket No. 95–ANE–15.

Applicability: CFM International (CFMI) CFM56–2/–2A/–2B/–3/–3B/–3C/–5 series turbofan engines installed on, but not limited to Airbus A320 series, McDonnell Douglas DC–8 series, and Boeing 737, E–3, E–6, and KC–135 series aircraft.

Note: This airworthiness directive (AD) applies to each engine identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For engines that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (j) to request approval from the Federal Aviation Administration (FAA). This approval may address either no action, if the current configuration eliminates the unsafe condition, or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any engine from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent a low cycle fatigue (LCF) failure of the low pressure turbine rotor (LPTR) stub shaft and conical support, which could result in an uncontained engine failure and damage to the aircraft, accomplish the following:

(a) Reidentify CFM56–2A LPTR stub shafts, Part Numbers (P/N) 301–330–623–0 and 301–330–624–0, with Serial Numbers (S/N) listed in Table 2 of CFMI CFM56–2A Service Bulletin (SB) No. 72–338, dated November 25, 1993, in accordance with the Accomplishment Instructions of CFMI CFM56–2A SB No. 72–338, dated November 25, 1993, at the next piece-part exposure after the effective date of this AD, but not to exceed 6,400 cycles since new (CSN).

(b) Reidentify CFM56–2B LPTR stub shafts, P/N 301–330–618–0, 301–330–619–0, 301–330–623–0, and 301–330–624–0, with S/N listed in Table 2 of CFMI CFM56–2B SB No. 72–476, dated December 7, 1993, in accordance with the Accomplishment Instructions of CFMI CFM56–2B SB No. 72–476, dated December 7, 1993, at the next piece-part exposure after the effective date of this AD, but not to exceed 8,300 CSN.

(c) Reidentify CFM56–2 LPTR conical supports, P/N 305–056–106–0, 305–056–109–0, 305–056–110–0, and 305–056–111–0, with S/N listed in Table 1 of CFMI CFM56–2 SB No. 72–728, Revision 2, dated December 21, 1994, in accordance with the Accomplishment Instructions of CFMI CFM56–2 SB No. 72–728, Revision 2, dated December 21, 1994, at the next piece-part exposure after the effective date of this AD, but not to exceed 18,000 CSN.

(d) Reidentify CFM56–2A LPTR conical supports, P/N 305– 056–110–0 and 305–056–111–0, with S/N listed in Table 1 of CFMI CFM56–2A SB No. 72–338, dated November 25, 1993, in accordance with the Accomplishment Instructions of CFMI CFM56–2A SB No. 72–338, dated November 25, 1993, at the next piece-part exposure after the effective date of this AD, but not to exceed 5,700 CSN.

(e) Reidentify CFM56–2B LPTR conical supports, P/N 305–056–106–0, 305–056–109–0, 305–056–110–0, and 305–056–111–0, with S/N listed in Table 1 of CFMI CFM56–2B SB No. 72–476, dated December 7, 1993, in accordance with the Accomplishment Instructions of CFMI CFM56–2B SB No. 72–476, dated December 7, 1993, at the next piece-part exposure after the effective date of this AD, but not to exceed 8,700 CSN.

(f) Reidentify CFM56–3B/–3C LPTR stub shafts, P/N 301–330–618–0, 301–330–619–0, 301–330–623–0, and 301–330–624–0, with S/N listed in Table 2 of CFMI CFM56–3/–3B/–3C SB No. 72–695, dated November 25, 1993, in accordance with the Accomplishment Instructions of CFMI CFM56–3/–3B/–3C SB No. 72–695, dated November 25, 1993, as follows:

(1) For CFM56–3B series engines, at the next piece-part exposure after the effective date of this AD, but not to exceed 11,400 CSN.

(2) For CFM56–3C series engines, at the next piece-part exposure after the effective date of this AD, but not to exceed 7,900 CSN.

(g) Reidentify CFM56–3/–3B/–3C LPTR conical supports, P/N 305–056–106–0, 305–056–109–0, 305–056–110–0, and 305–056–111–0, with S/N listed in Table 1 of CFMI CFM56–3/–3B/–3C SB No. 72–695, dated November 25, 1993, in accordance with the Accomplishment Instructions of CFMI CFM56–3/–3B/–3C SB No. 72–695, dated November 25, 1993, as follows:

(1) For CFM56–3 series engines, at the next piece-part exposure after the effective date of this AD, but not to exceed 12,100 CSN.

(2) For CFM56–3B series engines, at the next piece-part exposure after the effective date of this AD, but not to exceed 9,300 CSN.

(3) For CFM56–3C series engines, at the next piece-part exposure after the effective date of this AD, but not to exceed 5,700 CSN.

(h) Remove from service CFM56–5 LPTR conical support, P/N 336–000–305–0, prior to accumulating 11,300 CSN.

(i) This action establishes new LCF retirement lives for parts reidentified in accordance with paragraphs (a) through (g) of this AD, and the new LCF retirement life noted in paragraph (h) of this AD, which are published in Chapter 05 of the applicable engine shop manual (CFM56–2 CFMI–TP.SM.4, CFM56–2A/–2B CFMI–TP.SM.6, CFM56–3 CFMI–TP.SM.5, and CFM56–5 CFMI–TP.SM.7).

(j) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office. The request should be forwarded through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Engine Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

(k) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the aircraft to a location where the requirements of this AD can be accomplished.

Issued in Burlington, Massachusetts, on August 23, 1995.

Jay J. Pardee,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

[Docket No. 95N–0139]

Medical Devices; Proposed Reclassification and Exemption From Premarket Notification for Certain Classified Devices; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that appeared in the **Federal Register** of July 28, 1995 (60 FR 38902). The document proposed to reclassify 112 generic types of class II devices into class I based on new information respecting the devices, and exempt the 112 generic types of devices, along with 12 already classified generic types of class I devices, from the requirement of premarket notification, with limitations. The document was published with some errors. This document corrects those errors.

DATES: Submit written comments by October 11, 1995. For the devices the agency is proposing to reclassify into class I and exempt from the requirement of premarket notification, FDA is proposing that any final rule that may issue based on this proposed rule become effective 30 days after the date of its publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Melpomeni K. Jeffries, Center for Devices and Radiological Health (HFZ–404), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301–594–2186.

In FR Doc. 95–18456, appearing on page 38902 in the **Federal Register** of Friday, July 28, 1995, the following corrections are made:

1. On page 38902, in the third column, under the **DATES** caption, in the second sentence, "August 28, 1995" is corrected to read "30 days after the date of its publication in the **Federal Register**."

2. On page 38906, in the first column, in Table 4.—ANESTHESIOLOGY DEVICES, "868.1975 Water Vapor Analyzer" is added after "868.1870 Gas volume calibrator".

Dated: August 28, 1995.

William B. Schultz,

Deputy Commissioner for Policy.

40 CFR Part 70

[AD-FRL–5290–3]

Clean Air Act Proposed Approval of the Federal Operating Permits Program; San Luis Obispo Air Pollution Control District, California

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA is proposing interim approval for the Federal Operating Permits Program submitted by the California Air Resources Board on behalf of the San Luis Obispo County Air Pollution Control District (San Luis Obispo or District). This Program was submitted for the purpose of complying with Federal requirements in title V of the Clean Air Act which mandates that States develop, and submit to EPA, programs for issuing operating permits to all major stationary sources and to certain other sources.

DATES: Comments on this proposed action must be received in writing by October 2, 1995.

ADDRESS: Comments should be addressed to Frances Wicher, Mail Code A–5–2, U.S. Environmental Protection Agency, Region IX, Air and Toxics Division, 75 Hawthorne Street, San Francisco, California 94105.

Copies of the District's submission and other supporting information used in developing the proposed interim approval including the Technical Support Document are available for inspection during normal business hours at the following location: Operating Permits Section, A–5–2, Air and Toxics Division, U.S. EPA-Region IX, 75 Hawthorne Street, San Francisco, California 94105.

FOR FURTHER INFORMATION CONTACT: Frances Wicher, (415) 744–1250, Operating Permits Section, A–5–2, Air and Toxics Division, U.S. EPA-Region IX, 75 Hawthorne Street, San Francisco, California 94105.

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

As required under title V of the Clean Air Act ("the Act") as amended (1990), EPA has promulgated rules that define the minimum elements of an approvable State operating permits program and the corresponding standards and procedures by which the EPA will approve, oversee, and withdraw approval of State operating permits programs (see 57 FR 32250 (July 21, 1992)). These rules are codified at 40 CFR part 70. Title V requires States to develop, and submit to EPA, programs for issuing operating permits to all major stationary sources and to certain other sources.

The Act requires that States develop and submit these programs to EPA by November 15, 1993, and that EPA act to approve or disapprove each program within one year of receiving the submission. The EPA's program review occurs pursuant to section 502 of the Act and the part 70 regulations, which together outline criteria for approval or disapproval. Where a program substantially, but not fully, meets the requirements of part 70, EPA may grant the program interim approval for a period of up to two years. If EPA has not fully approved a program by two years after the November 15, 1993 date, or by the end of an interim program, it must establish and implement a Federal program.

II. Proposed Action and Implications

A. Analysis of State Submission

The analysis contained in this notice focuses on the major elements of San Luis Obispo's title V operating permit program and on the specific elements that must be corrected to meet the minimum requirements of part 70. The full program submittal, the Technical Support Document (TSD), which contains a detailed analysis of the submittal, and other relevant materials are available for inspection as part of the public docket. The docket may be viewed during regular business hours at the address listed above.

1. Title V Program Support Materials

San Luis Obispo's title V program was submitted by the California Air Resources Board (CARB) on November 15, 1993. Additional material was submitted by CARB on May 23 and August 21, 1995 and by the District on February 18, 1994 and May 3, 1995. In submitting the District's title V program, CARB requested source category-limited interim approval for the program because California law currently exempts agricultural sources from all permitting requirements including title V. The District's submission contains a complete program description, District implementing and supporting regulations, application and reporting forms, and other supporting information. In addition, CARB submitted for all Districts in the State a single Attorney General's opinion, State enabling legislation, and certain other information regarding State law.

EPA reviewed the District's program to assure that it contains all the elements required by § 70.4(b) (elements of the initial program submission) and has found the program complete pursuant to § 70.4(e)(1) in a letter to the CARB on January 13, 1994. An implementation agreement is currently being developed between San Luis Obispo and EPA.

2. Title V Operating Permit Regulations and Program Implementation

The rules that San Luis Obispo adopted to implement its title V program are Rules 216 *Federal Part 70 Permits* (adopted October 26, 1993) and Rules 217 *Federal Part 72 Permits* (adopted March 29, 1995). Other District rules that were submitted in support of the District's title V program are Rules 103 *Conflicts between District, State and Federal Rules* (no date), 105 *Definitions* (revised October 26, 1993), 107 *Breakdown or Upset Conditions and Emergency Variances* (revised March 29, 1995), 201 *Equipment Not Requiring a Permit* (revised November 5, 1991), 206 *Conditional Approval* (revised November 5, 1991) and 301–308 *Fees* (various adoption and revision dates).[1] These rules, along with the authorities granted the District under California State law, substantially meet the requirements of §§ 70.2 (Definitions) and 70.3 (Applicability) for applicability; § 70.5(c) (Standard application form and required information) for criteria that define insignificant activities and for complete application forms; §§ 70.4(b)(12) (Section 502(b)(10) changes) and 70.6 (Permit content) for permit content including operational flexibility; § 70.7 (Permit issuance, renewal, reopenings, and revisions) for public participation, permit issuance, and permit modifications; § 70.9 (Fee determination and certification) for fees; and § 70.11 for enforcement authority.

EPA has identified several interim approval issues affecting permit content, permit modifications and notice to the public and affected states that must be corrected in order for the San Luis Obispo program to receive full approval. These interim approval issues are discussed below and detailed in the TSD. EPA has also identified in the TSD other recommended changes that are not required for full approval but would improve, clarify, or strengthen the District's title V program.

a. Variances

The San Luis Obispo District Hearing Board has authority to issue variances from requirements imposed by State and local law. See California Health and Safety Code 42350 *et seq.* and District Rule 107 and Regulation VII. In the opinion submitted with California operating permit programs, California's Attorney General states that "(t)he variance process is *not* part of the Title V permitting process and does not affect federal enforcement for violations of the requirements set forth in a Title V permit." (Emphasis in original.)

EPA regards State and District variance provisions as wholly external to the programs submitted for approval under part 70 and consequently is proposing to take no action on these provisions of State and local law. EPA has no authority to approve provisions of state law that are inconsistent with the Act. EPA does not recognize the ability of a District to grant relief from the duty to comply with a federally-enforceable part 70 permit, except where such relief is granted through procedures allowed by part 70. A part 70 permit may be issued or revised, consistent with part 70 permitting procedures, to incorporate those terms of a variance that are consistent with applicable requirements. A part 70 permit may also incorporate, via part 70 permit issuance or revision procedures, the schedule of compliance set forth in a variance. However, EPA reserves the right to pursue enforcement of applicable requirements notwithstanding the existence of a compliance schedule in a permit to operate. This is consistent with § 70.5(c)(8)(iii)(C), which states that a schedule of compliance "shall be supplemental to, and shall not sanction noncompliance with, the applicable requirements on which it is based."

b. Permit Content

San Luis Obispo's permit content requirements are found in sections F. and L. of Rule 216 and in the District's Part 70 Permit Format. The Part 70 Permit Format is San Luis Obispo's sample permit form and was submitted as part of the District's title V program. The regulatory provisions adequately address nearly all of the part 70 requirements; however, certain elements (e.g., §§ 70.6(a)(3)(ii)(A) and 70.6(a)(6)(i)), are addressed or more fully detailed only in the Part 70 Permit Format. Nothing in the District's program requires the use of the Part 70 Permit Format for every permit issued pursuant to Rule 216. EPA is, therefore, requiring, as a condition for full approval, that San Luis Obispo establish a binding requirement that the Part 70 Permit Format be included in all part 70 permits or that the District fully address all part 70 permit content requirements in Rule 216.

EPA is specifically approving the Part 70 Permit Format (dated November 13, 1993) contained in Appendix B–6 of the District November 15, 1993 submittal. Any modifications to the conditions established in this Format must be approved by EPA. Failure to include these conditions in part 70 permits will be cause for EPA to object to a District operating permit. See § 70.8(c)(1).

c. Insignificant Activities

Section 70.4(b)(2) requires States to include in their title V programs any criteria used to determine insignificant activities or emission levels for the purpose of determining complete applications. Section 70.5(c) states that an application for a part 70 permit may not omit information needed to determine the applicability of, or to impose, any applicable requirement, or to evaluate appropriate fee amounts. Section 70.5(c) also states that EPA may approve, as part of a State program, a list of insignificant activities and emissions levels which need not be included in permit applications. Under part 70, a State must request and EPA must approve as part of that State's program any activity or emission level that the State wishes to consider insignificant. Part 70, however, does not establish appropriate emission levels for insignificant activities, relying instead on a case-by-case determination of appropriate levels based on the particular circumstances of the part 70 program under review.

San Luis Obispo submitted, as an insignificant activities list, its permit exemption rule (Rule 201) which specifies a specific list of activities and, for unlisted activities, an emissions cap of 2 lb/day (0.365 tons per year) that will be considered insignificant in the District's title V program. Rule 201, however, does not allow any activities that are subject to a New Source Performance Standard or National Emission Standard for Hazardous Air Pollutants to be considered insignificant. In addition, the District submitted an emissions analysis of its list of insignificant activities.

---

[1] EPA is only approving those portions of Rules 105, 107, 206 and 301–308 that are necessary to implement the District's title V program. More specifically, EPA is not approving the emergency variance provisions of Rule 107 B. This approval does not constitute approval under any other provisions of the Act.

San Luis Obispo County is designated attainment for all criteria pollutants; therefore, the major source threshold for all non-HAPs regulated air pollutants is 100 tons per year and, for HAPs, 10 tons per year for a single HAP and 25 tpy for a combination of HAPs. The District's emissions cap for insignificant activities is less than ½ of 1 percent of the major source threshold for all non-HAPs regulated air pollutants and less than 5 percent of the major source threshold for HAPs. EPA finds these levels to be insignificant and the 2 lb/day cap to be fully approvable.

EPA, however, in reviewing the District list of specific activities did find several activities that are potentially subject to a unit-specific applicable requirement. Rule 201 M.1. and 2. exempts air conditioning and refrigeration units regardless of size. Such units, if they have a charge rate of 50 pounds or more of a Class I or II ozone-depleting compounds, would be subject to applicable requirements and could not be considered insignificant.

The TSD provides a detailed review of the District's insignificant activities list. For interim approval, EPA is relying on San Luis Obispo's Rule 216 which requires the inclusion in each permit application of a list of all activities that are insignificant based on size or production rate and all information necessary to determine the applicability of, and to impose applicable requirements. For full program approval San Luis Obispo must revise its list of insignificant activities for title V permitting as discussed in section B.2. of this notice.

d. Definition of Title I Modification

The San Luis Obispo program does not explicitly define the term "title I modification," however, the program effectively defines the term to mean "the modification does not involve any addition, deletion, or revision to a part 70 permit condition under section 112(g) of Title I of the CAA, or under EPA regulations promulgated pursuant to Title I of the CAA, including 40 CFR parts 51, 52, 60, 61, and 62." See, for example, Rule 216 C.13., definition of "Minor Part 70 Permit Modification." While this effective definition is broad enough to cover minor new source review (minor NSR) changes because it includes changes under parts 51 and 52, it is clear from the Program Description that the District does not intend that minor NSR be considered a title I modification.

In an August 29, 1994 rulemaking proposal, EPA explained its view that the better reading of "title I modifications" includes minor NSR. However, the Agency solicited public comment on whether the phrase should be interpreted to mean literally any change at a source that would trigger permitting authority review under regulations approved or promulgated under title I of the Act. (59 FR 44572, 44573). This would include State preconstruction review programs approved by EPA as part of the State Implementation Plan under section 110(a)(2)(C) of the Clean Air Act.

The EPA has not yet taken final action on the August 29, 1994 proposal. However, in response to public comment on that proposal, the Agency has decided that the definition of "title I modifications" is best interpreted as not including changes reviewed under minor NSR programs. This decision was announced in a June 20, 1995 letter from Mary D. Nichols, EPA Assistant Administrator for Air and Radiation, to Congressman John D. Dingell, and will be included in a supplemental rulemaking proposal that will be published in August, 1995. Thus, EPA expects to confirm that San Luis Obispo's definition of "title I modification" is fully consistent with part 70.

The August 29, 1994 action proposed to, among other things, allow State programs with a more narrow definition of "title I modifications" to receive interim approval (59 FR 44572). The Agency stated that if, after considering the public comments, it continued to believe that the phrase "title I modifications" should be interpreted as including minor NSR changes, it would revise the interim approval criteria as needed to allow states with a narrower definition to be eligible for interim approval. If EPA does conclude, during this rulemaking, that Title I modifications should be read to include minor NSR, it will implement the interim approval option spelled out in the August 29, 1994 proposal.

e. Affected State Notification

The San Luis Obispo program neither defines "affected state" nor includes any procedures for notifying and dealing with comments from affected states as required by § 70.2 "Affected state", § 70.8(b) and § 70.7(e)(2)(ii). In its program submittal, the District argued that it need not include these procedures because its location (on the coastline in the middle of California) precludes emissions from its sources from affecting any other states. EPA would agree with this position if the definition of "affected state" was not being revised to include tribal governments that request treatment as affected states. Because there are tribal lands that could qualify as affected states for San Luis Obispo, the District may in the future need to have affected state notification and response procedures in its title V program.

EPA has not finalized the rulemaking that will allow tribal governments to seek affected state status. EPA is proposing, as an interim approval issue for the District, that Rule 216 be revised to define and provide for giving notice to and responding to comments from affected states. Since it remains uncertain whether any tribes will seek affected state status for the San Luis Obispo District, EPA is proposing as an alternative that the District may satisfy the interim approval issue by making a commitment to: (1) Initiate rule revisions upon being notified by EPA of an application by a tribe for state status, and (2) provide affected state notice to tribes upon their filing for state status (i.e., prior to San Luis Obispo's revising Rule 216 to incorporate affected state notice procedures).

3. Permit Fee Demonstration

Section 502(b)(3) of the Act requires that each permitting authority collect fees sufficient to cover all reasonable direct and indirect costs required to develop and administer its title V operating permits program. Each title V program submission must contain either a detailed demonstration of fee adequacy or a demonstration that aggregate fees collected from title V sources meet or exceed $25 per ton of emissions per year (adjusted from 1989 by the Consumer Price Index (CPI)). The $25 per ton amount is presumed, for program approval, to be sufficient to cover all reasonable program costs and is thus referred to as the "presumptive minimum," (§ 70.9(b)(2)(i)).

San Luis Obispo has opted to make a presumptive minimum fee demonstration in order to show fee adequacy and meet the requirements of § 70.9 (Fee determination and certification). San Luis Obispo's existing fee schedule (Rules 301–308) requires title V facilities to pay an amount equivalent to $61 per ton in annual operating fees (1991 figures). This amount is well over the $25 per ton per year (CPI adjusted from 1989) presumptive minimum.

San Luis Obispo determined its fee level at the $61 per ton equivalent amount by assessing its 1991 fee revenue and costs, and the additional costs posed by title V. San Luis Obispo is prepared to increase fees, as needed, to reflect actual program implementation costs.

4. Provisions Implementing the Requirements of Other Titles of the Act

a. Authority and Commitments for Section 112 Implementation

San Luis Obispo has demonstrated in its title V program submission adequate legal authority to implement and enforce all section 112 requirements through the title V permit. This legal authority is contained in the State of California enabling legislation and in regulatory provisions defining "federally enforceable requirements" and stating that the permit must incorporate all applicable requirements. EPA has determined that this legal authority is sufficient to allow San Luis Obispo to issue permits that assure compliance with all section 112 requirements. For further discussion on the District's legal authority, please refer to the TSD accompanying this rulemaking and the April 13, 1993 guidance memorandum titled "Title V Program Approval Criteria for Section 112 Activities," signed by John Seitz, Director, Office of Air Quality Planning and Standards, U.S. EPA.

b. Authority for Title IV (Acid Rain) Implementation

On May 23, 1995, CARB submitted on behalf of San Luis Obispo, the District's rule Rule 217 *Federal Part 72 Permits* (adopted March 29, 1995). Rule 217 incorporates by reference 40 CFR part 72 *(Acid Rain) Permit Regulation* and provides the District adequate authority to issue permits to affected acid rain sources under title IV.

B. Proposed Action

1. Title V Operating Permits Program

The EPA is proposing to grant interim approval to the operating permits program submitted by CARB on behalf of the San Luis Obispo County Air Pollution Control District on November 15, 1993, and supplemented on February 18, 1994, and May 3, May 23 and August 21, 1995. If EPA were to finalize this proposed interim approval, it would extend for two years following the effective date of final interim approval, and could not be renewed. During the interim approval period, San Luis Obispo would be protected from sanctions, and EPA would not be obligated to promulgate, administer and enforce a federal permits program for the District. Permits issued under a program with interim approval have full standing with respect to part 70, and the one-year time period for submittal of permit applications by subject sources begins upon the effective date of interim approval, as does the three-year time period for processing the initial permit applications.

Following final interim approval, if the District failed to submit a complete corrective program for full approval by the date six months before expiration of the interim approval, EPA would start an 18-month clock for mandatory sanctions. If San Luis Obispo then failed to submit a corrective program that EPA found complete before the expiration of that 18-month period, EPA would be required to apply one of the sanctions in section 179(b) of the Act, which would remain in effect until EPA determined that the District had corrected the deficiency by submitting a complete corrective program. Moreover, if the Administrator found a lack of good faith on the part of the District, both sanctions under section 179(b) would apply after the expiration of the 18-month period until the Administrator determined that the District had come into compliance. In any case, if, six months after application of the first sanction, the District still had not submitted a corrective program that EPA found complete, a second sanction would be required.

If, following final interim approval, EPA were to disapprove San Luis Obispo's complete corrective program, EPA would be required to apply one of the section 179(b) sanctions on the date 18 months after the effective date of the disapproval, unless prior to that date the District had submitted a revised program and EPA had determined that it corrected the deficiencies that prompted the disapproval. Moreover, if the Administrator found a lack of good faith on the part of the District, both sanctions under section 179(b) would apply after the expiration of the 18-month period until the Administrator determined that the District had come into compliance. In all cases, if, six months after EPA applied the first sanction, San Luis Obispo had not submitted a revised program that EPA had determined corrected the deficiencies that prompted disapproval, a second sanction would be required.

In addition, discretionary sanctions may be applied where warranted any time after the end of an interim approval period if a district has not timely submitted a complete corrective program or EPA has disapproved a submitted corrective program. Moreover, if EPA has not granted full approval to a District title V operating permits program by the expiration of an interim approval and that expiration occurs after November 15, 1995, EPA must promulgate, administer and enforce a federal permits program for that district upon interim approval expiration.

2. Interim Approval Issues for San Luis Obispo's Title V Operating Permits Program

If EPA finalizes this interim approval, San Luis Obispo must make the following changes, or changes that have the same effect, to receive full approval:

(1) Remove any activities from the District's list of insignificant activities that are subject to a unit-specific applicable requirement. See §§ 70.4(b)(2) and 70.5(c).

(2) Revise the definitions of "Minor Part 70 Permit Modification" in Rule 216 C.13, to ensure that significant changes to existing monitoring permit terms or conditions, rather than just relaxations of existing monitoring terms, are processed as significant permit modifications. See § 70.7(e)(4).

(3) Revise Rule 216 J.1.b. to include notice "by other means if necessary to assure adequate notice to the affected public." See § 70.7(h)(1).

(4) Revise Rule 216 H.1.a.4. and L.1.e. to further limit the types of significant permit modifications that may be operated prior to receiving a final part 70 permit revision to only those modifications that are subject to section 112(g) or required to have a permit under title I, parts C and D of the Act and that are not otherwise prohibited by an existing part 70 permit. See § 70.5(a)(1)(ii).

(5) Revise Rule 216 to establish a binding requirement that the Part 70 Permit Format will be included in all part 70 permits or revise Rule 216 to fully address all part 70 permit content requirements within the Rule. See § 70.6.

(6) Revise Rule 216 to define and provide for giving notice to and responding to comments from affected states. Alternatively, San Luis Obispo may make a commitment to: (1) Initiate rule revisions upon being notified by EPA of an application by a tribe for state status, and (2) provide affected state notice to tribes upon their filing for state status (i.e., prior to revising Rule 216 to incorporate affected state notice procedures). See §§ 70.2 "Affected state," 70.7(e)(2)(iii), and 70.8(b).

(7) Limit the exemption in Rule 216 D.4 for solid waste incineration units required to obtain a permit pursuant to section 3005 of the Solid Waste Disposal Act to those units that are not a major source. Section 70.3(b) states that all major sources, affected sources (acid rain sources), and solid waste incinerators regulated pursuant to section 129(e) of the CAA may not be exempted from title V permitting.

Although section 129(g)(1) of the CAA exempts solid waste incineration units subject to section 3005 of the Solid Waste Disposal Act from regulation under section 129, these units are still subject to title V and part 70 if they are also major sources. See § 70.3(a)(1).

(8) Revise Rule 216 H.4. to require that the permittee keep records describing non-federal minor changes (e.g., off-permit changes) and the emissions resulting from these changes. See § 70.4(b)(14)(iv).

3. California Enabling Legislation—Legislative Source Category Limited Interim Approval Issue

Because California State law currently exempts agricultural production sources from permit requirements, CARB has requested source category-limited interim approval for all California districts. EPA is proposing to grant source category-limited interim approval to the operating permits program submitted by CARB on behalf of San Luis Obispo on November 15, 1993. In order for this program to receive full approval (and to avoid a disapproval upon the expiration of this interim approval), the Health and Safety Code must be revised to eliminate the exemption of agricultural production sources from the requirement to obtain a title V permit. Once the California statute has revised, the District must also revise its permit exemption rules to eliminate any blanket exemption granted agricultural sources.

The above described program and legislative deficiencies must be corrected before San Luis Obispo can receive full program approval. For additional information, please refer to the TSD, which contains a detailed analysis of San Luis Obispo's operating permits program and California's enabling legislation.

4. District Preconstruction Permit Program Implementing Section 112(g)

The EPA has published an interpretive notice in the **Federal Register** regarding section 112(g) of the Act (60 FR 8333, February 14, 1995). The revised interpretation postpones the effective date of section 112(g) until after EPA has promulgated a rule addressing that provision. The interpretive notice explains that EPA is considering whether the effective date of section 112(g) should be delayed beyond the date of promulgation of the federal rule so as to allow States time to adopt rules implementing the federal rule, and that EPA will provide for any such additional delay in the final section 112(g) rulemaking. Unless and until EPA provides for such an additional postponement of section 112(g), San Luis Obispo must be able to implement section 112(g) during the period between promulgation of the federal section 112(g) rule and adoption of implementing District regulations.

For this reason, EPA is proposing to approve the use of San Luis Obispo's preconstruction review program as a mechanism to implement section 112(g) during the transition period between promulgation of the section 112(g) rule and adoption by San Luis Obispo of rules specifically designed to implement section 112(g). However, since the sole purpose of this approval is to confirm that the District has a mechanism to implement section 112(g) during the transition period, the approval itself will be without effect if EPA decides in the final section 112(g) rule that there will be no transition period. The EPA is limiting the duration of this proposed approval to 12 months following promulgation by EPA of the section 112(g) rule.

5. Program for Delegation of Section 112 Standards as Promulgated

Requirements for approval, specified in 40 CFR 70.4(b), encompass section 112(l)(5) requirements for approval of a program for delegation of section 112 standards as promulgated by EPA as they apply to part 70 sources. Section 112(l)(5) requires that the state program contain adequate authorities, adequate resources for implementation, and an expeditious compliance schedule, which are also requirements under part 70. Therefore, EPA is also proposing to grant approval under section 112(l)(5) and 40 CFR part 63.91 of San Luis Obispo's program for receiving delegation of section 112 standards that are unchanged from federal standards as promulgated. California Health and Safety Code section 39658 provides for automatic adoption by CARB of section 112 standards upon promulgation by EPA. Section 39666 of the Health and Safety Code requires that districts then implement and enforce these standards. Thus, when section 112 standards are automatically adopted pursuant to section 39658, San Luis Obispo will have the authority necessary to accept delegation of these standards without further regulatory action by the District. The details of this mechanism and the means for finalizing delegation of standards will be set forth in a Memorandum of Agreement between San Luis Obispo and EPA, expected to be completed prior to approval of the District's section 112(l) program for delegation of unchanged federal standards. This program applies to both existing and future standards but is limited to sources covered by the part 70 program.

III. Administrative Requirements

A. Request for Public Comments

The EPA is requesting comments on all aspects of this proposed interim approval. Copies of the District's submittal and other information relied upon for the proposed interim approval are contained in a docket maintained at the EPA Regional Office. The docket is an organized and complete file of all the information submitted to, or otherwise considered by, EPA in the development of this proposed interim approval. The principal purposes of the docket are:

(1) To allow interested parties a means to identify and locate documents so that they can effectively participate in the approval process, and

(2) To serve as the record in case of judicial review. The EPA will consider any comments received by October 2, 1995.

B. Executive Order 12866

The Office of Management and Budget has exempted this action from Executive Order 12866 review.

C. Regulatory Flexibility Act

The EPA's actions under section 502 of the Act do not create any new requirements, but simply address operating permits programs submitted to satisfy the requirements of 40 CFR part 70. Because this action does not impose any new requirements, it does not have a significant impact on a substantial number of small entities.

D. Unfunded Mandates Act

Under section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a federal mandate that may result in estimated costs to State, local, or tribal governments in the aggregate; or to the private sector, of $100 million or more. Under section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that the proposed approval action promulgated today does not include a federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This federal action approves pre-existing requirements under State or local law, and imposes no new federal requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401–7671q.

Dated: August 21, 1995.

Felicia Marcus,

Regional Administrator.

50 CFR Parts 649, 650, and 651

[Docket No. 950824215–5217–02; I.D. 050295B]

RIN 0648–AH37

American Lobster Fishery, Framework Adjustment 1; Atlantic Sea Scallop Fishery, Framework Adjustment 3; Northeast Multispecies Fishery, Framework Adjustment 7; Vessel Ownership Requirements

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes measures contained in Framework Adjustment 1 to the American Lobster Fishery Management Plan (FMP), Framework Adjustment 3 to the Atlantic Sea Scallop FMP, and Framework Adjustment 7 to the Northeast Multispecies FMP. These framework adjustments would revise a provision in each of the FMPs that requires all permit applicants to own a fishing vessel at the time they apply for or renew a Federal limited access permit. This proposed action would allow certain applicants who have owned vessels that meet the various limited access permit qualification criteria, but who do not currently own a vessel, to preserve their eligibility to apply for a limited access permit for a replacement vessel in subsequent years by obtaining a Confirmation of Permit History.

DATES: Comments on the proposed rule must be received on or before September 15, 1995.

ADDRESSES: Comments on the proposed rule or supporting documents should be sent to Dr. Andrew A. Rosenberg, Regional Director, Northeast Region, NMFS, 1 Blackburn Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on Proposed Framework Adjustments to Vessel Ownership Requirements."

Copies of the Framework Adjustments, Amendment 5 to the American Lobster FMP, Amendment 4 to the Atlantic Sea Scallop FMP, and Amendment 5 to the Northeast Multispecies FMP, including regulatory impact reviews, initial regulatory flexibility analyses, and final supplemental environmental impact statements are available upon request from Douglas Marshall, Executive Director, New England Fishery Management Council, 5 Broadway, Saugus, MA 01906–1097; telephone: 617–231–0422.

FOR FURTHER INFORMATION CONTACT: E. Martin Jaffe, Fishery Policy Analyst, 508–281–9272.

SUPPLEMENTARY INFORMATION:

Background

In 1994, NMFS implemented major amendments developed by the New England Fishery Management Council (Council) to the FMPs for the Atlantic sea scallop, northeast multispecies and the American lobster fisheries. These amendments, which were intended to address overfishing in these fisheries, implemented measures that limited access to these fisheries based upon historical participation.

NMFS partially implemented Amendment 4 to the Atlantic Sea Scallop FMP (January 19, 1994, 59 FR 2757) and Amendment 5 to the Northeast Multispecies FMP on March 1, 1994 (59 FR 9872). Most of the measures remaining became effective on May 1, 1994 (59 FR 22760, May 3, 1995). NMFS implemented the approved sections of Amendment 5 to the American Lobster FMP on June 21, 1994 (59 FR 31938).

Under current regulations for the Atlantic sea scallop and northeast multispecies fisheries, to be eligible to obtain a Federal limited access permit in 1994, an applicant had to have owned a vessel that qualified under the limited access criteria for each respective fishery. In addition, an applicant had to obtain a permit in 1994 to be eligible to renew a limited access permit in future years. Current regulations for the American lobster fishery are the same, with the exception that the qualifying year is 1995. These requirements represent a continuation of preexisting permit requirements.

Under a limited access permit system, however, this situation poses a potential problem for anyone who does not own a fishing vessel at the time he or she applies for, or renews, a limited access permit. This includes anyone who sold or transferred a vessel and retained the permit and fishing history, but did not buy a new vessel in time to apply for an initial Atlantic sea scallop or northeast multispecies permit during the 1994 calendar year, or, in the case of American lobster, during the 1995 calendar year.

In developing Amendment 5 to the American Lobster FMP, Amendment 4 to the Atlantic Sea Scallop FMP, and Amendment 5 to the Northeast Multispecies FMP, the Council adopted the policy that vessel owners should not be required to continue to fish their vessels to be eligible to obtain or renew limited access permits. The Council did not intend to force vessels to remain active in currently overfished fisheries to retain fishing rights for the future, but it did not explicitly address the issue of vessel ownership as a requirement to obtain a permit under the various FMP amendments. Therefore, current regulations contradict the Council's intent not to require vessels to remain active in a limited access fishery.

Proposed Adjustment

To address this problem, the Council has requested NMFS to implement this proposed action, which would allow an applicant who has owned a vessel that meets the various limited access permit qualification criteria, but who does not own a vessel at the time of application, to preserve his or her right to qualify for a Federal limited access permit for a replacement vessel in subsequent years in the Atlantic sea scallop and northeast multispecies fisheries, and in the American lobster fishery. Qualified applicants would be allowed to apply for a Confirmation of Permit History, and would need to apply for such annually, to preserve the permit and fishing history of the qualifying vessel.

Comments and Responses

The Council has discussed and heard public comment on this issue for several years during the development of the amendments to the Northeast Multispecies and Atlantic Sea Scallop FMPs. More recently, this problem was discussed at the September 21–22, 1994, Council meeting, at which time the

Council initiated this combined framework action. The public was notified of this Council meeting, and of the final Council meeting held on October 28–29, 1994, at which time this action was discussed. No public comments were received. This proposed rule provides the public with an additional opportunity to comment.

Classification

This proposed rule has been determined to be not significant under E.O. 12866.

This rule contains a collection-of-information requirement subject to the Paperwork Reduction Act that has been approved by the Office of Management and Budget under OMB Control Number 0648–0202. The public reporting burden for completing an application for a Confirmation of Permit History is estimated at 0.5 hours per response. This estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to NMFS (see **ADDRESSES**) and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503 (Attention: NOAA Desk Officer).

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities because it would not: (1) Result in a change in annual gross revenues of more than 5 percent; or (2) increase annual compliance costs for small entities by more than 5 percent and would not increase compliance costs for small entities compared to large entities.

List of Subjects

50 CFR Part 649

Fisheries.

50 CFR Part 650

Fisheries, Reporting and recordkeeping requirements.

50 CFR Part 651

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: August 28, 1995.

Rolland A. Schmitten,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Parts 649, 650, and 651 are proposed to be amended as follows:

PART 649—AMERICAN LOBSTER FISHERY

1. The authority citation for part 649 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 649.4, paragraph (b)(1)(iv) is added to read as follows:

§ 649.4 Vessel permits.

(b) * * *

(1) * * *

(iv) *Confirmation of Permit History.* Notwithstanding any other provisions of this part, a person who does not currently own a fishing vessel, but who has owned a qualifying vessel that has sunk, been destroyed, or transferred to another person, may apply for and receive a Confirmation of Permit History if the fishing and permit history of such vessel has been retained lawfully by the applicant. To be eligible to obtain a Confirmation of Permit History, the applicant must show that the qualifying vessel meets the eligibility requirements, as applicable, in this part. Issuance of a valid and current Confirmation of Permit History preserves the eligibility of the applicant to apply for or renew a limited access permit for a replacement vessel based on the qualifying vessel's fishing and permit history at a subsequent time, subject to the replacement provisions specified at § 649.4. A Confirmation of Permit History must be applied for and received on an annual basis in order for the applicant to preserve the fishing rights and limited access eligibility of the qualifying vessel. If fishing privileges have been assigned or allocated previously under this part based on the qualifying vessel's fishing and permit history, the Confirmation of Permit History also preserves such fishing privileges. Any decision regarding the issuance of a Confirmation of Permit History for a qualifying vessel that has applied for or been issued previously a limited access permit under this part is a final agency action subject to judicial review under 5 U.S.C. 704. Applications for a Confirmation of Permit History shall be accepted by the Regional Director on or before December 31, 1995. For subsequent years, applications must be received by the end of the calendar year in which the Confirmation of Permit History expires. Information requirements for the Confirmation of Permit History application shall be the same as those for a limited access permit with any request for information about the vessel being applicable to the qualifying vessel that has been sunk, destroyed, or transferred. Vessel permit applicants who hold a Confirmation of Permit History and who wish to obtain a vessel permit for a replacement vessel based upon the previous vessel history may do so pursuant to paragraph (b) of this section.

* * * * *

PART 650—ATLANTIC SEA SCALLOP FISHERY

3. The authority citation for part 650 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

4. In § 650.4, the introductory text is revised and paragraph (a)(1)(iv) is added to read as follows:

§ 650.4 Vessel permits.

Any vessel of the United States that fishes for, possesses, or lands per trip Atlantic sea scallops in quantities greater than 40 lb (18.14 kg) shucked scallops or 5 bushels (176.2 l) in-shell, except vessels that fish exclusively in state waters for sea scallops, must have been issued and carry on board a valid limited access scallop permit or a valid general scallop permit, issued under this section.

(a) * * *

(1) * * *

(iv) *Confirmation of Permit History.* Notwithstanding any other provisions of this part, a person who does not currently own a fishing vessel, but who has owned a qualifying vessel that has sunk, been destroyed, or transferred to another person, may apply for and receive a Confirmation of Permit History if the fishing and permit history of such vessel has been retained lawfully by the applicant. To be eligible to obtain a Confirmation of Permit History, the applicant must show that the qualifying vessel meets the eligibility requirements, as applicable, in this part. Issuance of a valid and current Confirmation of Permit History preserves the eligibility of the applicant to apply for or renew a limited access permit for a replacement vessel based on the qualifying vessel's fishing and permit history at a subsequent time, subject to the replacement provisions specified at § 650.4. A Confirmation of Permit History must be applied for and received on an annual basis in order for the applicant to preserve the fishing rights and limited access eligibility of the qualifying vessel. If fishing privileges have been assigned or allocated previously under this part based on the qualifying vessel's fishing and permit history, the Confirmation of Permit History also preserves such fishing privileges. Any decision regarding the issuance of a Confirmation of Permit History for a qualifying vessel that has applied for or been issued previously a limited access permit under this part is a final agency action subject to judicial review under 5 U.S.C. 704. Applications for a Confirmation of Permit History shall be accepted by the Regional Director on or before 30 days after publication of the final rule. For subsequent years, such applications must be received by the end of the calendar year in which the Confirmation of Permit History expires. Information requirements for the Confirmation of Permit History application shall be the same as those for a limited access permit with any request for information about the vessel being applicable to the qualifying vessel that has been sunk, destroyed or transferred. Vessel permit applicants who hold a Confirmation of Permit History and who wish to obtain a vessel permit for a replacement vessel based upon the previous history may do so pursuant to paragraph (a) of this section.

* * * * *

PART 651—NORTHEAST MULTISPECIES FISHERY

5. The authority citation for part 651 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

6. In § 651.4, paragraph (a) introductory text is revised and paragraph (a)(1)(iv) is added to read as follows:

§ 651.4 Vessel permits.

* * * * *

(a) *Limited access multispecies permits.* Beginning on May 1, 1994, any vessel of the United States that possesses or lands more than the possession limit of regulated species specified under § 651.27(a), except vessels fishing with fewer than 4,500 hooks that have been issued a hook-gear-only permit as specified in paragraph (b) of this section, vessels fishing for regulated species exclusively in state waters, and recreational fishing vessels, must have been issued and carry on board a valid Federal limited access multispecies permit, or an authorizing letter issued under paragraph (a)(8)(v) of this section. To qualify for a limited access multispecies permit, a vessel must meet the following criteria, as applicable:

(1) * * *

(iv) *Confirmation of Permit History.* Notwithstanding any other provisions of this part, a person who does not currently own a fishing vessel, but who has owned a qualifying vessel that has sunk, been destroyed, or transferred to another person, may apply for and receive a Confirmation of Permit History if the fishing and permit history of such vessel has been retained lawfully by the applicant. To be eligible to obtain a Confirmation of Permit History, the applicant must show that the qualifying vessel meets the eligibility requirements, as applicable, in this part. Issuance of a valid and current Confirmation of Permit History preserves the eligibility of the applicant to apply for or renew a limited access permit for a replacement vessel based on the qualifying vessel's fishing and permit history at a subsequent time, subject to the replacement provisions specified at § 651.4. A Confirmation of Permit History must be applied for and received on an annual basis in order for the applicant to preserve the fishing rights and limited access eligibility of the qualifying vessel. If fishing privileges have been assigned or allocated previously under this part based on the qualifying vessel's fishing and permit history, the Confirmation of Permit History also preserves such fishing privileges. Any decision regarding the issuance of a Confirmation of Permit History for a qualifying vessel that has applied for or been issued previously a limited access permit under this part is a final agency action subject to judicial review under 5 U.S.C. 704. Applications for a Confirmation of Permit History shall be accepted by the Regional Director on or before 30 days after publication of the final rule. For subsequent years, such applications must be received by the end of the calendar year before the year for which the Confirmation of Permit History expires. Information requirements for the Confirmation of Permit History application shall be the same as those for a limited access permit with any request for information about the vessel being applicable to the qualifying vessel that has been sunk, destroyed or transferred. Vessel permit applicants who hold a Confirmation of Permit History and who wish to obtain a vessel permit for a replacement vessel based upon the previous vessel history may do so pursuant to paragraph (a) of this section.

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census.

Title: Data User Evaluation Surveys.

Form Number(s): Various.

Agency Approval Number: 0607–0760.

Type of Request: Extension of a currently approved collection.

Burden: 3,500 hours.

Number of Respondents: 7,000.

Avg Hours Per Response: 30 minutes.

Needs and Uses: The Census Bureau is requesting a three-year extension of the generic clearance to conduct data user surveys to continue to promote their optimal use and encourage focused and effective improvements to the quality of Census Bureau products and services. An extension of this clearance would again cover data collections in all areas of the Census Bureau. The clearance is administered jointly by the Bureau Forms Clearance Officer and a member of the Work Force Development and Quality Management Office (QMO). Offices wanting to conduct a survey under the clearance prepare a letter to OMB for signature by the Forms Clearance Officer. The letter and survey form are reviewed by the Forms Clearance Officer and the QMO member. The Forms Clearance Officer forwards signed letters, along with the survey form, for the OMB and the Office of the Under Secretary, Economic and Statistics Administration (ESA), for final approval. Survey operations begin a minimum of 5 days after submitting this letter.

Affected Public: Individuals or household, businesses or other for–profit, Not–for–profit institutions, Farms, Federal government, State, local or tribal government.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Maria Gonzalez, (202) 395–7340.

Copies of the above information collection proposals can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, Room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collections should be sent to Maria Gonzalez, OMB Desk Officer, Room 10202 New Executive Office Building,Washington, DC 20503.

Dated: August 29, 1995.

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 95–21807 Filed 8–31–95; 8:45 am]

BILLING CODE 3510–07–F

Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census.

Title: Annual Survey of Communication Services.

Form Number(s): B–516 through B–521.

Agency Approval Number: 0607–0706.

Type of Request: Extension of a currently approved collection.

Burden: 7,000 hours.

Number of Respondents: 1,780.

Avg Hours Per Response: 4 hours.

Needs and Uses: The Annual Survey of Communication Services is a vital component of a broad–based, multi–year program at the Census Bureau to expand coverage and improve statistics for service–related industries. This program is part of an interagency initiative to improve statistics in this sector of the economy. This survey will provide the only annual source of key measures of the communication sector, including the telephone, broadcasting, and cable television industries. These data will serve as inputs into the national income and product accounts calculated by the Bureau of Economic Analysis, the Bureau of Labor Statistics' Producer Price Indices, and the Department of Commerce's publication, Industrial Outlook. In addition, the Census Bureau will use results of this survey in the planning and design stages of current and future economic census questionnaires by providing information on the ability of respondents to report accurate and timely data from existing records and by identifying areas of dynamic change in the communication sector.

Affected Public: Federal Government, Businesses or other for–profit organizations, Not–for–profit institutions.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, Room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, Room 10201 New Executive Office Building,Washington, DC 20503.

Dated: August 29, 1995.

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 95–21808 Filed 8–31–95; 8:45 am]

BILLING CODE 3510–07–F

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: School Enrollment Report.

Form Number(s): P–4.

Agency Approval Number: 0607–0459.

Type of Request: Extension of a currently approved collection.

Burden: 20 hours.

Number of Respondents: 40.

Avg Hours Per Response: 30 minutes.

Needs and Uses: The Census Bureau sends the School Enrollment Report annually to the 40 state departments of education that do not publish enrollment data early enough in the year for us to use their published reports. Information requested includes fall public and nonpublic enrollment by grade for the state and selected counties. In six states we collect year–end enrollment. The Census Bureau uses school enrollment data in preparing estimates of state population. State population estimates are used by dozens of Federal agencies for allocating Federal program funds, as bases for rates of occurrences, and as input for Federal surveys. State and local governments, businesses, and the general public use state population estimates for planning and other informational uses.

Affected Public: State, local, or tribal government.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: August 28, 1995.

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 95–21698 Filed 8–31–95; 8:45 am]

BILLING CODE 3510–07–F

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Annual Survey of Local Government Finances (School Systems).

Form Number(s): F–33, F–33–1, F–33–L1.

Agency Approval Number: 0607–0700.

Type of Request: Extension of a currently approved collection.

Burden: 2,871 hours.

Number of Respondents: 894.

Avg Hours Per Response: 3 hours and 13 minutes.

Needs and Uses: The Census Bureau collects financial data for public school systems as part of its Annual Survey of State and Local Government Finance. This survey is the only comprehensive source of public fiscal data collected on a nationwide scale using uniform definitions, concepts, and procedures. Data are incorporated with other state and local government finance data and entered into the national income accounts. Data are also used in long–established Census Bureau reports and provided to the National Center for Education Statistics (NCES). The collection of these data at the school system level are closely coordinated with the NCES' National Public Education Finance Survey (NPEFS) which obtains state totals for revenue and expenditure items.

Affected Public: State, local or tribal government.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: August 28, 1995.

BILLING CODE 3510–07–F

US & Foreign Commercial Service; U.S.-Caribbean Business Development Council

AGENCY: US & Foreign Commercial Service, Commerce.

ACTION: Notice of opportunity to participate in U.S.-Caribbean Business Development Council.

SUMMARY: As part of its recently launched Caribbean Commercial Strategy, the Department of Commerce, through its U.S. & Foreign Commercial Service, is establishing a U.S.-Caribbean Business Development Council (CBDC). The CBDC will be a forum for dialogue among the public and private sectors of participating countries. Its objectives are to provide a forum for constructive exchanges of information on commercial matters, encouraging discussion on issues of common interest, including, but not limited to: (i) Identifying commercial opportunities; (ii) improving dissemination of information on U.S.-Caribbean market opportunities; (iii) developing sectoral approaches to expanding business opportunities; (iv) implementing trade and business development programs; and (v) taking any other appropriate steps for fostering commercial relations between the United States and the Caribbean. The inaugural meeting for the CBDC is expected to be in mid-December, in Kingston, Jamaica.

The CBDC will be composed of two sections, a U.S. section and a Caribbean section open to membership to Antigua and Barbuda, Bahamas, Barbados, Belize, Dominica, Dominican Republic, Grenada, Guyana, Haiti, Jamaica, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, and Trinidad and Tobago. Each participating Caribbean country will be represented by a trade or industry minister and several private sector members. The U.S. section will be chaired by Secretary of Commerce Ronald H. Brown and will be comprised of 20–25 private sector representatives.

The Department of Commerce is currently seeking nominations of outstanding individuals or companies to serve on the U.S. section of the CBDC. Private sector members serve at the discretion of the Secretary of Commerce and as representatives of the U.S. business community. They are expected to participate fully in defining the agenda for the CBDC and in implementing its work program. They are fully responsible for travel, living and personal expenses associated with the participation.

In order to be eligible for membership in the U.S. section, potential candidates must be: (i) U.S. citizens; (ii) CEOs or other top management level employees of a U.S. company or organization with demonstrated involvement in trade and investment within the Caribbean region; and, (iii) not a registered Foreign Agent.

To the extent possible, the Department of Commerce will strive to achieve membership composition that reflects U.S. entrepreneurial diversity. Therefore, in reviewing eligible candidates, the U.S. & Foreign Commercial Service will consider such selection factors as: (i) Depth of experience in the Caribbean market; (ii) industry sectors, company size, location, and demographics.

To be considered for membership, please provide the following: name and title of individual requesting consideration; name and address of the company or organization sponsoring the individual; company's product or service line; size of the company; foreign commerce experience and major markets; a brief statement (not more than 2 pages) of why each candidate should be considered for membership on the BDC; the particular segment of the business community each candidate would represent; and a personal resume.

DATES: In order to receive full consideration, requests must be received no later than September 15, 1995.

ADDRESSES: Please send requests for consideration to Ms. Maria Tildon, Special Assistant, Office of the Director General, US&FCS, preferably by fax on (202) 482–5013 or by mail at Room 3802, U.S. Department of Commerce, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Ms. Maria Tildon, Special Assistant, Office of the Director General, US&FCS, Room 3802, U.S. Department of Commerce, Washington, DC 20230. Telephone, 202–482–0332.

Authority: Act of February 14, 1903, c. 552, as amended, 15 U.S.C. 1501 *et seq.*, 32 Stat. 825; Reorganization Plan No. 3 of 1979, 19 U.S.C. 2171 Note, 93 Stat. 1381.

Dated: August 25, 1995.

Robert LaRussa,

Principal Deputy Assistant Secretary for US&FCS.

[FR Doc. 95–21806 Filed 8–31–95; 8:45 am]

BILLING CODE 3510–FP–P

International Trade Administration

U.S.-Argentina Business Development Council and U.S.-Brazil Business Development Council—Standards Working Groups

AGENCY: International Trade Administration, DOC.

ACTION: Notice of Open Discussion Roundtable and Standards Seminar Organized by the U.S.-Argentina Business Development Council Standards Working Group and the U.S.-Brazil Business Development Council Standards Working Group.

SUMMARY: On January 25, 1995, Secretary of Commerce Ronald H. Brown and Argentine Minister of Economy and Public Works and Services Domingo Cavallo signed the Terms of Reference to create the U.S.-Argentina Business Development Council (A–BDC). On March 23, 1995, Secretary of Commerce Ronald H. Brown and Brazilian Minister of External Relations Luiz Felipe Lampreia signed the Terms of Reference to create the U.S.-Brazil Business Development Council (B–BDC). The purpose of the BDCs, which are bilateral, public-private sector councils, is to provide a forum for cooperation through which U.S. and respectively, Argentine and Brazilian (Argentine/Brazilian) representatives can exchange information on commercial matters and encourage discussion on various themes related to bilateral business development and trade promotion.

The BDCs are comprised of U.S. and Argentine/Brazilian sections. The U.S. sections are comprised of U.S. Government officials and senior level representatives of U.S. companies with commercial interest and experience in Argentina/Brazil. The activities of the BDCs may include, but are not limited to. the following: identifying commercial opportunities, impediments and issues of concern to the U.S. and Argentine/Brazilian business communities; improving dissemination of information on U.S.-Argentine/Brazilian market opportunities; developing sectoral or project oriented approaches to expanding bilateral business opportunities; implementing bilateral trade and business development programs; and other appropriate steps to foster bilateral commercial relations.

To implement these activities, the BDCs have formed various working groups, including Standards Working Groups ("Standards Groups") in each BDC. The two Standards Groups intend to implement a program to encourage use of internationally accepted standards and conformity assessment practices and to enhance the efficiency of U.S.-Argentine/Brazilian commerce by identifying possible solutions to standards-related impediments.

DATES: The standards discussion roundtable will be held on Tuesday, September 19, 1995 at 1:30 P.M. The standards seminar is scheduled for Tuesday, November 28, 1995.

ADDRESSES: The standards discussion roundtable will be held at the U.S. Department of Commerce, Herbert C. Hoover Building, Auditorium, 14th and Constitution Avenue NW., Washington, DC 20230. The standards seminar will be held in Buenos Aires, Argentina.

FOR FURTHER INFORMATION CONTACT:

(1) Regarding the A–BDC generally—Carrie B. Clark, Argentina Desk, (202) 482–0477;

(2) Regarding the B–BDC generally—Laura Zeiger-Hatfield, Brazil Desk, (202) 482–0428;

(3) Regarding both BDC Standards Groups and the Discussion Roundtable—Dr. Stanley I. Warshaw, Senior Policy Advisor for Standards and Technology, U.S. Department of Commerce, International Trade Administration, HCHB Room 3527, Washington, DC 20230, (202) 482–5620 or 5853, Fax: (202) 482–5444, Internet: Warshaw@usita.gov;

(4) Regarding the Standards Seminar—Mr. John L. Donaldson, Chief, Standards Code and Information Program, U.S. Department of Commerce, National Institute of Standards and Technology, TB 417, Room 109, Gaithersburg MD 20899, (301)975–4030, Fax: (301)963–2871, Internet: Donaldso@micf.nist.gov.

SUPPLEMENTARY INFORMATION:

Open Standards Discussion Roundtable Organized by the A–BDC and B–BDC Standards Groups

The U.S. sections of the BDC Standards Groups will host a roundtable to generate a broad private sector discussion of standards-related issues that may be considered by the A–BDC and B–BDC Standards Groups in preparation for future bilateral meetings scheduled to take place, respectively in Buenos Aires and Rio de Janeiro. The standards seminar will be open to all interested participants.

Open Standards Seminar

The BDCs will organize a standards seminar. In accordance with the public—private sector partnership embodied in the BDCs, the seminar is being organized and cosponsored by the International Trade Administration and the National Institute of Standards and Technology of the U.S. Department of Commerce, Argentina's National Institute of Industrial Technology, Brazil's National Institute of Metrology, Standardization and Industrial Quality, and the A–BDC and B–BDC Standards Groups. The standards seminar will be open to all interested participants.

Contact Information

Those interested in attending the standards roundtable discussion or in submitting written comments on standards issues relevant to U.S.-Argentine/Brazilian commerce and/or in participating in the standards seminar in Buenos Aires should contact the relevant persons listed above.

Authority: Act of February 14, 1903, c. 552, as amended, 15 U.S.C. § 1501 et seq., 32 Stat. 825.

Dated: August 25, 1995.

Walter M. Bastian, III,

Director, Office of Latin America and the Caribbean.

Bureau of Export Administration

Sensors Technical Advisory Committee; Partially Closed Meeting

A meeting of the Sensors Technical Advisory Committee will be held September 27, 1995, 9 a.m., in the Herbert C. Hoover Building, Room 1617M(2), 14th Street & Pennsylvania Avenue, NW., Washington, DC. The Committee advises the Office of the Assistant Secretary for Export Administration with respect to technical questions that affect the level of export controls applicable to sensors and related equipment and technology.

Agenda

General Session

1. Opening remarks by the Chairman.
2. Presentation of papers or comments by the public.
3. Discussion on rechartering of the Committee.
4. Update on Administration export initiatives.

Executive Session

5. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. export control program and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent that time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting. However, to facilitate distribution of public presentation materials to the Committee members, the Committee suggests that presenters forward the public presentation materials two weeks prior to the meeting date to the following address: Ms. Lee Ann Carpenter, OAS/EA–Room 3886C, Bureau of Export Administration, U.S. Department of Commerce, Washington, DC 20230.

The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on January 6, 1994, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings of the Committee and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C., 552b(c)(1) shall be exempt from the provisions relating to public meetings found in section 10 (a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6020, U.S. Department of Commerce, Washington, DC 20230. For further information or copies of the minutes, contact Lee Ann Carpenter on (202) 482–2583.

Dated: August 29, 1995.

Lee Ann Carpenter,

Director, Technical Advisory Committee Unit.

Bureau of the Census

Economics and Statistics Administration; 2000 Census Advisory Committee (formerly the Advisory Committee of the Task Force for Designing the Year 2000 Census and Census-Related Activities for 2000–2009); Notice of Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), and after consultation with GSA, the Secretary of Commerce has determined that the renewal of the 2000 Census Advisory Committee (formerly the Advisory Committee of the Task Force for Designing the Year 2000 Census and Census-Related Activities for 2000–2009) is in the public interest in connection with the performance of duties imposed on the Department by law.

The 2000 Census Advisory Committee will continue to provide advice to the Secretary of Commerce and the Director, Bureau of the Census, on such matters as questionnaire content, operational planning, and other issues related to effective implementation.

The 2000 Census Advisory Committee will have a balanced representation of up to 35 member organizations. In addition, 15 ex-officio members will be invited to serve in a nonvoting capacity. The 2000 Census Advisory Committee will continue to report and be responsible to the Secretary of Commerce and the Director, Bureau of the Census, and will function solely as an advisory body in compliance with the Federal Advisory Committee Act.

The Department of Commerce will file copies of the committees' renewed charters with appropriate committees in Congress.

You may address inquiries or comments to Maxine Anderson-Brown, Committee Liaison Officer, Bureau of the Census, Room 3039–3, Washington, DC 20233, telephone (301) 457–2308, or Victoria Kruk, Committee Management Analyst, U.S. Department of Commerce, Washington, DC 20230, telephone (202) 482–4115.

Dated: August 29, 1995.

Harry A. Scarr,

Deputy Director, Bureau of the Census.

BILLING CODE 3510–07–P

Census Advisory Committee (CAC) on the American Indian and Alaska Native Populations; Notice of Public Teleconference Call Meeting

Pursuant to the Federal Advisory Committee Act (P.L. 92–463 as amended by P.L. 94–409, P.L. 96–523, and P.L. 97–375), we are giving notice of a teleconference call of the CAC on the American Indian and Alaska Native Populations. The conference call meeting will convene on September 11, 1995 at the Census Bureau, Conference Room #3, Federal Building 3, Suitland, Maryland 20233.

The committee is composed of nine members appointed by the Secretary of Commerce. They provide an organized and continuing channel of communication between the communities they represent and the Bureau of the Census on its efforts to reduce the differential in the count for the 2000 census and on ways that census data can be disseminated to maximum usefulness to their communities and other users.

The committee will draw on past experience with the 1990 census process and procedures, results of evaluations and research studies, and the expertise and insight of their members to provide advice and recommendations during the research and development phase on various topics, and provide advice and recommendations during the design, planning, and implementation phases of the 2000 census.

The agenda for the conference call meeting that will begin at 1 p.m. eastern daylight time and end at 4 p.m. is:

(1) Introductory remarks by the Committee Liaison, CAC on the American Indian and Alaska Native Populations.

(2) Administrative Records, which includes the review of comments on the final report results and recommendations from the "Research and Evaluation of American Indian and Alaska Native Government Administrative Records," prepared by WESTAT.

(3) The 1996 American Indian Reservation Special Test that includes the discussion of the working group meeting held July 21, 1995 and will cover the recommendations made by the working group, cultural awareness training for the Special Test, the Tribal Liaison Program, and the outreach and promotion products.

The conference call meeting is open to the public and a brief period is set aside on September 11, 1995 for public comment and questions. Those persons with extensive questions or statements must submit them in writing to the Census Bureau official named below at least three days before the meeting.

The conference call meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should also be directed to the Census Bureau official named below.

Persons wishing additional information concerning the conference call meeting or who wish to submit written statements may contact Ms. Diana Harley, Decennial Management Division, Bureau of the Census, Room 3587, Federal Building 3, Suitland, Maryland. (Mailing address: Washington, DC 20233). Telephone: (301) 457–4047.

Dated: August 29, 1995.

Harry A. Scarr,

Deputy Director, Bureau of the Census.

[FR Doc. 95–21825 Filed 8–31–95; 8:45 am]

BILLING CODE 3510–07–P

International Trade Administration

Amendment of Initiation of Countervailing Duty Administrative Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of amendment of initiation of countervailing duty administrative reviews.

SUMMARY: The Department of Commerce (the Department) published *Interim Regulations* (interim rules) in the **Federal Register** on May 11, 1995 (60 FR 25130) which affected the requirements for requesting administrative reviews of countervailing duty orders beginning January 1, 1995. Parties who had requested administrative reviews of countervailing duty orders since that time were notified of these changed requirements and were provided an opportunity to amend their requests to comply with the Department's new interim rules. Having received the amended requests for review, the Department is now amending the notices of initiation for administrative reviews requested after January 1, 1995.

EFFECTIVE DATE: September 1, 1995.

FOR FURTHER INFORMATION CONTACT: Barbara E. Tillman, Office of Countervailing Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, telephone: (202) 482–2786.

SUPPLEMENTARY INFORMATION:

Background

Since January 1, 1995, the Department received several timely requests, in accordance with 19 CFR 355.22(a) (1994), for administrative reviews of countervailing duty orders and initiated those proceedings. On May 11, 1995, however, the Department published interim rules in the **Federal Register** which amend the existing countervailing duty regulations in accordance with certain amendments to the Tariff Act of 1930, as amended (the Act) made by the Uruguay Round Agreement Act. Under the revised § 355.22(a), each year during the anniversary month of the publication of an order, (1) an interested party may request that the Secretary conduct an administrative review of specified individual producers or exporters covered by an order, if the requesting person states why the person desires the Secretary to review those particular producers or exporters; (2) a producer or exporter covered by an order may request a review of only that person; and (3) an importer may request a review of only a producer or exporter of the merchandise imported by that importer. *See* interim rules, § 355.22(a). As a result, there is no longer a preference for calculating a single country-wide rate in countervailing duty proceedings and reviews will instead be conducted on a company-specific basis.

The Department advised requesting parties of these new requirements and provided them an opportunity to comply with the interim rules. Accordingly, the Department is now amending the notices of initiation of reviews of countervailing duty orders which were requested after January 1, 1995 to indicate the specific companies for which a review was requested.

[A–580–809]

Court Decision and Suspension of Liquidation: Circular Welded Non-Alloy Steel Pipe From Korea

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of court decision and suspension of liquidation.

SUMMARY: On August 11, 1995, in the case of *Laclede Steel Co.* v. *United States*, Cons. Ct. No. 92–12–00784, Slip Op. 95–144 ("*Laclede*"), the United States Court of International Trade (the Court) affirmed the Department of Commerce's (the Department's) results of redetermination on remand of the final determination of sales at less than fair value of circular welded non-alloy steel pipe from Korea. Consistent with the decision of the United States Court of Appeals for the Federal Circuit (Federal Circuit) in *Timken Co.* v. *United States*, 893 F.2d 337 (Fed. Cir. 1990) ("*Timken*"), the Department will not order the liquidation of the subject merchandise entered or withdrawn from warehouse from consumption prior to a "conclusive" decision in this case.

EFFECTIVE DATE: August 21, 1995.

FOR FURTHER INFORMATION CONTACT: Erik Warga, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, telephone: (202) 482–0922.

SUPPLEMENTARY INFORMATION:

Background

On September 17, 1992, the Department published its final determination of sales at less-than-fair-value. *Final Determination of Sales at Less Than Fair Value: Circular Welded Non-Alloy Steel Pipe From the Republic of Korea*, 57 FR 42942 (Sept. 17, 1992). On November 2, 1992, the Department published its amendment to the final determination of sales at less-than-fair-value. *Notice of Antidumping Orders: Certain Circular Welded Non-Alloy Steel Pipe from Brazil, the Republic of Korea, Mexico, and Venezuela, and Amendment to Final Determination of Sales at Less Than Fair Value: Circular Welded Non-Alloy Steel Pipe From the Republic of Korea*, 57 FR 49453 (Nov. 2, 1992).

Subsequent to the Department's final determination, petitioners and three of the investigated companies filed lawsuits with the Court challenging this determination. Thereafter, the Court issued an Order and Opinion dated October 12, 1994, in *Laclede Steel Co.* v. *United States*, Cons. Ct. No. 92–12–00784, Slip Op. 94–160, remanding three issues to the Department. The Court instructed the Department to (1) reconsider its original determination that certain overrun pipe sales were within the ordinary course of trade; (2) grant duty drawback adjustments on all U.S. sales, including those compared to constructed value; and (3) conduct a correlation test, utilizing only the price factor, to determine whether there was a correlation between price and levels of trade for the subject merchandise.

The Department filed its remand results on March 3, 1995. On March 9, 1995, the Department filed amended results to correct certain typographical errors. In the remand results, the Department found the overrun pipe sales at issue to be outside the ordinary course of trade. In accordance with the Court's instructions, the Department granted adjustments for duty drawback for all U.S. sales. Additionally, as the results of the correlation test were inconclusive, the Department calculated foreign market value without regard to level of trade.

On August 11, 1995, the Court sustained the Department's remand results. *See Laclede Steel Co.* v. *United States*, Cons. Ct. No. 92–12–00784, Slip Op. 95–144 (CIT Aug. 11, 1995).

Suspension of Liquidation

In its decision in *Timken*, the Federal Circuit held that, pursuant to 19 U.S.C. 1516a(e), the Department must publish notice of a decision of the Court or Federal Circuit which is "not in harmony" with the Department's determination. Publication of this notice fulfills this obligation. The Federal Circuit also held that in such a case, the Department must suspend liquidation until there is a "conclusive" decision in the action. A "conclusive" decision cannot be reached until the opportunity to appeal expires or any appeal is decided by the Federal Circuit. Therefore, the Department will continue to suspend liquidation pending the expiration of the period to appeal or pending a final decision of the Federal Circuit if *Laclede* is appealed.

Dated: August 28, 1995.

Paul L. Joffe,

Acting Assistant Secretary for Import Administration.

[FR Doc. 95–21810 Filed 8–31–95; 8:45 am]

BILLING CODE 3510–DS–P

Export Trade Certificate of Review

ACTION: Notice of Issuance of an Export Trade Certificate of Review, Application No. 94–0003.

SUMMARY: The Department of Commerce has issued an Export Trade Certificate of Review to United Products of America, Inc. (UPA). This notice summarizes the conduct for which certification has been granted.

FOR FURTHER INFORMATION CONTACT: W. Dawn Busby, Director, Office of Export Trading Company Affairs, International Trade Administration, 202–482–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing Title III are found at 15 CFR part 325 (1993). The Office of Export Trading Company Affairs ("OETCA") is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a Certificate in the **Federal Register**. Under Section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Certified Conduct

Export Trade

1. Products

All products.

2. Services

All services.

3. Technology Rights

Technology rights including, but not limited to, patents, trademarks, copyrights, and trade secrets that relate to Products and Services.

4. Export Trade Facilitation Services (As They Relate to the Export of Products, Services and Technology Rights)

All Export Trade Facilitation Services, including professional services in the areas of export management, procurement management, market research and analysis, feasibility analysis, customer and supplier location, government relations and assistance with state and federal programs, foreign trade and business protocol, consulting, collection of information on trade opportunities, marketing, negotiations, joint ventures, shipping, export licensing, advertising, documentation and services related to compliance with customs requirements, insurance and financing, trade show exhibitions, organizational development, business management and labor strategies, technology transfer, transportation, and facilitating the formation of shippers associations.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operation

UPA, acting as an Export Intermediary, may:

1. Provide and/or arrange for the provision of Export Trade Facilitation Services;
2. Engage in promotional and marketing activities and collect information on trade opportunities in the Export Markets and distribute such information;
3. Enter into exclusive and/or non-exclusive licensing and/or sales agreements with Suppliers for the export of Products, Services, and/or Technology Rights in Export Markets;
4. Enter into exclusive and/or non-exclusive agreements with distributors and/or sales representatives in Export Markets;
5. Allocate export sales or divide Export Markets among suppliers for the sale and/or licensing of Products, Services and/or Technology Rights;
6. Allocate export orders among Suppliers;
7. Establish the price for Products, Services, and/or Technology Rights for sale and/or licensing in markets to export.
8. Negotiate, enter into, and/or manage licensing agreements for the export of Technology Rights;
9. Enter into contracts for shipping;
10. Exchange information on a one-to-one basis with individual Suppliers regarding inventories and near-term production schedules for the purpose of determining the availability of Products for export and coordinating exports with distributors.

Terms and Conditions of Certificate

1. In engaging in the above Export Trade Activities and Methods of Operation, UPA shall not intentionally disclose, directly or indirectly, to any Supplier, information about any other Supplier's costs, production, capacity, inventories, domestic prices, domestic sales, or U.S. business plans, strategies, or methods unless such information is already generally available to the trade or public.
2. UPA will comply with requests made by the Secretary of Commerce on behalf of the Secretary of Commerce or the Attorney General for information or documents relevant to conduct under the Certificate. The Secretary of Commerce will request such information or documents when either the Attorney General or the Secretary of Commerce believes that the information or documents are required to determine that the Export Trade, Export Trade Activities and Methods of Operation of a person protected by this Certificate of Review continue to comply with the standards of section 303(a) of the Act.

Definitions

1. "Export Intermediary" means a person who acts as a distributor, sales representative, sales or marketing agent, or broker, or who performs similar functions, including providing or arranging for the provision of Export Trade Facilitation Services.
2. "Supplier" means a person who produces, provides, or sells a Product and/or Service.

Protection Provided by the Certificate

The Certificate protects UPA, its officers, directors, and employees acting on its behalf, from private treble damage actions and government criminal and civil suits under U.S. federal and state antitrust laws for the export conduct specified in the Certificate and carried out during its effective period in compliance with its terms and conditions.

Effective Period of Certificate

The Certificate continues in effect from the effective date indicated below until it is relinquished, modified, or revoked as provided in the Act and the Regulations.

Other Conduct

Nothing in the Certificate prohibits UPA from engaging in conduct not specified in the Certificate, but such conduct is subject to the normal application of the antitrust laws.

Disclaimer

The issuance of the Certificate of Review to UPA by the Secretary of Commerce with the concurrence of the Attorney General under the provisions of the Act does not constitute, explicitly or implicitly, an endorsement or opinion by the Secretary or by the Attorney General concerning either (a) the viability or quality of the business plans of UPA or (b) the legality of such business plans of UPA under the laws of the United States (other than as provided in the Act) or under the laws of any foreign country. The application of this Certificate to conduct in export trade where the United States Government is the buyer or where the United States Government bears more than half the cost of the transaction is subject to the limitations set forth in Section V.(D.) of the "Guidelines for the Issuance of Export Trade Certificates of Review (Second Edition)", 50 FR 1786 (January 11, 1985).

Dated: August 28, 1995.

Josephine H. Ludolph,

Acting Deputy Assistant Secretary for Service Industries and Finance.

This notice summarizes the application and requests comments relevant to whether the Certificate should be issued.

FOR FURTHER INFORMATION CONTACT: W. Dawn Busby, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/482–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protects the holder and the members identified in the Certificate from state and federal government antitrust actions and from private, treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the **Federal Register** identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination whether a Certificate should be issued. An original and five (5) copies should be submitted no later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 1800H, Washington, DC. 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 95–00005."

Summary of the Application

Applicant: The Connell Company, 45 Cardinal Drive, Westfield, N.J. 07090–1099.

Application No.: 95–00005.

Date Deemed Submitted: August 24, 1995.

The Connell Company seeks a Certificate to cover the following specific Export Trade, Export Markets, and Export Trade Activities and Methods of Operations.

Export Trade

Products

Japonica brown rice.

Export Trade Facilitation Services (As They Relate to the Export of Products)

Communication and processing of export orders; inspection, fumigation and stevedoring; transportation; freight forwarding and trade documentation; insurance; billing of foreign buyers; collection of letters of credit and other financial instruments.

Export Markets

The export markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operation

To engage in Export Trade in the Export Markets, the Connell Company may:

(i) Solicit orders from foreign purchasers;

(ii) Receive information on a one-to-one basis with individual Suppliers regarding inventories and near-term production schedules for the purpose of determining the availability of Products for purchase and export;

(iii) Confer from time to time, on a one-to-one basis, with individual Suppliers regarding a potential purchase by the Connell Company with regard to the quantities, price, delivery schedule, and other pertinent matters pertaining thereto;

(iv) Advise individual Suppliers that the price paid to each Supplier for Products purchased by the Connell Company to be resold by the Connell Company to a specific foreign purchaser in a given time period is equivalent to the price paid to other Suppliers for Products to be sold; and ensure that such parity is maintained;

(v) Allocate the amount of purchases of Products by the Connell Company from individual Suppliers for resale in the Export Markets; and advise individual Suppliers of the total quantity of Products being purchased by the Connell Company from all Suppliers for resale in the Export Markets and the quantity being purchased by the Connell Company from each individual Supplier for resale in the Export Markets;

(vi) Enter into purchase agreements with one or more Suppliers for the purchase of Products in the United States, and sales agreements with one or more foreign purchasers for the sale of Products in the Export Markets;

(vii) Refuse to purchase from one or more Suppliers for reasons the Connell Company deems fit; and

(viii) As the single buyer of Products, coordinate schedules for delivery of Products to the dock among Suppliers; allocate dock space; allocate Products to various vessels, coordinate stevedoring from the inland trucks to the dock and from the dock to the vessels; arrange for inspection by both U.S. and foreign inspection services; arrange for fumigation of the Products; arrange for various documentation regarding the cargo; and provide for other Export Trade Facilitation services as they relate to the export of Products.

Definitions

Supplier means a person that produces, provides, or sells Products.

Dated: August 28, 1995.

Josephine H. Ludolph,

Acting Deputy Assistant Secretary for Service Industries and Finance.

BILLING CODE 3510–DR–P

Proposed Classification System for Environmental Technologies Goods and Services

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Request for comments on and notice of a public meeting regarding a proposed classification system for Environmental Technologies Goods and Services.

SUMMARY: The Department of Commerce is seeking comment on a classification system to be used to collect data on the production of goods and services used for measuring, preventing, limiting or correcting environmental damages to water, air and soil as well as problems related to waste, noise and ecosystems. The Environmental Trade Working Group of the Trade Promotion Coordinating Committee and the Environmental Technology Initiative have concluded, in response to requests from industry, state governments and environmental organizations that consistent and reliable data on environmental technologies goods and services are needed. In order to collect this data a classification system is required. A draft of that classification is included as part of this notice.

This classification system will be used by Census to conduct a special survey of firms producing environmental technologies goods and providing enviromental services. This initiative is being undertaken in coordination with the Organization for Economic Cooperation and Development in Paris, France with the objective of developing comparable data for all countries that are major producers of environmental technologies goods and services.

PUBLIC MEETING: On September 18, 1995 at 1 p.m. a public meeting will be held to give all interested parties an opportunity to comment on the proposed classification system. Comments are particularly sought as to the level of detail and products and services that should be included but are not. The meeting will be held at the Department of Commerce in Room 1414 of the Herbert Hoover Building, 14th and Constitution, NW, Washington, DC. While not required, it would be appreciated if those intending to speak could notify Jonathan Menes at the address below so as to facilitate the scheduling of speakers.

WRITTEN COMMENTS: Written comments are requested no later than September 22, 1995. Comments should be addressed to Jonathan Menes, Office of Trade and Economic Analysis, Room 2815, U.S. Department of Commerce, Washington, DC 20230. In addition, comments may be submitted by fax, 202–482–5145 or via internet to "jmenes@doc.gov. Questions regarding this notice, additional information or copies of this notice can be obtained by contacting Mr. Menes.

FOR FURTHER INFORMATION CONTACT: Jonathan Menes, Office of Trade and Economic Analysis, Room 2815, U.S. Department of Commerce, Washington, DC 20230, (202) 482–5145, fax, (202) 482–4614, internet jmenes@doc.gov.

SUPPLEMENTARY INFORMATION: In 1993, President Clinton requested that Secretary Brown lead an interagency effort to assess the competitiveness of current environmental technologies and to develop a strategy to give U.S. companies the trade development promotion efforts and technical assistance that they need to increase exports and create U.S. jobs as well as to promote a better environment. The interagency group charged with responding to that mandate found that very little data was available and what there was, was inconsistent and based on very small samples. The interagency group also held a series of meetings where many from the private sector expressed a need for better date regarding the environmental industry. As a result an environmental data working group was established to explore ways to develop better data.

In order to develop data, the group concluded that a classification system for environmental technologies goods and services was needed. Such a system has been developed drawing on inputs from the private and public sector. In addition, a parallel effort through the Organization for Economic Cooperation and Development was initiated so as to ensure the classification system and the data collected using it will be comparable with environmental date collection in other industrial countries.

This system will initially be used by the Bureau of the Census to conduct a special survey in 1996. The proposed classification system is as follows:

Total environmental products
Total environmental services
Total Air pollution control
Total Air pollution control products
Total Air particulate emissions collectors
  Electrostatic precipitators
  Fabric filters
  Mechanical collectors
  Wet scrubbers
Total gaseous emissions control devices
  Catalytic oxidation systems
  Thermal and direct oxidation systems
  Scrubbers (gas absorbers)
  Wet FGD systems
  Dry FGD systems
  Gas adsorbers
Total mobile source controls
  Catalytic converters
  On board monitoring/control systems
  Other
Total Air pollution control services
  Modeling
  Emissions monitoring
  Permitting and Licensing services
  Analytical services
  Assessment, evaluation, and planning
Total Water Pollution Control
Total Water Pollution Control Products
Total monitoring and analytical products
  Freezers
  Microtomes
  Centrifuges
  Gas Chromatography
  Mass Spectrometers
  Other instruments
  Leak detectors
  Industrial process monitoring devices
  Radiation detection devices
Water treatment chemicals
Total Water treatment equipment
  Desalinization equipment
  Storage tanks and process vessels
  Separators
  Gas separators
  Fluid filters
  Sewage systems—construction
  Water supply and delivery—construction
Total Water/Wastewater Services
  Hydrogeology services
  Ground water resource analysis
  Health and ecological risk assessment
  Treatment planning and analysis
  Analytical laboratory services
  Construction and engineering management & design
  Sewerage systems—privately operated
  Private water supply and delivery
  Licensing and permitting
Total Energy Conservation/Efficiency Products
Total Renewable Energy residential/commercial/industrial
  Solar residential/ commercial (active)
  Solar residential/ commercial (passive)
  Wind energy conversion (residential)
  Residential photovoltaics
  Residential wood stoves
  Low & medium temp solar process heat
  Alcohol fermentation plant
  Methanol/ethanol production (non petroleum based)
  Low & medium Btu gas from pyrolysis/anaerobic digestion/wood gasification
  Industrial wood fired boiler
Utility
  Wood fired steam electric plant

BILLING CODE 3510–DR–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

PROCUREMENT LIST; ADDITION

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Addition to the Procurement List.

SUMMARY: This action adds to the Procurement List a commodity to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 2, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: On June 30, 1995, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice (60 FR 34235) of proposed addition to the Procurement List.

Comments were received from one of the current contractors for this paper towel. The commenter claimed that adding the towel to the Procurement List would have a significantly adverse effect on the contractor and would result in dramatically higher prices because there would no longer be competition on this product. The contractor also observed that nonprofit agencies employing people who are blind or severely disabled are not able to produce items themselves but have to subcontract production to manufacturers.

The current contract which this contractor holds with the Government for these towels represents only a very small percentage of its total sales, and a considerably smaller percentage than it claimed. Even if the impact of the 1993 addition to the Procurement List of another commodity for which the contractor held a Government contract at the time is taken into account, the impact of the Committee's action on this contractor does not reach a level which the Committee considers severe.

The Committee is required to set a fair market price for each commodity and service added to the Procurement List, and to adjust the price as conditions change to assure the price remains competitive. The price established by the Committee does not represent a significant increase over the current Government contract price.

The nonprofit agency which will produce the towels will convert paper stock into finished towels, as well as perform all packaging operations. It should be noted that the packaging operations are the labor-intensive parts of towel production which create jobs for blind people, as the other parts of the process are done by machine.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the commodity, fair market price, and impact of the addition on the current or most recent contractors, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.
2. The action does not appear to have a severe economic impact on current contractors for the commodity.
3. The action will result in authorizing small entities to furnish the commodity to the Government.
4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity proposed for addition to the Procurement List.

Accordingly, the following commodity is hereby added to the Procurement List:

Towel, Paper
8540–00–291–0392

This action does not affect current contracts awarded prior to the effective date of this addition or options exercised under those contracts.

E.R. Alley, Jr.,

Deputy Executive Director.

[FR Doc. 95–21823 Filed 8–31–95; 8:45 am]

BILLING CODE 6820–33–P

Procurement List Addition

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Addition to the Procurement List.

SUMMARY: This action adds to the Procurement List a commodity to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 2, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: On June 23, 1995, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice (60 F.R. 32658) of proposed addition to the Procurement List. Comments were received from the current contractor for this day planner. The contractor noted that both it and the nonprofit agency which would produce the planner under the Javits-Wagner-O'Day (JWOD) Program hold Multiple Award Schedule (MAS) contracts to provide day planners to the Government. Addition of the planner to the Procurement List would, according to the contractor, foreclose its ability to sell the planner to the Department of Defense, thus depriving it of a market which is essential to its success and seriously impacting the company.

The Committee's action would only add the requirements of the Defense Supply Service, Washington, DC (DSSW) for a second color binder of the planner to the Procurement List, not the entire Department of Defense. This requirement represents a very small percentage of the contractor's total sales, even when the impact of the recent addition of the DSSW requirement of another color of the same day planner is taken into account. The contractor will retain its right to sell to the rest of the Department of Defense and the rest of the Government under its MAS contract and other individual contracts. Consequently, the Committee does not

believe that its action will have a severe adverse impact on the contractor.

The contractor contended that the Committee's action would be inappropriate because it would undermine the MAS approach of giving all organizations a level playing field to compete in for Federal business. The Committee's action will not deprive the contractor or other MAS contractors of the right to compete to sell this product to other Federal customers. The fact that the nonprofit agency designated by the Committee to produce the planner also holds an MAS contract does no more than give that agency the right to compete for Federal business. That right does not, however, guarantee any work for people with severe disabilities, while the action being taken by the Committee will assure a limited business base. The Committee does not believe its action will undermine the MAS program, which will continue to encompass the vast majority of Federal sales of this product.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the commodity, fair market price, and impact of the addition on the current or most recent contractors, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.
2. The action does not appear to have a severe economic impact on current contractors for the commodity.
3. The action will result in authorizing small entities to furnish the commodity to the Government.
4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity proposed for addition to the Procurement List.

Accordingly, the following commodity is hereby added to the Procurement List:

Organizer, Day Planner, Travel Size
7530–00–D16–0057 (Burgundy)
(Requirements for the Defense Supply Service, Washington, DC)

This action does not affect current contracts awarded prior to the effective date of this addition or options exercised under those contracts.

E.R. Alley, Jr.,

Deputy Executive Director.

[FR Doc. 95–21821 Filed 8–31–95; 8:45 am]

BILLING CODE 6820–33–P

Procurement List; Proposed Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to the Procurement List commodities and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 2, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities and services to the Government.
2. The action does not appear to have a severe economic impact on current contractors for the commodities and services.
3. The action will result in authorizing small entities to furnish the commodities and services to the Government.
4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities and services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following commodities and services have been proposed for addition to Procurement List for production by the nonprofit agencies listed:

Commodities

Plug, Ear, Hearing Protection
6515–00–137–6345
NPA: Orange County Rehabilitation Center—Occupations, Inc., Middletown, New York
Brush, Wire
7920–00–900–3577
NPA: Industries for the Blind, Inc., Milwaukee, Wisconsin

Services

Grounds Maintenance, Puget Sound Naval Shipyard, Bremerton, Washington
NPA: Peninsula Services, Bremerton, Washington
Janitorial/Custodial, Presidio of Monterey, Annex and Child Development Center, Monterey, California
NPA: PRIDE Industries, Roseville, California
Janitorial/Custodial, Allison Park U.S. Army Reserve Center #2, Buildings 1 and 5, Allison Park, Pennsylvania
NPA: Vocational Rehabilitation Center of Allegheny County, Pittsburgh, Pennsylvania
Janitorial/Custodial, U.S. Army Reserve Center, New Kensington, Pennsylvania
NPA: Family Services of Western Pennsylvania, New Kensington, Pennsylvania

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Logistics Modernization

ACTION: Notice of Advisory Committee Meeting.

SUMMARY: The Defense Science Board Task Force on Logistics Modernization will meet in open session on September 25–26, 1995 at the Institute for Defense Analyses (IDA), 1801 N. Beauregard Street, Alexandria, Virginia.

The mission of the Defense Science Board is to advise the Secretary of

Defense and the Under Secretary of Defense for Acquisition & Technology on scientific and technical matters as they affect the perceived needs of the Department of Defense.

Persons interested in further information should call LTC Kerry M. Brown at (703) 697–7980.

Dated: August 29, 1995.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000-04-M

Department of the Navy

Notice of Rescheduling of Public Hearing and Extension of the Comment Period for the Draft Environmental Impact Statement for Construction and Operation of a Relocatable Over the Horizon Radar, Puerto Rico

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, as implemented by the Council on Environmental Quality Regulations (40 CFR Parts 1500–1508), and the Commonwealth of Puerto Rico Public Law Number Nine, section 4(c), the Department of the Navy has prepared and filed with the U.S. Environmental Protection Agency the Draft Environmental Impact Statement (DEIS) for construction and operation of a Relocatable Over the Horizon Radar (ROTHR) system in Puerto Rico.

On August 7, 1995, the Navy announced in the **Federal Register** the postponement of public hearings scheduled for August 8, 1995 in Lajas, Puerto Rico and for August 10, 1995 in Vieques, PR. The public hearings were to solicit public comment on the DEIS for ROTHR. This announcement is to notify the public that the public hearings have been rescheduled. The Puerto Rico Environmental Quality Board and the Department of the Navy will hold two public hearings, one on September 26, 1995 from 6:30 PM to 9:30 PM at the Municipal Theater, Lajas, PR; and another on September 28, 1995 from 6:30 PM to 9:30 PM at the Town Hall Community Center, Vieques, PR. In order to allow additional time for public review on the DEIS, the public comment period has been extended to October 13, 1995.

The DEIS has been distributed to various Federal, commonwealth, and local agencies, elected officials, special interest groups, and libraries. The DEIS is available for review at the following locations: Town Hall, Municipality of Vieques, Vieques Island, PR; Public Library, Municipality of Lajas, PR; and Mayor's Office, Lajas, PR. A limited number of copies of the DEIS are available by contacting Ms. Linda Blount, (804) 322–4892 or Sr. Jose Negron, Commander Fleet Air, Caribbean, (809) 865–4429.

Written statements and/or comments regarding the DEIS should be mailed to: Department of the Navy, Commander, Atlantic Division, Naval Facilities Engineering Command, 1510 Gilbert Street, Norfolk, VA 23511–2699 (Attn: Ms. Linda Blount, Code 2032LB). Questions may be directed to Ms. Linda Blount, (804) 322–4892 or Sr. Jose Negron, Commander Fleet Air, Caribbean, (809) 865–4429. All comments must be postmarked no later than October 13, 1995 to become part of the official record.

Dated: August 29, 1995.

M.D. Schetzsle,

Lt, JAGC, USNR, Alternate Federal Register Liaison Officer.

BILLING CODE 3810-FF-M

DEPARTMENT OF EDUCATION

Office of Vocational and Adult Education; Intent to Repay to the Iowa State Board for Vocational Education Funds Recovered as a Result of a Final Audit Determination

AGENCY: Department of Education.

ACTION: Notice of intent to award grantback funds.

SUMMARY: Under section 459 of the General Education Provisions Act (GEPA), 20 U.S.C. 1234h (1988), the Secretary of Education (Secretary) intends to repay to the Iowa Department of Education (Iowa), under a grantback arrangement, an amount equal to 75 percent of the principal amount of Vocational Education Basic Grant funds recovered by the U.S. Department of Education (Department) as a result of the final audit determination (ACN: 07–82144) in this matter. The Department's recovery of funds followed a settlement reached between the parties under which Iowa refunded $178,500 in principal, to the Department in full resolution of the Department's final audit determination for fiscal year (FY) 1986. This notice describes Iowa's plan for the use of the repaid Vocational Education funds and the terms and conditions under which the Secretary intends to make those funds available. This notice invites comments on the proposed grantback.

DATES: All comments must be received on or before October 2, 1995.

ADDRESSES: All written comments should be addressed to Dr. Marcel R. DuVall, Chief, Finance Branch, Division of Vocational-Technical Education, Office of Vocational and Adult Education, U.S. Department of Education, 600 Independence Avenue SW., (Mary E. Switzer Building, room 4320, MS–7324), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Dr. Marcel R. DuVall, Telephone (202) 205–9502. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8239 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

A. Background

Under a settlement agreement between the Department and Iowa, the Department recovered $178,500 from Iowa in full resolution of all claims arising from an audit of the Iowa State Department of Education, covering FY 1986. Of this amount, $132,959 is considered to be a recovery of Vocational Education Basic Grant funds.

The Department's original claim of $240,803.68 was contained in a final letter of determination issued by the Assistant Secretary for Vocational and Adult Education, et al., on July 23, 1990. The parties determined that $19,129.24 of the refund demand was barred by the statute of limitations. This claim arose from findings related to Iowa's administration of its Handicapped State Grant program, Civil Rights Technical Assistance and Training program, Adult Education program and Vocational Education program. The Vocational Education program was administered under the provisions of the Carl D. Perkins Vocational and Applied Technology Education Act of 1990 (Perkins II).

In the July 23, 1990, letter, the Assistant Secretary determined that Iowa violated the regulations governing payroll expenditures and maintenance of time distribution records. For the applicable programs, Iowa improperly allocated payroll expenditures based on predetermined budgets and failed to maintain appropriate time distribution records for employees who worked on more than one cost objective, thus violating provisions of the cost principles implemented at 34 CFR Part 74, Subpart Q, Appendix C, Part II (B)(10)(b).

Pursuant to a November 12, 1991, agreement resolving fully all claims in this matter, Iowa repaid the Department $178,500. The full payment was made

on November 22, 1993. The repayment included $132,959 of Vocational Education funds.

B. Authority for Awarding a Grantback

Section 459(a) of GEPA, 20 U.S.C. section 1234h, the authority applicable to this grantback request, provides that whenever the Secretary has recovered funds paid under an applicable program because the recipient made an expenditure of funds that was not allowable, or otherwise failed to discharge its responsibility to account properly for funds, the Secretary may consider those funds to be additional funds available for that program and may arrange to repay to the recipient affected by that action an amount not to exceed 75 percent of the recovered funds. The Secretary may enter into this grantback arrangement if the Secretary determines that—

(1) The practices or procedures of the recipient that resulted in the violation of law have been corrected, and that the recipient is in all other respects in compliance with the requirements of that program;

(2) The recipient has submitted to the Secretary a plan for the use of those funds pursuant to the requirements of that program and, to the extent possible, for the benefit of the population that was affected by the failure to comply or by the misuse of funds that resulted in the recovery; and

(3) The use of the funds in accordance with that plan would serve to achieve the purposes of the program under which the funds were originally paid.

C. Plan for Use of Funds Awarded Under a Grantback Arrangement

Pursuant to section 459(c) of GEPA, Iowa has applied for a grantback of $99,719, or 75 percent of the Vocational Education portion of the recovered funds. Iowa has submitted a plan for use of the proposed grantback funds, consistent with Perkins II, which is currently in effect. Iowa plans to conduct a third-party evaluation of the applied academic coursework incorporated into Iowa's tech-prep education programs and to purchase equipment needed to connect the Iowa Department of Education to the Iowa Communication Network (ICN).

Specifically, Iowa plans to utilize the requested grantback funds to—

(1) Contract with an independent firm to design and conduct an evaluation of the applied academics course being administered as a portion of Iowa's tech-prep education programs. The State developed and implemented a framework model for tech-prep education programs approximately three years ago. Many secondary and postsecondary institutions in the State have incorporated curriculum materials, based upon this framework model, into their own tech-prep education programs. These institutions are interested in obtaining data regarding the model program's effectiveness. The contractor will produce a final report summarizing the findings of this evaluation.

(2) Purchase equipment needed to link the State Department of Education to a statewide fiber optic network. This network connects all of Iowa's community colleges and provides for at least one education end point in all of the State's 99 counties. Gaining access to the ICN will enable the State to provide direct technical assistance to Perkins fund recipients, helping them to resolve administrative issues and to facilitate supplemental support services for students with special needs. The network will also improve basic communications between The State Board and the State community colleges. The additional equipment Iowa plans to purchase will serve to advance the quality of programs delivered by, and coordinated through, the postsecondary State system, resulting in Statewide benefit to vocational education, and maximizing the impact of the grantback funds.

D. The Secretary's Determination

The Secretary has carefully reviewed the plan submitted by Iowa and other relevant documentation. Based upon that review, the Secretary has determined that the conditions under section 459 of GEPA have been met.

This determination is based upon the best information available to the Secretary at the present time. If this information is not accurate or complete, the Secretary is not precluded from taking appropriate administrative action at a later date. In finding that the conditions of section 459 of GEPA have been met, the Secretary makes no determination concerning any pending audit recommendations or final audit determinations.

E. Notice of the Secretary's Intent to Enter into a Grantback Arrangement

Section 459(d) of GEPA requires that, at least 30 days before entering into an arrangement to award funds under a grantback, the Secretary must publish in the **Federal Register** a notice of intent to do so, and the terms and conditions under which the payment will be made.

In accordance with section 459(d) of GEPA, notice is hereby given that the Secretary intends to make funds available to the Iowa State Division of Vocational Education under a grantback arrangement. The grantback award would be in the amount of $99,719, which is 75 percent—the maximum percentage authorized by the statute—of the principal amount of Vocational Education Basic Grant funds recovered by the Department as a result of the final audit determination and the settlement in this matter.

F. Terms and Conditions Under Which Payments Under a Grantback Arrangement Would Be Made

Iowa agrees to comply with the following terms and conditions under which payment under a grantback arrangement would be made:

(1) Iowa will expend the funds awarded under the grantback in accordance with—

(a) All applicable statutory and regulatory requirements;

(b) The plan that was submitted and any amendments in that plan that are approved in advance of the grantback by the Secretary; and

(c) The budget that was submitted with the plan and any amendments to the budget that are approved in advance of the grantback by the Secretary.

(2) All funds received under the grantback arrangement must be obligated by September 30, 1995 in accordance with section 459(c) of GEPA and Iowa's plan.

(3) Iowa will, no later than January 1, 1996, submit a report to the Secretary which—

(a) Indicates that the funds awarded under the grantback have been spent in accordance with the proposed plan and approved budget; and

(4) Separate accounting records must be maintained documenting the expenditures of funds awarded under the grantback arrangement.

(Catalog of Federal Domestic Assistance Number 84.048, Basic State Grants for Vocational Education).

Dated: August 24, 1995.

Patricia W. McNeil,

Acting Assistant Secretary for Vocational and Adult Education.

[FR Doc. 95–21919 Filed 8–31–95; 8:45 am]

BILLING CODE 4000-01-P

Intent To Repay to the Washington State Board for Vocational Education Funds Recovered as a Result of Two Final Audit Determinations

AGENCY: Department of Education.

ACTION: Notice of intent to award grantback funds.

SUMMARY: Under section 459 of the General Education Provisions Act

(GEPA), 20 U.S.C. 1234h, the Secretary of Education (Secretary) intends to repay to the Washington State Board for Vocational Education (Washington), under a grantback arrangement, an amount equal to 75 percent of the principal amount of funds recovered by the U.S. Department of Education (Department) as a result of the final audit determinations in this matter. The Department's recovery of funds followed settlements reached between the parties under which Washington refunded $49,500 (ACN: 10–03372G) and $50,000 (ACN: 10–13343G), equalling a total of $99,500 in principal, to the Department in full resolution of the Department's final audit determinations for fiscal years (FYs) 1989 and 1990. This notice describes Washington's plan for the use of the repaid funds and the terms and conditions under which the Secretary intends to make those funds available. This notice invites comments on the proposed grantback.

DATES: All comments must be received on or before October 2, 1995.

ADDRESSES: All written comments should be addressed to Dr. Marcel R. DuVall, Chief, Finance Branch, Division of Vocational-Technical Education, Office of Vocational and Adult Education, U.S. Department of Education, 600 Independence Avenue SW., (Mary E. Switzer Building, room 4320, MS–7324), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Dr. Marcel R. DuVall, (202) 205–9502. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8239 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION

A. Background

Under settlement agreements between the Department and Washington, the Department recovered $49,500 (ACN: 10–03372G) and $50,000 (ACN: 10–13343G) from Washington in full resolution of all claims arising from audits of Washington's State Division of Vocational Education, covering FYs 1989 and 1990, respectively.

The Department's original claims of $192,354 (ACN: 10–03372G (FY 1989)) and $135,248 (ACN: 10–13343G (FY 1990)) were contained in final letters of determination issued by the Assistant Secretary on March 29, 1991, and March 31, 1993, respectively. These claims arose from findings related to Washington's administration of its vocational education program under the provisions of the Carl D. Perkins Vocational Education Act. 20 U.S.C. 2301 et seq. (1988)(Perkins I).

In the March 29, 1991 letter for FY 1989, the Assistant Secretary determined that Washington violated the Federal regulations governing funds set aside for disabled and disadvantaged students awarded under Title II, Part A, of Perkins I. Specifically, Washington used funds to pay for salaries and instructional programs that served students who were not enrolled in vocational education programs, thus violating provisions implemented at 34 CFR 401.52(a) and 401.53(a)(1) and 401.58(a)(1)(1989). In addition, Washington violated the requirement, implemented at 34 CFR 401.52(a) and 401.53(a)(1), that funds allocated for disabled and disadvantaged individuals be used only for the excess costs incurred as a result of serving those populations. The Assistant Secretary further determined that Washington violated the requirement at 20 U.S.C. 2323(b)(16)(1988) that Perkins I funds be used to supplement and not supplant State and local funds.

In the March 31, 1993 letter, the Assistant Secretary determined that Washington awarded funds reserved for disabled and disadvantaged under Title II, Part A, of Perkins I to 11 community colleges based on applications proposing services that were not allowable under Perkins I. The Assistant Secretary determined that the colleges used these funds to pay for salaries and instructional programs that either served disadvantaged and disabled individuals who were not enrolled in vocational education programs or that served students who were not members of those special populations. 34 CFR 401.52(a) and 401.53(a)(1)(1990).

The settlement negotiations resulting from Washington's appeal of the Assistant Secretary's March 29, 1991 and March 31, 1993 determinations culminated in settlement agreements. The settlement agreement for the March 29, 1991 determination (ACN: 10–03372G) was executed on June 5, 1992. The Department received full payment of $49,500 for this determination in August 1992. The settlement agreement for the March 31, 1993 determination (ACN: 10–13343G) was executed on May 10, 1995. The Department received full payment of $50,000 for this determination on August 8, 1994.

B. Authority for Awarding a Grantback

Section 459(a) of GEPA, 20 U.S.C. § 1234(h), provides that whenever the Secretary has recovered funds following a final audit determination with respect to any applicable program, the Secretary may consider those funds to be additional funds available for the program and may arrange to repay to the State or local educational agency affected by that determination an amount not to exceed 75 percent of the recovered funds. The Secretary may enter into this grantback arrangement if the Secretary determines that—

(1) The practices or procedures of the recipient that resulted in the violation of law have been corrected, and that the recipient is in all other respects in compliance with the requirements of that program;

(2) The recipient has submitted to the Secretary a plan for the use of those funds pursuant to the requirements of that program and, to the extent possible, for the benefit of the population that was affected by the failure to comply or by the misuse of funds that resulted in the recovery; and

(3) The use of the funds in accordance with that plan would serve to achieve the purposes of the program under which the funds were originally paid.

C. Plan for Use of Funds Awarded Under a Grantback Arrangement

Pursuant to section 459(a)(2) of GEPA, Washington has applied for a grantback of $74,625, or 75 percent of the $99,500 total amount repaid to the Department under the FY 1989 and FY 1990 settlement agreements, and has submitted a plan for use of the proposed grantback funds, consistent with the Carl D. Perkins Vocational and Applied Technology Education Act of 1990 (Perkins II), which is currently in effect. Washington plans to use the FY 1989 funds to purchase equipment to assist disabled and disadvantaged populations enrolled in remedial vocational programs. Utilizing the FY 1990 funds, Washington plans to hire personnel and to purchase equipment to develop a communication system for the State and postsecondary institutions involved in vocational-technical programs.

Specifically, Washington plans to utilize the requested FY 1989 grantback funds, totaling $37,125, to—

(1) Purchase updated adaptive equipment to assist disabled and disadvantaged students enrolled in remedial and vocational training programs at South Seattle Community College, so that these students can fully participate in vocational programs. This equipment will include four G.E. Fastrac speed listening cassette recorders and adapters, two Sharp Talking Clock calculators, three adjustable computer tables for wheelchair users, four Language Masters, one personal FM Loop system, and one portable disk drive for Type 'n Speak equipment ($3,958);

(2) Purchase adaptive equipment to assist vocational education students enrolled at Spokane Community College including: four high-back stools designed to accommodate students with physical disabilities (including back injuries), six portable spell checkers for the learning disabled, and one computer workstation specially designed for the disabled ($9,119);

(3) Purchase equipment to assist vocational education students with disabilities at Shoreline Community College, including: five micro tape recorders, one computer station that utilizes speech recognition for text input, one Dragon Dictate that also uses speech recognition input, and one Laserjet 4M+ printer to permit special population students to print from laptop computers ($6,330);

(4) Purchase and enhance adaptive equipment for disabled students enrolled in vocational education programs at Everett Community College, including: four wrist rests, two ergonomic keyboards, two FM Comtrex systems, four 4-track recorders, two 2MG memory computer boards, one 4MG memory computer board, and four ergonomic chairs ($6,715);

(5) Purchase a laptop computer and related software for hearing-impaired vocational education students at Green River Community College ($3,291);

(6) Purchase adaptive equipment for disabled students enrolled in vocational education at Wenatchee Valley Community College, including: one Vista VGA system to provide computer magnification capability for the visually impaired, and one door to provide disabled access into the Student Services facility ($7,712).

Washington also plans to utilize the requested FY 1990 grantback funds, totaling $37,500, to—

(1) Purchase one Hewlett Packard NetServer and related equipment to provide an effective communication system between the State Board and local community and technical colleges. Washington plans to establish an accurate and consistent method of exchange for data related to Perkins II, its rules and regulations, especially as it relates to disadvantaged and disabled populations. The information would be available for special population coordinators, counselors, teachers and local administrators. The system would share information about "best practices", providing examples of exemplary utilization of Perkins funds for disabled and disadvantaged students. It would also provide E-mail access between the State and the local college community, permitting a question and answer dialog to be established ($10,000);

(2) Purchase hardware and software needed to support the user network and to provide applicable data. The system information would serve as a clearinghouse resource for disadvantaged and disabled populations, providing data related to career guidance and counseling, job placement; and employment assistance. The system would also be utilized to contact and aid employers interested in hiring disabled or disadvantaged vocational education students. It would provide assistance and information about job restructuring and adaptive modifications needed to accommodate the employment of special needs students ($7,500);

(3) Retain the services, by contract, of a computer project technician, who would develop and implement the communication system ($18,000); and

(4) Conduct a pilot testing and dissemination program of the completed computer network system ($2,000).

Washington plans to use the FY 1989 grantback funds to enhance access to vocational education programs for disabled and disadvantaged students. As is indicated in Washington's grantback plan, the additional equipment Washington plans to purchase will serve to advance the quality of programs delivered by, and coordinated through, the postsecondary State system, resulting in Statewide benefit to vocational education, and maximizing the impact of the grantback funds.

Washington plans to use the FY 1990 grantback funds to enable an accurate and efficient exchange of information about vocational education, especially as it relates to disadvantaged and disabled populations, to local administrators, teachers, and students within the community and technical college system. It will further allow disadvantaged and disabled vocational students to access quickly and easily a broad range of information relevant to their particular needs.

D. The Secretary's Determination

The Secretary has carefully reviewed the plan submitted by Washington and other relevant documentation. Based upon that review, the Secretary has determined that the conditions under section 459 of GEPA have been met.

These determinations are based upon the best information available to the Secretary at the present time. If this information is not accurate or complete, the Secretary is not precluded from taking appropriate administrative action at a later date. In finding that the conditions of section 459 of GEPA have been met, the Secretary makes no determination concerning any pending audit recommendations or final audit determinations.

E. Notice of the Secretary's Intent To Enter into a Grantback Arrangement

Section 459(d) of GEPA requires that, at least 30 days before entering into an arrangement to award funds under a grantback, the Secretary must publish in the **Federal Register** a notice of intent to do so, and the terms and conditions under which the payment will be made.

In accordance with section 459(d) of GEPA, notice is hereby given that the Secretary intends to make funds available to the Washington State Division of Vocational Education under a grantback arrangement. The grantback award would be in the amount of $74,625, which is 75 percent—the maximum percentage authorized by the statue—of the principal recovered to date by the Department as a result of the final audit determinations and the settlements in this matter.

F. Terms and Conditions Under Which Payments Under a Grantback Arrangement Would Be Made

Washington agrees to comply with the following terms and conditions under which payment under a grantback arrangement would be made:

(1) Washington will expend the funds awarded under the grantback in accordance with—

(a) All applicable statutory and regulatory requirements;

(b) The plan that was submitted and any amendments in that plan that are approved in advance of the grantback by the Secretary; and

(c) The budget that was submitted with the plan and any amendments to the budget that are approved in advance of the grantback by the Secretary.

(2) All funds received under the grantback arrangement must be obligated by September 30, 1995 for ACN: 10–03372G and September 30, 1998 for ACN: 10–13343G, in accordance with section 459(c) of GEPA and Washington's plan.

(3) Washington will, no later than January 1, 1996, submit a report to the Secretary which—

(a) Indicates that the funds awarded under the grantback have been spent in accordance with the proposed plan and approved budget; and

(b) Describes the results and effectiveness of the project for which the funds were spent.

(4) Separate accounting records must be maintained documenting the

expenditures of funds awarded under the grantback arrangement.

(Catalog of Federal Domestic Assistance Number 84.048, Basic State Grants for Vocational Education).

Dated: August 24, 1995.

Patricia W. McNeil,

Acting Assistant Secretary for Vocational and Adult Education.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Prototype Spent Nuclear Fuel Dry Transfer System

AGENCY: Office of Civilian Radioactive Waste Management, DOE.

ACTION: Notice.

SUMMARY: On July 14, 1995, the U.S. Department of Energy published a **Federal Register** Notice entitled "Notice of Prototype Spent Nuclear Fuel Dry Transfer System Project" (60 FR 36267). That notice invited letters of interest from electric utilities and other public and private entities interested in participating with DOE in a cooperative project for prototype fabrication, demonstration and/or licensing of a spent nuclear fuel dry transfer system currently being designed under a Cooperative Agreement between DOE and the Electric Power Research Institute (EPRI).

The Department of Energy hereby announces that the due date for letters of interest in response to that notice has been extended to September 22, 1995.

DATES: Letters of interest must be received no later than September 22, 1995.

ADDRESSES: Letters of interest should be sent to the U.S. Department of Energy, Attn: Michelle Miskinis, HR–561.21, 1615 M Street NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Michelle Miskinis, (202) 634–4413.

SUPPLEMENTARY INFORMATION: The DOE/EPRI design consists of portable spent nuclear fuel dry transfer equipment which operates in a shielded facility to safely transfer spent nuclear fuel between casks or canister based systems. This system has potential applications at utility and Federal sites. Further details regarding the dry transfer system are included in the previous **Federal Register** Notice (60 FR 36267). Letters of interest must contain the information specified in that notice.

Issued in Washington, DC, on August 28, 1995.

Lake Barrett,

Deputy Director, Office of Civilian Radioactive Waste Management.

[FR Doc. 95–21787 Filed 8–31–95; 8:45 am]

BILLING CODE 6450–01–P

Chicago Operations Office; Financial Assistance Award; the Electrochemical Society, Inc.

AGENCY: U.S. Department of Energy.

ACTION: Intent to Award Based on an Unsolicited Application.

SUMMARY: The Department of Energy announces that pursuant to the provisions of 10 CFR 600.14, it intends to renew Grant No. DE–FG02–87CE34012 based on an unsolicited application received from the Electrochemical Society for the Electrochemical Society Summer Fellowship Program. The determination to renew this grant is based on the following information: A technical evaluation of the proposed project was performed pursuant to 10 CFR 600.14 (d). This renewal will provide five summer fellowships during 1996, 1997 and 1998 for students engaged in electrochemical research. The research will address energy-related aspects of electrochemical science and engineering, as well as solid state science and engineering relevant to batteries and fuel cells. Photoelectrochemistry and electrochemical processes in materials will also be explored with the goal being to reduce energy consumption. The objectives of this program are to increase students' awareness of the energy efficiency and renewable energy programs at DOE, contribute new understanding of basic phenomena related to electrochemical energy conversion, and provide training for new scientists and technologists in the field electrochemistry to ensure a continuing reservoir of electrochemical expertise. The probability of achieving the anticipated objectives is extremely high. The facilities and qualifications of the key personnel are appropriate. DOE knows of no other entity which is conducting or planning to conduct such an effort. The DOE share of funding is estimated at $45,000 for the three year project period which shall go directly to the fellowship recipients in the form of five $3,000 scholarships each year. The anticipated term of the renewal period is June 1, 1996 through May 31, 1999.

FOR FURTHER INFORMATION CONTACT: June M. Wiinikka, U.S. Department of Energy, Chicago Operations Office, Acquisition and Assistance Group, 9800 South Cass Avenue, Argonne, IL 60439, (708) 252–2126. Ms. Kerry Cullerton, U.S. Department of Energy, Chicago Operations Office, Acquisition and Assistance Group, 9800 South Cass Avenue, Argonne, IL 60439, (708) 252–2107.

Issued in Chicago, Illinois on August 25, 1995.

BILLING CODE 6450–01–P

Federal Energy Regulatory Commission

[Docket No. ER95–1489–000, et al.]

Southern California Edison Company, et al.; Electric Rate and Corporate Regulation Filings

August 25, 1995.

Take notice that the following filings have been made with the Commission.

1. Southern California Edison Company

[Docket No. ER95–1489–000]

Take notice that on August 23, 1995, Southern California Edison Company (Edison) tendered for filing supplements to its initial filing in the above docket. The supplements amend the rate to be effective June 1, 1995, for the Edison-Riverside Washington Water Power Firm Transmission Service Agreement between Edison and the City of Riverside, correct the losses stated for the Edison-IID Firm Transmission Service Agreement between Edison and Imperial Irrigation District, and correct a typographical error in the losses shown for the Edison-AEPCO Firm Transmission Service Agreement between Edison and the Arizona Electric Power Cooperative.

Edison states that copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Comment date: September 5, 1995, in accordance with Standard Paragraph E at the end of this notice.

2. Navajo Tribal Utility Authority v. Public Service Company of New Mexico

Docket No. EL95–75–000)

Take notice that on August 21, 1995, Navajo Tribal Utility Authority tendered for filing a complaint against the Public Service Company of New Mexico for rate relief.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

3. PSI Energy, Inc.

[Docket No. ER95–1563–000]

Take notice that on August 15, 1995, PSI Energy, Inc. tendered for filing a revision to its rates for full requirements wholesale electric service to municipalities, proposed to become effective as of September 23, 1995.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

4. Northern States Power Company (Minnesota Company)

[Docket No. ER95–1575–000]

Take notice that on August 18, 1995, Northern States Power Company (NSP) tendered for filing Amendment No. 1 to the Transmission Service Exchange Agreement dated February 1, 1994, between NSP and East River Electric Power Cooperative (East River).

Amendment No. 1 to the Transmission Service Exchange Agreement provides for a change in the transmission wheeling rate between the parties. NSP requests the Commission to waive its Part 35 notice requirements and accept the agreement for filing effective August 19, 1995.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

5. Entergy Power, Inc.

[Docket No. ER95–1576–000]

Take notice that on August 18, 1995, Entergy Power, Inc., tendered for filing a Purchase and Sale Agreement between Tenneco Energy Marketing Company and Entergy Power, Inc.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

6. Wisconsin Power and Light Company

[Docket No. ER95–1578–000]

Take notice that on August 18, 1995, Wisconsin Power and Light Company (WP&L) tendered for filing an Agreement dated July 24, 1995, establishing NorAm Energy Services, Inc. as a customer under the terms of WP&L's Transmission Tariff T–2.

WP&L requests an effective date of July 24, 1995 and accordingly seeks waiver of the Commission's notice requirements. A copy of this filing has been served upon the Public Service Commission of Wisconsin.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

7. Wisconsin Power and Light Company

[Docket No. ER95–1579–000]

Take notice that on August 18, 1995, Wisconsin Power and Light Company (WP&L) tendered for filing a signed Service Agreement under WP&L's Bulk Power Tariff between itself and NorAm Energy Services, Inc. WP&L respectfully requests a waiver of the Commission's notice requirements, and an effective date of July 20, 1995.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

8. Wisconsin Power and Light Company

[Docket No. ER95–1580–000]

Take notice that on August 18, 1995, Wisconsin Power and Light Company (WP&L) tendered for filing a signed Service Agreement under WP&L's Bulk Power Tariff between itself and Illinois Power Company. WP&L respectfully requests a waiver of the Commission's notice requirements, and an effective date of August 1, 1995.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

9. PECO Energy Company

[Docket No. ER95–1581–000]

Take notice that on August 18, 1995, PECO Energy Company (PECO) filed a Service Agreement dated August 2, 1995, with Wabash Valley Power Association (WABASH VALLEY) under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff). The Service Agreement adds WABASH VALLEY as a customer under the Tariff.

PECO requests an effective date of August 2, 1995, for the Service Agreement.

PECO states that copies of this filing have been supplied to WABASH VALLEY to the Pennsylvania Public Utility Commission.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

10. Upper Peninsula Power Company

[Docket No. ER95–1582–000]

Take notice that on August 17, 1995, Upper Peninsula Power Company (UPPC) tendered for filing Addendum C to the Agreement dated September 12, 1966 between the Village of L'Anse and UPPC.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

11. GED Gas Services, LLC

[Docket No. ER95–1583–000]

Take notice that on August 17, 1995, GED Gas Services, LLC tendered for filing an application for Power Broker.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

12. Puget Sound Power & Light Company

[Docket No. ER95–1584–000]

Take notice that on August 18, 1995, Puget Sound Power & Light Company (Puget) tendered for filing an Agreement for Purchase and Sale of Power (Purchase Agreement) with Public Utility District No. 1 of Douglas County, Washington (District). A copy of the filing was served upon District.

The Purchase Agreement is for the sale of on-peak capacity and associated energy by District and the off-peak return of energy by Puget pursuant to Puget's FPC Electric Tariff Original Volume No. 3.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

13. Consumers Power Company

[Docket No. ER95–1585–000]

Take notice that on August 18, 1995, Consumers Power Company (Consumers), acting on behalf of itself and as agent for The Detroit Edison Company (Detroit Edison), tendered for filing various rate schedule changes to Consumers Power Company Rate Schedule FPC No. 41 and The Detroit Edison Company Rate Schedule FPC No. 22.

Copies of the filing were served upon the Michigan Public Service Commission, Consumers and Detroit Edison.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

14. Citizens Utilities Company

[Docket No. ER95–1586–000]

Take notice that on August 18, 1995, Citizens Utilities Company (Citizens), tendered for filing two Tariffs providing for Transmission Services by its Vermont Electric Division, a Point-to-Point Transmission Service Tariff and a Network Integration Service Transmission Tariff. Citizens presently provides retail service in the Counties of Franklin, Grand Isle, Essex, Orleans and Caledonia.

As more fully set forth therein, the Transmission Tariffs provide for the non-discriminatory transmission of electric energy over Citizens' Vermont transmission facilities at cost-based rates. Initial service under the Transmission Tariffs will not begin before December 1, 1995.

Citizens states that a copy of its filing was served on all parties listed on the attached Service List.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

15. Commonwealth Edison Company

[Docket No. ER95–1587–000]

Take notice that on August 18, 1995, Commonwealth Edison Company (ComEd), submitted for filing revisions to its Power Sales Tariff (PS–1 Tariff). ComEd proposes to modify the PS–1 Tariff to permit ComEd to make sales under the Tariff to electric utilities with whom ComEd is directly interconnected, to reduce the minimum purchase requirement for transactions and to offer customers served under the PS–1 Tariff the option that ComEd will arrange for third-party transmission service.

ComEd requests an effective date of August 19, 1995 and, accordingly, seeks waiver of the Commission's notice requirements. Copies of this filing were served upon parties to service agreements under the PS–1 Tariff and the Illinois Commerce Commission.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

16. Portland General Electric Company

[Docket No. ER95–1588–000]

Take notice that on August 18, 1995, Portland General Electric Company (PGE), tendered for filing an Interconnection and Transmission Agreement with Eugene Water & Electric Board. PGE proposes an effective date of August 19, 1995.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

17. Kentucky Utilities Company

[Docket No. ER95–1598–000]

Take notice that on August 21, 1995, Kentucky Utilities Company tendered for filing an executed Service Agreement for Non-Firm Transmission Service with InterCoast Power Marketing Company.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

18. Kentucky Utilities Company

[Docket No. ER95–1600–000]

Take notice that on August 21, 1995, Kentucky Utilities Company tendered for filing an executed Service Agreement for Power Services with Rainbow Energy Marketing Corporation.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

19. Kentucky Utilities Company

[Docket No. ER95–1601–000]

Take notice that on August 21, 1995, Kentucky Utilities Company tendered for filing an executed Service Agreement for Power Services with Electric Clearinghouse, Inc.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

20. Kentucky Utilities Company

[Docket No. ER95–1602–000]

Take notice that on August 21, 1995, Kentucky Utilities Company tendered for filing an executed Service Agreement for Power Services with Intercoast Power Marketing Company.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

21. Kentucky Utilities Company

[Docket No. ER95–1603–000]

Take notice that on August 21, 1995, Kentucky Utilities Company tendered for filing an executed Service Agreement for Power Services with NorAm Energy Services.

Comment date: September 8, 1995, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–P

[Docket No. CP95–695–000]

East Tennessee Natural Gas Company; Notice of Request Under Blanket Authorization

August 28, 1995.

Take notice that on August 18, 1995, East Tennessee Natural Gas Company (East Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP95–695–000 a request pursuant to Sections 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to construct delivery point facilities in Fentress County, Tennessee, for Upper Cumberland Gas Utility District, an LDC, under East Tennessee's blanket certificate issued in Docket No. CP82–412–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

East Tennessee states that the total delivered quantities would not exceed total authorized quantities and there would be no detriment to existing customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 95–21707 Filed 8–31–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP95–670–000]

Natural Gas Pipeline Company of America; Renotice of Application

August 21, 1995.

Natural's application in Docket No. CP95–670–000 was inadvertently entitled "NOTICE OF REQUEST UNDER BLANKET AUTHORIZATION" and had the corresponding boiler-plate language, referencing a 45-day notice period when noticed on August 15, 1995. (60 FR 43790, August 23, 1995.)

In view of the above, Natural's application will be renoticed as a "NOTICE OF APPLICATION" and given a 21-day comment period.

Take notice that on August 8, 1995, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP95–670–000 an application pursuant to Section 7(b) of the Natural Gas Act, for permission and approval to abandon, by sale to Shell Offshore Inc. (Shell), lateral and meter facilities located in offshore Louisiana, all as more fully set forth in the application on file with the Commission and open to public inspection.

It is stated that the facilities were originally constructed to receive gas purchased from Shell in offshore Louisiana. Natural states that these facilities are no longer related to any gas purchase contracts and hence, no longer hold sufficient value to Natural, to warrant the expenditures required to maintain them.

Specifically, Natural proposes to abandon: (1) 2.8 miles of 8-inch pipeline that extends between Shell's "A" and "B" platforms in Eugene Island Block 331, offshore Louisiana, (2) a dual 8-inch meter and appurtenant facilities located on Shell's "A" platform in Eugene Island Block 331, offshore Louisiana, (3) a 10-inch dual meter and appurtenant facilities located on Shell's platform in Vermilion Block 321, offshore Louisiana, (4) a dual 6-inch meter and appurtenant facilities located on Shell's platform in Vermilion Block 340, offshore Louisiana, and (5) a dual 8-inch meter and appurtenant facilities located on Shell's platform in West Cameron 565, offshore Louisiana. Natural states that it intends to sell the facilities to Shell for $260,000.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 5, 1995, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Natural to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

[FR Doc. 95–21708 Filed 8–31–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP95–700–000]

Williams Natural Gas Co.; Application

August 28, 1995.

Take notice that on August 21, 1995, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP95–700–000 an application pursuant to Section 7(c) of the Natural Gas Act requesting authority to construct and operate pipeline loop facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, WNG proposes to construct and operate 28.2 miles of 20-inch pipeline loop in Newton, Lawrence, and Christian Counties, Missouri to extend its existing 20-inch Springfield loop pipeline in order to provide the capacity necessary to maintain reliable, consistent service to the Springfield, Missouri area.

WNG estimates cost of the proposed facilities to be approximately $13.7 million, which WNG states will be paid from available funds. WNG also requests a determination that rolled-in rate treatment is appropriated for these facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 18, 1995, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulation Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for WNG to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Office of Hearings and Appeals

Notice of Cases Filed; Week of May 22 Through May 26, 1995

During the Week of May 22 through May 26, 1995, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20585.

Dated: August 18, 1995.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of May 22 through May 26, 1995]

Date	Name and location of applicant	Case No.	Type of submission
May 23, 1995	J.F. Tollison Fertilizer, Anson, Texas	RR272–201	Request for modification/rescission in the crude oil refund proceeding. If granted: The May 13, 1995 Dismissal, Case No. RF272–95167, issued to J.F. Tollison Fertilizer would be modified and the firm would be granted a refund in the Crude Oil Refund Proceeding.
May 24, 1995	A. Victorian, Nottingham, England	VEF–0043	Appeal of an information request denial. If granted: The April 9, 1994 Freedom of Information Request Determination issued by the Oakland Operations Office would be modified, and A. Victorian would receive access to additional Department of Energy information.

Date received	Name of refund proceeding/name of refund application	Case No.
5/19–5/26/95	Supplemental Crude	RK272–142 thru RK272–152.
5/17–5/26/95	Crude Oil Refund Applications	RG272–250 thru RG272–270.
5/17–5/26/95	Gulf Refund Applications	RF300–21827 thru RF300–21829.
5/23/95	Harold Regency Service	RF321–21070.
5/25/95	Little America Refining Co.	RF345–38.

[FR Doc. 95–21786 Filed 8–31–95; 8:45 am]

BILLING CODE 6450–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5290–7]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before September 27, 1995.

FOR FURTHER INFORMATION OR A COPY CALL: Sandy Farmer at EPA, (202) 260–2740, and refer to EPA ICR No. 0270.34.

SUPPLEMENTARY INFORMATION: Title: Public Water Supply System Supervision Program, Public Notification and Education Requirements (OMB Control No. 2040–0090; EPA ICR No. 0270.34). This is an amendment to a previously-approved collection. (These requirements were included in rules promulgated by EPA in 1987 and 1991, but were not included in ICRs developed at those times. Due to enactment of the Paperwork Reduction Act of 1995, the requirements are now being submitted for OMB review. EPA is not proposing any modification of the requirements at this time.)

Abstract: The Safe Drinking Water Act requires that the public be made aware of potential contaminants in their water systems. A public water system is required to notify its consumers when the system has exceeded regulatory action levels, has received variances or exemptions, or has failed to comply with schedules pursuant to variances. Systems notify their consumers by means of mailed notices (often included with a water bill), newspaper announcements, posted notices, and in some circumstances electronic media (radio and television). Public water systems that exceed action levels for lead must provide educational materials to consumers about lead in drinking water. The educational materials include water bill announcements, newspaper announcements, and brochures distributed by mail and made available at local health agencies, schools and other public entities. The general public notification provisions and lead public education requirements are included in the National Primary Drinking Water Regulations, 40 CFR Parts 141–143.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 6.6 hours per response. This estimate includes the time needed to review regulations and guidance; prepare notification statements and brochures, distributing and/or posting the notices, and training personnel on notification procedures.

Respondents/Affected Entities: Public water systems.

Estimated No. of Respondents: 61,930.

Estimated Total Annual Burden on Respondents: 408,535 hours.

Frequency of Collection: On occasion.

Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to the following addresses. Please refer to EPA ICR No. 0270.34 and OMB Control No. 2040–0090 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, OPPE Regulatory Information Division (2136), 401 M Street, SW, Washington, DC 20460.

and

Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503.

Dated: August 29, 1995.

Richard Westlund,

Acting Director, Regulatory Information Division.

[FR Doc. 95–21802 Filed 8–31–95; 8:45 am]

BILLING CODE 6560–50–P

[FRL–5288–6]

Information Collection Request for Used Oil

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) listed below is coming up for renewal. Before submitting the renewal package to the Office of Management and Budget (OMB), EPA is soliciting comments on specific aspects of the collection as described below.

DATES: Comments must be submitted on or before October 31, 1995.

ADDRESSES: Commenters must send an original and two copies of their comments referencing docket number F–95–UIOP–FFFFF to: RCRA Docket Information Center, Office of Solid Waste (5305W), U.S. Environmental Protection Agency Headquarters (EPA, HQ), 401 M Street, SW., Washington, DC 20460. Comments may also be submitted electronically through the Internet to: RCRA-Docket@epamail.epa.gov. Comments in electronic format should also be identified by the docket number F–95–UIOP–FFFFF. All electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

Public comments and supporting materials are available for viewing in the RCRA Information Center (RIC), located in Room M2616 at the address listed above. The RIC is open from 9 a.m. to 4 p.m., Monday through Friday, excluding federal holidays. To review docket materials, the public must make an appointment by calling (202) 260–9327. The public may copy a maximum of 100 pages from any regulatory docket at no charge. Additional copies cost $.15/page.

Copies of the original ICR may be requested from the docket address and phone number listed above or may be found on the Internet. The complete ICR can be accessed off the main EPA Gopher menu, in the directory: EPA Offices and Regions/Office of Solid Waste and Emergency Response (OSWER)/Office of Solid Waste (RCRA)/hazardous waste—RCRA Subtitle C/hazardous waste identification/listing of used oil.

Follow these instructions to access the information electronically:

Gopher: gopher.epa.gov
WWW: http://www.epa.gov
Dial-up: (919) 558–0335.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline at 1–800–424–9346 or TDD 1–800–553–7672 (hearing impaired). In the Washington metropolitan area, call 703–412–9610 or TDD 703–412–3323. For technical information, contact Tracy Bone at (202) 260–3509.

SUPPLEMENTARY INFORMATION: *Affected entities:* Entities affected by this action are those which handle or manage used oil including used oil: transporters, processors, re-refiners, and burners.

Title: Used Oil Management Standards Recordkeeping and Reporting Requirements, ICR No. 1286, OMB No. 2050–0124, expires 12/31/95.

Abstract: Under statutory authority, EPA established mandatory regulations (See 40 *CFR* Part 279) that control the storage of used oil in aboveground tanks and containers to minimize potential releases from these units. It establishes notification and testing requirements, and tracking and recordkeeping requirements for used oil transporters, processors, re-refiners, and burners to document the movement of used oil. It also sets standards for the prevention and cleanup of releases to the environment during storage and transit and for the safe closure of storage units and processing and re-refining facilities to mitigate future releases and damages. EPA believes these requirements mitigate potential hazards to human health and the environment from the potential mismanagement of used oils by used oil handlers, while providing for the recycling of used oil. This information will be used to ensure compliance with the Used Oil Management Standards.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The following estimates are summarized from ICR 1286.

Burden Statement

The bottom line burden to respondents for complying with the Part 279 information collection requirements is approximately 75,626 hours per year, with an annual cost of $1,802,159.

Transporters and Transfer Facilities

For the estimated 383 used oil transporters and transfer facilities, EPA estimates the bottom line burden to these transporters and transfer facilities to be 58,236 hours per year with an annual cost of approximately $465,455. The public reporting burden for this collection of information is estimated to range from 18 to 54 minutes per response, while the recordkeeping burden averages eight minutes per respondent.

EPA estimates that 96 transporter and transfer facilities will be required to obtain an EPA identification number. EPA estimates that each of the 383 used oil transporters will make 202 shipments annually and that each shipment will consist of 15 pickups, for an annual total of 1,160,490 pickups per year. Used oil transporters will determine the halogen content of each pickup. In addition, EPA estimates that used oil transporters will rebut the hazardous waste presumption for one percent of these shipments, or 774. EPA expects that records will be maintained on file for each of the 1,161,264 determinations.

Oil Processors and Re-Refiners

For the estimated 249 used oil processors and re-refiners, EPA estimates the total estimated annual burden is 56,315 hours, with an annual cost of $1,331,587. The public reporting burden is estimated to range from 94 hours to 108 hours per respondent, while the recordkeeping burden averages 12 to 18 minutes per response.

EPA estimates that all 249 processors and re-refiners will be burdened by information collection requirements relating to the development, amendment, and retention of a contingency plan. EPA estimates that one percent of all used oil processors and re-refiners, or three facilities, will experience an emergency incident each year and have to submit to EPA a written report of the emergency incident. EPA estimates that all 249 processors/re-refiners will be affected by information collection requirements relating to preparing and maintaining a written analysis plans. EPA estimates that used oil processors and re-refiners will manage a total of 323,000 used oil shipments per year. EPA estimates that each shipment will consist of used oil picked up from 10 locations, for a total of 3,230,000 pickups delivered to used oil processors and re-refiners. EPA estimates that an additional 8,400 pickups will be delivered to blending facilities, increasing the total to 3,238,400 total pickups. EPA expects that the used oil processor or re-refiner will determine the halogen content for each pickup and, in addition, that the used oil processor or re-refiner will rebut the hazardous waste presumption for one percent of these shipments, or 3,314 shipments. In addition, EPA expects that one percent of the 249 processors and re-refiners, or approximately three facilities, will experience an emergency incident that will require recordkeeping.

Burners

For the estimated 1,155 burners of off-specification used oil, EPA estimates the total annual burden to be 185 hours, at an annual cost of $4,980. The public reporting burden is estimated to average nine minutes per response, while the recordkeeping burden averages six minutes.

EPA estimates that all 1,155 used oil burners will determine the halogen content of their used oil. EPA expects that each of these 1,155 used oil burners will receive 20 shipments, or a total of 23,100 shipments. Of these shipments, EPA expects one percent, or 231 shipments, will be tested under the rebuttable presumption. As such, EPA expects that 23,331 determinations will be performed annually and that they will keep records of each of the determinations.

States

The public reporting burden for States is estimated to range from nine minutes to 1 hour and fifteen minutes per response, with no recordkeeping burden. EPA estimated that six States would submit petitions during FY'93–95. The total annual burden for States is approximately 7.5 hours, at an annual cost of $137.

No person is required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are displayed in 40 CFR Part 9.

Dated: August 25, 1995.

Michael Shapiro,

Director, Office of Solid Waste.

BILLING CODE 6560–50–P

[ER–FRL–5228–4]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared August 14, 1995 Through August 18, 1995 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260–5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 14, 1995 (60 FR 19047).

Draft EISs

ERP No. D–AFS–L65237–ID Rating EU2, Thunderbolt Wildfire Recovery Project, Implementation, Boise and Payette National Forests, Valley County, ID.

Summary

EPA found the proposed salvage project to be environmentally unsatisfactory. EPA's primary concerns include impaired water quality, significantly increased sediment loading, degradation to salmon spawning and rearing habitat, and major deviation from the forest plan.

ERP No. D–COE–J35010–UT Rating EC2, Kennecott Tailings Modernization Project, Tailings Impoundment Expansion, COE Section 404 Permit Issuance, Salt Lake County, UT.

Summary

EPA expressed environmental concerns regarding water quality impacts and requested information that will assist in expediting a CERCLA decision.

ERP No. D–FAA–C51018–NY Rating EC2, Syracuse Hancock International Airport, Land Acquisition and Construction of Runway 10 L–28R, Funding and Airport Layout Plan Approval, Onondaga County, NY.

Summary

EPA expressed environmental concerns about the need for the proposed project, as well as the proposed project's potential impacts to wetlands, surface water quality, and noise. Accordingly, additional information should be provided in the final EIS to address these issues.

ERP No. D–FAA–L51016–WA Rating EO2, Seattle - Tacoma (Sea-Tac) International Airport Master Plan Update for Development Actions, Funding, Airport Layout Plan Approval and COE Section 404 Permit, King County, WA.

Summary

EPA expressed environmental objections with a number of concerns regarding the purpose and need for the project and air quality analysis.

ERP No. D–FHW–C40135–NY Rating EC2, I–287 Cross Westchester Expressway (CWE) Transportation Improvements, New York State Thruway Route 303 to Route 120, Funding, Right-of Way Acquisition, COE Section 10 and 404 Permits, Rockland and Westchester Counties, NY.

Summary

EPA expressed environmental concerns about the proposed project's potential impacts to wetlands and surface water quality. Additionally, EPA requested information addressing potential cumulative impacts, and supplemental information regarding the air quality analysis performed for the proposed project.

ERP No. D–FHW–L40196–WA Rating EC2, WA–20 Transportation Improvements between Fredonia (WA–536) and Burlington (Interstate 5), Funding, Right-of-Way Acquisition and COE Section 404 Permit, Skagit County, WA.

Summary

EPA expressed environmental concerns based on the predicted noise and wetland effects. Additional information is needed on mitigation for both.

ERP No. D–GSA–K80037–CA Rating EC2, San Diego-United States Courthouse, Site Selection and Construction within a portion of the Central Business District (CBD), City of San Diego, San Diego County, CA.

Summary

EPA expressed environmental concerns regarding the project's air conformity determination, the absence of solid waste recycling features, and a need to more fully document the project's consistency with GSA's environmental justice strategy.

Final EISs

ERP No. F-AFS-K65153–00 Klamath National Forest Land and Resource Management Plan, Implementation, Siskiyou Co., CA and Jackson Co., OR.

Summary

Review of the Final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

ERP No. F-BLM-L65225–OR Upper Klamath Basin Resource Management Plan, Implementation, Klamath Falls Resource Area, Lakeview District, Klamath County, OR.

Summary

Review of the Final EIS has been completed and the project found to be environmentally satisfactory.

ERP No. F-COE-K32047–CA Humboldt Harbor and Bay (Deepening) Channels, Feasibiiity Study for Navigation Improvements, Humboldt County, CA.

Summary

Review of the Final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

ERP No. F-COE-L36102–OR Willamette River Temperature Control Study, Selective Withdrawal Structure(s) (SWS) Construction, McKenzie River Subbasin, OR.

Summary

EPA reiterates its concerns regarding the impact to water quality, and fish habitat and spawning success during the construction phases. EPA supports the proposal to develop a construction monitoring and evaluation plan.

ERP No. F-FRC-D29000–VA Gaston and Roanoke Rapids Project (FERC-No. 2009 003), Nonpoint Use of Project Lands and Water for the City of Virginia Beach Water Supply Project, License Issuance, Brunswick County, VA.

Summary

EPA expressed environmental concern regarding implementation of a reuse wastewater system and not incorporating the result of a basin-wide reservoir operations modeling analysis.

ERP No. F-NAS-A12040–00 Cassini Spacecraft Exploration Mission to Explore the Planet Saturn, Implementation.

Summary

The final EIS addresses EPA's concerns raised in the draft EIS.

ERP No. FS-TVA-E06016–TN Adoption—Watts Bar Nuclear Plant, Unit 1 Operations, Operating License Issuance, Rhea County, TN.

Summary

EPA had environmental concerns that this document did not adequately address two issues raised at the draft EIS stage: need for power and pollution prevention, and recommended that future NEPA documents be more inclusive of these issues.

Dated: August 28, 1995.

B. Katherine Biggs,

Associate Director, NEPA Compliance Division Office of Federal Activities.

Toxics Data Reporting Subcommittee of the Environmental Information and Assessments Committee National Advisory Council for Environmental Policy and Technology; Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: Under the Federal Advisory Committee Act, EPA gives notice of a 1-day meeting of the Toxics Data Reporting subcommittee of the National Advisory Council for Environmental Policy and Technology. This will be the seventh meeting of the Toxics Data Reporting subcommittee, whose mission is to provide advice to EPA regarding the Agency's Toxics Release Inventory (TRI) Program.

DATES: The public meeting will take place on September 28, 1995 from 8:30 a.m. to 5:00 p.m. Members of the public wishing to make comments at this meeting should submit their comments, in writing, by September 18, 1995.

ADDRESSES: The public meeting will be held at the Bellevue Hotel, 15 E Street, NW., Washington, DC 20001. Written comments must be submitted to: U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Attn: Maria Doa, 7408.

FOR FURTHER INFORMATION CONTACT: Cassandra Vail, Environmental Assistance Division, U.S. Environmental Protection Agency, Mail Stop 7408, 401 M St., SW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: EPA is proposing that the subcommittee discuss the following subjects: (1) Status and direction of activities of the Toxic Release Program (TRI), including expansion of covered facilities, review of the initial list of chemicals and consideration of reporting information under EPCRA section 313 on the use of toxic chemicals at facilities; (2) Definitions and guidance for the Pollution Prevention Act required information and the redesign of the Form R; and (3) The specific aspects of the programs that the subcommittee will wish to focus on in the next year.

Dated: August 28, 1995.

Morris Altschuler,

Office of Cooperative Environmental Management.

Sustainable Economies Committee of the National Advisory Council for Environmental Policy and Technology; Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: Under the Federal Advisory Committee Act, Pub. L. 92463, EPA gives notice of a two-day meeting of the Sustainable Economies Committee of the National Advisory Council for Environmental Policy and Technology (NACEPT). NACEPT provides advice and recommendations to the Administrator of EPA on a broad range of environmental policy issues, and the Sustainable Economies Committee was formed to identify opportunities for harmonizing environmental policy, economic activity, and ecosystem management.

The meeting is being held to discuss recommendations the Committee plans to submit to EPA. Scheduling constraints preclude oral comments from the public during the meeting. Written comments can be submitted by mail, and will be transmitted to Committee members for consideration.

DATES: The public meeting will be held on Wednesday, September 27, and Thursday, September 28, 1995, in Embassy Room A of the Dupont Plaza Hotel, at 1500 New Hampshire Avenue NW, Washington, D.C. On Wednesday, September 27, the Committee will meet from 9 a.m. to 5 p.m., and on Thursday, September 28, the Committee will meet from 8:30 a.m. to 4 p.m.

ADDRESSES: Written comments should be sent to: Mark Joyce, Office of Cooperative Environmental Management, U.S. EPA (1601F), 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Mark Joyce, Designated Federal Official, Direct line (202) 260–6889, Secretary's line (202) 260–9744.

Dated: August 22, 1995.

Mark Joyce,

Designated Federal Official.

Science Advisory Board; Notification of Public Advisory Committee Meetings

Pursuant to the Federal Advisory Committee Act, Public Law 92–463, notice is hereby given that two committees of the US Environmental Protection Agency's (EPA) Science Advisory Board (SAB) will meet on the dates and times described below. All times noted are Eastern Time. All meetings are open to the public. Due to limited space, seating at all meetings will be on a first-come basis. For further information concerning each meeting, please contact the individuals listed below. Documents that are the subject of SAB reviews are normally available from the originating EPA office and are not available from the SAB Office. Information concerning document availability from the relevant EPA Program area is included below.

1. Clean Air Scientific Advisory Committee

The Clean Air Scientific Advisory Committee (CASAC) of the Science Advisory Board (SAB) will meet on Tuesday and Wednesday, September 19–20, 1995 at the Brownestone Hotel, 1707 Hillsborough Street, Raleigh, NC 27605 (phone: 919/828–0811). The meeting will begin at 8:30 am and end at 5 pm each day.

Purpose of the Meeting—At this meeting, the Committee will review and provide advice to EPA on the August 1995 external review draft staff paper for ozone (Review of National Ambient Air Quality Standards for Ozone: Assessment of Scientific and Technical Information), and its associated analyses. The purpose of the staff paper is to evaluate and interpret the most relevant scientific and technical information reviewed in the ozone air quality criteria document in order to better specify the critical elements which the EPA staff believes should be considered in any possible revisions to the national ambient air quality standards (NAAQS) for ozone. This document is intended to bridge the gap between the scientific review contained in the criteria document and the judgments required of the Administrator in setting NAAQS for ozone. The Committee will consider presentations from Agency staff and the interested public prior to making recommendations to the Administrator.

The Committee will also complete it's review of the final changes made to the criteria document (Air Quality Criteria for Ozone and Related Photochemical Oxidants) on the basis of comments received on the February 1995 CASAC Review Draft at the previous public meeting held March 21–22, 1995 (see 60 FR 11971–11974, dated March 3, 1995).

Availability of Documents—Documents that are the subject of Science Advisory Board reviews are *not* available from the SAB. They must be obtained from the appropriate EPA office listed below.

(a) *Draft Ozone Criteria Document*—Limited copies of the final revisions will be available at the meeting.

(b) *Draft Ozone Staff Paper*—Single copies of the ozone staff paper may be obtained from Dr. David J. McKee, Office of Air Quality Planning and Standards (MD–15), U.S. EPA, Research Triangle Park, NC 27711. Dr. McKee can also be reached by telephone at (919) 541–5288 or by fax at (919) 541–0237. The Office of Air Quality Planning and Standards (OAQPS) will accept written comments from the public on all aspects of their revised external review draft staff paper for ozone and revised technical support documents through October 16, 1995. Comments should be sent to Dr. McKee at the previously stated address.

For Further Information—Members of the public desiring additional information concerning the meeting should contact Mr. A. Robert Flaak, Acting Designated Federal Official, Clean Air Scientific Advisory Committee, Science Advisory Board (1400F), US Environmental Protection Agency, Washington, DC 20460, telephone (202) 260–5133, fax (202) 260–7118 or via the INTERNET at FLAAK.ROBERT@EPAMAIL.EPA.GOV. Individuals desiring a copy of the draft meeting agenda should contact Ms. Connie Valentine at (202) 260–6552 or by fax at (202) 260–7118 or via the INTERNET at VALENTINE.CONNIE@EPAMAIL.EPA.GOV.

Members of the public who wish to make a brief oral presentation to the Committee concerning the scientific issues contained in the draft staff paper must contact Mr. Flaak in writing no later than 12 noon Eastern time on Tuesday, September 12, 1995, in order to be placed on the meeting agenda. A brief time period will be allocated for presentations on both days; however, public commentors will be limited to five minutes per person or organization [It is expected that oral comments will be heard regarding the primary standard on September 19th and on the secondary standard on September 20th]. The written request should identify the name of the individual who will make the presentation, the organization (if any) they will represent, any audio visual requirements (e.g., overhead projector, 35mm projector, chalkboard, etc), and which issue (primary or secondary standard) they will address. Presentors are expected to provide at least 35 copies of an outline of the issues to be addressed or the presentation itself.

2. Executive Committee

The Science Advisory Board's (SAB's) Executive Committee will hold its quarterly meeting on Thursday and Friday, September 21–22, 1995. On Thursday the meeting will convene at 8:30 a.m. in the Disabled American Veterans Auditorium, 807 Maine Avenue SW, Washington, DC 20460 and adjourn no later than 5:30 p.m. On Friday, the meeting will convene at 8:30 a.m. in the Administrator's Conference Room 1103 West Tower, U.S. Environmental Protection Agency, 401 M Street SW, Washington, DC 20460 and adjourn no later than 12:00 noon.

Purpose of the Meeting—At this meeting, the Executive Committee will receive updates from its standing committees and ad hoc subcommittees concerning their recent and planned activities. As part of these updates, some committees will present draft reports for Executive Committee review and approval. Drafts expected at this meeting include:

(a) Ecological Processes and Effects Committee

(1) Commentary on Methodology for Developing Bioaccumulation Factors

(2) Review of the Agency's Sediment Criteria for Metals

(b) Environmental Engineering Committee—

(1) Commentary on SAB Review of Computer Environmental Transport and Fate Models

(c) Research Strategies Advisory Committee:

(1) Commentary on Research Planning and Budget

(d) ad hoc Subcommittee on Dioxin:

(1) Review of the Agency's Reassessment of Dioxin

Although the agenda has not yet been fixed, the last item (Report of the ad hoc Subcommittee on Dioxin) will take place on Thursday, September 21.

Additional topics on the agenda include a discussion of

(a) The activities of the Subcommittee on Membership Search

(b) The activities of the Subcommittee on Projects, including consideration of three major projects for FY96:

(1) Readdressing relative risks

(2) Functioning as a lookout panel

(3) The Economics/Natural Sciences Interface

(c) The role of science in the Agency's planning and budgeting process.

For Further Information—Any member of the public wishing further information concerning the meeting or who wishes to submit comments should contact Dr. Donald G. Barnes, Designated Federal Official for the Executive Committee, Science Advisory Board (1400), U.S. EPA, Washington, DC 20460, phone (202)–260–4126; fax (202)–260–9232; or via the INTERNET at: BARNES.DON@EPAMAIL.EPA.GOV. Copies of the draft meeting agenda and available draft reports listed above can be obtained from Ms. Priscilla Tillery-Gadson at the above phone and fax numbers.

Providing Oral or Written Comments at SAB Meetings

The Science Advisory Board expects that public statements presented at its meetings will not be repetitive of previously submitted oral or written statements. In general, each individual or group making an oral presentation will be limited to a total time of five minutes. For conference call meetings, opportunities for oral comment will be limited to no more than five minutes per speaker and no more than fifteen minutes total. Written comments (at least 35 copies) received in the SAB Staff Office sufficiently prior to a meeting date, may be mailed to the relevant SAB committee or subcommittee prior to its meeting; comments received too close to the meeting date will normally be provided to the committee at its meeting. Written comments may be provided to the relevant committee or subcommittee up until the time of the meeting.

Dated: August 28, 1995.

Donald G. Barnes,

Staff Director, Science Advisory Board.

[FR Doc. 95–21764 Filed 8–31–95; 8:45 am]

BILLING CODE 6560–50–P

[FRL–5290–8]

Science Advisory Board; Notification of Public Advisory Committee Meeting; Meeting Cancellation

Pursuant to the Federal Advisory Committee Act, Public Law 92–463, notice is hereby given that the previously announced meeting of the Ecological Processes and Effects Committee of the Science Advisory Board, scheduled for September 7–8, 1995, at the Environmental Protection Agency's Washington Information Center, Conference Room 17, 401 M Street, SW., Washington, DC 20460, has been cancelled (60 FR 43594–43595; August 22, 1995). A principal reason for the meeting was to review portions of the Agency's draft document, "Proposed Environmental Goals for America with Benchmarks for the Year 2005." That document is not yet available for review by the SAB, due to additional internal reviews scheduled by the Agency.

Background: The Environmental Goals Project is an EPA effort to define national environmental goals and benchmarks by which to measure progress toward achieving those goals. In 1994, a series of nine public roundtables were held in cities around the country to receive input on the nation's goals for the environment. The draft document, "Proposed Environmental Goals for America with Benchmarks for the Year 2005," summarizes the Agency's proposals for long-range goals and measurable 10-year benchmarks. Following review by other federal agencies and the SAB, the document will be distributed for public review, including a series of public roundtables in early 1996. Concurrent with final federal agency review of the document, the SAB has been asked to review the goals and benchmarks and evaluate the following: (a) Are the long-range goals technically meaningful and achievable? (b) will the goals, if met, result in a healthy and economically secure populace and a healthy environment? (c) are the milestones appropriate for gauging progress toward the goals? (d) do the milestones, taken together, adequately cover the range of technical considerations for each goal? and, (e) what other milestones should be considered, and is data currently available to allow their use?

For further information on the Environmental Goals Project, please contact Judith Koontz, Office of Administration and Resources Management, US EPA, 401 M Street, SW., Mail Code 3102, Washington, DC 20460, telephone (202) 260–8608.

Dated: August 28, 1995.

A. Robert Flack,

Acting Staff Director, Science Advisory Board.

[FR Doc. 95–21926 Filed 8–31–95; 8:45 am]

BILLING CODE 6560-50-P

[OPPTS–42111G; FRL–4965–9]

Withdrawal of Conditional Exemptions From TSCA Section 4 Test Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is withdrawing certain conditional Toxic Substances Control Act (TSCA) section 4 testing exemptions announced in the **Federal Register** of March 31, 1995 (60 FR 16648).

EFFECTIVE DATE: September 1, 1995.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Rm. E–543B, 401 M St. SW., Washington, DC 20460, (202) 554–1404, TDD: (202) 544–0551; Internet: TSCA-Hotline@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: On November 10, 1993, EPA issued a final rule requiring manufacturers and processors of 1,3,5-trimethylbenzene (TMB) as one of four substances named as "Office of Water Chemicals," to conduct oral 14–day repeated dose and oral 90–day subchronic toxicity studies on TMB (58 FR 59667). Petroleum refiners, challenged EPA's final rule arguing that they had received inadequate notice that they might be considered manufacturers of TMB and therefore subject to the test rule. After reviewing the record, EPA agreed that there was an issue as to whether certain manufacturers received sufficient notice that they would be subject to the test rule. As a result, EPA issued a Clarification of Test Rule Notice to clarify that only manufacturers, importers, and processors of TMB as an isolated product, and not persons who manufacture, import, or process the substance as part of complex mixtures or substances, would be subject to the final test rule requiring certain health effects testing. This **Federal Register** Notice was published on September 2, 1994 (59 FR 45629).

On March 31, 1995, EPA published its routine **Federal Register** notice granting conditional exemptions from TSCA Section 4 Test Rules (60 FR 16648). This notice granted conditional exemptions from the requirements to test certain substances pursuant to the Office of Water Chemicals TSCA section 4 test rule issued on November 10, 1993 (58 FR 59667). EPA granted the conditional exemptions for those "manufacturers" of chemical substances who had submitted exemption applications pursuant to the Office of Water Chemicals Test Rule.

Companies are required to submit exemption applications within 30 days after the effective date of a test rule (See 40 CFR 790.45(a)). As a result, EPA received exemption applications for TMB before issuing its Clarification of Test Rule Notice for TMB. However, some of those companies that submitted the exemption applications before EPA issued the clarification may actually not be subject to the requirements of the Office of Water Chemicals Test Rule as clarified because they are "... persons, including relevant petroleum refiners, who do not manufacture, import, or process TMB as an isolated product." (59 FR 45629).

After publication of the March 31, 1995 **Federal Register** notice, EPA realized that because certain companies covered by the Clarification of Test Rule Notice of September 2, 1994 would not be subject to the Office of Water Chemicals Test Rule, they would not be required to test the substance or, in the alternative to provide a request for an exemption from the requirement to test the substance. Therefore, for those companies that are excluded from coverage under the Office of Water Chemicals Test Rule by the September 2, 1994 Clarification of Test Rule Notice, EPA withdraws the granting of the conditional exemption. Such companies were not required to submit an exemption application, ". . .or any other item that may be required pursuant to a final test rule under TSCA Section 4." (59 FR 45629).

Authority: 15 U.S.C. 2601, 2603.

Dated: August 25, 1995.

Charles M. Auer,

Director, Chemical Control Division, Office of Pollution Prevention and Toxics.

BILLING CODE 6560-50-F

[FRL 5288–7]

Urban Soil Lead Abatement Demonstration Project; Integrated Report

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of External Peer Review Workshop and Availability of Draft Document.

SUMMARY: This notice announces an External Peer Review Workshop for expert scientific review of the Draft Urban Soil Lead Abatement Demonstration Project Integrated Report and the availability of the draft Integrated Report. It is sponsored by the EPA's National Center for Environmental Assessment.

DATES: This scientific workshop will be held Wednesday, September 20, 1995, through Friday, September 22, 1995. It will begin at 9:00 a.m. Wednesday and concludes at 4:00 p.m. Friday. Members of the public may attend as observers.

A copy of the Draft Urban Soil Lead Abatement Demonstration Project Integrated Report will be available for review on or about September 8, 1995.

ADDRESSES: The meeting will be held at the Sheraton Imperial Hotel and Convention Center, 4700 Emperor Boulevard, Research Triangle Park, NC 27709, Tel: (919) 941–5050, Fax: (919) 941–2958. To attend the workshop as an observer, contact: Ms. Emily R. Lee, National Center for Environmental Assessment—RTP Office (MD–52), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711, Tel: (919) 541–4169, Fax: (919) 541–5078 by September 15, 1995. Space is limited, so please call as soon as possible.

To obtain a single copy of the Draft Integrated Report, interested parties should contact Office of Research and Development (ORD) Publications: Technology Transfer Support Division, Technical Information Branch, National Risk Management Research Laboratory, U.S. EPA, 26 West Martin Luther King Drive, Cincinnati, OH 45268, Tel: (513) 569–7562, Fax: (513) 569–7566. Please provide your name and mailing address, the document title: Draft Urban Soil Lead Demonstration Project Integrated Report (External Review Draft, September 1995), and the EPA document number is EPA/600/R–95/139. Copies will be available on or about September 8, 1995.

SUPPLEMENTARY INFORMATION: The Urban Soil Lead Abatement Demonstration Project, generally known as the "Three-Cities Soil Lead Study," was initiated in 1987 in cooperation with states, state health departments, and local scientists.

The purpose was to conduct soil-lead abatement demonstration projects in three U.S. metropolitan areas to evaluate the efficacy of abatement of urban soil-lead as a means to reduce lead exposures in children. The three cities chosen for the project were Boston, Baltimore, and Cincinnati.

The soil lead studies for each of the three cities have been completed. A limited supply of copies of the July 1993 individual city reports are still available. To obtain a single copy of one or more of these city reports please contact ORD Publications. The document name and EPA document numbers for the individual reports are:

Boston—Urban Soil Lead Abatement Demonstration Project, Volume II: Parts 1 and 2, Boston Report (Review Draft, July 1993) EPA/600/AP–93/001b

Baltimore—Urban Soil Lead Abatement Demonstration Project, Volume III: Parts 1 and 2, Baltimore Report (Review Draft, July 1993) EPA/600/AP–93/001c

Cincinnati—Urban Soil Lead Abatement Demonstration Project, Volume IV: Cincinnati Report (Review Draft, July 1993) EPA/600/AP–93/001d

EPA believes that all interested parties will benefit from a further statistical analysis that integrates and standardizes the results of the individual three cities studies into a single report. Thus, as an adjunct to the original project, an Integrated report was developed. An earlier draft of this integrated Report underwent external peer review, resulting in additional statistical analyses and revisions. The current draft has undergone initial internal EPA review and will undergo external scientific peer review at the September 20–22 workshop.

Expert scientific peer reviewers, from a cross-section of the public and private sectors, have been invited to attend this workshop. These peer reviewers will provide final expert scientific comment on the analyses conducted to standardize the analytical results of the Three-Cities Soil Lead Study into an Integrated Report. The workshop will specifically focus on science and analytical issues only.

Interested observers may also attend the workshop. There will be opportunity for brief oral comments from observers. If an interested party is unable to attend the workshop as an observer, the Agency will accept written comments on the Draft Integrated Report received on or before Monday, October 16, 1995. Send comments to: Ms. Emily R. Lee, National Center for Environmental Assessment—RTP Office (MD–52), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711, Tel: (919) 541–4169, FAX: (919) 541–5078.

Substantive scientific comments made on the Draft Integrated Report by the expert review panel, by workshop observers in their oral comments, or via written comments received on or before October 16, will be taken into account in revising the Integrated Report prior to finalization.

Dated: August 25, 1995.

Joseph K. Alexander,

Acting Assistant Administrator for Research and Development.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–3116–EM]

Florida; Amendment to Notice of an Emergency Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of an emergency for the State of Florida, (FEMA–3116–EM), dated August 3, 1995, and related determinations.

EFFECTIVE DATE: August 24, 1995.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: The notice of an emergency for the State of Florida dated August 3, 1995, is hereby amended to include the following area among those areas determined to have been adversely affected by the catastrophe declared an emergency by the President in his declaration of August 3, 1995:

St. Lucie County for emergency assistance as defined in the declaration letter of August 3, 1995.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Richard W. Krimm,

Associate Director, Response and Recovery Directorate.

BILLING CODE 6718-02-M

[FEMA–1064–DR]

Minnesota; Amendment to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Minnesota, (FEMA–1064–DR), dated August 18, 1995, and related determinations.

EFFECTIVE DATE: August 23, 1995.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of Minnesota dated August 18, 1995, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of August 18, 1995:

Aitkin, Cass, and Wilkin for Public Assistance and Hazard Mitigation Assistance.

Becker, Beltrami, Clay, Clearwater, Crow Wing, Hubbard, Itasca, Kittson, Mahnomen, Otter Tail, St. Louis, and Wadena Counties, and the White Earth Indian Reservation for Hazard Mitigation Assistance. (Already designated for Public Assistance)

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Richard W. Krimm,

Associate Director, Response and Recovery Directorate.

BILLING CODE 6730–01–M

OFFICE OF GOVERNMENT ETHICS

Advance Notice of Proposed Modified Form for Executive Branch Confidential Financial Disclosure Reporting To Be Submitted to OMB for Approval Under the Paperwork Reduction Act

AGENCY: Office of Government Ethics (OGE).

ACTION: Notice.

SUMMARY: The Office of Government Ethics plans to submit a new OGE Form 450 for confidential financial disclosure reporting under its existing executive branch regulations for approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act. This new, modified form will replace the existing Standard Form (SF) 450.

DATES: Comments on this proposal should be received by November 15, 1995.

ADDRESSES: Comments should be sent to William E. Gressman, Office of Government Ethics, Suite 500, 1201 New York Avenue, NW., Washington, DC 20005–3917.

FOR FURTHER INFORMATION CONTACT: Mr. Gressman at the Office of Government Ethics, telephone 202–523–5757 (ext. 1110), FAX 202–523–6325. A copy of OGE's draft form may be obtained, without charge, by contacting Mr. Gressman.

SUPPLEMENTARY INFORMATION: The Office of Government Ethics is planning to submit, after this notice and comment period (with any modifications that may appear warranted), a proposed new OGE Form 450 Executive Branch Confidential Financial Disclosure Report for three-year approval by OMB under the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35). Once finally approved by OMB and adopted by OGE, the new OGE form will replace the existing SF 450 Executive Branch Personnel Confidential Financial Disclosure Report. The SF 450 collects, as will the future OGE Form 450, information required under OGE's executive branchwide regulatory provisions. See subpart I of 5 CFR part 2634. The new OGE Form 450 will serve, as does the current SF 450, as the uniform report form for collection, on a confidential basis, of financial information required by the OGE regulation from certain new entrant and incumbent employees of the executive branch departments and agencies in order to allow ethics officials to conduct conflict of interest reviews and to resolve any actual or potential conflicts found.

The basis for the OGE regulation and the report form is two-fold. First, section 201(d) of Executive Order 12674 of April 12, 1989 (as modified by Executive Order 12731 of October 17, 1990) makes OGE responsible for the establishment of a system of nonpublic (confidential) financial disclosure by executive branch employees to complement the system of public disclosure under the Ethics in Government Act of 1978 (the "Ethics Act"), as amended, 5 U.S.C. appendix. Second, section 107(a) of the Ethics Act further provides authority for OGE as the supervising ethics office for the executive branch of the Federal Government to require that appropriate executive agency employees file confidential financial disclosure reports, "in such form as the supervising ethics office may prescribe." The current SF 450, together with the underlying OGE regulation, both adopted in 1992 after appropriate clearances from OMB as well as the General Services Administration (GSA) for the standard form, constitute the form OGE has prescribed for such confidential financial disclosure in the executive branch. The Office of Government Ethics recently sought a limited paperwork renewal from OMB as to the existing SF 450 in order to allow sufficient time for OGE to develop and clear the new OGE Form 450 which is the subject of this advance notice. See 60 FR 34258–34259 (June 30, 1995). The new OGE form will not require GSA clearance, since it is not a standard (or optional) form under the GSA program. The Office of Government Ethics will provide further information in the future to the agencies and the public about the details of phasing in the new form, once it is finally cleared and adopted, and phasing out the existing standard form.

Since the OGE's financial disclosure regulation at 5 CFR part 2634 and the reporting format were adopted in 1992, there have been certain revisions to each. The most significant of these is the determination of OGE to exclude from general executive branch confidential financial disclosure the reporting of cash accounts in depository institutions (including banks), money market mutual funds and accounts and U.S. Government obligations and securities. See 58 FR 63023–63024 (November 30, 1993). The Office of Government Ethics has directed executive departments and agencies to notify all filers of this change, which is not reflected on the SF 450 itself. The new OGE replacement form will reflect that change, as well as various other changes and improvements in the reporting format, to make it clearer and more user-friendly. A more complete set of instructions for filling out the form is included in the draft OGE Form 450 and helpful examples are set forth on the reporting parts.

The Office of Government Ethics expects that the new form should be ready, after OMB clearance, for dissemination to executive branch departments and agencies early next year. The Office of Government Ethics will provide appropriate guidance and phase-in time to departments and agencies once the new form is available. The new form will be made available in paper, on electronic disk and on OGE's electronic bulletin board entitled "The Ethics Bulletin Board System" (TEBBS). In addition, OGE will work on making available a future electronic version of the form, to allow employees the option of preparing it on a computer. The Office of Government Ethics also intends to permit departments and agencies to develop or utilize, on their own, electronic versions of the form provided that they precisely duplicate the paper original to the extent possible.

Since 1992, various agencies have developed, with OGE review/approval alternative reporting formats, such as certificates of no conflict, for certain classes of employees. Other agencies provide for additional disclosures pursuant to independent organic statutes and in certain other circumstances when authorized by OGE. However, the future OGE Form 450, as successor to the current SF 450, will remain the uniform executive branch report form for most of those executive branch employees who are required by their agencies to report confidentially on their financial interests. The confidential report form is to be filed by each reporting individual with the designated agency ethics official at the executive department or agency where he or she is or will be employed.

Reporting individuals are regular employees whose positions have been designated by their agency as requiring confidential financial disclosure in order to help avoid conflicts with their assigned responsibilities; additionally, all special Government employees

(SGEs) are generally required to file. Agencies may, if appropriate under the OGE regulation, exclude certain regular employees or SGEs as provided in 5 CFR 2634.905. Reports are normally required to be filed within 30 days of entering a covered position (or earlier if required by the agency concerned), and again annually if the employee serves for more than 60 days in the position. As indicated in § 2634.907 of the OGE regulation, the information required to be collected includes assets and sources of income, gifts and travel reimbursements, liabilities, employment agreements and arrangements, and outside positions, subject to certain thresholds and exclusions.

Most of the persons who file this report form are current executive branch Government employees at the time they complete the forms. However, some filers are private citizens who are asked by their prospective agency to file a new entrant report prior to entering Government service in order to permit advance checking for any potential conflicts of interest and resolution thereof by agreement to recuse, divest, obtaining of a waiver, etc. Based on OGE's annual agency ethics questionnaire responses, approximately 285,000 SF 450 report forms were filed during 1994 throughout the executive branch. Of these, OGE estimates that no more than between 5% and 10%, or some 14,500 to 28,500 per year at most, are filed by private citizens, those potential regular employees whose positions are designated for confidential disclosure filing as well as potential special Government employees whose agencies require that they file their new entrant reports prior to assuming Government responsibilities.

Each filing is estimated to take an average of one and one-half hours. The number of private citizens whose reports are filed each year with OGE is less than 10, but pursuant to 5 CFR 1320.7(s)(1), the lower limit for this general regulatory-based requirement is set at 10 private persons (OGE-processed reports). This yields an annual reporting burden of 15 hours, the same as in the current OMB inventory for this information collection. The remainder of the private citizen reports are filed with other departments and agencies throughout the executive branch.

Public comment is invited on each aspect of the proposed new OGE Form 450 as set forth in this notice, including specifically views on the need for and practical utility of this proposed modified collection of information, the accuracy of OGE's burden estimate, the enhancement of quality, utility and clarity of the information collected, and the minimization of burden (including the use of information technology).

Comments received submitted in response to this notice will be summarized for, and may be included with, the OGE request for OMB paperwork approval for this modified information collection. The comments will also become a matter of public record.

Approved: August 28, 1995.

Stephen D. Potts,

Director, Office of Government Ethics.

BILLING CODE 6345–01–U

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Notice of a Meeting of the Commission on Research Integrity

Pursuant to P.L. 92–463, notice is hereby given of a public meeting of the Commission on Research Integrity.

The meeting will be held at the Washington Dulles Airport Marriott Hotel on Monday and Tuesday, September 18–19, from 8:30 a.m. until 5 p.m.

The Commission will be working on its remaining recommendations and final report to congressional oversight committees and the Secretary of the Department of Health and Human Services (HHS) on the administration of Section 493 of the Public Health Service Act, as amended by and added to by Section 161 of the NIH Revitalization Act of 1993. Recommendations include possible administrative actions to improve the HHS scientific misconduct apparatus. Interested parties are advised to call the Executive Secretary, Ms. Henrietta Hyatt-Knorr, shortly before the meeting to verify the date, place, and agenda. Persons wishing to make a presentation should contact her in writing at Rockwall II, Suite 700, 5515 Security Lane, Rockville MD 20852 or by phone at (301) 443–5300, by fax at (301) 443–5351, or via internet at hhyatt@oasch.ssw.dhhs.gov. Ms. Hyatt-Knorr will furnish a meeting agenda upon request. Depending on the number of speakers and other constraints, the Executive Secretary will allocate a timeframe for anyone wishing to make an oral presentation.

Henrietta D. Hyatt-Knorr,

Executive Secretary, Commission on Research Integrity.

BILLING CODE 4160–17–P

Administration for Children and Families

President's Committee on Mental Retardation; Meeting

Agency Holding the Meeting: President's Committee on Mental Retardation.

Time and Date: Full Committee Meeting, September 7, 1995, 2 p.m.–6 p.m., September 8, 1995, 9 a.m.–5 p.m.

Place: Madison Hotel, 1177 15th Street NW., Washington, DC 20005.

Status: Meetings are open to the public. An interpreter for the deaf will be available upon advance request. All locations are barrier free.

To Be Considered: The Committee plans to discuss critical issues concerning Federal Policy, Federal Research and Demonstration, State Policy Collaboration, Minority and Cultural Diversity and Mission and Public Awareness.

The PCMR acts in an advisory capacity to the President and the Secretary of the U.S. Department of Health and Human Services on a broad range of topics relating to programs and services for persons with mental retardation. The Committee, by Executive Order, is responsible for evaluating the adequacy of current practices in programs for persons with mental retardation, and for reviewing legislative proposals that impact the quality of life that is experienced by citizens with mental retardation and their families.

Contact Person for More Information: Gary H. Blumenthal, Wilbur J. Cohen Building, Room 5325, 330 Independence Avenue SW., Washington, DC 20201–0001, (202) 619–0634.

Dated: August 29, 1995.

Gary H. Blumenthal,

Executive Director, PCMR.

BILLING CODE 4184–01–M

Agency for Health Care Policy and Research

Notice of Advisory Committee Meetings

In accordance with section 10(a) of the Federal Advisory Committee Act (5 U.S.C., Appendix 2) announcement is made of the following advisory committees scheduled to meet during the months of October and November 1995:

Name: Health Services Developmental Grants Review Subcommittee.

Date and Time: October 18–19, 1995 8:00 a.m.

Place: The DoubleTree, 1750 Rockville Pike, Conference Room TBA, Rockville, Maryland 20852.

Open October 18, 8:00 a.m. to 9:00 a.m.

Closed for remainder of meeting.

Purpose: The Subcommittee is charged with the initial review of grant applications proposing experimental, analytical and theoretical research on costs, quality, access, effectiveness, and efficiency of the delivery of health services for the research grant program administered by the Agency for Health Care Policy and Research (AHCPR).

Agenda: The open session of the meeting on October 18 from 8:00 a.m. to 9:00 a.m. will be devoted to a business meeting covering administrative matters and reports. During the closed session, the Subcommittee will be reviewing and discussing grant applications dealing with health services research issues. In accordance with the Federal Advisory Committee Act, section 10(d) of 5 U.S.C., Appendix 2 and 5 U.S.C., 552b(c)(6), it has been determined that this latter session will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a roster of members, minutes of the meeting, or other relevant information should contact J. Terrell Hoffeld, D.D.S., Ph.D., Scientific Review Administrator, Office of Scientific Affairs, Agency of Health Care Policy and Research, Suite 400, Executive Office Center, 2101 East Jefferson Street, Rockville, Maryland 20852, Telephone (301) 594–1449.

Name: Health Services Research Review Subcommittee.

Date and Time: October 18–20, 1995, 8:00 a.m.

Place: Ramada Inn, 1775, Rockville Pike, Conference Room TBA, Rockville, Maryland 20852.

Open October 18, 8:00 a.m. to 8:45 a.m.

Closed for remainder of meeting.

Purpose: The Subcommittee is charged with the initial review of grant applications proposing analytical and theoretical research on costs, quality, access, and efficiency of the delivery of health services for the research grant program administered by the Agency for Health Care Policy and Research (AHCPR).

Agenda: The open session of the meeting on October 18, from 8:00 a.m. to 8:45 a.m. will be devoted to a business meeting covering administrative matters and reports. During the closed session, the Subcommittee will be reviewing and discussing grant applications dealing with health services research issues. In accordance with the Federal Advisory Committee Act, section 10(d) of 5 U.S.C., Appendix 2 and 5 U.S.C., 552b(c)(6), it has been determined that this latter session will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a roster of members, minutes of the meeting, or other relevant information should contact Patricia G. Thompson, Ph.D., Scientific Review Administrator, Office of Scientific Affairs, Agency for Health Care Policy and Research, Suite 400, Executive Office Center, 2101 East Jefferson Street, Rockville, Maryland 20852, Telephone (301) 594–1451.

Name: Health Services Research Dissemination Study Section.

Date and Time: October 23–24, 1995, 8:00 a.m.

Place: Holiday Inn Chevy Chase, 5520 Wisconsin Avenue, Conference Room TBA, Chevy Chase, Maryland 20815.

Open October 23, 1995, 8:00 a.m.

Closed for remainder of meeting.

Purpose: The Study Section is charged with the review of and making recommendations on grant applications for Federal support of conferences, workshops, meetings, or projects related to dissemination and utilization of research findings, and AHCPR liaison with health care policy makers, providers, and consumers.

Agenda: The open session of the meeting on October 23 from 8:00 a.m. to 8:30 a.m. will be devoted to general business matters. During the closed portions of the meeting, the Study Section will be reviewing and discussing grant applications dealing with health services research issues. In accordance with the Federal Advisory Committee Act, section 10(d) of 5 U.S.C., Appendix 2 and 5 U.S.C. 552b(c)(6), it has been determined that this latter session will be closed because the discussions are likely to reveal personal information concerning individuals associated with the grant applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a roster of members, minutes of the meeting, or other relevant information should contact Linda Blankenbaker, Scientific Review Administrator, Office of Scientific Affairs, Agency for Health Care Policy and Research, Suite 400, 2101 East Jefferson Street, Rockville, Maryland 20852, Telephone (301) 594–1438.

Name: Health Care Technology Study Section.

Date and Time: November 6–7, 1995, 8:00 a.m.

Place: Hyatt Regency, One Bethesda Metro Center, Conference Room TBA, Bethesda, Maryland 20814.

Open November 6, 8:00 a.m. to 9:00 a.m.

Closed for remainder of meeting.

Purpose: The Study Section is charged with conducting the initial review of health services research grant applications concerned with medical decisionmaking, computers in health care delivery, and the utilization and effects of health care technologies and procedures.

Agenda: The open session on November 6 from 8:00 a.m. to 9:00 a.m. will be devoted to a business meeting covering administrative matters and reports. The closed session of the meeting will be devoted to reviewing and discussing grant applications dealing with health services research issues. In accordance with the Federal Advisory Committee Act, section 10(d) of 5 U.S.C., Appendix 2 and 5 U.S.C., 552b(c)(6), it has been determined that this latter session will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a roster of members, minutes of the meeting, or other relevant information should contact Karen Rudzinski, Ph.D., Scientific Review Administrator, Office of Scientific Affairs, Agency for Health Care Policy and Research, Suite 400, Executive Office Center, 2101 East Jefferson Street, Rockville, Maryland 20852, Telephone (301) 594–1437.

Agenda items for all meetings are subject to change as priorities dictate.

Dated: August 24, 1995.

Clifton R. Gaus,

Administrator.

BILLING CODE 4160–90–M

Food and Drug Administration

[Docket No. 95C–0286]

Ebonex Corp.; Filing of a Color Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Ebonex Corp. has filed a petition proposing that the color additive regulations be amended to provide for the safe use of bone black as a color additive in cosmetics, including cosmetics intended for use in the eye area.

DATES: Written comments on the petitioner's environmental assessment by October 2, 1995.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mitchell A. Cheeseman, Center for Food Safety and Applied Nutrition (HFS–217), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–418–3083.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 721(d)(1) (21 U.S.C. 379e(d)(1))), notice is given that a color additive petition (CAP 5C0247) has been filed by Ebonex Corp., P.O. Box 3247, Melvindale, MI 48122. The petition proposes to amend the color additive regulations to provide for the safe use of bone black as a color additive in cosmetics, including cosmetics intended for use in the eye area.

The potential environmental impact of this action is being reviewed. To encourage public participation consistent with regulations promulgated under the National Environmental Policy Act (40 CFR 1501.4(b)), the agency is placing the environmental assessment submitted with the petition that is the subject of this notice on public display at the Dockets Management Branch (address above) for public review and comment. Interested persons may, on or before October 2, 1995, submit to the Dockets Management Branch (address above) written comments. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. FDA will also place on public display any amendments to, or comments on, the petitioner's environmental assessment without further announcement in the **Federal Register**. If, based on its review, the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: August 18, 1995.

George H. Pauli,

Acting Director, Office of Premarket Approval, Center for Food Safety and Applied Nutrition.

Health Resources and Services Administration Advisory Council; Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of September 1995.

Name: National Advisory Council on the National Health Service Corps.

Date and Time: September 14–17, 1995.

Place: Marriott Hotel Airport, Kansas City, Missouri, (816) 464–2200.

The meeting is open to the public.

Agenda: The agenda will include testimony on an oral health paper, update on the National Health Service Corps conference "Creating a Road Map for the Future", and updates on programmatic and legislative issues. The Council will also visit two Health centers in Kansas City and participate in the Region VII New Provider Orientation Conference on September 16–17.

The meetings will begin at 7:00 p.m. on Thursday and reconvene at 8:00 a.m. each successive date and adjourn at 12:30 on Sunday.

The meeting is open to the public; however, transportation for site visits will not be provided.

Anyone requiring information regarding the subject Council should contact Ms. Nada Schnabel, National Advisory Council on the National Health Service Corps, 8th floor, 4350 East West Highway, Rockville, Maryland 20857, Telephone (301) 594–4147.

Agenda Items are subject to change as priorities dictate.

Dated: August 28, 1995.

BILLING CODE 4160–15–P

National Institutes of Health

National Institute of Allergy and Infectious Diseases; Notice of Meeting: Microbiology and Infectious Diseases Research Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Microbiology and Infectious Diseases Research Committee, National Institute of Allergy and Infectious Diseases, on October 5–6, 1995, at the Belmont Conference Center, 6555 Belmont Woods Road, Elkridge, Maryland.

The meeting will be open to the public from 8 a.m. to 9 a.m. on October 5, to discuss administrative details relating to committee business and for program review. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting will be closed to the public for the review, discussion, and evaluation of individual grant applications and contract proposals from 9 a.m. until recess on October 5, and from 8 a.m. until adjournment on October 6. These applications, proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Claudia Goad, Committee Management Officer, National Institute of Allergy and Infectious Diseases, Solar Building, Room 3C26, National Institutes of Health, Bethesda, Maryland 20892, 301–496–7601, will provide a summary of the meeting and a roster of committee members upon request. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Ms. Goad in advance of the meeting.

Dr. Gary Madonna, Scientific Review Administrator, Microbiology and Infectious Diseases Research Committee, NIAID, NIH, Solar Building, Room 4C21, Rockville, Maryland 20892, telephone 301–496–3528, will provide substantive program information.

Place: Embassy Suites, Washington, DC.

Contact Person: Dr. Elliot Postow, Chief, Technology and Applied Sciences Review Section, 6701 Rockledge Drive, Room 5100, Bethesda, MD 20892, (301) 435–1750.

The meetings will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

This notice is being published less than 15 days prior to the meetings due to the urgent need to meet timing limitations imposed by the grant review cycle.

BILLING CODE 4140-01-M

National Institute of Dental Research; Notice of Meeting of NIDR Board of Scientific Counselors

Pursuant to Pub. L. 92–463, notice is hereby given of a meeting of the Board of Scientific Counselors, National Institute of Dental Research (NIDR), on October 4–6, 1995, in Building 30, Trendley Dean Conference Room, National Institutes of Health, Bethesda, Maryland. The meeting will be open to the public from 9:00 a.m. to recess on October 5 and from 8:30 a.m. to 10:30 a.m. on October 6 for program and poster presentations. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sec. 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 6:00 p.m. until recess on October 4 and from 10:30 a.m. until adjournment on October 6 for the review, discussion, and evaluation of individual programs and projects conducted by the NIDR, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. Brent Jaquet, Director, Office of Planning, Evaluation, and Communications, NIDR, HIH, Building 31, Room 2C34, Bethesda, Maryland 20892 (telephone: (301) 496–6705) will provide a summary of the meeting, roster of committee members and substantive program information. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact the Executive Secretary listed above in advance of the meeting.

Dated: August 28, 1995.

Margery G. Grubb,

Senior Committee Management Specialist, NIH.

BILLING CODE 4140-01-M

National Institute of Dental Research; Notice of a Meeting of the National Advisory Dental Research Council

Pursuant to Pub. L. 92–463, notice is hereby given of a meeting of the National Advisory Dental Research Council, National Institute of Dental Research, on September 28–29, 1995. The meeting of the full Council will be open to the public on September 28 from 8:30 a.m. to recess, Conference Room 10, Building 31C, National Institutes of Health, Bethesda, Maryland, for general discussion and program presentations. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting of the Council will be closed to the public on September 29, 8:30 a.m. to adjournment, for the review, discussion and evaluation of individual grant applications and for the discussion, review and evaluation of the Board of Scientific Counselors' report. These applications and discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications and reports, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Dushanka V. Kleinman, Executive Secretary, National Advisory Dental Research Council, and Deputy Director, National Institute of Dental Research, National Institutes of Health, Building 31, Room 2C39, Bethesda, Maryland 20892, (telephone (301) 496–9469) will furnish a roster of committee members, a summary of the meeting, and other information pertaining to the meeting. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact the Executive Secretary listed above in advance of the meeting.

National Institute of Mental Health; Notice of Closed Meetings

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meetings of the National Institute of Mental Health Initial Review Group:

Agenda/Purpose

To review and evaluate grant applications.

Committee Name: Clinical Centers and Special Projects Review Committee.

Date: October 5–October 6, 1995.

Time: 8:30 a.m.

Place: NIH Natcher Conference Center, 9000 Rockville Pike, Bethesda, MD 20892.

Contact Person: Phyllis L. Zusman, Parklawn Building, Room 9C–18, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–1340.

Committee Name: Health Behavior and Prevention Review Committee.

Date: October 10–October 11, 1995.

Time: 9 a.m.

Place: Bethesda Holiday Inn, 8120 Wisconsin Avenue, Bethesda, MD 20814.

Contact Person: Monica F. Woodfork, Parklawn Building, Room 9C–26, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–4843.

Committee Name: Neuropharmacology and Neurochemistry Review Committee.

Date: October 11–October 12, 1995.

Time: 8:30 a.m.

Place: Holiday Inn, Bethesda, 8120 Wisconsin Avenue, Bethesda, MD 20814.

Contact Person: Shirley H. Maltz, Parklawn, Room 9–101, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–3936.

Committee Name: Services Research Review Committee.

Date: October 11–October 13, 1995.

Time: 8:30 a.m.

Place: Double Tree Hotel, 1750 Rockville Pike, Rockville, MD 20852.

Contact Person: Angela L. Redlingshafer, Parklawn Building, Room 9C–18, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–1367.

Committee Name: Clinical Neuroscience and Biological Psychopathology Review Committee.

Date: October 11–October 13, 1995.

Time: 9 a.m.

Place: Hampshire Hotel, 1310 New Hampshire Ave., N.W., Washington, DC 20036.

Contact Person: Maureen L. Eister, Parklawn Building, Room 9–101, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–3936.

Committee Name: Mental Disorders of Aging Review Committee.

Date: October 12–October 13, 1995.

Time: 8:30 a.m.

Place: Double Tree Hotel, 1750 Rockville Pike, Rockville, MD 20852.

Contact Person: W. Gregory Zimmerman, Parklawn, Room 9C–18, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–1340.

Committee Name: Child/Adolescent Development, Risk, and Prevention Review Committee.

Date: October 12–October 13, 1995.

Time: 9 a.m.

Place: Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, MD 20814.

Contact Person: Phyllis D. Artis, Parklawn Building, Room 9C–26, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–6470.

Committee Name: Violence and Traumatic Stress Review Committee.

Date: October 16–October 18, 1995.

Time: 8:30 a.m.

Place: The Latham Hotel, 3000 M Street, N.W., Washington, DC 20007–3701.

Contact Person: Sheri L. Schwartzback, Parklawn Building, Room 9C–26, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–4843.

Committee Name: Psychobiology, Behavior, and Neuroscience Review Committe.

Date: October 16–October 17, 1995.

Time: 8:30 a.m.

Place: Bethesda Holiday Inn, 8210 Wisconsin Avenue, Bethesda, MD 20814.

Contact Person: William H. Radcliff, Parklawn Building, Room 9–101, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–3936.

Committee Name: Molecular, Cellular, and Developmental Neurobiology Review Committee.

Date: October 16–October 17, 1995.

Time: 8 a.m.

Place: Chevy Chase Holiday Inn, 5520 Wisconsin Avenue, Chevy Chase, MD 20815.

Contact Person: Shirley H. Maltz, Parklawn Building, Room 9–101, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–3936.

Committee Name: Cognitive Functional Neuroscience Review Committee.

Date: October 19–October 20, 1995.

Time: 8:30 a.m.

Place: One Washington Circle, One Washington Circle, NW., Washington, DC 20037.

Contact Person: Shirley H. Maltz, Parklawn Building, Room 9–101, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–3936.

Committee Name: Perception and Cognition Review Committee.

Date: October 19–October 20, 1995.

Time: 9 a.m.

Place: Madison Hotel, 1177 15th Street, NW., Washington, DC 20036

Contact Person: Regina M. Thomas, Parklawn, Room 9C–26, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–6470.

Committee Name: Child Psychopathology and Treatment Review Committee.

Date: October 25–October 26, 1995.

Time: 9 a.m.

Place: Ramada Inn Rockville, 1775 Rockville Pike, Rockville, MD 20852.

Contact Person: Bernice R. Cherry, Parklawn Building, Room 9C–18, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–1367.

Committee Name: Social and Group Processes Review Committee.

Date: October 26–October 27, 1995.

Time: 9 a.m.

Place: Holiday Inn, Bethesda, 8120 Wisconsin Avenue, Bethesda, MD 20814.

Contact Person: Rehana A. Chowdhury, Parklawn, Room 9C–26, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–6470.

Committee Name: Treatment Assessment Review Committee.

Date: October 26–October 27, 1995.

Time: 9 a.m.

Place: Barcelo Washington Hotel, 2121 P Street, NW., Washington, DC 20037.

Contact Person: Phyllis L. Zusman, Parklawn, Room 9C–18, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–1340.

Committee Name: Mental Health Small Business Research Review Committee.

Date: October 30–October 31, 1995.

Time: 8:30 a.m.

Place: Chevy Chase Holiday Inn, 5520 Wisconsin Avenue, Chevy Chase, MD 20815.

Contact Person: Angela L. Redlingshafer, Parklawn Building, Room 9C–18, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–1367.

Committee Name: Clinical Psychopathology Review Committee.

Date: November 2–November 3, 1995.

Time: 9 a.m.

Place: Bethesda Marriott Hotel, 5151 Pooks Hill Road, Bethesda, MD 20814.

Contact Person: Phyllis L. Zusman, Parklawn, Room 9C–18, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–1340.

Committee Name: Epidemiology and Genetics Review Committee.

Date: November 6–November 7, 1995.

Time: 9 a.m.

Place: Embassy Suites, 4300 Military Road, N.W., Washington, DC 20015.

Contact Person: Bernice R. Cherry, Parklawn Building, Room 9C–18, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301, 443–1367.

Committee Name: Mental Health, AIDS and Immunology Review Committee—2.

Date: November 6–November 7, 1995.

Time: 8:30 a.m.

Place: The River Inn, 924 25th Street, N.W., Washington, DC 20037.

National Institute of Allergy and Infectious Diseases; Meeting: Allergy, Immunology, and Transplantation Research Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Allergy, Immunology, and Transplantation Research Committee on October 17–18, 1995, at the Georgetown Holiday Inn, 2101 Wisconsin Avenue, NW., Washington, DC.

The meeting will be open to the public from 8:30 a.m. to 9:45 a.m. on October 17 to discuss administrative details relating to committee business and program review, and for a report from the Director, Division of Extramural Activities which will include a discussion of budgetary matters. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting will be closed to the public for the review, discussion, and evaluation of individual grant applications and contract proposals from 9:45 a.m. until recess on October 17, and from 8:30 a.m. until adjournment on October 18. These applications, proposals, and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning

individuals associated with the applications and proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Claudia Goad, Committee Management Officer, National Institute of Allergy and Infectious Diseases, Solar Building, Room 3C26, National Institutes of Health, Bethesda, Maryland 20892, 301–496–7601, will provide a summary of the meeting and a roster of committee members upon request. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Ms. Goad in advance of the meeting.

Dr. Olivia Preble, Acting Scientific Review Administrator, Allergy, Immunology and Transplantation Research Committee, NIAID, NIH, Solar Building, Room 4C19, Bethesda, Maryland 20892, telephone 301–496–8208, will provide substantive program information.

BILLING CODE 4140–01–M

Substance Abuse and Mental Health Services Administration

Current List of Laboratories Which Meet Minimum Standards To Engage in Urine Drug Testing for Federal Agencies and Laboratories That Have Withdrawn From the Program

AGENCY: Substance Abuse and Mental Health Services Administration, HHS (Formerly: National Institute on Drug Abuse, ADAMHA, HHS).

ACTION: Notice.

SUMMARY: The Department of Health and Human Services notifies Federal agencies of the laboratories currently certified to meet standards of Subpart C of Mandatory Guidelines for Federal Workplace Drug Testing Programs (59 FR 29916, 29925). A similar notice listing all currently certified laboratories will be published during the first week of each month, and updated to include laboratories which subsequently apply for and complete the certification process. If any listed laboratory's certification is totally suspended or revoked, the laboratory will be omitted from updated lists until such time as it is restored to full certification under the Guidelines.

If any laboratory has withdrawn from the National Laboratory Certification Program during the past month, it will be identified as such at the end of the current list of certified laboratories, and will be omitted from the monthly listing thereafter.

FOR FURTHER INFORMATION CONTACT: Mrs. Giselle Hersh, Division of Workplace Programs, Room 13A–54, 5600 Fishers Lane, Rockville, Maryland 20857; Tel.: (301) 443–6014.

SUPPLEMENTARY INFORMATION: Mandatory Guidelines for Federal Workplace Drug Testing were developed in accordance with Executive Order 12564 and section 503 of Pub. L. 100–71. Subpart C of the Guidelines, "Certification of Laboratories Engaged in Urine Drug Testing for Federal Agencies," sets strict standards which laboratories must meet in order to conduct urine drug testing for Federal agencies. To become certified an applicant laboratory must undergo three rounds of performance testing plus an on-site inspection. To maintain that certification a laboratory must participate in a quarterly performance testing program plus periodic, on-site inspections.

Laboratories which claim to be in the applicant stage of certification are *not* to be considered as meeting the minimum requirements expressed in the HHS Guidelines. A laboratory must have its letter of certification from SAMHSA, HHS (formerly: HHS/NIDA) which attests that it has met minimum standards.

In accordance with Subpart C of the Guidelines, the following laboratories meet the minimum standards set forth in the Guidelines:

Aegis Analytical Laboratories, Inc., 624 Grassmere Park Rd., Suite 21, Nashville, TN 37211, 615–331–5300
Alabama Reference Laboratories, Inc., 543 South Hull St., Montgomery, AL 36103, 800–541–4931/205–263–5745
American Medical Laboratories, Inc., 14225 Newbrook Dr., Chantilly, VA 22021, 703–802–6900
Associated Pathologists Laboratories, Inc., 4230 South Burnham Ave., Suite 250, Las Vegas, NV 89119–5412, 702–733–7866
Associated Regional and University Pathologists, Inc. (ARUP), 500 Chipeta Way, Salt Lake City, UT 84108, 801–583–2787
Baptist Medical Center—Toxicology Laboratory, 9601 I–630, Exit 7, Little Rock, AR 72205–7299, 501–227–2783 (formerly: Forensic Toxicology Laboratory Baptist Medical Center)
Bayshore Clinical Laboratory, 4555 W. Schroeder Dr., Brown Deer, WI 53223, 414–355–4444/800–877–7016
Cedars Medical Center, Department of Pathology, 1400 Northwest 12th Ave., Miami, FL 33136, 305–325–5810
Centinela Hospital Airport Toxicology Laboratory, 9601 S. Sepulveda Blvd., Los Angeles, CA 90045, 310–215–6020
Clinical Reference Lab, 11850 West 85th St., Lenexa, KS 66214, 800–445–6917

BILLING CODE 4160–20–U

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. FR–3778–N–52]

Federal Property Suitable as Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact Mark Johnston, room 7256, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708–1226; TDD number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with Sections 2905 and 2906 of the National Defense Authorization Act for Fiscal Year 1994, P.L. 103–160 (Pryor Act Amendment) and with 56 FR 23789 (May 24, 1991) and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the April 21, 1993 Court Order in *National Coalition for Homeless* v. *Veterans Administration*, No. 88–2503–OG (D.D.C.).

These properties reviewed are listed as suitable/available and unsuitable. In accordance with the Pryor Act Amendment the suitable properties will be made available for use to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Please be advised, in accordance with the provisions of the Pryor Act Amendment, and if no expressions of interest or applications are received by the Department of Health and Human Services (HHS) during the 60 day period, these properties will not longer be available for use to assist the homeless. In the case of buildings and properties for which no such notice is received, these buildings and properties shall be available only for the purpose of permitting a redevelopment authority to express in writing an interest in the use of such buildings and properties. These buildings and properties shall be available for a submission by such redevelopment authority exclusively for one year. Buildings and properties available for a redevelopment authority shall not be available for use to assist the homeless. If a redevelopment authority does not express an interest in the use of the buildings or properties or commence the use of buildings or properties within the applicable time period such buildings and properties shall then be republished as properties available for use to assist the homeless pursuant to Section 501 of the Steward B. McKinney homeless Assistance Act.

Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Brian Rooney, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A–10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 for detailed instructions or write a letter to Mark Johnston at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: U.S. Air Force: John Carr, Realty Specialist, HQ–AFBDA/BDR, Pentagon, Washington, DC 20330–5130; (703) 696–5581; (This is not a toll-free number).

Dated: August 25, 1995.

Jacquie M. Lawing,

Deputy Assistant Secretary for Economic Development.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK–962–1410–00–P]

Alaska; Notice for Publication AA–10439 Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(h)(1) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(h)(1), will be issued to Sealaska Corporation for 6.93 acres. The lands involved are in the vicinity of Anan Bay, Alaska.

Lots 1 and 2, U.S. Survey No. 9780, Alaska.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the JUNEAU EMPIRE. Copies of the decision may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7599 ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until October 2, 1995 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4, subpart E, shall be deemed to have waived their rights.

Patricia A. Baker,

Land Law Examiner, Branch of Gulf Rim Adjudication.

[FR Doc. 95–21769 Filed 8–31–95; 8:45 am]

BILLING CODE 4310–JA–P

[MT–930–1220–00; MTM 84500]

Notice of Proposed Withdrawal; Montana

AGENCY: Department of the Interior.

ACTION: Notice.

SUMMARY: The Department of the Interior proposes to withdraw approximately 19,100 acres of Federal lands for protection of the watersheds within the drainages of the Clark's Fork of the Yellowstone, Soda Butte Creek, and the Stillwater River, and the water quality and fresh water fishery resources within Yellowstone National Park. This notice segregates the land for up to 2 years from location and entry under the mining laws. The lands will remain open to mineral leasing.

FOR FURTHER INFORMATION CONTACT: Jeff Holdren, 1620 L Street NW, Washington, D.C. 20240, 202–542–7779.

SUPPLEMENTARY INFORMATION: On August 29, 1995, a petition was approved allowing the Assistant Secretary, Policy, Management, and Budget to file an application to withdraw the following described Federal lands from location and entry under the mining laws, subject to valid existing rights:

Principal Meridian, Montana

T. 8 S., R. 14 E.,
  Sec. 25, unsurveyed;
  Sec. 33, partly unsurveyed;
  Secs. 34 to 36, inclusive, unsurveyed.
T. 9 S., R. 14 E.,
  Secs. 1 to 28, inclusive;
  Secs. 33 to 36, inclusive, partly surveyed.
T. 8 S., R. 15 E.,
  Secs. 30 and 31.
T. 9 S., R. 15 E.,
  Secs. 5 to 8, inclusive;
  Secs. 17 to 20, inclusive;
  Secs. 29 to 32, inclusive.

The areas described aggregate approximately 19,100 acres in Park County, Montana.

The purpose of the proposed withdrawal is for protection of the watersheds within the drainages of the Clark's Fork of the Yellowstone, Soda Butte Creek, and the Stillwater River, and the water quality and fresh water fishery resources within Yellowstone National Park.

A withdrawal application, when filed, will be processed in accordance with the regulations set forth in 43 CFR 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the lands will be segregated from location and entry under the mining law, subject to valid existing rights, unless the application is denied or canceled or the withdrawal is approved prior to the end of the segregation period.

Existing uses of the segregated lands may be continued except for the location or relocation of mining claims during the pendency of the 2-year segregative period, including but not limited to all legal ingress and egress to valid mining claims and patented claims, all rights-of-way, all access to non-Federal lands, all current recreational uses, and all commercial uses requiring special use permits.

Dated: August 29, 1995.

Thomas P. Lonnie,

Deputy State Director, Division of Resources.

BILLING CODE 4310–DN–P

Bureau of Reclamation

Colorado River Basin Salinity Control Advisory Council, Public Meeting

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, announcement is made of a meeting of the Colorado River Basin Salinity Control Advisory Council.

DATES: The meeting begins on Wednesday, October 18, 1995, and reconvenes on Thursday, October 19, 1995, following the Colorado River Basin Salinity Control Forum meeting.

ADDRESSES: The meeting will be held at Lake Havasu City, Arizona.

FOR FURTHER INFORMATION CONTACT: Mr. David Trueman, Colorado River Salinity Control Program Manager, Bureau of Reclamation, UC–228, Mail Room 6107, 125 South State Street, Salt Lake City, Utah 84138–1102; Telephone: (801) 524–6292, ext. 1.

SUPPLEMENTARY INFORMATION: Council members will be briefed on the status of salinity control activities and receive input for drafting the Council's annual report. The Department of the Interior, the Department of Agriculture, and the Environmental Protection Agency will each present a progress report and a schedule of activities on salinity control in the Colorado River Basin. The Council will discuss salinity control activities and the content of their report.

The meeting of the Advisory Council is open to the public. Any member of the public may file written statements with the Council before, during, or after the meeting, in person or by mail. To the extent that time permits, the Council chairman may allow public presentation of oral statements at the meeting.

Dated: August 28, 1995.

Charles A. Calhoun,

Regional Director.

BILLING CODE 4310–94–M

Fish and Wildlife Service

Notice of Availability of a Technical/Agency Draft Recovery Plan for Harrisia portoricensis for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces availability for public review of a technical/agency draft recovery plan for *Harrisia portoricensis* (higo chumbo). This cactus occurs only on the islands of Mona, Monito, and Desecheo, all located to the west of Puerto Rico. The species is threatened by development which has been proposed on Mona Island and the effects of introduced animals such as feral pigs and goats. The Service solicits review and comments from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before October 31, 1995 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting Ms. Susan Silander, Caribbean Field Office, P.O. Box 491, Boquerón, Puerto Rico 00622. Comments and materials received are available upon request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Susan Silander, Caribbean Field Office, P.O. Box 491, Boquerón, Puerto Rico 00622, Telephone: 809/851–7297.

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened species or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

This Technical/Agency Draft is for *Harrisia portoricensis* (higo chumbo), a cactus currently known from the islands of Mona, Monito, and Desecheo, all located to the west of Puerto Rico. It once occurred on the main island, however, has not been collected there since 1913. Higo chumbo, a night flowering cactus, can reach 6 feet in height and about 3 inches in diameter. It is usually unbranched and has 8 to 11 ribs separated by shallow grooves. The plant's fruit is a round, yellow, spineless berry and is a favorite food of the endangered yellow-shouldered blackbird. Higo chumbo is threatened by proposed development on the island of Mona feral pigs, which may uproot the cactus while foraging for roots, and feral goats, which may indirectly affect the cactus by modifying the vegetation. This plan will describe measures necessary to recover the species, including studies of its reproductive biology and propagation.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1531.

Dated: August 25, 1995.

James P. Oland,

Field Supervisor.

BILLING CODE 4310–55–M

National Park Service

Mississippi River Corridor Study Commission

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets the schedule for the forthcoming meeting of the Mississippi River Corridor Study Commission. Notice of this meeting is required under the Federal Advisory Committee Act (Public Law 92–463).

MEETING DATE AND TIME: September 7, 1995, 12 noon until 5:00 p.m.

ADDRESS: Best Western Memphis Airport Hotel, 2240 Democrat, Memphis, Tennessee 38132.

This business meeting will be open to the public. Space and facilities to accommodate members of the public are limited and persons accommodated on a first-come, first-served basis. The Chairman will permit attendees to address the Commission, but may restrict the length of presentations. An agenda will be available from the National Park Service, Midwest Region, 1 week prior to the meeting.

FOR FURTHER INFORMATION CONTACT: Alan M. Hutchings, Acting Associate Regional Director, Planning and Resource Preservation, National Park Service, Midwest Region, 1709 Jackson Street, Omaha, Nebraska 68102, or call 402–221–3082.

SUPPLEMENTARY INFORMATION: The Mississippi River Corridor Study Commission was established by Public Law 101–398, September 29, 1990.

Dated: August 23, 1995.

William W. Schenk,

Field Director [illegible]on.

BILLING CODE 431[illegible]

AGENCY FOR INTERNATIONAL DEVELOPMENT

Loan Guarantees To Israel; Notice of Investment Opportunity Amendment No. 1

The Government of Israel (the "GOI") wishes to select a lead managing underwriter for the structuring and sale of U.S. Agency for International Development ("USAID")-guaranteed loans. The USAID-guaranteed loans have been authorized by Public Law 102–391, and are being provided in connection with Israel's extraordinary humanitarian effort to resettle and absorb immigrants into Israel from the republics of the former Soviet Union, Ethiopia and other countries.

The legislation authorizes the guaranty by USAID of up to $10 billion principal amount of loans over a five-year period, with a maximum of $2 billion in loans, offered in one or more tranches, to be guaranteed in each of the five fiscal years. This Notice is in connection with the GOI's selection of managing underwriters for an offering contemplated to be made under the authorization for the current fiscal year.

The lead managing underwriter for the proposed transaction will be selected through a competitive bid on the expected pricing date. In order to pre-qualify for participation in the competitive sale, potential bidders must demonstrate the requisite financial and technical capabilities by their responses to a Request for Proposals ("RFP"), which will be available from the GOT on or about July 28, 1995. Proposals must be submitted, in accordance with the RFP, by 5:00 p.m. on September 5, 1995. For information regarding the submission of proposals, please contact Mr. Eliahu Ziv-Zitouk, Chief Fiscal Officer, Ministry of Finance of the Government of Israel, 800 Second Avenue, New York, N.Y. 10017 (fax: 212/499/5715).

The GOI reserves the right to limit the number of firms that are eligible to submit bids to underwrite the proposed transaction, and to reject any or all bids. In order to be eligible for selection as a managing underwriter, an institution must be a member of the National Association of Securities Dealers, and otherwise meet the legal requirements for serving such role. All firms are encouraged to seek to prequalify, regardless of ethnic origin, race or gender.

The full repayment of the loans will be guaranteed by USAID. To be eligible for an USAID guaranty, the loans must be repayable in full no later than the thirtieth anniversary of the disbursement of the principal amount thereof. The USAID guaranty will be backed by the full faith and credit of the United States of America and will be issued pursuant to authority in Section 226 of the Foreign Assistance Act of 1961, as amended. Disbursements under the loans will be subject to certain conditions required of the GOI by USAID as set forth in agreements between USAID and the GOI.

Additional information regarding USAID's responsibilities in this guaranty program can be obtained from the undersigned: Room 225, SA–2, 515 22nd Street NW., Washington, D.C. 20523–0235, Telephone: 202/663–2773.

Dated: August 25, 1995.

Michael G. Kitay,

Assistant General Counsel, U.S. Agency for International Development.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31730 (Sub-No. 1)]

Rio Grande Industries, Inc., et al.—Trackage Rights Exemption—Burlington Northern Railroad Company Lines Between Kansas City, MO, and Chicago, IL

In a trackage rights agreement dated August 1, 1990 (1990 agreement), Burlington Northern Railroad Company (BN) granted Southern Pacific Transportation Company, The Denver and Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp. (collectively, SP) overhead trackage rights between Kansas City, MO, and Chicago, IL. *See Rio Grande Industries, Inc.,*[1] Southern Pacific Transportation Company, The Denver and Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, SPCSL Corp.—Trackage Rights—Burlington Northern Railroad Company Lines Between Kansas City, MO, and Chicago, IL, Finance Docket No. 31730 (ICC served Oct. 26, 1990).

The 1990 agreement has been modified by a settlement agreement dated April 13, 1995 (1995 agreement), which was entered into by SP, on the one side, and by BN and The Atchison, Topeka and Santa Fe Railway Company (Santa Fe), on the other side, in connection with the Finance Docket No. 32549 proceeding. *See Burlington Northern Inc. and Burlington Northern Railroad Company—Control and Merger—Santa Fe Pacific Corporation and The Atchison, Topeka and Santa Fe Railway Company*, Finance Docket No. 32549 (ICC served Aug. 23, 1995) (*BN/Santa Fe).* The 1995 agreement provides, among other things, that notwithstanding the terms of the 1990 agreement (which provides for overhead trackage rights only), SP shall be granted: access to all industries which are served directly or by reciprocal switching by either BN or Santa Fe at Fort Madison, IA, and Galesburg, IL; and access to the Toledo, Peoria and Western Railway Corporation at Bushnell, IL. The 1995 agreement further provides that BN and Santa Fe shall have the right to coordinate operations over their lines between Kansas City and Chicago and to alter the usage between each line, including usage of BN's line by SP.[2]

The modification of the terms of the 1990 agreement will be effective upon consummation of common control of BN and Santa Fe, which can occur no earlier than September 22, 1995. *See BN/Santa Fe*, slip op. at 117.

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Paul A. Cunningham, Harkins Cunningham, 1300 19th Street, N.W., Suite 600, Washington, D.C. 20036.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected under *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Decided: August 25, 1995.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 7035–01–P

[Finance Docket No. 32719]

Southern Pacific Transportation Company, The Denver and Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp.—Trackage Rights Exemption—The Atchison, Topeka and Santa Fe Railway Company Lines Between Pueblo, CO, and Amarillo, TX

The Atchison, Topeka and Santa Fe Railway Company (Santa Fe) has agreed to grant Southern Pacific Transportation Company, The Denver and Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp. (collectively, SP): (1) Overhead trackage rights over Santa Fe's lines between Pueblo, CO (in the vicinity of Santa Fe's Denver Subdivision Milepost 617.7) and Stratford, TX (in the vicinity of Santa Fe's Boise City Subdivision Milepost 85.5); and (2) overhead trackage rights over Santa Fe's lines between Pueblo, CO (in the vicinity of Santa Fe's Denver Subdivision Milepost 617.7) and Amarillo, TX (in the vicinity of Santa Fe's Panhandle Subdivision Milepost 552.3), solely for the purpose of serving industries located at Amarillo, TX.

These trackage rights have been granted pursuant to a settlement agreement dated April 13, 1995, which was entered into by SP, on the one side, and by Santa Fe and Burlington Northern Railroad Company (BN), on the other side, in connection with the Finance Docket No. 32549 proceeding. *See Burlington Northern Inc. and Burlington Northern Railroad Company—Control and Merger—Santa Fe Pacific Corporation and The Atchison, Topeka and Santa Fe Railway Company*, Finance Docket No. 32549 (ICC served Aug. 23, 1995) (*BN/Santa Fe*).

The settlement agreement also provides that BN will grant SP overhead trackage rights between Dalhart, TX, and Fort Worth, TX. This is the subject of a separate exemption notice. *See* Finance Docket No. 32720, *Southern Pacific Transportation Company, The Denver And Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp.—Trackage Rights Exemption—Burlington Northern Railroad Company Lines Between Dalhart, TX, and Fort Worth, TX.* The settlement agreement further provides that SP shall also be granted: Access to all industries which are served directly or by reciprocal switching by either BN or Santa Fe at Amarillo, TX, at Plainview, TX, and at Lubbock, TX; and access to the Seagraves, Whiteface and Lubbock Railroad at Lubbock, TX. *See BN/Santa Fe*, slip op. at 85.

The settlement agreement provides that the various rights granted therein will be effective upon consummation of common control of BN and Santa Fe, which can occur no earlier than September 22, 1995. *See BN/Santa Fe*, slip op. at 117.

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Paul A. Cunningham, Harkins Cunningham, 1300 19th Street, N.W., Suite 600, Washington, D.C. 20036.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected under *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Decided: August 25, 1995.

BILLING CODE 7035–01–M

[Finance Docket No. 32722]

Southern Pacific Transportation Company, The Denver And Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp.—Trackage Rights Exemption—The Atchison, Topeka and Santa Fe Railway Company Lines Between Kansas City, KS, and Fort Worth, TX, and Between Hutchinson, KS, and Winfield Junction, KS

The Atchison, Topeka and Santa Fe Railway Company (Santa Fe) has agreed to grant Southern Pacific Transportation Company, The Denver and Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp. (collectively, SP) overhead trackage rights over Santa Fe's lines: between Kansas City, KS, and Fort Worth, TX (via Olathe, KS, and Cassoday, KS); and between Hutchinson, KS, and Winfield Junction, KS (via Wichita, KS). The Kansas City-Fort Worth trackage rights will run between Kansas City (in the vicinity of Santa Fe's Emporia Subdivision Milepost 1.7) and Fort Worth (in the vicinity of Santa Fe's Fort Worth Subdivision Milepost 345.6). The Hutchinson-Winfield Junction trackage rights will run between Hutchinson (in the vicinity of Santa Fe's La Junta Subdivision Milepost 216.4) and Winfield Junction (in the vicinity of Santa Fe's Arkansas City Subdivision Milepost 249.7).

These trackage rights have been granted pursuant to a settlement agreement dated April 13, 1995, which was entered into by SP, on the one side, and by Santa Fe and the Burlington Northern Railroad Company (BN), on the other side, in connection with the Finance Docket No. 32549 proceeding. *See Burlington Northern Inc. and Burlington Northern Railroad Company—Control and Merger—Santa Fe Pacific Corporation and The Atchison, Topeka and Santa Fe Railway Company*, Finance Docket No. 32549 (ICC served Aug. 23, 1995) (*BN/Santa Fe*).

The settlement agreement provides that the Kansas City-Fort Worth and Hutchinson-Winfield Junction trackage rights will be overhead rights only, subject to the access rights indicated in the next sentence. Under the terms of the settlement agreement, SP will receive access to: Industries served directly or by reciprocal switching by BN or Santa Fe at Wichita; industries at Hutchinson, through the present reciprocal switching arrangements; the Central Kansas Railway at Wichita; and the South Kansas and Oklahoma Railroad at Winfield, KS.

The settlement agreement provides that the various rights granted therein will be effective upon consummation of common control of BN and Santa Fe, which can occur no earlier than September 22, 1995. *See BN/Santa Fe*, slip op. at 117.

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Paul A. Cunningham, Harkins Cunningham, 1300 19th Street, NW., Suite 600, Washington, DC 20036.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected under *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Decided: August 25, 1995.

BILLING CODE 7035–01–M

[Finance Docket No. 32721]

Southern Pacific Transportation Company, et al.—Trackage Rights Exemption—The Atchison, Topeka and Santa Fe Railway Company Lines Between Hutchinson, KS, and Chicago, IL, and Between Topeka, KS, and Kansas City, KS

The Atchison, Topeka and Santa Fe Railway Company (Santa Fe) has agreed to grant Southern Pacific Transportation Company, The Denver and Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp. (collectively, SP) overhead trackage rights over Santa Fe's lines: between Hutchinson, KS, and Chicago, IL (via Ottawa, KS); and between Topeka, KS, and Kansas City, KS. The Hutchinson-Chicago trackage rights will run between Hutchinson (in the vicinity of Santa Fe's La Junta Subdivision Milepost 220.9) and Chicago (in the vicinity of Santa Fe's Chillicothe Subdivision Milepost 14.3 at McCook, IL, and in the vicinity of Santa Fe's Chillicothe Subdivision Milepost 7.3 at Nerska, IL). The Topeka-Kansas City trackage rights will run between Topeka (in the vicinity of Santa Fe's Topeka Subdivision Milepost 52.4) and Kansas City (in the vicinity of Santa Fe's Emporia Subdivision Milepost 1.7).

These trackage rights have been granted pursuant to a settlement agreement dated April 13, 1995, which was entered into by SP, on the one side, and by Santa Fe and the Burlington Northern Railroad Company (BN), on the other side, in connection with the Finance Docket No. 32549 proceeding. *See Burlington Northern Inc. and Burlington Northern Railroad Company—Control and Merger—Santa Fe Pacific Corporation and The Atchison, Topeka and Santa Fe Railway Company*, Finance Docket No. 32549

---

[1] The entity formerly known as Rio Grande Industries, Inc., is now known as Southern Pacific Rail Corporation.

[2] The 1995 agreement also provides for the operation of SP trains over Santa Fe's lines between Kansas City and Chicago. This is the subject of a separate exemption notice. *See* Finance Docket No. 32721, *Southern Pacific Transportation Company, The Denver And Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp.—Trackage Rights Exemption—The Atchison, Topeka and Santa Fe Railway Company Lines Between Hutchinson, KS, and Chicago, IL, and Between Topeka, KS, and Kansas City, KS.*

(ICC served Aug. 23, 1995) (*BN/Santa Fe*).

The settlement agreement provides that SP may employ the Hutchinson-Chicago trackage rights only for trains comprised of not less than 90 percent intermodal or automotive traffic. The settlement agreement also provides that SP may not employ the Hutchinson-Chicago trackage rights to interchange with or connect with its own lines or the lines of any other carrier, with certain specified exceptions indicated in the next sentence. Under the terms of the settlement agreement, SP: may enter and exit Santa Fe's line at Kansas City solely to access the Kansas City Terminal Railroad and, through it, its connections; may enter and exit the Santa Fe line at Lomax, IL, solely for the purpose of accessing the Toledo, Peoria and Western Railway Corporation for intermodal and automotive traffic; may connect and interchange with other carriers at Streator, IL, solely for the purpose of movement to and from Chicago of traffic originating, terminating, or interchanged with other carriers in the Chicago area; and may connect with the Illinois Central Railroad at Joliet, IL, for movement over its lines to and from facilities at Chicago, for traffic originating or terminating at Chicago or interchanged with other carriers at Chicago.

The settlement agreement allows Santa Fe and BN to coordinate operations over their respective lines between Kansas City and Chicago, so that SP traffic moving over BN's lines between Kansas City and Chicago pursuant to trackage rights granted by BN in 1990 [1] may be rerouted over Santa Fe's lines, for the operational convenience of BN and Santa Fe.[2]

The settlement agreement provides that the various rights granted therein will be effective upon consummation of common control of BN and Santa Fe, which can occur no earlier than September 22, 1995. *See BN/Santa Fe*, slip op. at 117.

This notice is filed under 49 CFK 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Paul A. Cunningham, Harkins Cunningham, 1300 19th Street, N.W., Suite 600, Washington, D.C. 20036.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected under *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Decided: August 25, 1995.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

[Finance Docket No. 32720]

Southern Pacific Transportation Company, The Denver and Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp.—Trackage Rights Exemption—Burlington Northern Railroad Company Lines Between Dalhart, TX, and Fort Worth, TX

Burlington Northern Railroad Company (BN) has agreed to grant Southern Pacific Transportation Company, The Denver and Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp. (collectively, SP) overhead trackage rights over BN's lines between Dalhart, TX (in the vicinity of BN's Milepost 417.5) and Fort Worth TX (in the vicinity of BN's Milepost 5.1).

These trackage rights have been granted pursuant to a settlement agreement dated April 13, 1995, which was entered into by SP, on the one side, and by BN and The Atchison, Topeka and Santa Fe Railway Company (Santa Fe), on the other side, in connection with the Finance Docket No. 32549 proceeding. *See Burlington Northern Inc. and Burlington Northern Railroad Company—Control and Merger—Santa Fe Pacific Corporation and The Atchison, Topeka and Santa Fe Railway Company*, Finance Docket No. 32549 (ICC served Aug. 23, 1995) (*BN/Santa Fe*).

The settlement agreement also provides that Santa Fe will grant SP: (1) Overhead trackage rights over Santa Fe's lines between Pueblo, CO, and Stratford, TX; and (2) overhead trackage rights over Santa Fe's lines between Pueblo, CO, and Amarillo, TX, solely for the purpose of serving industries located at Amarillo, TX. This is the subject of a separate exemption notice. See Finance Docket No. 32719, *Southern Pacific Transportation Company, The Denver and Rio Grande Western Railroad Company, St. Louis Southwestern Railway Company, and SPCSL Corp.—Trackage Rights Exemption—The Atchison, Topeka and Santa Fe Railway Company Lines Between Pueblo, CO, and Amarillo, TX*. The settlement agreement further provides that SP shall also be granted: access to all industries which are served directly or by reciprocal switching by either BN or Santa Fe at Amarillo, TX, at Plainview, TX, and at Lubbock, TX; and access to the Seagraves, Whiteface and Lubbock Railroad at Lubbock, TX. *See BN/Santa Fe*, slip op. at 85.

The settlement agreement provides that the various rights granted therein will be effective upon consummation of common control of BN and Santa Fe, which can occur no earlier than September 22, 1995. *See BN/Santa Fe*, slip op. at 117.

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Paul A. Cunningham, Harkins Cunningham, 1300 19th Street, N.W., Suite 600, Washington, D.C. 20036.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected under *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Decided: August 25, 1995.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

BILLING CODE 7035-01-P

[Finance Docket No. 32760]

Union Pacific Corporation, Union Pacific Railroad Company and Missouri Pacific Railroad Company—Control and Merger—Southern Pacific Rail Corporation, Southern Pacific Transportation Company, St. Louis Southwestern Railway Company, SPCSL Corp. and the Denver and Rio Grande Western Railroad Company

AGENCY: Interstate Commerce Commission.

ACTION: Decision No. 1; Notice of prefiling notification and request for comments.

SUMMARY: Pursuant to 49 CFR 1180.4(b), Union Pacific Corporation (UPC), Union Pacific Railroad Company (UPRR), Missouri Pacific Railroad Company (MPRR), Southern Pacific Rail Corporation (SPR), Southern Pacific Transportation Company (SPT), St. Louis Southwestern Railway Company (SSW), SPCSL Corp. (SPCSL), and the Denver and Rio Grande Western Railroad Company (DRGW) [1] have notified the Commission of their intent to file an application seeking authority under 49 U.S.C. 11343–45 for: (1) The acquisition of control of SPR by UP Acquisition Corporation (Acquisition), an indirect wholly owned subsidiary of UPC; (2) the merger of SPR into UPRR; and (3) the resulting common control of UP and SP by UPC. The Commission finds this to be a major transaction as defined in 49 CFR Part 1180. The applicants have proposed a procedural schedule, on which the Commission invites comments by interested persons.

DATES: Written comments on the proposed schedule must be filed with the Interstate Commerce Commission no later than September 18, 1995. The applicants' reply is due by September 28, 1995.

ADDRESSES: An original and 20 copies of all documents must refer to Finance Docket No. 32760 and must be sent to the Office of the Secretary, Case Control Branch, Attn: Finance Docket No. 32760, Interstate Commerce Commission, 1201 Constitution Avenue, NW., Washington, DC 20423.

In addition, one copy of all documents in this proceeding must be sent to each of the applicants' representatives: (1) Arvid E. Roach II, Esq., Covington & Burling, 1201 Pennsylvania Avenue, NW., PO Box 7566, Washington, DC 20044; and (2) Paul A. Cunningham, Esq., Harkins Cunningham, 1300 Nineteenth Street, NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Beryl Gordon, (202) 927–5610. [TDD for the hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: In the notice of intent filed August 4, 1995, the applicants state that under an Agreement and Plan of Merger dated August 3, 1995, UPC, Acquisition, UPRR and SPR have agreed that Acquisition will acquire all of the common stock of SPR. Acquisition plans first to acquire 25% of the stock of SPR for cash in a tender offer and place that stock in a voting trust pending review of the merger by the Commission.[2] Upon the satisfaction of certain conditions, including approval of the merger by the Commission, the remainder of the SPR stock will then be acquired for a combination of UPC stock and cash, and SPR will be merged into UPRR. The UP and SP railroads will then be consolidated.

The applicants state that they will use the year 1993 for purposes of their impact analyses to be filed in the application, and that they anticipate filing their application on or before December 1, 1995. On August 11, 1995, Santa Fe Pacific Corporation and The Atchison, Topeka, and Santa Fe Railway Company (collectively, Santa Fe) filed a partial objection to the notice of intent, objecting to the use of 1993 data in this proceeding (SF–2).[3] Also on August 11, 1995, the applicants filed a modification of their notice of intent (UP/SP–5). The applicants state that, if the 1994 ICC Waybill Sample is available by September 1, 1995, they will use 1994 as the base year, and that, if it is not, they will use 1993. Consultation with the Commission's Office of Economics and Environmental Analysis (OEEA) indicates that the 1994 data will be available by September 5, 1995. That being the case, we will require the applicants to use the 1994 data. If, for some reason, the data are not available on that date, we will reconsider this issue at that time.

The Commission finds that this is a major transaction, as defined at 49 CFR 1180.2(a), as it is a control and merger transaction involving two or more class I railroads. The application must conform to the regulations set forth at 49 CFR Part 1180 and must contain all information required therein for major transactions, except as modified by any advance waiver. The carriers are also required to submit maps with overlays that show the existing routes of both carriers and their competitors.

By petition also filed August 4, 1995, the applicants seek a protective order to protect confidential, highly confidential, and proprietary information, including contract terms, shipper-specific traffic data, and other traffic data to be submitted in connection with the control application (UP/SP–2). A protective order will be entered in a subsequent decision.

Also on August 4, 1995, the applicants filed a petition to establish a proposed procedural schedule (UP/SP–4). The Commission seeks comments now on the applicants' proposed procedural schedule, which is as follows:

Proposed Procedural Schedule

F	Primary application and related applications filed.
F + 30	Commission notice of acceptance of primary application and related applications published.
F + 60	Description of anticipated inconsistent and responsive applications due; petitions for waiver or clarification with regard to such applications due.
F + 90	Inconsistent and responsive applications due. All comments, protests, requests for conditions, and any other opposition evidence

---

[1] UPC, UPRR, and MPRR are referred to collectively as Union Pacific. UPRR and MPRR are referred to collectively as UP.

SPR, SPT, SSW, SPCSL, and DRGW are referred to collectively as Southern Pacific. SPT, SSW, SPCSL, and DRGW are referred to collectively as SP.

UPC, UPRR, MPRR, SPR, SPT, SSW, SPCSL, and DRGW are referred to collectively as applicants or petitioners.

Applicants have petitioned for waiver or clarification of the definition of applicants so as to exclude Chicago and North Western Transportation Company (CNWT), Chicago and North Western Railway Company (CNW), and Western Railroad Properties Incorporated (WRPI), thus eliminating the necessity of their joining in the filing of the application. CNWT and CNW are scheduled to be merged into UPRR on October 1, 1995; WRPI was merged into UPRR on August 1, 1995.

[2] On August 4, 1995, the applicants filed a copy of the voting trust agreement proposed to be entered into by and between UPC, Acquisition, and Southwest Bank of St. Louis, an institutional trustee. The applicants state that they believe that Acquisition's planned purchase of 25% of the outstanding voting stock of SPR will not give UPC and its affiliates the power to exercise control of SPR and its affiliates. However, the applicants request that Commission staff issue an informal, non-binding opinion stating whether the voting trust agreement and the arrangements contained therein will effectively insulate UPC and its affiliates from any violation of the Interstate Commerce Act and Commission policy against unauthorized acquisition of control of SPR's carrier subsidiaries.

[3] Santa Fe essentially argues that, for a transaction as significant as this one, the Commission should have available the most relevant information necessary to assess changes in railroad operations and competitive impacts that will result from the proposed transaction. It is Santa Fe's position that more recent data would provide the Commission with the most relevant information, and that 1994 data will be available in ample time for use in this proceeding.

and arguments due. DOJ and DOT comments due.
F + 105 Notice of acceptance (if required) of inconsistent and responsive applications published in the **Federal Register**.
F + 120 Response to inconsistent and responsive applications due. Response to comments, protests, requested conditions, and other opposition due. Rebuttal in support of primary application and related applications due.
F + 130 Rebuttal in support of inconsistent and responsive applications due.
F + 140 Briefs due, all parties (not to exceed 50 pages).
F + 155 Oral argument.
F + 156 Voting conference.
F + 195 Date for service of final decision.

Under the applicants' proposal, immediately upon each evidentiary filing, the filing party shall place all documents relevant to the filing (other than documents that are privileged or otherwise protected from discovery) in a depository open to all parties, and shall make its witnesses available for discovery depositions. Access to documents subject to the protective order shall be appropriately restricted. Parties seeking discovery depositions may proceed by agreement. Relevant excerpts of transcripts will be received in lieu of cross-examination at the hearing, unless cross-examination is needed to resolve material issues of disputed fact.[4] Discovery on responsive and inconsistent applications, comments, protests, and requests for conditions shall begin immediately upon their filing.

The proposed schedule is substantially similar to that adopted recently in *Burlington Northern Inc. and Burlington Northern Railroad Company—Control and Merger—Santa Fe Pacific Corporation and The Atchinson, Topeka and Santa Fe Railway Company*, Finance Docket No. 32549 (ICC served March 7, 1995) (*BN/Santa Fe*).

We would also like comments from the public on a variation of the proposed procedural schedule.[5] Based on our recent experience in *BN/Santa Fe*, we believe that parties filing inconsistent and responsive applications, comments, protests, requests for conditions, and other opposition evidence and arguments, may not need 90 days from the date the primary application is filed to prepare their submissions. We seek comments on the feasibility of parties filing descriptions of anticipated inconsistent and responsive applications, and petitions for waiver or clarification with regard to such applications, 10 days after the publication of the notice accepting the primary application. All inconsistent and responsive applications, comments, protests, requested conditions, and other opposition evidence and argument would be due 30 days after the acceptance of the primary application. Comments from the United States Department of Justice (DOJ) and the United States Department of Transportation (USDOT) would also be due on that day. The 30 days taken from the segment of time in which protesting parties would prepare their submissions would be inserted later in the schedule.

The applicants are proposing that any applications for authority for, or for exemption of, merger-related abandonments, and any supporting verified statements, be filed with the primary application, and be treated as related applications. The applicants filed, on August 4, 1995, a petition for waiver or clarification of the Railroad Consolidation Procedures, and for related relief (UP/SP–3), in which they ask for a waiver under 49 CFR 1152.24(e)(5) to permit modifications to the procedures and timetables prescribed in our rules at 49 CFR 1152.25(d) (6) and (7), and other relief, seeking to ensure that they are able to make the referenced filings pertaining to merger-related abandonments with the primary application. Consequently, the applicants desire that all opposition evidence, comments, rebuttal, and briefing on those applications be submitted under the same schedule as the primary application. We will discuss the applicants' request for relief with regard to merger-related abandonments in a subsequent decision addressing all of the requests in UP/SP–3.

The applicants also request that the Commission establish certain guidelines to govern discovery in this proceeding. The applicants note that their proposed guidelines are similar to those developed by the parties and the presiding Administrative Law Judge in *BN/Santa Fe*, and assert that the guidelines were central to the progress of that proceeding. In the applicants' view, the guidelines provided all of the parties in *BN/Santa Fe* with a fair opportunity to conduct discovery and curtailed abusive practices that had caused delays in prior control proceedings. The applicants assert that similar early establishment of discovery guidelines at the outset of this proceeding will provide guidance to all parties and will promote an efficient and orderly proceeding. The process of assigning an Administrative Law Judge (ALJ) to this proceeding is underway. While we think the *BN/Santa Fe* discovery guidelines worked exceedingly well, we will leave all discovery matters, including the adoption of any guidelines governing discovery initially, to the discretion of the ALJ.[6] A decision naming that judge will be issued as soon as possible.

We invite interested persons to submit written comments on the proposed procedural schedule. Comments must be filed by September 18, 1995. The applicants may reply by September 28, 1995.[7]

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

Decided: August 24, 1995.

By the Commission, Chairman Morgan, Vice Chairman Owen, and Commissioners Simmons and McDonald.

Vernon A. Williams,

Secretary.

[FR Doc. 95–21746 Filed 8–31–95; 8:45 am]

BILLING CODE 7035–01–M

---

[4] It is not clear to what hearing the applications are referring. Their proposed schedule provides for no evidentiary hearing, and we see no need for one at this time.

[5] On August 14, 1995, The Kansas City Southern Railway Company (KCS) filed comments on the proposed procedural schedule (KCS–1). KCS claims that the applicants have not presented any justification for expediting the schedule in this proceeding without first seeking public comments on the proposed schedule. KCS alleges that it has concerns regarding its ability to conduct discovery and sufficiently analyze the competitive concerns within the time frame applicants propose. KCS would like time to develop an alternative procedural schedule. Because we are, in fact, asking for comments regarding the applicants' proposed schedule, KCS will have the opportunity to submit further comments on the schedule in response to this notice. The applicants filed a reply to KCS's comments on the proposed procedural schedule and discovery guidelines on August 18, 1995 (UP/SP–6).

[6] KCS also raises concerns about the applicants' proposed discovery guidelines in KCS–1, stating that the applicants have not established any reason why this proceeding cannot be conducted under the Commission's normal rules of discovery found at 49 CFR 1114. KCS notes that, in *BN/Santa Fe*, the Commission did not rule on discovery guidelines and instead deferred that decision to the ALJ. The ALJ conducted a conference where all parties could comment, and then issued discovery guidelines. KCS recommends that we follow the same procedure here, rather than simply adopting the same guidelines used in *BN/Santa Fe*. Because we are initially turning all discovery matters over to an ALJ, nothing more need be said regarding KCS's concerns at this time. KCS also filed a pleading in opposition to the applicants' proposed protective order (KCS–2). That pleading will be addressed in a separate decision entering the protective order.

[7] In addition to submitting an original and 20 copies of all documents filed with the Commission, the parties are encouraged to submit all pleadings and attachments as computer data contained on a 3.5-inch floppy diskette which is formatted for WordPerfect 5.1 (or formatted so that it can be converted by WordPerfect 5.1). The computer data contained on the computer diskettes submitted will be subject to the protective order to be entered shortly in this proceeding, and is for the exclusive use of Commission employees reviewing substantive matters in this proceeding. The flexibility provided by such computer file data will facilitate expedited review by the Commission and its staff.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 94–7]

David W. Davis, D.O., Revocation of Registration

On October 7, 1993, the Deputy Assistant Administrator (then-Director), Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to David W. Davis, D.O., of Houston, Texas (Respondent), proposing to revoke his DEA Certificate of Registration, AD7600631, and deny any pending applications for registration as a practitioner. The statutory basis for the Order to Show Cause was that the continued registration of Respondent was inconsistent with the public interest as that term is set forth in 21 U.S.C. 823(f) and 824(a)(4).

On November 5, 1993, Respondent, through counsel, requested a hearing on the issues raised in the order to show cause and the matter was docketed before Administrative Law Judge Paul A. Tenney. Following prehearing proceedings, a hearing was held in Houston, Texas on October 20, 1994. The administrative law judge issued his findings of fact, conclusions of law and recommended ruling on January 17, 1995, recommending that Respondent's registration be revoked. No exceptions to the ruling were filed by either party. On February 17, 1995, the administrative law judge transmitted the record of the proceeding to the Deputy Administrator of DEA. After careful consideration of the record in its entirety, the Deputy Administrator enters his final order in this matter, in accordance with 21 CFR 1316.67, based on findings of fact and conclusions of law as set forth herein.

The administrative law judge found that DEA initiated an investigation of Respondent after receiving reports from Houston area pharmacies that Respondent prescribed large amounts of controlled substances, particularly the combination of Tylenol No. 4 (a Schedule III controlled substance) and Valium or Xanax (Schedule IV controlled substances). DEA additionally was concerned about Respondent's prescribing practices because he was listed as one of the top 1,000 Medicaid prescribers for the period of January 1991 to February 1992.

The administrative law judge further found that an undercover officer from the Houston Police Department visited Respondent's office on three occasions. The undercover officer's conversations with Respondent were recorded and monitored by a DEA Diversion Investigator.

On the undercover officer's first visit, on May 14, 1991, the officer asked Respondent for something "to mellow out" with, specifically requesting Tylenol. Respondent asked the undercover officer if he wanted Xanax or Valium and prescribed 30 dosage units of Valium (10 mg) and 30 dosage units of Tylenol No. 4. There was no discussion concerning any pain or anxiety experienced by the undercover officer.

On June 21, 1991, the undercover officer made a second visit to Respondent's office and, again, expressed his need for medication to "chill out, mellow out." Although there was no previous discussion concerning whether the undercover officer had experienced any pain. Respondent, on this visit, inquired whether the officer still experienced pain. The undercover officer responded "No . . . I'm fine doc." Respondent prescribed 30 dosage units of Valium (10 mg) and 30 dosage units of Tylenol No. 4. However, Respondent denied the undercover officer's request for additional medication and warned him against developing a drug habit.

On the third visit, on July 30, 1991, the undercover officer requested Tylenol No. 4 and Valium, and specified that he did not have any pain. Respondent again prescribed 30 dosage units of Valium (10 mg) and 30 dosage units of Tylenol No. 4.

The administrative law judge found that each of the three visits lasted no longer than ten minutes and that during that time the undercover officer's blood pressure was taken on one visit and his weight may have been taken. Respondent also examined the officer's chest with a stethoscope. The undercover officer was in good health at the time of the visits and exhibited no outward manifestations of a drug abuser. At no point during any of the three office visits did the undercover officer complain of any pain.

The administrative law judge found that, subsequent to the execution of a search warrant, Respondent was indicted on three counts of prescribing a Schedule III controlled substance to an undercover officer without a valid medical purpose. On April 23, 1992, Respondent pled *nolo contendere* to the first count, and the remaining two counts were dismissed. An adjudication of guilt was withheld in favor of two years probation and a $2,000 fine, notwithstanding the fact that the District Court of Harris County, Texas, found that the evidence substantiated Respondent's guilt.

Judge Tenney additionally found that DEA obtained copies of Respondent's controlled substance prescriptions from a local pharmacy for the year of 1991. These prescriptions revealed that Respondent frequently prescribed combinations of Valium or Xanax with Tylenol No. 4, and that multiple individuals in the same household would receive similar prescriptions. DEA also obtained written statements from several Houston area pharmacists declaring that they refused to fill prescriptions issued by Respondent.

Pursuant to 21 U.S.C. 824(a)(4), the Deputy Administrator of the DEA may revoke the registration of a practitioner upon a finding that the registrant has committed such acts as would render his registration inconsistent with the public interest as that term is used in 21 U.S.C. 823(f). In determining the public interest, the following factors will be considered:

(1) The recommendation of the appropriate State licensing board or disciplinary authority.

(2) The [registrant]'s experience in dispensing, or conducting research with respect to controlled substances.

(3) The [registrant]'s conviction record under Federal or State laws relating to the manufacture, distribution or dispensing of controlled substances.

(4) Compliance with applicable State, Federal or local laws relating to controlled substances.

(5) Such other conduct with may threaten the public health and safety. 21 U.S.C. 823(f).

It is well established that these factors are to be considered in the disjunctive, i.e., the Deputy Administrator may properly rely on any one or a combination of factors, and give each factor the weight he deems appropriate in assessing the public interest. *See Mukand Lal Arora, M.D.*, 60 FR 4447 (1995); *Henry J. Schwartz, Jr., M.D.*, 54 FR 16422 (1989). The administrative law judge found that factors (2) through (5) were relevant in determining whether to revoke Respondent's registration, and that the Government had met its burden in establishing these factors.

The administrative law judge found that, notwithstanding the deferred adjudication of guilt, the Government had established a *prima facie* case under factor (3). DEA has previously held that a registrant may be found to have been convicted within the meaning of the Controlled Substances Act despite the withholding of an adjudication of guilt. *See Clinton D. Nutt, D.O.*, 55 FR 30992 (1990); *Eric A. Baum, M.D.*, 53 FR 47272 (1988).

The administrative law judge additionally found that the Government had proven, by a preponderance of the evidence, that Respondent had prescribed controlled substances to the undercover officer on three separate occasions, without a valid medical purpose, thereby establishing a *prima facie* case under factors (2), (4) and (5).

The administrative law judge found that the Government failed to prove that Respondent knew or should have known that the combination of Tylenol No. 4 and Valium or Xanax was highly abused on the streets or that the prescriptions issued to individuals other than the undercover officer were for a non-legitimate purpose. The Government did, however, establish that the combination controlled substances is abused among low-income individuals in the Houston area, a group served by Respondent. The administrative law judge also noted that the ease with which the undercover officer obtained the combination of drugs warrants serious concern by DEA.

The Deputy Administrator adopts the findings of fact, conclusions of law and recommended ruling of the administrative law judge in its entirety. Accordingly, the Deputy Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b) and 0.104, hereby orders that DEA Certificate of Registration, AD7600631, issued to David W. Davis, D.O., be, and it hereby is, revoked, and that any pending applications for such registration as a practitioner be, and they hereby are, denied. This order is effective on October 2, 1995.

Dated: August 28, 1995.

Stephen H. Greene,

Deputy Administrator.

FR Doc. 95–21694 Filed 8–31–95; 8:45 am]

BILLING CODE 4410–09–M

Manufacturer of Controlled Substances; Registration

By Notice dated April 4, 1995, and published in the **Federal Register** on April 12, 1995, (60 FR 18618), Mallinckrodt Chemical, Inc., Mallinckrodt & Second Streets, St. Louis, Missouri 63147, made application to the Drug Enforcement Administration (DEA) to be registered as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Tetrahydrocannabinols (7370)	I
Methylphenidate (1724)	II
Cocaine (9041)	II
Codeine (9050)	II
Diprenorphine (9058)	II
Etorphine Hydrochloride (9059)	II
Dihydrocodeine (9120)	II
Hydrocodone (9193)	II
Levorphanol (9220)	II
Meperidine (9230)	II
Methadone (9250)	II
Methadone-intermediate (9254)	II
Dextropropoxyphene, bulk (non-dosage forms) (9273)	II
Morphine (9300)	II
Thebaine (9333)	II
Opium extracts (9610)	II
Opium fluid extract (9620)	II
Opium tincture (9630)	II
Opium powdered (9639)	II
Opium granulated (9640)	II
Oxymorphone (9652)	II
Alfentanil (9737)	II
Sufentanil (9740)	II
Fentanyl (9801)	II

A comment and a request for a hearing with respect to Methylphenidate were filed by two registered manufacturers. However, Mallinckrodt Chemical, Inc., has withdrawn its 1994 and 1995 applications for registration as a bulk manufacturer of Methylphenidate. Therefore, pursuant to section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and Title 21, Code of Federal Regulations, § 1301.54(e), the Deputy Assistant Administrator, Office of Diversion Control, hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic classes of controlled substances listed above is granted with the exception of Methylphenidate (1724).

Dated: August 28, 1995.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 95–21771 Filed 8–31–95; 8:45 am]

BILLING CODE 4410–09–M

Importer of Controlled Substances; Registration

By Notice dated April 7, 1995, and published in the **Federal Register** on April 17, 1995, (60 FR 19306), Sigma Chemical Company, 3500 Dekalb Street, St. Louis, Missouri 63118, made application to the Drug Enforcement Administration (DEA) to be registered as an importer of the basic classes of controlled substances listed below:

Drug	Schedule
Cathinone (1235)	I
Methcathinone (1237)	I
Fenethylline (1503)	I
Aminorex (1585)	I
Methaqualone (2565)	I
Alpha-Ethyltryptamine (7249)	I
Ibogaine (7260)	I
Lysergic acid diethylamide (7315)	I
Marihuana (7360)	I
Tetrahydrocannabinols (7370)	I
Mescaline (7381)	I
4-Bromo-2, 5-dimethoxyamphetamine (7391)	I
4-Bromo-2, 5-dimethoxyphenethylamine (7392)	I
4-Methyl-2, 5-dimethoxyamphetamine (7395)	I
2,5-Dimethoxyamphetamine (7396)	I
3,4-Methylenedioxyamphetamine (7400)	I
N-Hydroxy-3, 4-methylenedioxyamphetamine (7402)	I
3,4-Methylenedioxymethamphetamine (7405)	I
4-Methoxyamphetamine (7411)	I
Bufotenine (7433)	I
Diethyltryptamine (7434)	I
Dimethyltryptamine (7435)	I
Psilocybin (7437)	I
Psilocyn (7438)	I
N-Ethyl-1-phenylcyclohexylamine (7455)	I
1-(1-Phenylcyclohexyl)pyrrolidine (7458)	I
1-[1-(2-Thienyl)cyclohexyl]piperidine (7470)	I
Etorphine (except HCl) (9056)	I
Difenoxin (9168)	I
Heroin (9200)	I
Morphine-N-oxide (9307)	I
Normorphine (9313)	I
1-Methyl-4-phenyl-4-propionoxypiperidine (9661)	I
3-Methylfentanyl (9813)	I
Alpha-methylfentanyl (9814)	I
Beta-hydroxyfentanyl (9830)	I
Amphetamine (1100)	II
Methamphetamine (1105)	II
Pentobarbital (2270)	II
Secobarbital (2315)	II
Glutethimide (2550)	II
Phencyclidine (7471)	II
1-Piperidinocyclohexanecarbonitrile (8603)	II
Anileridine (9020)	II
Cocaine (9041)	II
Codeine (9050)	II
Diprenorphine (9058)	II
Benzoylecgonine (9180)	II
Ethylmorphine (9190)	II
Meperidine (9230)	II
Methadone (9250)	II
Dextropropoxyphene, bulk (non-dosage forms) (9273)	II
Morphine (9300)	II
Oxymorphone (9652)	II
Alfentanil (9737)	II
Sufentanil (9740)	II
Fentanyl (9801)	II

Written comments were filed by three registered manufacturers. One stated that they would not oppose or request a hearing if it was determined that Sigma Chemical Company's applications for registration was only for the importation of small quantities of Alfentanil, Sufentanil, Oxymorphone, Morphine, Cocaine, Codeine, Fentanyl, Methadone, Dextropropoxyphene, bulk (non-dosage forms), and Meperidine. DEA has found that this is the case. Another manufacturer's comment requested that the firm's application for registration to import Meperidine be denied. The remaining manufacturer commented that they have the ability to supply small quantities of amphetamine and methamphetamine and do not believe there is a need for another supplier. The comments were considered, however, DEA has determined that the application should be approved. Therefore, pursuant to section 1008(a) of the Controlled Substances Import and Export Act and in accordance with Title 21, Code of Federal Regulations, § 1311.42, the above firm is granted registration as an importer of the basic classes of controlled substances listed above.

Dated: August 28, 1995.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 95–21772 Filed 8–31–95; 8:45 am]

BILLING CODE 4410–09–M

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Compensation 2000: Albuquerque, New Mexico and Allentown, Pennsylvania Test

ACTION: Corrected notice.

SUMMARY: This corrected notice is being published to correct errors in notice document 95–20778 in the issue of Tuesday, August 22, 1995, 60 FR 43614.

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden is minimized, reporting forms are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed new collection, "Compensation 2000: Albuquerque, New Mexico and Allentown, Pennsylvania Test." A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the address section of this notice.

DATES: Written comments must be submitted on or before October 31, 1995.

ADDRESSES: Send comments to Karin G. Kurz, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 3255, 2 Massachusetts Avenue N.E., Washington, DC 20212. For further information contact Ms. Kurz at 202–606–7628. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

I. Background

This collection is a test of a new method of identifying and classifying occupations within an establishment. If successful, the new method could ultimately allow for joint collection of three separate statistical surveys of wage and benefit data; the Occupational Compensation Survey Program, the Employment Cost Index, and the Employee Benefits Survey. In addition to evaluating the results of the test for use in future surveys, BLS also will publish a bulletin for each area containing the occupational earnings data collected.

II. Current Actions

The test will include establishments in the Albuquerque, New Mexico and Allentown, Pennsylvania metropolitan statistical areas, both in private industry and in State, Local or Tribal Government. It will be conducted in early 1996. Once each occupation has been selected and classified using the test methodology, earnings data for the occupations will be collected. A new data entry system using laptop computers also will be tested as part of the collection.

Type of Review: New.
Agency: Bureau of Labor Statistics.
Title: Compensation 2000: Albuquerque, New Mexico and Allentown, Pennsylvania Test.
Frequency: One time.
Affected Public: Business or other for-profit; Not-for-profit institutions; and State, Local or Tribal Government. ,
Number of Respondents: 574.
Estimated Time Per Respondent: 2 hours.
Total Burden Hours: 1148 hours.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the ICR; they also will become a matter of public record.

Signed at Washington, D.C., this 28th day of August, 1995.

W. Stuart Rust, Jr.,

Acting Chief, Division of Management Systems, Bureau of Labor Statistics.

[FR Doc. 95–21728 Filed 8–31–95; 8:45 am]

BILLING CODE 4510–24–M

Employment Standards Administration

Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination; Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S–3014, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The number of decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume and State. Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

Volume I

Connecticut:

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the county.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487–4630.

Hard-copy subscriptions may be purchased from:

Superintendent of Documents, U.S. Government Printing Office,
Washington, D.C. 20402, (202) 512–1800

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C. this 25th day of August 1995.

Alan L. Moss,

Director, Division of Wage Determinations.

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 11, 1995.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address show below, not later than September 11, 1995.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 21st day of August, 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

Baxter: Baxter Anesthesia Division, North Reading, Massachusetts; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on December 9, 1994, applicable to all workers at Baxter Anesthesia Division located in North Reading, Massachusetts. The notice was published in the **Federal Register** on January 3, 1995 (60 FR 14).

At the request of the State Agency, the Department reviewed the certification and is amending it to include leased workers from B & M Associates, Woburn, Massachusetts engaged in the production of infusion pumps at the subject firm. New findings show that some workers were laid off by B & M Associates for lack of work in adversely affected employment.

The intent of the Department's certification is to include all workers of Baxter Anesthesia Division adversely affected by imports.

The amended notice applicable to TA–W–30, 1989 is hereby issued as follows:

> All workers of the North Reading, Massachusetts plant of the Baxter Anesthesia Division of Baxter, and workers from B & M Associates, Woburn, Massachusetts who were laid off for lack of work in adversely affected employment by Baxter Anesthesia Division, who became totally or partially separated from employment on or after July 27, 1993 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, D.C. this 23rd day of August 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

[TA–W–31,124; TA–W–31,124A]

Great Bear Industries, Cross City, Florida and Lake Butler Apparel Company, Lake Butler, Florida; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on July 12, 1995, applicable to all workers of Great Bear Industries located in Cross City, Florida. The notice was published in the **Federal Register** on August 9, 1995 (60 FR 40613).

New information received from the company reveals that worker separations have occurred at Lake Butler Apparel Company, Lake Butler, Florida, the parent company of Great Bear. The workers produce men's, boys' and women's slacks. The company provided information showing declines in sales, production and employment from 1993 to 1994, and in January through March 1995 compared to the same time period of 1994. The company also reported an increase in purchases of imports of apparel from 1993 to 1994.

The intent of the Department's certification is to include all workers of Great Bear and its parent company adversely affected by imports.

The amended notice applicable to TA–W–31, 124 is hereby issued as follows:

> All workers of Great Bear Industries, Cross City, Florida (TA–W–31, 124), and Lake Butler Apparel Company, Lake Butler, Florida (TA–W–31,124A) who became totally or partially separated from employment on or after June 2, 1994 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of August 1995.

Victor J. Trunzo,

Program Manager, Policy and Employment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Notice of Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of August, 1995.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) that sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–31,145; Moore Business Forms & Systems Div., Buckhannon, WV
TA–W–31,130; Peerless Corp., Tualatin, OR
TA–W–31,164; Cairns & Brothers, Inc., Clifton, NJ
TA–W–31,239; NU Quaker Dyeing, Inc., Easton, PA
TA–W–31,210; Tampella Power Corp., Williamsport, PA

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

TA–W–31,158; Unisys Corp., Computer Systems Div Group, Roseville, MN

Increased imports did not contribute importantly to worker separations at the firm.

TA–W–31,165; Communication Associates, Inc., Anniston, AL
TA–W–31,193; Telxon Corp., Houston, TX

The investigation revealed that criteria (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued; the date following the company name and location for each determination references the impact date for all workers for such determination.

TA–W–31,204; Valmont Electric, Inc., El Paso, TX: June 15, 1994.
TA–W–31,138; Layton Sportswear, Layton, UT: June 2, 1994.
TA–W–31,287; Garan, Inc., Lambert Mills Div., Lambert, MS: July 13, 1994.
TA–W–31,205; Huls America, Inc., Elizabeth, NJ: June 1, 1994.
TA–W–31,236; Topographic Land Surveyors, Midland, TX: July 28, 1994.
TA–W–31,235; Daphne Handbag & Mfg, Scranton, PA: June 3, 1994.
TA–W–31,157; Theodore Rich Co., Inc., Terra Haute, IN: June 9, 1994.
TA–W–31,174; Emerson Electric Co., Motor Div., Ava, MO: June 17, 1994.
TA–W–31,218; Dana Corp., Mobile Fluid Products, Corinth, MS: June 23, 1994.
TA–W–31,252; Blue Eagle Exploration, Inc., Salisbury, NC & Operating at Various Locations in the Following States: A; CO, B; ID, C; NV, D; WY, E; WI: June 21, 1994.

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (P.L. 103–182) concerning transitional adjustment assistance hereinafter called (NAFTA–TAA) and in accordance with Section 250(a) Subchapter D, Chapter 2, Title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA–TAA issued during the month of August, 1995.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA–TAA the following group eligibility requirements of Section 250 of the Trade Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof (including workers in any agricultural firm or appropriate subdivision thereof), have become totally or partially separated from employment and either—

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) that imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased, and that the increases in imports contributed importantly to such workers' separations or threat of separation and to the decline in sales or production of such firm or subdivision; or

(4) that there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFTA–TAA

In each of the following cases the investigation revealed that criteria (3) and (4) were not met. Imports from Canada or Mexico did not contribute importantly to workers' separations. There was no shift in production from the subject firm to Canada or Mexico during the relevant period.

NAFTA–TAA–00516; Blue Bell Snack Foods, Inc., Portland, OR
NAFTA–TAA–00519; Comptronix Corp., Colorado Springs, CO
NAFTA–TAA–00518; Bethlehem Steel Corp., Bethlehem Structural Products Corp., PB & NE Subsidiary Railroad Co., Bethlehem, PA
NAFTA–TAA–00513; Telescope Casual Furniture, Granville, NY
NAFTA–TAA–00522; AEP Industries, Inc., Moonachie, NJ

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

NAFTA–TAA–00520; John Lyon Reload, Klickitat, WA
NAFTA–TAA–00523; Paso Del Norte Avionics, Inc., El Paso, TX

The investigation revealed that the workers of the subject firm do not produce an article within the meaning of Section 250(a) of the Trade Act, as amended.

Affirmative Determinations NAFTA–TAA

The following certifications have been issued; the date following the company name & location for each determination references the impact date for all workers for such determination.

NAFTA–TAA–00545; Walker Equipment Corp., Subsidiary of Plantronics, Inc, Ringgold, GA: August 2, 1994.
NAFTA–TAA–00529; Century Place, Inc., Sewing Div., Salisbury, NC: July 20, 1994.
NAFTA–TAA–00546; American Safety Razor Co., Verona, VA: July 27, 1994.
NAFTA–TAA–00547; Electronics & Space Corp., (ESCO), St. Louis, MO: July 31, 1994.
NAFTA–TAA–00517; John Chopot Lumber Co., Colville, WA: July 3, 1994.

I hereby certify that the aforementioned determinations were issued during the months of August, 1995. Copies of these determinations are available for inspection in Room C–4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons who write to the above address.

Dated: August 22, 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Occupational Safety and Health Administration

National Advisory Committee on Occupational Safety and Health; Full Committee Meeting

Notice is hereby given that the National Advisory Committee on Occupational Safety and Health (NACOSH), established under section 7(a) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656) to advise the Secretary of Labor and the Secretary of Health and Human Services on matters relating to the administration of the Act, will meet on September 21 and 22, 1995, in C5320 Seminar Room 6 of the Department of Labor Building located at 200 Constitution Avenue NW, Washington, DC. The meeting is open to the public and will begin at 9 a.m. each day lasting until approximately 4:30 p.m. on September 21 and 1 p.m. on September 22.

Agenda items will include overviews of activities of both the Occupational Safety and Health Administration (OSHA) and the National Institute for Safety and Health (NIOSH), a legislative update together with a review of OSHA's Hazard Communication Standard, an update on the development of a proposed safety and health program standards, an update on OSHA data initiatives, a presentation by NIOSH of their process for setting a National Research Agenda, an update by NIOSH on their Respirator Standard as well as brief organizational meetings of two workgroups: One on hazard communication, and one on safety and health programs.

Since the last NACOSH meeting on April 10 and 11, six members terms have expired. Three of these members have been reappointed for a two year term ending in September 1997. They are: James A. Merchant, Health Representative; Henry B. Lick, Management Representative; and Michael J. Wright, Labor Representative. Two new members have been appointed for a two year term. They are: Kenneth J. Zeller, Commissioner of the Indiana Department of Labor, who will serve as a Public Representative; and Kennith D. Brock, Senior Vice President and General Manager of Liberty Mutual Insurance Company, who will serve as a Safety Representative. A third new member will be added in the near future to serve as a Public Representative. Members completing the second year of a two year term are: Ellen Schall and Ruy N. Delgado Zayas, Public Representatives; Frederick M. Toca. Management Representative; Margaret M. Seminario, Labor Representative; Frederic D. Rine, Safety Representative; and Andrea K. Taylor, Health Representative.

Written data, views or comments for consideration by the committee may be submitted, preferably with 20 copies, to Joanne Goodell at the address provided below. Any such submissions received prior to the meeting will be provided to the members of the Committee and will be included in the record of the meeting. Anyone wishing to make an oral presentation should notify Joanne Goodell before the meeting. The request should state the amount of time desired, the capacity in which the person will appear and a brief outline of the content of the presentation. Persons who request the opportunity to address the Advisory Committee may be allowed to speak to the extent time permits, at the discretion of the Chair of the Advisory Committee. Individuals with disabilities who need special accommodations should contact Tom Hall by September 18 at the address indicated below.

An official record of the meeting will be available for public inspection through Tom Hall, Division of Consumer Affairs, Room N–3647, 200 Constitution Avenue, NW, Washington, DC 20210, telephone (202) 219–8615.

For additional information contact: Joanne Goodell, Directorate of Policy, Occupational Safety and Health Administration, Room N–3641, 200 Constitution Avenue, NW, Washington, DC 20210, telephone (202) 219–8021.

Signed at Washington, DC, this 29th day of August, 1995.

Joseph A. Dear,

Assistant Secretary of Labor.

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Cognitive, Psychological and Language Sciences; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting for the Advisory Panel for Cognitive, Psychological & Language Sciences (#1758).

Name: Advisory Panel for Cognitive, Psychological and Language Sciences (#1758).

Date and Time: September 20–22, 1995, 9 a.m.–5 p.m.

Place: National Science Foundation, 4201 Wilson Boulevard, Room 370, Arlington, VA 22230.

Contact Person: Paul G. Chapin, Program Director for Linguistics, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Telephone: (703) 306–1731.

Agenda: To review and evaluate the outcome of NSF-funded projects in Linguistics.

Type of Meeting: Closed.

Purpose of Meeting: To provide advice and recommendations concerning the results and impacts of research projects funded by the NSF.

Reason for Closing: The actions being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the actions. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: August 29, 1995.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–338 and 50–339]

Virginia Electric and Power Company; North Anna Power Station, Units No. 1 and No. 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to an exemption from the requirements of Section III.G.3 of Appendix R to 10 CFR Part 50 issued by the Commission on November 6, 1986 to the Virginia Electric and Power Company (the licensee) for the North Anna Power Station, Units No. 1 and No. 2 located on the licensee's site in Louisa County, Virginia.

Environmental Assessment

Identification of the Proposed Action

The original exemption issued on November 6, 1986, was from the technical requirements of Section III.G.3 of Appendix R to 10 CFR Part 50 to the extent that fire detection and fixed suppression systems are not installed throughout the Auxiliary Fuel, and Decontamination Building (Fire Area 11). The original Safety Evaluation transmitted with the November 6, 1986 exemption, stated that the charging pump cubicles have 3-hour fire-rated walls, and that the penetrations in these walls are sealed to a rating of 3 hours. By letter dated December 11, 1992, the licensee requested an addendum to the original exemption to account for non-fire-rated penetration seals and unprotected openings located in the south wall of the charging pump cubicles. The lack of rated penetration seals was identified in NRC inspection report 50–338, 339/92–18 dated October 19, 1992.

The Commission's technical evaluation of the licensee's proposed amendment to the exemption will be published in a report entitled "Safety Evaluation Related to An Addendum To Exemption From Certain Requirements of Appendix R to 10 CFR Part 50 at North Anna Power Station, Units No. 1 and No. 2." The evaluation is responsive to the licensee's request for an addendum to the exemption dated December 11, 1992, as supplemented by letter dated August 18, 1994.

The Need for the Proposed Action

The proposed exemption amendment is needed to clarify which penetrations in the south wall separating the charging pump cubicles are not sealed to a rating of 3 hours. In addition, documentation is required to specify that the lack of fire-rated penetration seals in the south wall of the pump cubicles does not present an undue risk to the public health and safety. Finally, the proposed amended exemption is needed in order to permit the licensee to use alternative fire protection configurations that achieve an equivalent level of safety compared to that attained by compliance with Section III.G of Appendix R.

Environmental Impacts of the Proposed Action

The proposed amendment to the Exemption would not degrade the level of safety attained by compliance with the rule and there would be no change in accident doses to the environment. Consequently, the probability of fires has not been increased and the post-fire radiological releases would not be greater than previously determined; nor does the proposed exemption otherwise affect radiological plant effluents. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with this proposed exemption amendment.

With regard to potential non-radiological impacts, the proposed exemption amendment involves features located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there is no significant non-radiological environmental impact associated with the proposed exemption amendment.

Alternatives to the Proposed Action

Since we have concluded that the environmental effects of the proposed action are not significant, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment to the exemption. This would not reduce the environmental impacts associated with fire protection modifications and compliance with the rule would accrue unreasonable costs to the licensee without an increase in safety.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement (as amended) for the North Anna Power Station, Units No. 1 and No. 2.

Agencies and Persons Consulted

In accordance with its stated policy, on August 3, 1995, the staff consulted with the Virginia State official, James Dekrafft, of the Virginia Department of Health, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed amendment to the exemption.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for an addendum to the exemption from 10 CFR 50, Appendix R, section III.G. of Appendix R dated December 11, 1992, as supplemented by letter dated August 18, 1994, which are available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street, NW., Washington, DC, and at the Board of Supervisors Office, Louisa, County Courthouse, Louisa Virginia 23093, and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Dated at Rockville, Maryland, this 24th day of August 1995.

For the Nuclear Regulatory Commission.

David C. Trimble,

Acting Director, Project Directorate II–1, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

Generic Letter 95–07, Pressure Locking and Thermal Binding of Safety-Related Power-Operated Gate Valves; Issued

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of issuance.

SUMMARY: The Nuclear Regulatory Commission (NRC) has issued Generic Letter 95–07 to request licensees of nuclear power reactors to describe their consideration of the potential for pressure locking and thermal binding of safety-related power-operated gate valves, and the planned and completed corrective actions for valves that are determined to be susceptible to these problems. This generic letter is available in the NRC Public Document Room under accession number 9508110268. The information that was sent to the Committee to Review Generic Requirements, including the resolution of public comments received on this generic letter, will be made available in the NRC Public Document Room. This generic letter is also discussed in Commission information paper SECY–95–200 which is available in the NRC Public Document Room.

DATES: The generic letter was issued on August 17, 1995.

ADDRESSES: Not applicable.

BILLING CODE 7590-01-M

[Docket Nos. 50–313 and 50–368]

Entergy Operations, Inc. (Arkansas Nuclear One, Units 1 and 2); Exemption

I

Entergy Operations, Inc., (the licensee) is the holder of Facility Operating Licenses Nos. DPR–51 and NPF–6, which authorize operation of Arkansas Nuclear One, Units 1 and 2. The operating license provides, among other things, that the licensee is subject to all rules, regulations, and orders of the Commission now and hereafter in effect.

The facilities consist of two pressurized water reactors at the licensee's site in Pope County, Arkansas.

II

Title 10 CFR 73.55, "Requirements for physical protection of licensed activities in nuclear power reactors against radiological sabotage," paragraph (a), in part, states that "The licensee shall establish and maintain an onsite physical protection system and security organization which will have as its objective to provide high assurance that activities involving special nuclear material are not inimical to the common defense and security and do not constitute an unreasonable risk to the public health and safety."

10 CFR 73.55(d), "Access Requirements," paragraph (1), specifies that "The licensee shall control all points of personnel and vehicle access into a protected area." 10 CFR 73.55(d)(5) requires that "A numbered picture badge identification system shall be used for all individuals who are authorized access to protected areas without escort." 10 CFR 73.55(d)(5) also states that an individual not employed by the licensee (i.e., contractors) may be authorized access to protected areas without escort provided the individual "receives a picture badge upon entrance into the protected area which must be returned upon exit from the protected area * * *."

The licensee proposed to implement an alternative unescorted access control system which would eliminate the need to issue and retrieve badges at each entrance/exit location and would allow all individuals with unescorted access to keep their badges with them when departing the site.

An exemption from 10 CFR 73.55(d)(5) is required to allow contractors who have unescorted access to take their badges offsite instead of returning them when exiting the site. By letter dated October 24, 1994, the licensee requested an exemption from certain requirements of 10 CFR 73.55(d)(5) for this purpose.

III

Pursuant to 10 CFR 73.5, "Specific exemptions," the Commission may, upon application of any interested person or upon its own initiative, grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not endanger life or property or the common defense and security, and are otherwise in the public interest.

Pursuant to 10 CFR 73.55, the Commission may authorize a licensee to provide alternative measures for protection against radiological sabotage provided the licensee demonstrates that the alternative measures have "the same high assurance objective" and meet "the general performance requirements" of the regulation, and "the overall level of system performance provides protection against radiological sabotage equivalent" to that which would be provided by the regulation.

Currently, employee and contractor identification/access control cards are issued and retrieved on the occasion of each entry to and exit from the protected areas of the Arkansas Nuclear One site. Station security personnel are required to maintain control of the badges while the individuals are offsite. This practice has been in effect at Arkansas Nuclear One since the first operating license was issued. Security personnel retain each identification access control card, when not in use by the authorized individual, within appropriately designed storage receptacles inside a bullet-resistant enclosure. An individual who meets the access authorization requirements is issued a picture identification card which also serves as an access control card. This card allows entry into preauthorized areas of the station. While entering the plant in the present configuration, an authorized individual is "screened" by the required detection equipment and by the issuing security officer. Having received the badge, the individual proceeds to the access portal, inserts the access control card into the card reader, and passes through the turnstile which is unlocked by the access card. Once inside the station, the access card allows entry into areas if the preauthorized criteria are met.

This present procedure is labor intensive since security personnel are required to verify badge issuance, ensure badge retrieval, and maintain the badges in orderly storage until the next entry into the protected area. The regulations permit employees to remove their badges from the site, but an exemption from 10 CFR 73.55(d)(5) is required to permit contractors to take their badges offsite instead of returning them when exiting the site.

Under the proposed system, all individuals authorized to gain unescorted access will have the physical characteristics of their hand (hand geometry) recorded with their badge number. Since the hand geometry is unique to each individual and its application in the entry screening function would preclude unauthorized use of a badge, the requested exemption would allow employees and contractors to keep their badges at the time of exiting the protected area. The process of verifying badge issuance, ensuring badge retrieval, and maintaining badges could be eliminated while the balance of the access procedure would remain intact. Firearm, explosive, and metal detection equipment and provisions for conducting searches will remain as well. The security officer responsible for the last access control function (controlling admission to the protected area) will also remain isolated within a bullet-resistant structure in order to assure his or her ability to respond or to summon assistance.

Use of a hand geometry biometrics system exceeds the present verification methodology's capability to discern an individual's identity. Unlike the photograph identification badge, hand geometry is nontransferable. During the initial access authorization or registration process, hand measurements are recorded and the template is stored for subsequent use in the identity verification process required for entry into the protected area. Authorized individuals insert their access authorization card into the card reader and the biometrics system records an image of the hand geometry. The unique features of the newly recorded image are then compared to the template previously stored in the database. Access is ultimately granted based on the degree to which the characteristics of the image match those of the "signature" template.

Since both the badge and hand geometry would be necessary for access into the protected area, the proposed system would provide for a positive verification process. Potential loss of a badge by an individual, as a result of taking the badge offsite, would not enable an unauthorized entry into protected areas.

The access process will continue to be under the observation of security personnel. The system of identification badges coupled with their associated access control cards will continue to be used for all individuals who are authorized access to protected areas without escorts. Badges will continue to be displayed by all individuals while inside the protected area. Addition of a hand geometry biometrics system will provide a significant contribution to effective implementation of the security plan at each site.

IV

For the foregoing reasons, pursuant to 10 CFR 73.55, the NRC staff has determined that the proposed alternative measures for protection against radiological sabotage meet "the same high assurance objective," and "the general performance requirements" of the regulation and that "the overall level of system performance provides protection against radiological sabotage equivalent" to that which would be provided by the regulation.

Accordingly, the Commission has determined that, pursuant to 10 CFR 73.5, an exemption is authorized by law, will not endanger life or property or common defense and security, and is otherwise in the public interest. Therefore, as long as the licensee uses the hand geometry access control system, the Commission hereby grants Entergy Operations, Inc. an exemption from those requirements of 10 CFR 73.55(d)(5) relating to the returning of picture badges upon exit from the protected area such that individuals not employed by the licensee, i.e., contractors, who are authorized unescorted access into the protected area, can take their badges offsite.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will have no significant impact on the quality of the human environment. This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 15th day of August 1995.

For the Nuclear Regulatory Commission.

Jack W. Roe,

Director, Division of Reactor Projects III/IV, Office of Nuclear Reactor Regulation.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–36163; File No. SR–Amex–95–34]

Self-Regulatory Organizations: Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the American Stock Exchange, Inc., Relating to the Listing of Options on the Inter@ctive Week Internet Index

August 29, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 23, 1995, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to list and trade options on the Amex Inter@ctive Week Internet Index ("Index"), a new stock index developed by the Amex and Inter@ctive Week based on stocks (or American Depositary Receipts ("ADRs") thereon) of companies involved in the fields of digital interactive services, software and hardware. In addition, the Amex proposes to amend Rule 901C, Commentary. 01 to reflect that 90% of the Index's numerical index value will be accounted for by stocks that meet the current criteria and guidelines set forth in Rule 915. The text of the proposed rule change is available at the Office of the Secretary, the Exchange, and at the Commission.

II. Self-Regulatory Organization's Statement of Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Amex has developed a new industry-specific index called the Inter@ctive Week Internet Index, based entirely on shares of widely held companies involved in providing interactive services, developing and marketing digital interactive software and manufacturing digital interactive hardware.[3] The industries represented

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The component securities of the Index are 3Com; Acclaim Entertainment; Activision; Adobe Systems; America Online; Avid Technology; Bolt, Beranek & Newman; Broadband Technologies;

by these companies are: internet service providers, on-line service companies, internet tool developers, multimedia publishers, networking companies, videoconferencing companies, interactive television companies, software technology developers and computer manufacturers. Each of the component securities are traded on the Amex, the New York Stock Exchange or through the facilities of the national Association of Securities Dealers Automated Quotation system and are reported national market system securities ("NASDAQ/NMS"). The Amex intends to trade standardized option contracts on the newly developed Index. The Exchange is filing this proposal pursuant to Rule 901C, Commentary.92, which provides for the commencement of trading of options on the Index thirty days after the date of this filing. The proposal meets all the criteria set forth in Commentary.02 and the Commission's approval of generic index approval standards as outlined below.[4]

Eligibility Standards for Index Components

Pursuant to Commentary .02 to Rule 901C, (1) All of the component securities of the Index are listed on the New York Stock Exchange or are NASDAQ/NMS listed, each of the component securities has a minimum market capitalization of at least $75 million;[5] (2) the average monthly trading volume for each of the five highest weighted component securities in the Index was greater than two million shares over the previous six months; and (3) thirty of the component securities in the Index (81.08%) have standardized options traded on them and thus have met the initial eligibility criteria for standardized options trading set forth in Rule 915.

In addition, thirty of the thirty-seven components in the Index have a monthly trading volume of at least one million shares per month during each of the six months preceding the filing of this proposal. Three of the seven components that do not meet the above requirement, which in the aggregate account for 1.24% of the weight of the Index, have months in which the volume is less than one million shares, but, the volume for those securities has never been less than 500,000 shares in any given month. The other four components that do not meet the monthly trading volume criteria are companies that were the subject of initial public offerings during the last six months and, accordingly, have not yet accumulated at least six months of trading volume data. Each of these four components have had monthly trading volumes for the months or partial months they have traded well in excess of one million shares. Performance Systems International's lowest monthly trading volume since its initial public offering was 3.3 million shares during the month of June. Spyglass Inc.'s monthly volume was 4.1 million shares in the month of June and 5.2 million shares in the month of July. UUnet Technologies lowest monthly volume was 5.9 million shares in the month of June. Netscape Communications, which went public on August 9, 1995, has had a trading volume of 19 million shares through August 14, 1995. The Exchange represents that three of the four components—Netscape Communications; Performance Systems International; and UUnet Technologies—will meet options listing standards as soon as the "Underwriter's Lock-up Periods" expire and sufficient float is available to satisfy options listing standards. Currently, Spyglass Inc. does not have sufficient shares outstanding (5.2 million shares) to qualify for options listing.

The four components that have less than six months of trading volume collectively account for only 4.58% of the Index's value. The Exchange represents that it will continually monitor the trading volume of these four components until each security reaches its six-month anniversary. During this period, if any one of the four components has a monthly trading volume of less than one million shares it will be removed from the Index. Once each component has passed its six-month anniversary, it will be maintained in the Index in accordance with the maintenance criteria set forth below and in Rule 902C, Commentary .02.[6]

The Index is capitalization weighted and no individual component stock in the Index represents more than 25 percent of the weight of the Index, and the top five highest weighted stocks do not constitute more than 50 percent of the weight of the Index.

Maintenance of the Index

The Exchange will maintain the Index in accordance with Rule 901C, Commentary .02 so that (1) the total number component securities will not increase or decrease by more than 33⅓% from the number of components in the Index at the time of its initial listing and in no event will the index have less than nine components; (2) component stocks constituting the top 90% of the Index by weight, must have a minimum market capitalization of $75 million and the component stocks constituting the bottom 10% of the Index, by weight, must have a minimum market capitalization of $50 million; (3) the monthly trading volume of each component security shall be at least 500,000 shares, or for each of the lowest weighted components in the Index that in the aggregate account for no more than 10% of the weight of the Index, the monthly trading volume shall be at least 400,000 shares; (4) the Index must meet the criteria that no single component represents more than 25% of the weight of the Index and that the five highest weighted components represents no more than 50% of the Index as of the first day of January and July in each year; (5) the lesser of the five highest weighted component securities in the index that in the aggregate represent at least 30% of the total number of stocks in the Index have an average monthly trading volume of at least one million shares over the previous six months; and (6) 90% of the Index's numerical index value and at least 80% of the total number of component securities will meet the then current criteria for standardized option trading set forth in Exchange Rule 915.

The Exchange shall not open for trading any additional option series should the Index fail to satisfy any of the maintenance criteria set forth above unless such failure is determined by the Exchange not to be significant and the

[4] *See* Securities Exchange Act Release No. 34157 (June 3, 1994), 59 FR 30062 (June 10, 1994).

[5] In the case of ADRs, this represents market value as measured by total world-wide shares outstanding.

[6] The Commission believes that, under the circumstances, it is appropriate for the Amex to conclude that the component trading volume requirements set forth in the generic narrow-based criteria have been satisfied in the present proposal, particularly because (1) the four components comprise only 4.58% of the Index's total value; (2) the trading volume of the four components currently meet and must continue to meet the required monthly trading volume requirements set forth in the generic standards; and (3) the options eligibility requirement contained in the generic criteria (*i.e.*, 90% of the index value and 80% of the total number of components must be options eligible) has been met by the Index and provides an additional safeguard that the Index cannot be substantially composed of securities that have a short trading history.

Commission concurs in that determination.

Index Calculation

The Index is market capitalization weighted, where the Index value is calculated by multiplying the primary exchange regular way last sale price of each component security by its number of shares outstanding, adding the sums and dividing by the current index divisor. The Index divisor was initially determined to yield a benchmark value of 200 on August 15, 1995. Similar to other stock index values published by the Exchange, the value of the Index will be calculated continuously and disseminated every 15 seconds over the Consolidated Tape Association's Network B.

The Index will be calculated and maintained by the Amex. A committee consisting of two representatives from the Amex, two representatives from Inter@ctive Week, a biweekly magazine published by Inter@ctive Enterprises L.L.C., and one representative from the digital interactive industry will be available to advise the Exchange when, pursuant to Rule 901C(b), the Exchange substitutes stocks, or adjusts the number of stocks included in the Index, based on changing conditions in the digital interactive industry or in the event of certain types of corporate actions such a merger or takeover which warrants the removal of a component security from the Index. It is anticipated that the committee will meet on a quarterly basis to review possible candidates for removal or inclusion in the Index. The committee meeting will occur after the close of trading and any determination to remove or include a component in the Index will be publicly announced prior to the opening of trading on the following business day. However, in the event the Exchange determines to increase the number of Index component stocks to greater than 48 or reduce the number of component stocks to fewer than 26, the Exchange will submit a 19b–4 filing to the Commission. In selecting securities to be included in the Index, the Exchange, in conjunction with the committee, will be guided by a number of factors including market value of outstanding shares and trading activity and adherence to Rule 901C, Commentary .02.

Expiration and Settlement

The proposed options on the Index will be European style (i.e., exercises are permitted at expiration only), and cash settled. Standard option trading hours (9:30 a.m. to 4:10 p.m. New York time) will apply. The options on the Inter@ctive Week Internet Index will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). The last trading day in an expiring option series will normally be the second to last business day preceding the Saturday following the third Friday of the expiration month (normally a Thursday). Trading in expiring options will cease at the close of trading on the last trading day.

The Exchange plans to list options series with expirations in the three near-term calendar months and in the two additional calendar months in the January cycle. In addition, longer term option series having up to thirty-six months to expiration may be traded. In lieu of such long-term options on a full value Index level, the Exchange may instead list long-term, reduced value put and call options based on one-tenth (1/10) the Index's full value. In either event, the interval between expiration months for either a full value or reduced value long-term option will not be less than six months. The trading of any long term options would be subject to the same rules which govern the trading of all the Exchange's index options, including sales practice rules, margin requirements and floor trading procedures and all options will have European style exercise. Position limits or reduced value long term Inter@ctive Week Internet Index options will be equivalent to the position limits for regular (full value) Index options and would be aggregated with such options (for example, if the position limit for the full value options is 10,500 contracts on the same side of the market, then the position limit for the reduced value options will be 105,000 contracts on the same side of the market).

The exercise settlement value for all of the Index's expiring options will be calculated based upon the primary exchange regular way opening sale prices for the component stocks. In the case of securities traded through the NASDAQ system, the first reported regular way sale price will be used. If any component stock does not open for trading on its primary market on the last trading day before expiration, then the prior day's last sale price will be used in the calculation.

Exchange Rules Applicable to Stock Index Options

Amex Rules 900C through 980C will apply to the trading of option contracts based on the Index. These Rules cover issues such as surveillance, exercise prices, and position limits. Surveillance procedures currently used to monitor trading in each of the Exchange's other index options will also be used to monitor trading in options on the Inter@ctive Week Internet Index. The Index is deemed to be a Stock Index Option under Rule 901C(a) and a Stock Index Industry Group under Rule 900C(b)(1). With respect to Rule 903C(b), the Exchange proposes to list near-the-money (i.e., within ten points above or below the current index value) option series on the Index at 2½ point strike (exercise) price intervals when the value of the Index is below 200 points. In addition, the Exchange expects that the review required by Rule 904C(c) will result in a position limit of 10,500 contracts with respect to options on this Index.

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act, in general, and furthers the objectives of Section 6(b)(5), in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of change, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change complies with the standards set forth in the Generic Index Approval Order, it has become effective pursuant to Section 19(b)(3)(A) of the Act. Pursuant to the Generic Index Approval Order,[7] the Exchange may not list the Amex Inter@ctive Week Internet Index options for trading prior to 30 days after August 23, 1995, the date the proposed rule change was filed with the Commission. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

---

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to SR–Amex–95–34 and should be submitted by September 22, 1995.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–36159; File No. SR–CBOE–95–07]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Approving and Notice of Filing and Order Granting Accelerated Approval of Amendment to a Proposed Rule Change Relating to Solicited Transactions

August 25, 1995.

I. Introduction

On February 14, 1995, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposal to modify Paragraph (e) of CBOE Rule 6.9 concerning solicited transactions. The proposal would eliminate the requirement that the terms of a matching order be disclosed to the trading crowd before a member or associated person would be permitted to trade based on knowledge of an imminent, undisclosed solicited transaction. The proposed rule change was published for comment and appeared in the **Federal Register** on March 28, 1995.[3] No comments were received regarding the original proposal. On June 22, 1995, the CBOE filed Amendment No. 1 to its proposal.[4] This order approves the proposal, as amended.

II. Description of the Proposal

On November 9, 1994, the Commission approved a CBOE proposal to adopt a new Rule 6.9 that regulates the execution of solicited orders, and sets forth specific priority principles applicable to such orders. In addition, Rule 6.9(e) restricts trading by members and associated persons of members possessing knowledge of imminent undisclosed solicited transactions.[5]

Pargaraph (e) of CBOE Rule 6.9 generally restricts the ability of a member, or an associated person, who has indicated in response to a solicitation an intention to place a responsive order, and anyone aware of that intention, to trade options of the same class as any option that is the subject of the original order, or securities underlying such options, or any related instruments. If either of two conditions is met, however, the restriction does not apply. The first condition is that all the terms of both the original order and the matching order be disclosed to the trading crowd.[6]

The Exchange now proposes to amend paragraph (e) to eliminate the requirement contained in the first condition that the terms of the solicited matching order be disclosed to the trading crowd. Thus, when there has been advance solicitation of the other side of an original order, a member (or associated person) with knowledge of the original order and a matching responsive order is not permitted to trade options of the same class as any option that is the subject of the original order, the securities underlying such options, and any related instruments, until the terms of the original order, and any changes in the terms and conditions of the original order of which the member or associated person has knowledge,[7] are disclosed to the trading crowd; once those terms are disclosed, however, the member or person associated with the member may trade even if the terms of the matching order are not disclosed. The Exchange has stated that this modification would place solicited parties on an equal footing with Exchange members who have knowledge of the terms of the original order only, and would conform the trading restriction in paragraph (e) to the various priority provisions of Rule 6.9, and Interpretation .02 thereunder, which generally require disclosure only of the terms of an original order, not the terms of a matching solicited order.

Finally, the Exchange has proposed adding Interpretation .06 to Rule 6.9. Interpretation .06 states that disclosing all the terms of the original order and any changes in the terms and conditions of the original order to the crowd prior to effecting a trade does not provide a safe harbor from possible violations of front-running prohibitions, and that front-running is considered to be a violation of Exchange Rule 4.1, Just and Equitable Principles of Trade.[8]

III. Discussion

The Commission finds the proposed rule change consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange. Specifically, the proposed rule change is consistent with the requirements of Section 6(b)(5) of the Act because the proposal is designed to remove impediments to and perfect the mechanism of a free and open market, and protect investors and the public interest. The Commission believes that the CBOE's proposal is appropriate to achieve Rule 6.9's primary purpose of facilitating and regulating solicited transactions without imposing undue restrictions on trading, particularly anticipatory hedge transactions. Under the present rule, once a solicited party has indicated, in response to a solicitation, an intention to place a matching responsive order, such a solicited party may not trade based on knowledge of the impending solicited transaction, even though the original order has been fully disclosed to the crowd, until the solicited order is also disclosed.

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1994).

[3] See Securities Exchange Act Release No. 35519 (March 21, 1995), 60 FR 15948.

[4] Amendment No. 1 effects two changes to the Exchange's proposal. First, Paragraph (e) of Rule 6.9 is revised to state explicitly that any change in the terms and conditions of the original order, as it is entered on the trading floor and of which the member has knowledge where there is a matching solicited order, must also be disclosed to the trading crowd before that member or that person associated with a member could permissibly trade an option of the same class as any option that is the subject of the original order, a security underlying such class, or a related instrument. Second, the Exchange proposes adding a new Interpretation .06 to Rule 6.9 stating that disclosing the terms and conditions of the original order any changes to the original order pursuant to Paragraph (e) for Rule 6.9 does not provide a safe harbor from possible front-running prohibitions. Front-running is considered to be a violation of CBOE Rule 4.1. See letter from Timothy Thompson, CBOE, to Michael Walinskas, Branch Chief, Division of Market Regulation, Commission, dated June 22, 1995 ("Amendment No. 1").

[5] See Securities Exchange Act Release No. 34959 (November 9, 1994), 59 FR 59446.

[6] The second condition is that the solicited order can no longer reasonably be considered imminent in view of the passage of time since the solicitation.

[7] See Amendment No. 1, *supra* note 4.

[8] *Id.*

The Commission notes that paragraph (e) does not restrict trading by other CBOE members who know the terms of a disclosed original order but who, if solicited, have not indicated an intention to trade at the original order's limit and who are otherwise unaware of any specific matching solicited order. Indeed, such parties may trade under the current rule even though they have good reason to believe that an execution of the original order is imminent based on market circumstances.

The Commission believes that once the terms and conditions of an original order, as well as any changes to the terms and conditions of the original order of which the member or associated person has knowledge,[9] are fully disclosed to the trading crowd, those in the crowd have essentially the same market information as do solicited persons. Moreover, any solicited person who has privately indicated an intention to place a responsive order, and anyone aware of that intention, necessarily remains subject to the risks of the market and the auction process when entering a responsive order or effecting anticipatory trades.

The Commission further believes that the narrower disclosure requirement before granting relief from the trading restrictions described above will provide the trading crowd with a fair and full opportunity to make informed trading decisions without subjecting solicited parties and the solicitation process to overly burdensome restrictions. Nevertheless, the Commission notes that this narrower disclosure requirement does not relieve market participants of the general CBOE requirement that their acts and practices be consistent with just and equitable principles of trade.[10] Thus, disclosing the terms and conditions of the original order, and any changes in the terms and conditions of the original order, to the crowd prior to effecting a trade does not provide a safe harbor from possible violations of front-running prohibitions. The Commission understands that the Exchange will issue a regulatory circular to its members describing the revisions to its solicitations rule.

Finally, the Commission notes that the Exchange's proposal relates only to the provision in the solicitations rule that restricts trading based on knowledge of an imminent undisclosed transaction. Thus, the Exchange's proposal does not affect the priority rules governing solicited transactions.[11]

The Commission finds good cause for approving Amendment No. 1 prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 1 revises Paragraph (e) of Rule 6.9 by making it clear that any change in the terms and conditions of the original order must be disclosed to the crowd before a member or associated person with knowledge of such terms and conditions can enter into related transactions. Amendment No. 1 also adds Interpretation .06 to Rule 6.9 to make clear that Paragraph (e) of Rule 6.9 does not provide a safe harbor from possible violations of front-running prohibitions.[12]

The Commission believes that these changes serve to strengthen and clarify the Exchange's proposals. Specifically, the revision to Rule 6.9, Paragraph (e) addresses the concern that if changes to the original order have not been disclosed to the trading crowd, then the trading crowd would be at a disadvantage relative to the solicited party who has knowledge of the changes to the terms of the original order. New Interpretation .06 clarifies that CBOE Rule 4.1 continues to be applicable to Rule 6.9, notwithstanding the provisions of Paragraph (e) of Rule 6.9. Accordingly, the Commission believes that Amendment No. 1 raises no new or unique regulatory issues. Therefore, the Commission believes it is consistent with Sections 6(b)(5) and 19(b)(2) of the Act[13] to approve Amendment No. 1 to the proposal on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning Amendment No. 1. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to File No. SR–CBOE–95–07 and should be submitted by September 22, 1995.

V. Conclusion

For the reasons discussed above, the Commission finds that the proposal, as amended, is consistent with the Act, and, in particular, Section 6 of the Act.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[14] that the proposed rule change (File No. SR–CBOE–95–07), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 95–21702 Filed 8–31–95; 8:45 am]

BILLING CODE 8010–01–M

---

[9] *Id.* If the changes to the original order were not disclosed to the trading crowd, then the trading crowd would still be at a disadvantage to the solicited person who did have knowledge of the changes to the terms of the original order. The solicited person with knowledge of the changes to the original order then would have the opportunity to benefit from this knowledge that the trading crowd did not have. Thus, under the CBOE's proposal, all trading based on that knowledge is prohibited until the information is disclosed to the trading crowd. *Id.*

[10] See CBOE Rule 4.1.

[11] For example, under the priority rules, when an original order is disclosed in advance of a solicitation, and the matching order both matches the disclosed original order's limit and improves the market, the matching order has priority over other orders in the crowd (subject to customer limit order book priorities set forth in Rule 6.45). See CBOE Rule 6.9(b). Similarly, when a matching order does not match the original order's limit and does not improve the market, it does not have priority over other bids and offers represented in the crowd even if the original order was disclosed to the crowd for the full solicitation period. See CBOE Rule 6.9(c).

[12] See Amendment No. 1. *supra* note 4.

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change and Amendment No. 1 To Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing and Trading of Options on the Mexico 30 Index

August 28, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on August 21, 1995, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to provide for the listing and trading on the Exchange of options on the Mexico 30 Index ("Mexico Index" or "Index"), a cash-settled broad-based index with European-style exercise. The CBOE amended the proposal on August 25, 1995 in order to provide more background information on the Mexican stock market and to establish additional Index maintenance criteria.[1]

The text of the proposed rule change is available at the Office of the Secretary, CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CBOE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to permit the Exchange to list and trade cash-settled, European-style stock index options on the Mexico 30 Index.[2] The Index is comprised of 30 representative stocks of the Mexican Stock Exchange ("Bolsa").[3] CBOE believes that options on the Index will provide investors with a low-cost means of participating in the performance of the Mexican economy and a hedging mechanism against the risk of investing in that economy. The CBOE represents that the Index is deemed to be an index option under Rule 24.2 and a broad-based index under Rule 24.1(i)(1).

Index Design. The Index was designed by and is maintained by the CBOE and the Chicago Mercantile Exchange ("CME"). CBOE represents that the 30 stocks comprising the Index were selected for their high market capitalization and their high degree of liquidity, and further believes that they are representative of the industrial composition of the broader Mexican equity market. The Mexico Index is composed of 15 broad industry groups, including building materials, diversified holding companies, and telecommunications.

The Index is weighted by the market capitalization of the component stocks, however, at the time of a semi-annual review (occurring after the close on expiration Fridays in December and June) the Index will be adjusted, if necessary, to ensure that no single component shall have a weight in the Index greater than 25%. For example, on June 16, 1995, the most recent review date, Telefonos de Mexico ("TMX") would have had a weight of 30.41% of the Index. To reduce TMX's weight, the Exchange reduced the number of outstanding TMX shares used in the calculation of the Index from 8.0375 billion to 6.1303 billion.

The total capitalization of the Index as of July 31, 1995 was $46.21 billion, which represents 49.35% of the overall capitalization of the Mexican Bolsa. The median capitalization of the stocks in the Index on July 31, 1995, was 4.507 billion Pesos ($737 million at the exchange rate of 6.115 pesos per dollar prevailing on July 31, 1995). The average market capitalization of these stocks was $1.54 billion on the same date (using the same rate of exchange). The individual market capitalization of these stocks ranged from $156 million (Grupo Sidek-B) to $13.3 billion (Telmex) on July 31, 1995. The largest stock accounted for 23.61% of the Index, while the smallest accounted for 0.36%. The top five stocks in the Index by weight accounted for 55.02% of the Index. CBOE represents that upon each semi-annual review of the Index, the Exchange shall make any necessary modifications to ensure that the top three weighted stocks in the Index by weight may not account for more than 45% of the Index at the time of a semi-annual review.[4] The average daily volume in the component securities for the period from February 1995 through July 1995, ranged from a low of approximately 9,270 shares to a high of 14,123,392 shares, with an average daily trading volume for all components of the Index of approximately 1,479,390 shares per day.

Calculation. The value of the Index is determined by multiplying the price of each stock times the number of shares outstanding, adding those sums and dividing by a divisor which gives the Index a value of 200 on its base date of January 3, 1995. This divisor is adjusted for pertinent changes as described below in the section titled "Maintenance." The Index had a closing value of 203.07 on July 31, 1995.

Maintenance. The Index will be maintained by the CBOE and CME. To maintain continuity of the Index, the divisor of the Index will be adjusted to reflect certain events relating to the component stocks. These events include, but are not limited to, changes in the number of shares outstanding, spin-offs, certain rights issuances, and mergers and acquisitions. The composition of the Index will be reviewed periodically and the Exchanges may make component changes at any time.

Index Option Trading. The Exchange proposes to base trading in options on the Index on the full value of the Index as expressed in U.S. Dollars. The Exchange also may provide for the listing of full-value long-term index option series ("LEAPS®") and reduced-value LEAPS on the Index. For reduced-value LEAPS, the underlying value would be computed at one-tenth of the value of the Index. The current and closing index value of any such reduced-value LEAP will, after such initial computation, be rounded to the nearest one-hundredth. The trading hours for options on the Index will be from 8:30 a.m. Chicago time to 3:15 Chicago time. Bridge Information Systems ("Bridge") will calculate the value of the Index every fifteen seconds throughout the trading day and disseminate the Index value through the Options Price Reporting Authority ("OPRA").[5] Bridge obtains quotes and trade information on a real-time basis directly through the Bolsa through an electronic feed. Accordingly, the value of the Index will be based upon the prices of the components as traded or quoted on the Bolsa.[6] Finally, CBOE represents that it has the necessary systems capacity to support new series that would result from the introduction of Mexico 30 Index options. CBOE has been informed that OPRA has the capacity to support such new series.[7]

---

[1] See Letter from Eileen Smith, CBOE, to Steve Youhn, SEC, dated August 25, 1995.

[2] A European-style option may only be exercised during a specified period before expiration.

[3] The components of the Index are Alfa SA–A; Apasco SA; Grupo Casa Autrey; Banacci-B; Grupo Carso-A1; Controla Com M–B; Cemex SA–B; Cifra SA–C; Desc SA–B; Empresas Moderna–A; Fomento Econ M–B; Grupo Embotelladoro Mexico; Grupo Financiero Bancomer-B; Grupo Financiero Serfina-B; Grupo Gigante; Grupo Modelo-C; Grupo Mexico-B; Grupo Tribasa-CPO; Hylsamex SA–BCP; Empresas ICA; Iusacell; Kimberly-Clark M–A; Coca-Cola Femsa; Grupo Industrial Maseca-B; Grupo Sidek-B; Tubos De Acero; Telefonos De Mexico-L; Tolmex SA–B2; Grupo Telev-CPP; Vitro SA.

[4] See Amendment No. 1. As of July 31, 1995, the top three stocks represented 43.6% of the weight of the Index.

Exercise and Settlement. The trading hours of the Bolsa are the same as those of the New York Stock Exchange, 8:30 a.m. through 3:00 p.m. Chicago time. The proposed options on the Index will expire on the Saturday following the third Friday of the expiration month and trading in the expiring contract month on CBOE will normally cease on Friday at 3:15 p.m. (Chicago time) unless a holiday occurs. The exercise settlement value of Index options at expiration will be determined at the close of the regular Friday trading sessions in Mexico. If a stock does not trade during this interval or if it fails to open for trading, the last available price of the stock will be used in the calculation of the Index. When expirations are moved in accordance with Exchange holidays, such as when the CBOE is closed on the Friday before expiration, the last trading day for expiring options will be Thursday and the exercise settlement value of Index options at expiration will be determined at the close of the regular Thursday trading sessions in Mexico even if the Mexican markets are open on Friday. If the Mexican markets will be closed on the Friday before expiration but the CBOE will not, the last trading day for expiring options will be Thursday.

Surveillance Agreements. The Exchange expects to apply its existing index option surveillance procedures to Index options. In addition, the Exchange is aware of a Memorandum of Understanding ("MOU") between the Commission and the Comision Nacional Bancaria y deValores. This MOU will enable the Commission to obtain information concerning the trading of the component stocks of the Mexico 30 Index. The Exchange also will make every effort to enter into an effective surveillance agreement with the Bolsa.

Position Limits. The Exchange is proposing to establish position limits for Mexico 30 Index options equal to 50,000 contracts on the same side of the market, with no more than 30,000 contracts in the series with the nearest expiration date. According to the Exchange, these limits are roughly equivalent, in dollar terms, to the limits applicable to options on other indices. Ten reduced-value options will equal one full-value contract for such purposes.

Exchange Rules Applicable. Except as modified herein, the Rules in Chapter XXIV will be applicable to Mexico 30 Index options.

2. *Statutory Basis*

CBOE believes the proposed rule change is consistent with Section 6(b) of the Act in general and furthers the objectives of Section 6(b)(5) in particular in that it will permit trading in options based on the Mexico 30 Index pursuant to rules designed to prevent fraudulent and manipulative acts and practices and to promote just and equitable principles of trade, and thereby will provide investors with the ability to invest in options based on an additional index.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes the proposed rule change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW. Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to File No. SR–CBOE–95–45 and should be submitted by September 22, 1995.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–36156; File No. SR–NYSE–95–22]

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change Relating to the Exchange's Wireless Data Communications Initiatives

August 25, 1995.

I. Introduction

On June 1, 1995, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") submitted to the Securities Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934

---

[5] See Amendment No. 1.

[6] Telephone conversation between Eileen Smith, CBOE, and Steve Youhn, SEC, on August 25, 1995.

[7] *See* Letter from Joe Corrigan, OPRA, to Eileen Smith, CBOE, dated August 1, 1995.

[8] 17 CFR 200.30–3(a)(12) (1994).

("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to introduce into its trading floor wireless data communications technology that allows a member in a trading crowd or elsewhere on the floor to communicate with others by means of a hand-held wireless device. The Exchange also proposed an interpretation with respect to NYSE Rule 117 which requires members' orders to be in writing.

The proposed rule change was published for comment in Securities Exchange Act Release No. 35931 (June 30, 1995), 60 FR 35767. No comments were received on the proposal.

II. Description of the Proposals

The Exchange's proposed wireless data communications technology involves the floor-based use of wireless hand-held data communication devices. The Exchange proposes to implement a four-phase process to integrate the new technology into the floor environment ("NYSE Plan").[3] The Exchange's basic operating premise is to allow private vendors to provide wireless data communications services to Exchange members on the floor, but only in a manner that treats members equitably and does not unfairly discriminate among members. The Exchange also proposes to provide its own wireless data communications service on a non-discriminatory basis.

Phase I, which has been completed, allowed the Exchange to supervise and monitor three "proof-of-concept" pilot programs on the floor to the Exchange.[4] Each of the programs tested the viability of the operation and functionality of wireless hand-held data devices on the floor. Members participating in the pilot programs were instructed to use the devices strictly for the purposes of evaluating the devices and to compare results that might have been achieved had the devices been used for actual trading purposes with results from actual trades using traditional paper tickets, telephones and the like.

Phase II will involve additional, more structured, pilot testing of independent wireless data communications services, including that offered by the Exchange. A prototype of the infrastructure that will be required to be installed in order to support the wide-scale use of the wireless hand-held data devices will be used to support the Phase II pilot programs.

In Phase III, the Exchange will conduct on the floor a pre-production pilot test of its wireless data communications system infrastructure. The Exchange will design that infrastructure to use the 2.4 Ghz radio frequency band and to support all hand-held device wireless data communications services of the Exchange and vendors. The Exchange will select an integrator to assist in the design, installation, testing and maintenance of the infrastructure.[5] In addition, the Exchange plans to allow its wireless data communication service to interface with the Exchange's Broker Booth Support System.

In Phase IV, the Exchange will have installed and tested the infrastructure and moved its own wireless data communications system to the infrastructure. At that point, the Exchange will have commenced the production roll-out of the wireless data communications infrastructure and will have directed all vendors to migrate their systems to the infrastructure. All authorized vendors will be permitted to offer their wireless data communications services (and the Exchange will offer its own system) to such number of members as their respective systems can accommodate. At that point, the floor-based wireless data communications technology should be available to all members.

Implementation of the NYSE's Plan will affect Exchange Rule 117 which prohibits members on the floor of the Exchange from making a bid, offer or transaction for or on behalf of another member except pursuant to a written order.[6] The Exchange is proposing an interpretation[7] that will deem a transmission of an order that a member located on the floor of the Exchange receives by means of an authorized hand-held device to constitute a "written order" for the purposes of Rule 117 if the member can show that the transmission of the order:

(i) Provides adequate information relating to the price, size and time of the order, the cancellation of the order, and the like;[8]

(ii) Satisfies the Exchange's audit trail requirements; and

(iii) Satisfies all other Exchange reporting and recordkeeping requirements.[9]

III. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.[10] Specifically, the Commission believes the proposal is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, to protect investors and the public interest, and are not designed to permit unfair discrimination between customers, issuers, brokers or dealers.

The Commission believes that the NYSE Plan should foster coordination with persons engaged in facilitating transactions in securities, remove impediments to and perfect the mechanism of a free and open market, and protect investors and the public interest by expediting and making more efficient the process by which members receive and execute orders on the floor of the Exchange.

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] A detailed description of the wireless communication plan and its requirements are set out in Securities Exchange Act Release No. 35931 (June 30, 1995), 60 FR 35767 (July 11, 1995).

[4] One pilot program was conducted by the Exchange and the other two were conducted by member-sponsored, private wireless data communications vendors.

[5] The Exchange plans to have the integrator define requirements, analyze technology and design the infrastructure during Phase II.

[6] Rule 117 also provides that if a member to whom an order has been entrusted leaves the trading crowd without actually transferring the written order to another member, the order shall not be represented in the market during his absence. The use of wireless data communications devices does not affect this portion of Rule 117. If a member receives an order by means of a transmission to his wireless device and he leaves a trading crowd without transferring a written version of the order to another member, the order may not be represented in the market in his absence.

[7] The Exchange intends to notify its members of this interpretation through an information memo.

[8] All orders entered from off the floor must be transmitted to a booth terminal before they are retransmitted to a hand-held device.

[9] In the case where an order is transmitted electronically from a member's off-floor location to a booth terminal and then the order is retransmitted from the booth terminal to a member's hand-held device, a record must be established and maintained which reflects the time the order was received by the booth terminal and the time the order was received by the hand-held device. The record of time of receipt by the booth terminal may be established and maintained by such terminal or by a server which records the time such terminal acknowledges receipt of the order. The booth terminal must display the order (and the time of receipt, on inquiry) and the automated record of the order (including time of receipt) must be supplemented by a paper record of the order at the booth. If the paper record cannot be produced at the booth terminal, it must then be produced by hand. The record of time of receipt by a hand-held device may be established and maintained by such device or by the server or the booth terminal which receives a message acknowledgement from the hand-held device. Regardless of whether the hand-held device records are maintained in such device or in the booth terminal or a server, such records must be capable of being printed at the booth location.

[10] 15 U.S.C. 78f(b).

The Commission also believes that the NYSE's Plan to phase in the wireless technology is not designed to permit unfair discrimination between customers, issuers, brokers, and dealers. Before implementing Phase II of the NYSE Plan, each of the vendors of the pilot programs must describe its procedures for selecting the 25 participants that will participate in its program. These procedures must provide a fair and non-discriminatory environment and must comply with the Exchange's selection requirements. For example, each vendor must demonstrate to the Exchange that it is willing and able to offer any member who wishes to use that vendor's system the opportunity to participate in the vendor's pilot program, subject to (i) The capacity constraints of the vendor's system, (ii) reasonable lead-time that the vendor may need to bring new users on-line and (iii) the NYSE Plan limit of 25 participants per pilot program. Each vendor is required, among other things, to offer its service in a reasonable manner that does not give the vendor (if it is also a member), or a member that is a sponsor or affiliate of the vendor, an unfair advantage over other Exchange members. In addition, the Exchange will prohibit a vendor from providing its pilot program to any member that primarily trades [11] in one stock unless and until (i) The vendor is prepared to provide its service to all members who primarily trade in the same stock and who desire to participate in the pilot program or (ii) the Exchange otherwise permits. Moreover, the Exchange will develop procedures for selecting its own pilot program participants on the same basis. The Commission believes that these procedures and limitations will result in a fair implementation of the NYSE Plan.

Finally, the Commission believes that the proposed interpretation to Rule 117, under which the transmission of an order that is received by means of an authorized hand-held device will be deemed to constitute a "written order" for purposes of Rule 117, in general, protects investors and the public interest. The proposed interpretation provides that an order recieved through a hand-held device will be considered a "written order" only if it meets the specified requirements, concerning the information to be maintained about the order. The Commission believes the proposed interpretation to Rule 117 will provide a more efficient means of communicating orders on the floor at the same time it requires the same information that is currently available for orders processed manually.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[12] that the proposed rule change (SR–NYSE–95–22) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[13]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 95–21756 Filed 8–31–95; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34–36158; File No. SR–PSE–95–16]

Self-Regulatory Organizations; Pacific Stock Exchange Incorporated; Order Granting Approval To Proposed Rule Change and Amendment No. 1 To Proposed Rule Change Relating to Violations of the Intermarket Trading System Rules

August 25, 1995.

On June 8, 1995, the Pacific Stock Exchange Incorporated ("PSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("the Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend its Minor Rule Violation Plan ("MRP") [3] to include violations of the Intermarket Trading System ("ITS") rules. On June 26, 1995, the Exchange submitted to the Commission Amendment No. 1 to the proposed rule change.[4]

The proposed rule change and Amendment No. 1 were published for comment in Securities Exchange Act Release No. 35959 (July 12, 1995), 60 FR 36849 (July 18, 1995). No comments were received on the proposal.

The Exchange's MRP, set forth in PSE Rule 10.13, provides that the Exchange may impose a fine not to exceed $5,000 on any member, member organization, or person associated with a member or member organization, for any violation of an Exchange rule that has been deemed to be minor in nature and approved by the Commission for inclusion in the MRP. Rule 10.13 includes a list of rule violations that are eligible for the expedited disciplinary procedure under the MRP and that may be the subject of fines in accordance with the Recommended Fine Schedule.

The Exchange proposes to amend its MRP by adding the following provision to the MRP as Rule 10.13(i)(9): "Failure to follow the provisions of the rules and regulations governing the use of the Intermarket Trading System (ITS) (PSE Rules 5.20–5.23)." The Exchange is also proposing to amend its Recommended Fine Schedule to establish the following recommended fines (on a running two-year basis) for violations of the ITS rules and regulations: $500 for a first-time violation; $1,000 for a second-time violation; and $2,000 for a third-time violation.[5]

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b).[6] In particular, the Commission believes the proposal is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, and, in general, to protect investors and the public, and with the Section 6(b)(6) requirement that the rules of an exchange provide that its members be appropriately disciplined for violations of an exchange's rules and the Act.

Specifically, the Commission believes that an exchange's ability to effectively enforce compliance by its members and member organizations with the Commission and Exchange rules is central to its self-regulatory functions. The inclusion of a rule in an exchange's minor rule violation plan, therefore, should not be interpreted to mean that it is not an important rule. On the contrary, the Commission recognizes that the inclusion of minor violations of particular rules under a minor rule violation plan may make the exchange's disciplinary system more efficient in prosecuting more egregious and/or repeated violations of these rules, thereby furthering its mandates to protect investors and the public interest.

---

[11] The Exchange deems a member to "primarily trade in one stock" if more than 50 percent of either his trades or share volume occur in that stock. The Exchange will base determinations of percentages of trades and share volumes on, among other things, the Exchange's audit trail data.

[12] 15 U.S.C. 78s(b)(2).

[13] 17 U.S.C. 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1994).

[3] Rule 19d–1(c)(2) under the Act, 17 CFR 240.19d–1(c)(2), authorizes national securities exchanges to adopt minor rule violation plans for the summary discipline and abbreviated reporting of minor rule violations by exchange members and member organizations. The PSE's Plan was approved by the Commission in Securities Exchange Act Release No. 22654 (Nov. 21, 1985), 50 FR 48853 (Nov. 27, 1985).

[4] *See* letter from Michael Pierson, Senior Attorney, PSE, to Jennifer S. Choi, Attorney, SEC, dated June 23, 1995. Amendment No. 1 withdrew the proposed changes to the Equity Floor Procedure Advice 2–B because these changes have been approved already by the Commission. *See* Securities Exchange Act Release No. 34760 (Sept. 30, 1994), 59 FR 50950 (Oct. 6, 1994) (approving File No. SR–PSE–94–13).

[5] For a discussion of the Exchange's Recommended Fine Schedule, see Securities Exchange Act Release No. 34322 (July 6, 1994), 59 FR 35958 (July 14, 1994).

[6] 15 U.S.C. 78f(b) (1988 & Supp. v 1993).

The Commission believes that adding the provisions listed above to the Exchange's MRP is consistent with Sections 6(b)(5) and 6(b)(6) in that the purpose of the Exchange's MRP is to provide for a response to a violation of Exchange rules when a meaningful sanction is needed, but when initiation of a disciplinary proceeding pursuant to Exchange Rule 10.3 [7] is not suitable because such a proceeding would be more costly and time-consuming than would be warranted given the nature of the violation. Rule 10.13 provides for an appropriate response to minor violations of certain Exchange rules while preserving the due process rights of the party accused through specified required procedures.[8]

Moreover, the Commission finds that violations of the provision being added are objective and technical in nature, and easily verifiable, thereby lending themselves to the use of expedited proceedings. Noncompliance with the provisions may be determined objectively and adjudicated quickly without the complicated factual and interpretive inquiries associated with more sophisticated Exchange disciplinary proceedings. If, however, the Exchange determines that a violation of one of these rules is not minor in nature, the Exchange retains the discretion to initiate full disciplinary proceedings in accordance with Exchange Rule 10.3. The Commission expects the PSE to bring full disciplinary proceedings in appropriate cases (*e.g.*, in cases where the violation is egregious or where there is a history or pattern of repeated violations).

Finally, the Commission finds that the imposition of the recommended fines for violations of the ITS rules and regulations should result in appropriate discipline of members, in a manner that is proportionate to the nature of such violations.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[9] that the proposed rule change (SR–PSE–95–16) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC–21321; File No. 812–9614]

Glenbrook Life and Annuity Company, et al.

August 25, 1995.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of application for an order under the Investment Company Act of 1940 ("1940 Act").

APPLICANTS: Glenbrook Life and Annuity Company ("Company"); Glenbrook Life and Annuity Company Variable Annuity Account ("Variable Account"); and Allstate Life Financial Services, Inc. ("ALFS").

RELEVANT 1940 ACT SECTIONS: Order requested under Section 6(c) of the 1940 Act granting exemptions from the provisions of Sections 26(a)(2)(C) and 27(c)(2) thereof.

SUMMARY OF APPLICATION: Applicants seek an order permitting the deduction of a mortality and expense risk charge imposed under certain variable annuity contracts ("Contracts") and any other variable annuity contracts that the Company may issue that are substantially similar in all material respects to the Contracts ("Materially Similar Contracts"), from the assets of the Variable Account or any other separate account established in the future by the Company in connection with the offering of Materially Similar Contracts. Applicants also request that the exemptions apply to registered broker-dealers other than ALFS, in the event of change in the identity of the principal underwriter for the relevant contracts.

FILING DATES: The application was filed on May 22, 1995.

HEARING AND NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Secretary of the Commission and serving Applicants with a copy of the request, personally or by mail. However requests should be received by the Commission by 5:30 p.m., on September 19, 1995, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Commission's Secretary.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicants, c/o Michael J. Velotta, Vice President, Secretary and General Counsel, Glenbrook Life and Annuity Company, 3100 Sanders Road, J5B, Northbrook, Illinois 60062.

FOR FURTHER INFORMATION CONTACT: Joyce Merrick Pickholz, Senior Counsel, or Wendy Finck Friedlander, Deputy Chief, Office of Insurance Products, Division of Investment Management, at (202) 942–0670.

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is available for a fee from the Commission's Public Reference Branch.

Applicants' Representations

1. The Company, a stock life insurance company incorporated under Illinois law, is a wholly owned subsidiary of Allstate Life Insurance Company ("Allstate Life"). Allstate Life is a wholly owned subsidiary of Allstate Insurance Company which is an indirect subsidiary of Sears, Roebuck and Co.

2. On December 15, 1992, the Company established the Variable Account as a segregated investment account to fund variable annuity contracts to be issued by the Company. The Variable Account is registered as a unit investment trust under the 1940 Act.

3. ALFS, a wholly owned subsidiary of Allstate Life, is the principal underwriter for the Contracts. It is registered as a broker-dealer under the Securities Exchange Act of 1934, and is a member of the National Association of Securities Dealers, Inc.

4. Purchase payments under the Contracts may be allocated, according to a Contractowner's instructions, to one or more of the Sub-Accounts of the Variable Account (or to one of the fixed accumulation options under the Contracts). The initial purchase payment must be at least $3,000 ($2,000 for qualified contracts). Subsequent purchase payments must be $50 or more. Each Sub-Account will invest

---

[7] PSE Rule 10.3 governs the initiation of disciplinary proceedings by the Exchange for violations within the disciplinary jurisdiction of the Exchange.

[8] The MRP permits any person to contest the Exchange's imposition of the fine through submission of a written answer, at which time the matter will become a formal disciplinary action.

[9] 15 U.S.C. 78s(b)(2) (1988).

[10] 17 CFR 200.30–3(a)(12) (1994).

solely in shares of a registered open-end management investment company (or series thereof).

5. If the Contractowner (Annuitant, if the Contractowner is not a natural person) dies before annuity payments begin, a death benefit is payable under the Contracts. The death benefit is based on the largest of the following amounts: the Contract value on the date the Company receives a proper request for payment, and the Contract values on the issue date and every seventh anniversary of that date, plus purchase payments and less withdrawals subsequent to such anniversary. The death benefit will never be less than the total purchase payments made, less withdrawals.

6. The Company will deduct a Contract Maintenance Charge of $30.00 per year from each Contractowner's Contract value to reimburse the Company for its costs in maintaining the Contract and the Variable Account. This charge is waived if the total purchase payments are $25,000 or more or if the entire Contract value is allocated to the fixed options under the Contract. The Company does not expect to realize a profit from this charge. The amount of the charge is guaranteed not to increase over the life of the Contract.

7. The Company will also deduct an Administrative Expense Charge which is an amount equal on an annual basis to .10% of the daily net assets in the Variable Account. This charge is designed to cover actual administrative expenses which exceed the revenues from the Contract Maintenance Charge. The Company does not intend to profit from this charge. The Company believes that the Administrative Expense Charge and Contract Maintenance Charge have been set at a level that will recover no more than the actual costs associated with administering the Contract. The Company guarantees that the rate of the Administrative Expense Charge will not increase over the life of the Contract.

8. The Contractowner may withdraw his or her Contract value at any time before the earlier of the annuity start date or the Contractowner's or Annuitant's death. No withdrawal Charges will be deducted on amounts up to 10% of the Contract value on the date of the first withdrawal in a Contract year ("Free Withdrawal Amount"). Amounts surrendered in excess of the Free Withdrawal Amount may be subject to a Withdrawal Charge. Free Withdrawal Amounts that are not withdrawn in a Contract Year are not carried over to later Contract Years for purposes of determining the Free Withdrawal Amount in such later years. For purposes of calculating the amount of the Withdrawal Charge, withdrawals are assumed to come from purchase payments first, beginning with the oldest payment. Withdrawals made after all purchase payments have been withdrawn will not be subject to a Withdrawal Charge.

9. Withdrawal Charges will be applied to purchase payments withdrawn (less any available Free Withdrawal Amount) as set forth below:

Number of complete years since purchase payment being withdrawn was made	Applicable withdrawal charge percentage
0 years	7
1 year	6
2 years	5
3 years	4
4 years	3
5 years	2
6 years	1
7 years or more	0

The Withdrawal Charge may be reduced or waived under circumstances described in the prospectus for the Contracts.

10. Pursuant to the Contracts, the Company deducts a daily Mortality and Expense Risk Charge equal at an annual rate of 1.25% of the assets of each Sub-Account of the Variable Account. The level of this charge is guaranteed not to increase.

Approximately .85% of this charge is allocated to the Company's assumption of mortality risk and approximately .40% to the assumption of expense risk. According to the application, the mortality risk arises from the Company's guarantee to cover all death benefits and to make annuity payments in accordance with the tables contained in the Contracts. The expense risk arises from the possibility that the Contract Maintenance Charge and the Administrative Expense Charge, which are guaranteed not to increase, will be insufficient to cover actual administrative expenses.

11. The Company reserves the right to assess a $10.00 charge on each transfer among the Sub-Accounts in excess of 12 per Contract year. However, it is currently not assessing such a charge.

12. The Company also reserves the right to deduct state premium taxes or other similar policy-holder taxes relative to the Contract when annuity payments begin or when a total withdrawal occurs.

Applicant's Legal Analysis

1. Section 6(c) of the 1940 Act authorizes the Commission to exempt any person, security or transaction or any class or classes of persons, securities or transactions from any provisions of the 1940 Act and the rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

2. Sections 26(a) and 27(c)(2) of the 1940 Act, taken together, provide for the protection of the assets of investment companies that issue periodic payment plan certificates. Section 27(c)(2) of the 1940 Act prohibits the issuer of a periodic payment plan certificate, and any depositor or underwriter for such issuer, from selling such periodic payment plan certificates unless all proceeds of payments (other than sales load) are deposited with a qualified bank acting as trustee or custodian, and held under an indenture or agreement containing specified provisions. Section 26(a) of the 1940 Act requires that such indenture or custodianship agreement provide, among other things, that such bank shall not allow as an expense any payment to the depositor or principal underwriter except a fee, not exceeding such reasonable amount as the Commission may prescribe, for bookkeeping and other administrative services of a character normally performed by the bank itself.

3. Applicants request that an exemption from Sections 26(a)(2)(C) and 27(c)(2) be granted to the extent necessary to allow the Company to deduct the Mortality and Expense Risk Charge described above from the assets of the Variable Account. Applicants further request that such exemption permit the deduction of a mortality and expense risk charge under any Materially Similar Contracts that the Company may issue from the Variable Account or, in the case of Materially Similar Contracts funded through another separate account established by the Company, such other separate account. Finally, Applicants requests that such relief will also be applicable in the event that a registered broker-dealer other than ALFS serves as the principal underwriter for the Contracts or Materially Similar Contracts.

4. Applicants submit that the requested order would promote competitiveness in the variable annuity contract market by eliminating the need for the Company to file redundant exemptive applications, thereby reducing its administrative expenses and maximizing the efficient use of its resources. The delay and expense involved in having repeatedly to seek exemptive relief would impair the Company's ability effectively to take

advantage of business opportunities as these opportunities arise. Applicants further submit that the requested relief is consistent with the purposes of the Act and the protection of investors for the same reasons. Applicants assert that if the Company were required repeatedly to seek exemptive relief with respect to the same issues addressed in this application, investors would not receive any benefit or additional protection thereby.

5. Applicants represent that the mortality risk is assumed by virtue of the annuity rates which cannot be changed after issuance of the Contract and the death benefit guaranteed in the Contract. Also, because the Contract Maintenance Charge and the Administrative Expense Charge will not increase regardless of the actual costs incurred, the Company assumes an expense risk. If the Mortality or Expense Risk Charge is insufficient to cover the actual costs, the Company will bear the loss. To the extent that the charge is in excess of actual costs, the Company, at its discretion, may use the excess to offset losses when the charge is not sufficient to cover expenses.

6. Applicants assert that the Mortality and Expense Risk Charge is reasonable in relation to the risks assumed by the Company under the Contracts, and is consistent with the protection of investors insofar as it is designed to be competitive while not exposing the Company to undue risk of loss. Applicants also represent that the Mortality and Expense Risk Charge is reasonable in amount as determined by industry practice with respect to comparable annuity products. Applicants state that this representation is based on their analysis of publicly available information about similar industry products, taking into consideration such factors as current charge levels, existence of charge level guarantees, and guaranteed annuity rates. The Company will maintain at its home office, available to the Commission, a memorandum setting forth in detail the products analyzed in the course of, and the methodology and results of, the Company's comparative survey. Similarly, prior to relying on the exemptive relief requested herein with respect to any Materially Similar Contracts funded by the Variable Account or other separate account established by the Company, Applicants will determine that the mortality and expense risk charge under such Materially Similar Contracts will be reasonable in relation to the risks assumed by the Company and reasonable in amount as determined by industry practice with respect to comparable annuity products. The Company will maintain at its home office a memorandum, available to the Commission upon request, setting forth in detail the methodology used in making these determinations.

7. Applicants acknowledge that the Withdrawal Charge may be insufficient to cover all costs relating to the distribution of the Contracts. Applicants also acknowledge that if a profit is realized from the Mortality and Expense Risk Charge, all or a portion of such profit may be viewed as being offset by distribution expenses not reimbursed by the Withdrawal Charge. The Company has concluded, however, that there is a reasonable likelihood that the proposed distribution financing arrangements will benefit the Variable Account and the Contractowners. The basis for such conclusion is set forth in a memorandum which will be maintained by the Company at its administrative offices and will be available to the Commission. Similarly, prior to relying on any exemptive relief granted herein with respect to any Materially Similar Contracts issued by the Variable Account or other separate accounts established by the Company, Applicants will determined that there is a reasonable likelihood that the distribution financing arrangement will benefit the Variable Account (or such other separate account) and its investors. The Company will maintain and make available to the Commission upon request a memorandum setting forth the basis of such determination.

8. The Company represents that the Variable Account (and any other separate account of the Company that relies on the relief sought in this application) will invest only in management investment companies which undertake, in the event such company adopts a plan pursuant to Rule 12b–1 adopted under the 1940 Act to finance distribution expenses, to have their board of directors (or trustees), a majority of whom are not interested persons of such company, formulate and approve any such plan under Rule 12b–1.

Conclusion

Based upon the facts and for the reasons set forth above, Applicants submit that the exemptions requested are necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–21322; File No. 812–9420]

Great-West Life & Annuity Insurance Company, et al.

August 28, 1995.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of application for amendment to order granting exemptions pursuant to the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: Great-West Life & Annuity Insurance Company (the "Company"), The Great-West Life Assurance Company ("Great-West Life") and FutureFunds Series Account (the "Separate Account").

RELEVANT 1940 ACT SECTIONS: Order requested pursuant to Section 6(c) of the 1940 Act to amend order granting exemptions from the provisions of Sections 26(a) and 27(c)(2) thereof.

SUMMARY OF APPLICATION: Applicants seek an amendment to an order that permits deduction of mortality and expense risk charges from the assets of the Separate Account in connection with the issuance and sale of certain group variable annuity contracts ("Existing Contracts").[1] The amendment will permit the deduction of mortality and expense risk charges from the assets of any other separate account established in the future by the Company ("Future Accounts," together with the Separate Account, "Accounts"), in connection with the issuance of certain group variable annuity contracts that are substantially similar in all material respects to the Existing Contracts ("Future Contracts," together with Existing Contracts, "Contracts").

FILING DATE: The application was filed on January 9, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Secretary of the Commission and serving Applicants with a copy of the request, personally or by mail. Hearing requests must be received by the Commission by 5:30

---

[1] See *Great-West Life & Annuity Insurance Company, et al.*, Inv. Co. Act Rel. No. 13998 (June 19, 1984) (notice) and Inv. Co. Act. Rel. No. 14038 (July 17, 1984) (order); file no. 812–5818.

p.m. on September 18, 1995, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Applicants, c/o Beverly A. Byrne, Assistant Counsel, Great-West Life & Annuity Insurance Company, Great-West Life Center, 8515 East Orchard Road, Englewood, Colorado 80111.

FOR FURTHER INFORMATION CONTACT: Kevin M. Kirchoff, Senior Counsel, or Brenda D. Sneed, Chief, Office of Insurance Products (Division of Investment Management), at (202) 942–0670.

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from the Public Reference Branch of the Commission.

Applicant's Representations

1. The Company is a stock life insurance company originally organized under the laws of the State of Kansas as the National Interment Association. In September of 1990, the Company redomesticated and is now organized under the laws of the State of Colorado. The Company, a wholly-owned subsidiary of Great-West Life, is licensed to sell insurance and annuities, and is qualified to do business in 49 states and the District of Columbia.

2. The Separate Account was established by the Company under the laws of the State of Kansas on November 15, 1983. As a result of the Company's redomestication to Colorado, the Separate Account now exists pursuant to Colorado law.

3. Great-West Life, a life insurance company organized under the laws of Canada, is the principal underwriter of the Existing Contracts. Great-West Life is registered with the Commission as a broker-dealer pursuant to the Securities Exchange Act of 1934 (the "1934 Act") and is a member of the National Association of Securities Dealers, Inc. The Existing Contracts are offered through licensed insurance agents of the Company who are registered representatives of either Great-West Life of a broker-dealer registered pursuant to the 1934 Act with which Great-West Life has entered into a dealer agreement.

4. The Separate Account is an investment account of the Company which acts as a funding vehicle for the Existing Contracts. The assets of the Separate Account are owned by the Company, but segregated from the other assets of the Company, and the obligations under the Existing Contracts are obligations of the Company. The income, gains and losses incurred on the assets in the Separate Account, whether or not realized, are credited to or charged against the Separate Account without regard to other income, gains or losses of the Company.

5. The Separate Account currently has seventeen investment divisions ("Investment Divisions") available for the purpose of investing contributions ("Contributions") by, or on behalf of, participants in the group ("Participants") received under the Existing Contracts. Each Investment Division invests solely in a corresponding portfolio of Maxim Series Fund, Inc., TCI Portfolios, Inc. or Fidelity Variable Insurance Products Fund, each of which has a different investment objective.

6. The Existing Contracts provide that, prior to the annuity commencement date, Contributions can accumulate on a variable basis, fixed basis, or a combination of both. Participants of Existing Contracts allocate Contributions to the Investment Divisions of their choice. The value under an Existing Contract varies with the investment performance of the applicable Investment Divisions of the Separate Account. Therefore, the owner of an Existing Contract, rather than the Company, assumes the risk of investment gain or loss on investments.

7. Participants of Existing Contracts may specify the date on which they desire annuity payments to begin, and may later change the date through a written request. The Existing Contracts offer several annuity options payable on a variable basis, a fixed basis, or a combination of both.

8. The Existing Contracts provide that the Company may deduct an annual contract maintenance charge of not more than sixty dollars from each Participant's account.

9. The Company currently intends to itself pay any premium tax relating to the Existing Contracts that is levied by any governmental entity, but has reserved the right to deduct any such tax from account values after giving notice to all Participants.

10. No sales charge is deducted from purchase payments, however, a contingent deferred sales charge ("CDSC") is deducted upon total or partial surrender of an Existing Contract, other than at death or annuitization. In some circumstances an amount against which a CDSC is not assessed ("Free Amount") applies. The Free Amount applicable to a given Existing Contract will not exceed ten percent of the Participant's annuity account value on December 31 of the prior year. All distributions in excess of an applicable Free Amount during a calendar year, are subject to a CDSC.

11. The amount of CDSC, which in no event will exceed 8.5%, is as follows:

(1) the CDSC equals 6% of the amount distributed in excess of the Free Amount (though the cumulative total of all such charges will not exceed 6% of all Contributions made within 72 months prior to the date of the particular distribution), for: (i) Section 401(k) retirement plans where the employer does not also maintain a Section 403(b) or Section 457 group contract with the Company; (ii) Section 401(a) plans where the employer also maintains a Section 403(b) group contract; and (iii) Section 403(b) retirement plans, other than employer-sponsored plans issued after May 1, 1992;

(2) For: (i) group contracts issued in exchange for group tax-sheltered annuity or group deferred compensation annuity contracts of Great-West Life, and (ii) Section 457 group contracts issued prior to May 1988 and not amended; the total of all CDSCs will not exceed (a) 6% of an amount equal to all Contributions made within 72 months prior to the date of the particular distribution, plus (b) an amount which is the result of multiplying the amount initially applied to a Participant annuity account from the exchanged contract by an appropriate percentage, or an amount equal to a percentage of the amount distributed in excess of the Free Amount, as chosen from the following chart:

No. of years of coverage of the participant	Percentage
Less than 5	6.
At least 5 but less than 10	5.
At least 10	4;

and.

(3) For: (i) Section 403(b) employer-sponsored plans issued after April 30, 1992; (ii) Section 457 group contracts issued after April 30, 1988; (iii) Section 457 group contracts issued prior to May 1988 but amended to incorporate this provision; and (iv) Section 401(a) plans where the employer also maintains a Section 457 group contract; the CDSC on amounts distributed in excess of the Free Amount will vary based on the following table.

No. of years of participation in the separate account	Percentage
0–4	5
5–9	4
10–14	3
15 or more	0

12. The Company assumes mortality and expense risks under the Existing Contracts because of its contractual obligation to make annuity payments, in the case of a life annuity, regardless of how long an annuitant may live. The mortality risk is the risk that, upon selection of a life annuity which has a life contingency, annuitants will live longer than the Company's actuarial projections indicate, resulting in higher than expected annuity payments. The expense risk is the risk that actual administrative expenses involved in administering the Existing Contracts may exceed the anticipated administrative expenses.

13. As compensation for assuming these mortality and expense risks, the Company assesses a daily charge at an annual effective rate of 1.25% of the net asset value of the Separate Account ("Mortality and Expense Risk Charge").

14. When the accounts derived from the Mortality and Expense Risk Charge are insufficient to cover the actual costs resulting from the mortality and expense risk, the Company bears the costs and realizes a loss. When the amounts derived from the Mortality and Expense Risk Charge are more than sufficient, the excess is a profit that is added to the Company's surplus and used for any lawful purpose, including the costs of distributing the Existing Contracts.

Applicants' Legal Analysis and Conditions

1. Pursuant to Section 6(c) of the 1940 Act the Commission may, by order upon application, conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities or transactions, from any provision or provisions of the 1940 Act or from any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

2. Sections 26(a)(2)(C) and 27(c)(2) of the 1940 Act, in pertinent part, prohibit a registered unit investment trust and any depositor thereof or underwriter thereof from selling periodic payment plan certificates unless the proceeds of all payments (other than sales load) are deposited with a qualified bank as trustee or custodian and held under arrangements which prohibit any payment to the depositor or principal underwriter except a fee, not exceeding such reasonable amount as the Commission may prescribe, for performing bookkeeping and other administrative services of a character normally performed by the bank itself.

3. Applicants previously received exemptive relief ("Previous Exemption") pursuant to Section 6(c) of the 1940 Act exempting them from Sections 26(a) and 27(c)(2) of the 1940 Act to the extent necessary to permit the deduction of the Mortality and Expense Risk Charge from the assets of the Separate Account.[2] Applicants now request an amendment to the Previous Exemption to permit the deduction of the Mortality and Expense Risk Charge from the assets of any other separate account established in the future by the Company, in connection with the issuance of certain variable annuity group contracts that are substantially similar in all material respects to the Existing Contracts. Without the requested exemptive relief, Applicants would have to request and obtain such relief for each Future Account the Company establishes to fund Future Contracts. Applicants assert that such additional requests for exemptive relief would present no issues under the 1940 Act that have not been addressed by either the Previous Exemption or the application that is the subject of this notice.

4. Applicants assert that the Mortality and Expense Risk Charge of 1.25% is within the range of industry practice for comparable annuity products. Applicants state that this determination is based upon an analysis of publicly available information about similar industry products, taking into consideration such factors as current charge levels, the existence of charge guarantees, guaranteed annuity rates and the markets in which the Contracts or offered. Applicants undertake to maintain a memorandum, available to the Commission upon request, outlining the methodology underlying this representation.

5. Applicants represent that Future Contracts will provide for equal or lower Mortality and Expense Risk Charge than the Existing Contracts. The amount of the Mortality and Expense Risk Charges will be stated in each Future Contract, and will be guaranteed not to increase.

Conclusion

For the reasons summarized above, Applicants represent that the exemptions requested are necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SMALL BUSINESS ADMINISTRATION

[(Declaration of Disaster Loan Area #2804)]

Vermont; Declaration of Disaster Loan Area

As a result of the President's major disaster declaration on August 16, 1995, I find that Caledonia, Chittenden, Essex, Lamoille, Orleans, and Washington Counties in the State of Vermont constitute a disaster area due to damages caused by excessive rain and flooding on August 4 through 6, 1995. Applications for loans for physical damages may be filed until the close of business on October 16, 1995, and for loans for economic injury until the close of business on May 16, 1996, at the address listed below: U.S. Small Business Administration, Disaster Area 1 Office, 360 Rainbow Blvd. South, 3rd Floor, Niagara Falls, NY 14303 or other locally announced locations. In addition, applications for economic injury loans from small businesses located in the following contiguous counties may be filed until the specified date at the above location: Addison, Franklin, Grand Isle, and Orange in the State of Vermont; Coos and Grafton in New Hampshire; and Clinton and Essex in New York.

The interest rates are:

	Percent
For Physical Damage:	
Homeowners with credit available elsewhere	8.000
Homeowners without credit available elsewhere	4.000
Businesses with credit available elsewhere	8.000
Businesses and non-profit organizations without credit available elsewhere	4.000

	Percent
Others (including non-profit organizations) with credit available elsewhere	7.125
For Economic Injury:	
Businesses and small agricultural cooperatives without credit available elsewhere	4.000

The number assigned to this disaster for physical damage is 280406. For economic injury the numbers are 860900 for Vermont, 861000 for New Hampshire, and 861100 for New York.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008).

Dated: August 25, 1995.

Bernard Kulik,

Associate Administrator for Disaster Assistance.

SOCIAL SECURITY ADMINISTRATION

Agency Forms Submitted to the Office of Management and Budget for Clearance

Normally on Fridays, the Social Security Administration publishes a list of information collection packages that will require submission to the Office of Management and Budget (OMB) for clearance in compliance with Public Law 96–511, as amended (P.L. 104–13 effective October 1, 1995), The Paperwork Reduction Act. Since the last list was published in the **Federal Register** on August 4, 1995, the following information collections have been proposed or will require extension of the current OMB approvals.

(Call the Reports Clearance Officer on (410) 965–4142 for a copy of the form(s) or package(s), or write to her at the address listed after the information collections.)

SSA Reports Clearance Officer: Charlotte S. Whitenight.

1. Statement by School Official About Student's Attendance and Statement to U.S. Social Security Administration by School Outside the U.S. About Student's Attendance—0960–0090. The information on forms SSA–1371 and SSA–1371FC is used by the Social Security Administration to determine a student's alleged full time attendance at an educational institution in cases where such attendance is needed for continued entitlement to benefits. The respondents are the school officials who provide the information on these forms.

Number of Respondents: 5,000.

Frequency of Response: 1.

Average Burden Per Response: 10 minutes.

Estimated Annual Burden: 833 hours.

2. Report of Continuing Disability Interview—0960–0072. The information on form SSA–454 is used by the Social Security Administration to determine whether a person who receives Social Security Disability benefits is still unable to work because of his/her disability. It will be used to make a determination as to whether the Disability benefits should continue or terminate. The affected public will consist of approximately 300,000 Social Security Disability benefit recipients.

Number of Respondents: 300,000.

Frequency of Response: 1.

Average Burden Per Response: 30 minutes.

Estimated Annual Burden: 150,000 hours.

3. Medical Report (Individual With Childhood Impairment)—0960–0102. The information on form SSA–3827 is used by the Social Security Administration to determine if an individual with a childhood impairment medically qualifies for benefits or payments under the provisions of the Social Security Act. Without this data, SSA would not by able to properly evaluate the medical aspects of an individual's claim or application. The respondents will be attending physicians/medical sources.

Number of Respondents: 12,000.

Frequency of Response: 1.

Average Burden Per Response: 30 minutes.

Estimated Annual Burden: 6,000 hours.

4. Agreement to Sell Property—0960–0127. The information on form SSA–8060 is used by the Social Security Administration when individuals or couples who are otherwise eligible for Supplemental Security Income (SSI) benefits, but whose resources exceed the allowable limit, may receive conditional payments if they agree to dispose of their excess nonliquid resources and make repayment. The respondents will be applicants for and recipients of SSI benefits.

Number of Respondents: 20,000.

Frequency of Response: 1.

Average Burden Per Response: 10 minutes.

Estimated Annual Burden: 3,333 hours.

5. Application for Survivors Benefits—0960–0062. The information on form SSA–24 is used by the Social Security Administration to determine if an individual who is filing for benefits from the Department of Veterans Affairs (DVA) may also be entitled by SSA. The respondents are claimants for VA benefits.

Number of Respondents: 3,200.

Frequency of Response: 1.

Average Burden Per Response: 15 minutes.

Estimated Annual Burden: 800 hours.

6. Modified Benefit Formula Questionnaire—0960–0395. The information on form SSA–150 is used by the Social Security Administration to determine the correct formula to be used in computing the Social Security benefit of someone who also receives a benefit from employment not covered by Social Security. The respondents will be people who are entitled to both types of benefits.

Number of Respondents: 90,000.

Frequency of Response: 1.

Average Burden Per Response: 8 minutes.

Estimated Annual Burden: 12,000 hours.

7. Modified Benefit Formula Questionnaire, Employer—0960–0477. The information on form SSA–50 is used by the Social Security Administration to verify the claimant's allegation that he or she received a pension based on union-covered employment after 1956. It also shows whether or not the individual became eligible for that pension before 1985. The respondents will be persons who are first eligible for both Social Security benefits and a pension from noncovered employment after 1985.

Number of Respondents: 30,000.

Frequency of Response: 1.

Average Burden Per Response: 20 minutes.

Estimated Annual Burden: 10,000 hours.

8. Report of Student Beneficiary About to Attain Age 19—0960–0274. The information on form SSA–1390 is used by the Social Security Administration to determine whether a student beneficiary is entitled to benefits for the month of attainment of age 19 and subsequent months. The respondents will be student beneficiaries about to attain age 19.

Number of Respondents: 50,000.

Frequency of Response: 1.

Average Burden Per Response: 5 minutes.

Estimated Annual Burden: 4,167 hours.

9. Reconsideration Disability Report—0960–0144. The information on form SSA–3441 is used by the Social Security Administration to determine if the claimant's medical or vocational situation changed after the initial disability determination. This form also elicits additional sources of medical and vocational evidence which were not considered in the initial determination.

The respondents are disability beneficiaries who request a reconsideration.

Number of Respondents: 400,000.

Frequency of Response: 1.

Average Burden Per Response: 30 minutes.

Estimated Annual Burden: 200,000 hours.

Written comments and recommendations regarding these information collections should be sent within 60 days from the date of this publication, directly to the SSA Reports Clearance Officer at the following address: Social Security Administration, DCFAM, Attn: Charlotte S. Whitenight, 6401 Security Blvd., 1–A–21 Operations Bldg., Baltimore, MD 21235.

In addition to your comments on the accuracy of the agency's burden estimate, we are soliciting comments on the need for the information; its practical utility; ways to enhance its quality, utility and clarity; and on ways to minimize burden on respondents, including the use of automated collection techniques or other forms of information technology.

Dated: August 25, 1995.

Charlotte Whitenight,

Reports Clearance Officer, Social Security Administration.

[FR Doc. 95–21615 Filed 8–31–95; 8:45 am]

BILLING CODE 4190-29-P

Notice of Meeting of the Representative Payment Advisory Committee

Date and Time: September 21, 1995, 9:00 a.m.–9:00 p.m.; September 22, 1995, 9:00 a.m.–5:00 p.m.

Place: September 21, 1995, 9:00 a.m.–5:00 p.m., Harold Washington Social Security Center, 600 West Madison, Chicago, IL 60661; September 21, 1995, 7:00 p.m.–9:00 p.m., The Ambassador West Hotel, 1300 North State Parkway, Chicago, IL 60610; September 22, 1995, 9:00 a.m.–5:00 p.m., Harold Washington Social Security Center, 600 West Madison, Chicago, IL 60661.

Type of Meeting: The meeting is open to the public.

Purpose: In accordance with section 10(a)(2) of the Federal Advisory Committee Act, the Social Security Administration (SSA) announces the second meeting of the Representative Payment Advisory Committee. The Committee will discuss issues related to payee selection, payee recruitment and retention, standards for payee performance and payee oversight. The Committee will focus its discussion on standards for determining beneficiary (in)capability.

SSA assumes that adult beneficiaries are capable and develops capability only if there is an indication that the beneficiary cannot manage or direct the management of benefits. For beneficiaries with mental impairments, SSA develops capability only if there is an indication that the beneficiary may not have the ability to reason properly, is disoriented, has seriously impaired judgement or is unable to communicate with others. For beneficiaries with physical impairments, SSA develops capability only if the impairment makes the beneficiary dependent upon others to meet daily needs and to make decisions. If the beneficiary can *direct* the management of benefits, a payee is not appointed.

Acceptable evidence of capability includes legal, medical and other evidence that describes the person's ability to understand the value of money and make decisions about its use. Other evidence is usually information from people close to the beneficiary who are in a position to know about the beneficiary's abilities through day-to-day contact. Usual sources of this information include the beneficiary, the beneficiary's custodian, friends, relatives, neighbors, landlord, and representatives of community groups.

Determinations of capability are made in SSA field offices. The determination of capability is relevant only for payment of SSA-administered funds. A determination of incapability is reviewed whenever the beneficiary requests direct receipt of payments. SSA considers making a determination of incapability when it reviews a beneficiary's disability status or redetermines his or her eligibility for SSI payments.

Agenda: The Committee will meet commencing at 9:00 a.m. to 9:00 p.m. on Thursday, September 21, 1995, with a break for dinner, and from 9:00 a.m. to 5:00 p.m. on Friday September 22, 1995. Agenda items for both days will include, but not be limited to, a discussion concerning standards for determining beneficiary (in)capability. Oral statements on this issue or any issue concerning representative payment policy are sought from the public for presentation on September 21. Presentations will be limited to 5 minutes per public speaker.

Persons interested in presenting an oral statement should submit a written request, along with a copy of their statement, to the Social Security Administration, Representative Payment Advisory Committee, 2–N–24 Operations Building, P.O. Box 17763, Baltimore, MD 21203–7763. Requests should contain the name, address, telephone number and any business or professional affiliation of the person desiring to make an oral statement. Groups having similar interests are requested to combine their comments and present them through a single representative. The allocation of time may be adjusted to accommodate the level of expressed interest. The Representative Payment Advisory Committee will notify each presenter by mail or telephone of their assigned presentation time. Persons who do not file an advance request for presentation, but desire to make an oral statement, may sign up at the meeting site before noon on September 21. These persons will be allowed to present their oral statements as time permits. The Committee also welcomes written comments. They may be sent to the Social Security Administration, Representative Payment Advisory Committee, 2–N–24 Operations Building, P.O. Box 17763, Baltimore, MD 21203–7763.

Records are being kept of all Committee proceedings, and will be available for public inspection at the office of the Social Security Administration, Representative Payment Advisory Committee, Room 2–N–24, Operations Building, 6401 Security Boulevard, Baltimore, MD 21235 between the hours of 9:00 a.m. and 4:00 p.m. on regular business days. Anyone requiring information regarding the Committee should contact the Representative Payment Advisory Committee at P.O. Box 17763, Baltimore, MD 21203–7763; Telephone: (410) 966–4688; FAX: (410) 966–0980; Internet: adcom@ssa.gov.

Dated: August 25, 1995.

Reba Andrew,

Staff Director, Representative Payment Advisory Committee.

BILLING CODE 4910-62-P

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended August 18, 1995

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et. seq.*). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: OST–95–396

Date filed: August 14, 1995

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 11, 1995

Description: Application of Baltia Air Lines, Inc. (Baltia), pursuant to Section 401 of the Act and Subpart Q of the Regulations, applies for a certificate of public convenience and necessity to provide scheduled foreign air transportation of persons, property and mail non-stop between New York, New York and St. Petersburg, Russia.

Docket Number: OST–95–403

Date filed: August 15, 1995

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 12, 1995

Description: Application of Eagle Jet charter, Inc. d/b/a Eagle Jet, pursuant to 49 U.S.C., 41102 and Subpart Q of the Regulations, requests authority to engage in interstate scheduled air transportation of passengers, property and mail: Between a place in (i) a State, territory, or possession of the United States and a place in the District of Columbia or another State, territory or possession of the United States; (ii) Hawaii and another place in Hawaii through the airspace over a place outside Hawaii; (iii) the District of Columbia and another place in the District of Columbia; and (iv) a territory or possession of the United States and another place in the same territory or possession.

Docket Number: OST–95–408

Date filed: August 16, 1995

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 13, 1995

Description: Application of Nashville Air, Inc., pursuant to 49 U.S.C. Section 41102 and Subpart Q of the Regulations, requests issuance of a certificate of public convenience and necessity so as to authorize Nashville Air to provide scheduled interstate air transportation of persons, property and mail between various points in the United States.

Docket Number: OST–95–412

Date filed: August 17, 1995

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 14, 1995

Description: Application of North East Cargo Airlines, pursuant to 49 U.S.C. Section 41301 and Part 211 of the Economic Regulations, and Subpart Q of the Regulations, applies for a foreign air carrier permit authorizing it to engage in charter foreign air transportation of property and mail between a point or points in the Russian Federation and a point or points in the United States.

Docket Number: OST–95–415

Date filed: August 17, 1995

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 14, 1995

Description: Application of Polar Air Cargo, Inc., pursuant to 49 U.S.C. Section 41102, and Subpart Q of the Regulations, applies for an amendment to its certificate of public convenience and necessity authorizing it to engage in scheduled foreign air transportation of property and mail between the U.S. on the one hand and the countries listed in this application. Polar Air also requests that it be permitted to integrate service to these newly authorized points with service to other points for which it holds outstanding certificate authority, to the extent consistent with all applicable international agreements. Furthermore, Polar Air requests that the Department allow it to integrate the exemption authority issued by Order 95–3–30 with its certificate authority as amended by the addition of these new countries.

BILLING CODE 4910-62-P

Federal Aviation Administration

Approval of Noise Compatibility Program, Greater Rockford Airport, Rockford, IL

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the Greater Rockford Airport Authority for Greater Rockford Airport under the provisions of title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96–193) and 14 CFR Part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96–52 (1980). On January 31, 1995, the FAA determined that the noise exposure maps submitted by the Greater Rockford Airport Authority under part 150 were in compliance with applicable requirements. On July 26, 1995, the Associate Administrator for Airports approved the Greater Rockford Airport noise compatibility program. This noise compatibility program is an updated version of a noise compatibility program FAA approved on March 23, 1990. The Greater Rockford Airport Authority's recommended program consists of twenty-nine measures including the withdrawal of six measures previously approved. Of the twenty-three remaining, twelve are listed as Noise Abatement Measures, eight are listed as Land Use Management Measures and three listed as Other Implementation Measures. The FAA has approved all twenty-three measures.

EFFECTIVE DATE: The effective date of the FAA's approval of the Greater Rockford Airport Noise Compatibility Program is July 26, 1995.

FOR FURTHER INFORMATION CONTACT: Melissa Wishy, Federal Aviation Administration, Chicago Airports District Office, CHI–ADO–640.8, 2300 East Devon Avenue, Des Plaines, Illinois, 60018, (708) 294–7524.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for Greater Rockford Airport, effective July 26, 1995.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) Part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act, and is limited to the following determinations:

a. The NCP was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes or aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR Part 150, section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action.

Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Chicago Airports District Office in Des Plaines, Illinois.

The Greater Rockford Airport Authority submitted to the FAA on May 3, 1994 noise exposure maps, descriptions and other documentation. This documentation was produced during the Airport Noise Compatibility Planning (Part 150) Study at Greater Rockford Airport from February 1993 through May 1994. The noise compatibility program is an updated version of a noise compatibility program FAA approved on March 23, 1990. The Greater Rockford Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on January 31, 1995. Notice of this determination was published in the **Federal Register** on February 23, 1995.

The Greater Rockford Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 1998. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on January 31, 1995 and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period would have been deemed to be an approval of such program.

The submitted program contained twenty-three proposed measures for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. The overall program, therefore, was approved by the Associate Administrator for Airports effective July 26, 1995.

Twelve of the twenty-three measures submitted are listed as "Noise Abatement Measures". Most of these noise abatement measures were designed to alter flight tracks and all were approved. Eight of the twenty-three measures submitted are listed as "Land Use Management Measures", of which all were approved. Of these eight land use measures, four are preventive measures including such things as noise overlay zoning recommendations, discouraging incompatible development in areas impacted by aircraft noise exposure of 65 DNL and higher, adopting the Part 150 NCP as a comprehensive plan element and adopting guidelines for discretionary review. The remaining land use management measures are corrective measures such as acquisition of noise impacted homes, acquisition of development and overflight rights, creation of a noise buffer, and options of voluntary sale. Finally, three measures, "Other Implementation Measures" dealing with continuing planning were also approved outright. These determinations are set forth in detail in a Record of Approval endorsed by the Associate Administrator for Airports on July 26, 1995. The Record of Approval, as well as other evaluation materials and documents which comprised the submittal to FAA are available for review at the following locations:

Airport Manager's Office, Greater Rockford Airport Authority, 3600 Airport Drive, Rockford, Illinois 61125–0063

Illinois Department of Transportation, Division of Aeronautics, One Langhorne Drive, Capitol Airport, Springfield, Illinois

Federal Aviation Administration, Chicago Airports District Office, 2300 East Devon Avenue, Des Plaines, Illinois 60018

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Des Plaines, Illinois on August 21, 1995.

Louis H. Yates,

Manager, Chicago Airports District Office FAA, Great Lakes Region.

BILLING CODE 4910-13-M

RTCA, Inc.; Joint RTCA Special Committee 180 and EUROCAE Working Group 46 Meeting; Design Assurance Guidance for Airborne Electronic Hardware

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., Appendix 2), notice is hereby given for a joint RTCA Special Committee 180 and EUROCAE Working Group 46 meeting to be held September 19–21, 1995, starting at 8:30 a.m. on September 19. (On subsequent days, meeting begins at 8:00 a.m.). The meeting will be held at EUROCAE, 17 rue Hamelin, Paris, France.

The agenda will be as follows: (1) Chairman's Introductory Remarks; (2)

Review and Approval of Meeting Agenda; (3) Review and Approval of Minutes of June 20–22 Joint Meeting; (4) Leadership Team Meeting Report; (5) Consensus Items; (6) Review Status of Action Items; (7) Review Issue Logs; (8) Joint Team Status Reports; (9) Joint Team Assignments and Objectives; (10) Adjourn to Joint Team Sessions; (11) Joint Team Reports; (12) Other Business; (13) Agenda for Next Meeting; (14) Date and Place of Next Meeting.

Attendance is open to the interested public but limited to space availability. With the approval of the chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, 1140 Connecticut Avenue NW., Suite 1020, Washington, DC 20036; (202) 833–9339 (phone) or (202) 833–9434 (fax). Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on August 28, 1995.

Janice L. Peters,

Designated Official.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

August 24, 1995.

The Department of Treasury has made revisions and resubmitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

Internal Revenue Service (IRS)

OMB Number: 1545–0534
Form Number: IRS Form 5303
Type of Review: Resubmission
Title: Application for Determination for Collectively Bargained Plan
Description: IRS uses Form 5303 to get information needed about the finances and operation of employee benefit plans set up by employers under a collective bargaining agreement. The information obtained on Form 5303 is used to make a determination on whether the plan meets the requirements to qualify under section 401(a) and whether the related trust qualifies for exemption under section 501(a) of the Code.
Respondents: Business or other for-profit, Individuals or households
Estimated Number of Respondents/Recordkeepers: 2,500
Estimated Burden Hours Per Respondent/Recordkeeper:
Recordkeeping—22 hr., 14 min.
Learning about the law or the form—3 hr., 35 min.
Preparing the form—6 hr., 54 min.
Copying, assembling, and sending the form to the IRS—48 min.
Frequency of Response: On occasion
Estimated Total Reporting/Recordkeeping Burden: 83,825 hours
Clearance Officer: Garrick Shear, (202) 622–3869, Internal Revenue Service, Room 5571, 1111 Constitution Avenue NW., Washington, DC 20224
OMB Reviewer: Milo Sunderhauf, (202) 395–7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

Public Information Collection Requirements Submitted to OMB for Review

August 24, 1995.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

Special Request: In order to conduct the survey described below in early to mid-September, the Department of Treasury is requesting Office of Management and Budget (OMB) review and approval of this information collection by September 5, 1995. To obtain a copy of this survey, please write to the IRS Clearance Officer at the address listed below.

Internal Revenue Service (IRS)

OMB Number: 1545–1432
Project Number: PC:V 95–013–G
Type of Review: Revision
Title: CP503/CP504 Customer Opinion Survey
Description: During the month of June 1995, the "Ensuring Compliance Core Business System Sub-Process" initiated a collection notice test for paragraphs CP503, Third Notice and CP504, Fourth/Final Notice. Philadelphia, Austin and Fresno Service Centers participated in the test. The original three- or four-page notices were revised to a one-page notice resembling a credit card bill. The CP503 had one revised format while the CP504 had multiple revised formats. The survey will be conducted with a group of taxpayers who have been sent the old notice and group of taxpayers who have been sent the revised notice. The results of each group will be compared to determine the effect the revised notice had on customer satisfaction and reducing burden. In addition, the results of the survey will be used as input for future revisions of these notices.
Respondents: Individuals or households, Business or other for-profit
Estimated Number of Respondents: 440
Estimated Burden Hours Per Respondent: 5 minutes
Frequency of Response: Other
Estimated Total Reporting Burden: 37 hours
Clearance Officer: Garrick Shear (202) 622–3869, Internal Revenue Service, Room 5571, 1111 Constitution Avenue NW., Washington, DC 20224
OMB Reviewer: Milo Sunderhauf, (202) 395–7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

Public Information Collection Requirements Submitted to OMB for Review

August 22, 1995.

The Office of Thrift Supervision (OTS) has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–11. Copies of the submission(s) may be obtained by calling the OTS Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the OTS Clearance Officer, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

OMB Number: 1550–0061.

Form Number: Not Applicable.

Type of Review: Extension.

Title: Outside Borrowings.

Description: This information is collected only from those institutions that do not meet capital requirements. The institutions must give the OTS 10 days notice before making long-term borrowings. OTS uses the information to monitor the safety and soundness of the institutions.

Respondents: Savings and Loan Associations and Savings Banks.

Estimated Number of Respondents: 10.

Estimated Burden Hours Per Respondents: 4 Hrs. Avg.

Frequency of Response: 1 per Year.

Estimated Total Burden: 40 Hrs.

Clearance Officer: Colleen M. Devine, (202) 906–6025, Office of Thrift Supervision, 1700 Street, NW., Washington, DC 20552.

OMB Reviewer: Milo Sunderhauf, (202) 395–7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

Advisory Committee on Prosthetics and Special-Disabilities Programs; Meeting

The Department of Veterans Affairs (VA) gives notice under Public Law 92–463 that a meeting of the Advisory Committee on Prosthetics and Special-Disabilities Programs will be held September 14 and 15, 1995. This meeting will be a field meeting conducted at the VA Medical Center, Palo Alto, California. The purpose of the meeting is to provide the Committee a first hand opportunity to review the provision, coordination, and operational capabilities of the special disability programs in the VA system. For this purpose, the Committee will tour the Medical Center and engage in discussions with VA service providers.

The meeting on September 14 will begin at 8:30 a.m. and conclude at 4 p.m. The day's agenda will consist of tours and lectures relating to the special disability programs. The meeting on September 15 will begin at 8:30 a.m. with a continuation of tours and lectures and conclude at approximately 3 p.m. with an executive meeting regarding a review of findings, conclusions, and future meeting plans.

Anyone having questions concerning the meeting may contact Kathy Pessagno, Administrative Officer, Prosthetic and Sensory Aids Service, Department of Veterans Affairs Central Office at (202) 565–7296.

Dated: August 25, 1995.

Heyward Bannister,

Committee Management Officer.

BILLING CODE 8320–01–M

Advisory Committee on the Readjustment of Vietnam and Other War Veterans, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under Pub. L. 92–463 that a meeting of the Advisory Committee on the Readjustment of Vietnam and Other War Veterans will be held September 14 and 15, 1995, This is a regularly scheduled meeting for the purpose of reviewing VA and other relevant services for Vietnam and other war veterans, to review Committee work in progress and to formulate Committee recommendations and objectives. The meeting on both days will be held at the American Legion, Washington Office, 1608 K Street, NW., Washington, DC. The meeting on both days will commence at 8:30 a.m. and adjourn at 4:30 p.m.

The agenda for September 14 will begin with a review of Committee special projects and reports. The first day's agenda will also cover a review of the Readjustment Counseling Service Vet Centers and VA medical center PTSD services in the context of the reorganization of Veterans Health Administration (VHA).

On September 15 the Committee will review the programs and activities of VA's Center for Minority Veterans and VHA's Women Veterans Health Program. The second day's agenda will also consist of a planning meeting to identify topics and objectives for the coming year.

Both day's meeting will be open to the public up to the meeting capacity of the room. Due to limited seating capacity of the room, those who plan to attend or who have questions concerning the meeting should contact Alfonso R.

Batres, Ph.D., M.S.S.W., Director, Readjustment Counseling Service, Department of Veterans Affairs (phone number: 202–565–7554).

Dated: September 17, 1995.

By Direction of the Secretary.

Sunshine Act Meetings

Federal Register
Vol. 60, No. 170
Friday, September 1, 1995

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:00 a.m. on Tuesday, August 29, 1995, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following:

Recommendation regarding the liquidation of a depository institution's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Memorandum re:
  CrossLand Savings, FSB New York City (Brooklyn), New York
    and
  First New York Bank for Business New York City (Manhattan), New York (Case No. 550–03549–95–BOD)

Matters relating to the Corporation's corporate activities.

In calling the meeting, the Board determined, on motion of Vice Chairman Andrew C. Hove, Jr., seconded by John F. Downey, acting in the place and stead of Director Jonathan L. Fiechter (Acting Director, Office of Thrift Supervision), concurred in by Ms. Susan F. Krause, acting in the place and stead of Director Eugene A. Ludwig (Comptroller of the Currency), and Chairman Ricki Helfer, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2), (c)(4), (c)(6), (c)(9)(B), and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Dated: August 29, 1995.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

42 CFR Parts 412, 413, 424, 485, and 489

[BPD–825–FC]

RIN 0938–AG95

Medicare Program; Changes to the Hospital Inpatient Prospective Payment Systems and Fiscal Year 1996 Rates

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule with comment period.

SUMMARY: We are revising the Medicare hospital inpatient prospective payment systems for operating costs and capital-related costs to implement necessary changes arising from our continuing experience with the system. In addition, in the addendum to this final rule, we are describing changes in the amounts and factors necessary to determine prospective payment rates for Medicare hospital inpatient services for operating costs and capital-related costs. These changes are applicable to discharges occurring on or after October 1, 1995. We are also setting forth rate-of-increase limits as well as policy changes for hospitals and hospital units excluded from the prospective payment systems. Finally, we are setting forth several requirements concerning Essential Access Community Hospitals (EACHs) and Rural Primary Care Hospitals (RPCHs), in accordance with provisions of the Social Security Act Amendments of 1994.

DATES: *Effective Date:* This final rule is effective on October 1, 1995, except that revised § 412.46 (concerning the physician attestation requirement for inpatient claims) is effective September 1, 1995.

Comments: Comments on revised § 485.645 (concerning the requirements for RPCH providers of long-term care services ("swing beds")) will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on October 31, 1995. We will not consider comments concerning any other issue.

ADDRESSES: Mail written comments (1 original and 3 copies) to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BPD–825–FC, P.O. Box 7517, Baltimore, MD 21207–0517.

If you prefer, you may deliver your written comments (1 original and 3 copies) to one of the following addresses: Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201, or Room C5–09–26, 7500 Security Boulevard, Baltimore, MD 21244–1850.

Because of staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code BPD–825–FC. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, in Room 309–G of the Department's offices at 200 Independence Avenue SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: (202) 690–7890).

Copies: To order copies of the **Federal Register** containing this document, send your request to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954. Specify the date of the issue requested and enclose a check or money order payable to the Superintendent of Documents, or enclose your Visa or Master Card number and expiration date. Credit card orders can also be placed by calling the order desk at (202) 512–1800 or by faxing to (202) 512–2250. The cost for each copy is $8.00. As an alternative, you can view and photocopy the **Federal Register** document at most libraries designated as Federal Depository Libraries and at many other public and academic libraries throughout the country that receive the **Federal Register**.

SUPPLEMENTARY INFORMATION:

I. Background

A. Summary

Under section 1886(d) of the Social Security Act (the Act), a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively-set rates was established effective with hospital cost reporting periods beginning on or after October 1, 1983. Under this system, Medicare payment for hospital inpatient operating costs is made at a predetermined, specific rate for each hospital discharge. All discharges are classified according to a list of diagnosis-related groups (DRGs). The regulations governing the hospital inpatient prospective payment system are located in 42 CFR part 412. On September 1, 1994, we published a final rule with comment period (59 FR 45330) to implement changes to the prospective payment system for hospital operating costs beginning with Federal fiscal year (FY) 1995.

For cost reporting periods beginning before October 1, 1991, hospital inpatient operating costs were the only costs covered under the prospective payment system. Payment for capital-related costs had been made on a reasonable cost basis because, under sections 1886 (a)(4) and (d)(1)(A) of the Act, those costs had been specifically excluded from the definition of inpatient operating costs. However, section 4006(b) of the Omnibus Budget Reconciliation Act of 1987 (Public Law 100–203) revised section 1886(g)(1) of the Act to require that, for hospitals paid under the prospective payment system for operating costs, capital-related costs would also be paid under a prospective payment system effective with cost reporting periods beginning on or after October 1, 1991. As required by section 1886(g) of the Act, we replaced the reasonable cost-based payment methodology with a prospective payment methodology for hospital inpatient capital-related costs. Under the new methodology, effective for cost reporting periods beginning on or after October 1, 1991, a predetermined payment amount per discharge is made for Medicare inpatient capital-related costs. (See subpart M of 42 CFR part 412, and the August 30, 1991, final rule (56 FR 43358) for a complete discussion of the prospective payment system for hospital inpatient capital-related costs.)

B. Major Contents of the Provisions of the June 2, 1995 Proposed Rule

On June 2, 1995, we published a proposed rule in the **Federal Register** (60 FR 29202) setting forth proposed changes to the Medicare hospital inpatient prospective payment systems for both operating costs and capital-related costs, as well as changes affecting hospitals excluded from those payment systems. The following is a summary of the major changes that we proposed to make:

- We proposed changes for FY 1996 DRG classifications and relative weighting factors as required by section 1886(d)(4)(C) of the Act.
- We proposed to update the wage index for FY 1996. Specific issues included allocation of general service salaries and hours to excluded areas, and revisions to the wage index based on hospital redesignations.

- We also proposed revisions to the criteria for seeking MGCRB reclassification and discussed comments received on alternative labor market areas.
- We discussed several provisions of the regulations in 42 CFR parts 412, 424, and 485 and set forth certain proposed changes concerning the following:

—Payment for transfer cases.
—Rural referral centers.
—Determination of number of beds in determining the indirect medical education adjustment.
—Disproportionate share adjustment.
—Essential access community hospitals (EACHs) and rural primary care hospitals (RPCHs).
—Rebasing the hospital market baskets.

- We discussed several provisions of the regulations in 42 CFR part 412 concerning the prospective payment system for capital related costs and set forth certain proposed changes concerning the following:

—New update framework.
—Specific adjustment for taxes to the capital prospective payment system Federal rate.

- We discussed changes to the regulations at 42 CFR parts 412 and 413 for hospitals and hospital units excluded from the prospective payment system. The proposed changes concerned the following:

—Requirements for certain long-term care hospitals excluded from the prospective payment systems.
—Payment window for preadmission services.
—Criteria for exclusion.
—Request for payment adjustment.

- In the addendum to the proposed rule, we set forth proposed changes to the amounts and factors for determining the FY 1996 prospective payment rates for operating costs and capital-related costs. We also proposed new update factors for determining the rate-of-increase limits for cost reporting periods beginning in FY 1996 for hospitals and hospital units excluded from the prospective payment system.
- In Appendix A of the proposed rule, we set forth an analysis of the impact that the proposed changes would have on affected entities.
- In Appendix B of the proposed rule, we set forth our technical appendix on the proposed FY 1996 capital acquisition model.
- In Appendix C to the proposed rule as corrected (60 FR 39304, August 2, 1995), we included our report to Congress on our initial estimate of an update factor for FY 1996 for both hospitals included in and hospitals excluded from the prospective payment systems as required by section 1886(e)(3)(B) of the Act.
- As required by sections 1886 (e)(4) and (e)(5) of the Act, in Appendix D, we provided our recommendation of the appropriate percentage change for FY 1996 for the following:

—Large urban area and other area average standardized amounts (and hospital-specific rates applicable to sole community hospitals) for hospital inpatient services paid for under the prospective payment system for operating costs.
—Target rate-of-increase limits to the allowable operating costs of hospital inpatient services furnished by hospitals and hospital units excluded from the prospective payment system.

- In the proposed rule, we discussed in detail the March 1, 1995 recommendations made by the Prospective Payment Assessment Commission (ProPAC). ProPAC is directed by section 1886(e)(2)(A) of the Act to make recommendations on the appropriate percentage change factor to be used in updating the average standardized amounts. In addition, section 1886(e)(2)(B) of the Act directs ProPAC to make recommendations regarding changes in each of the Medicare payment policies under which payments to an institution are prospectively determined. In particular, the recommendations relating to the hospital inpatient prospective payment systems are to include recommendations concerning the number of DRGs used to classify patients, adjustments to the DRGs to reflect severity of illness, and changes in the methods under which hospitals are paid for capital-related costs. Under section 1886(e)(3)(A) of the Act, the recommendations required of ProPAC under sections 1886(e)(2) (A) and (B) of the Act are to be reported to Congress not later than March 1 of each year.

We printed ProPAC's March 1, 1995 report, which included its recommendations, as Appendix E of the proposed rule. The recommendations, and the actions we proposed to take with regard to them (when an action is recommended), were discussed in detail in the appropriate sections of the preamble, the addendum, or the appendices to the proposed rule. Set forth below in sections II, III, IV, V, VI, and VII of this preamble, the addendum to this final rule, and the appendices are detailed discussion of the June 2 proposed rule, the public comments received in response to the proposed rule, and the responses to those comments, as well as the changes we are making.

C. Public Comments Received in Response to the June 2 Proposed Rule

A total of 2,006 items of correspondence containing comments on the proposed rule were received timely. Two issues, physician attestation of hospital patient claims and the DRG classification of the procedure for insertion of a coronary artery stent, were the subject of write-in campaigns. We received close to 1,000 letters on physician attestation and over 700 letters on coronary stent. Of the remaining letters, the main areas of concern addressed by the commenters were the following:

- The adjustment for taxes to the capital prospective payment system Federal rate.
- The new requirements for certain long-term hospitals excluded from the prospective payment system.
- The discussion on the definition of a transfer case.

II. Changes to DRG Classifications and Relative Weights

A. Background

Under the prospective payment system, we pay for inpatient hospital services on the basis of a rate per discharge that varies by the DRG to which a beneficiary's stay is assigned. The formula used to calculate payment for a specific case takes an individual hospital's payment rate per case and multiplies it by the weight of the DRG to which the case is assigned. Each DRG weight represents the average resources required to care for cases in that particular DRG relative to the average resources used to treat cases in other DRGs.

Congress recognized that it would be necessary to recalculate the DRG relative weights periodically to account for changes in resource consumption. Accordingly, section 1886(d)(4)(C) of the Act requires that the Secretary adjust the DRG classifications and relative weights annually. These adjustments are made to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources. The changes to the DRG classification system and the recalibration of the DRG weights for discharges occurring on or after October 1, 1995, are discussed below.

B. DRG Reclassification

1. General

Cases are classified into DRGs for payment under the prospective payment system based on the principal diagnosis, up to eight additional diagnoses, and up to six procedures performed during the stay, as well as age, sex, and discharge status of the patient. The diagnosis and procedure information is reported by the hospital using codes from the International Classification of Diseases, Ninth Edition, Clinical Modification (ICD–9–CM). The Medicare fiscal intermediary enters the information into its claims system and subjects it to a series of automated screens called the Medicare Code Editor (MCE). These screens are designed to identify cases that require further review before classification into a DRG can be accomplished.

After screening through the MCE and any further development of the claims, cases are classified by the GROUPER software program into the appropriate DRG. The GROUPER program was developed as a means of classifying each case into a DRG on the basis of the diagnosis and procedure codes and demographic information (that is, sex, age, and discharge status). It is used both to classify past cases in order to measure relative hospital resource consumption to establish the DRG weights and to classify current cases for purposes of determining payment. The records for all Medicare hospital inpatient discharges are maintained in the Medicare Provider Analysis and Review (MedPAR) file. The data in this file are used to evaluate possible DRG classification changes and to recalibrate the DRG weights.

Currently, cases are assigned to one of 492 DRGs in 25 major diagnostic categories (MDCs). Most MDCs are based on a particular organ system of the body (for example, MDC 6, Diseases and Disorders of the Digestive System); however, some MDCs are not constructed on this basis since they involve multiple organ systems (for example, MDC 22, Burns).

In general, principal diagnosis determines MDC assignment. However, there are five DRGs to which cases are assigned on the basis of procedure codes rather than first assigning them to an MDC based on the principal diagnosis. These are the DRGs for liver, bone marrow, and lung transplant (DRGs 480, 481, and 495, respectively) and the two DRGs for tracheostomies (DRGs 482 and 483). Cases are assigned to these DRGs before classification to an MDC.

Within most MDCs, cases are then divided into surgical DRGs (based on a surgical hierarchy that orders individual procedures or groups of procedures by resource intensity) and medical DRGs. Medical DRGs generally are differentiated on the basis of diagnosis and age. Some surgical and medical DRGs are further differentiated based on the presence or absence of complications or comorbidities (hereafter CC).

Generally, GROUPER does not consider other procedures; that is, nonsurgical procedures or minor surgical procedures generally not performed in an operating room are not listed as operating room (OR) procedures in the GROUPER decision tables. However, there are a few non-OR procedures that do affect DRG assignment for certain principal diagnoses, such as extracorporeal shock wave lithotripsy for patients with a principal diagnosis of urinary stones.

We proposed to make several changes to the DRG classification system for FY 1996. These proposed changes, the comments we received concerning them, our responses to those comments, and the final DRG changes, are set forth below.

2. MDC 5 (Diseases and Disorders of the Circulatory System)

a. Automatic Implantable Cardioverter Defibrillator (AICD) Procedures (DRG 116). For several years, we have received correspondence regarding the appropriate DRG assignment of certain procedures involving automatic implantable cardioverter defibrillators (AICDs). When a patient whose principal diagnosis is classified to MDC 5 (Diseases and Disorders of the Circulatory System) receives a total AICD system implant or replacement (procedure code 37.94), the case is assigned to DRG 104 or 105 (Cardiac Valve Procedures With or Without Cardiac Catheterization). However, for discharges occurring before October 1, 1992, if a procedure was performed that involved the implantation or replacement of only part of the AICD system (that is, replacement or implant of either the leads or pulse generator only), the case was assigned to DRG 120 (Other Circulatory System OR Procedures). Effective with discharges occurring on or after October 1, 1992, these procedures were reclassified to DRG 116 (Other Permanent Cardiac Pacemaker Implant or AICD Lead or Generator Procedure). In the proposed rule, we presented our analysis of AICD cases based on FY 1994 MedPAR data. We concluded that these cases continue to be appropriately assigned to DRG 116. Therefore, we did not propose any further changes to the DRG assignment. We received two public comments on our analysis and conclusion.

Comment: One commenter commended the continued assignment to DRG 116 of cases in which replacement or implantation of only part of the AICD system is performed. However, the other commenter requested that we change the DRG assignment for these cases to DRG 115 (Permanent Cardiac Pacemaker Implantation with AMI, Heart Failure or Shock). The second commenter stated that the resource use of these patients is similar to those in DRG 115, even though the patients in DRG 115 have much longer lengths of stay.

Response: Since reassignment of these procedures to DRG 116, we have annually analyzed the cases based on the most recent data. Based on data in the latest update of the FY 1994 MedPAR file (June 1995), the average standardized charge for the 2,569 AICD cases assigned to DRG 116 is $27,806. The average standardized charge for all cases in DRG 116 is $19,637 and for DRG 115, is $29,086. The $8,169 difference between the average charge for AICD cases in DRG 116 and all cases in DRG 116 is within the normal range of charges for that DRG. (One standard deviation from the mean of the charges for DRG 116 is $10,512.) We note that, compared to last year's analysis using FY 1993 MedPAR data, the average charge for the AICD cases has decreased slightly as has the difference in charges between all cases in DRG 116 and the AICD cases.

The average length of stay for the AICD cases in DRG 116 is 3.98 days compared to 5.89 days for all cases in DRG 116. However, the length of stay for cases in DRG 115 is 11.8. In general, the patients classified to DRG 115 are seriously ill and the long length of stay supports this contention. We continue to believe that the AICD patients are clinically much more similar to the patients classified to DRG 116 than to those in DRG 115 and that it is the cost of the AICD device that is responsible for the high average charge for these cases and not the intensity of hospital services required to treat the patient.

In the September 1, 1994 final rule (59 FR 45346), we stated our belief that as new AICD devices were approved by the FDA and entered the market, increased competition would result in a decrease in the price of the devices and a corresponding drop in the average charge for a hospital stay for AICD procedures. Second and third generations of several manufacturers' devices are now on the market. In addition, we believe that the slight decrease in average charges seen in the FY 1994 data compared to the FY 1993 data is a direct result of hospitals' ability to obtain AICD devices from multiple sources. (The increase in charges for AICD cases between the FY 1992 and FY 1993 data was approximately $6,000.) Based on this evidence, we will continue to assign the AICD implant cases to DRG 116 for FY 1996. However, we will reassess this assignment as a part of our FY 1997 DRG analysis in order to verify that the current pattern is maintained.

b. Sympathectomy Procedures. When performed in connection with a principal diagnosis assigned to MDC 5, procedure code 05.24 (presacral sympathectomy) is assigned to DRGs 478 and 479 (Other Vascular Procedures)[1]. However, the four other sympathectomy procedures related to MDC 5 diagnoses are classified to DRG 120 (Other Circulatory System OR Procedures). In order to improve clinical consistency, we proposed to assign procedure code 05.24 to DRG 120 rather than to DRGs 478 and 479.

We received one comment on this proposal, which supported our proposed change. Therefore, we are adopting this change as final.

3. MDC 15 (Newborns and Other Neonates with Conditions Originating in the Perinatal Period)

In the September 1, 1994, final rule (59 FR 45341), we stated our intention to improve the classification and relative weights of the DRGs that apply to newborns, children, and maternity patients. Because the Medicare population does not include many of these individuals, the original DRG classification system was developed from analysis of claims data representative of the total inpatient population. Non-Medicare discharge records from Maryland and Michigan hospitals were used to calculate the original Medicare weights for the DRGs to which newborns, children, and maternity patients are classified. Since that time, because of the lack of Medicare data, these low-volume DRGs have not been analyzed and refined, and the relative weights assigned to them may no longer be entirely reflective of the resources needed to treat patients.

Accordingly, we have acquired hospital claims data representative of the total inpatient population for analysis and evaluation. These data, collected and formatted by the Urban Institute under contract with HCFA (Contract 500–92–0024), represent claims for non-Medicare payers from 19 States. The data base contains approximately 17 million discharge records. Using these data, we are evaluating possible modifications to MDC 15 that would better address the requirements for an all-patient population.

As we have not yet completed this evaluation, we did not propose an MDC 15 DRG reclassification structure for FY 1996. However, we did propose to adjust the DRG relative weights for 36 Medicare low-volume DRGs (defined as those DRGs with fewer than 10 cases). These DRGs are generally those assigned to patients age 0–17, many of the neonate and newborn MDC 15 DRGs, and one DRG in MDC 14 (Pregnancy, Childbirth and Puerperium). The proposed DRG relative weights for these low-volume DRGs were calculated based on the non-Medicare data we acquired from the 19 States. We note that, based on the June 1995 update to the FY 1994 MedPAR file, there are only 34 low-volume DRGs in the final recalibration.

During the year, we have received suggestions from the public concerning improvements for the neonate DRG classifications. Among these suggestions have been recommendations concerning specific diagnoses that are currently considered significant problems in determining the assignment of a neonate case to DRG 390 (Neonate with Other Significant Problems) rather than DRG 391 (Normal Newborn). Another issue is the assignment to MDC 15 of discharges with a principal diagnosis of certain congenital defects regardless of the age of the patient. Because the MDC 15 modifications that we are considering should resolve these concerns, we did not propose to revise the assignment of these diagnoses and conditions. Rather, we indicated that we would incorporate the necessary and appropriate assignment of these cases with our overall modification of the neonate DRGs.

Comment: We received two comments on our proposal to base the relative weights for low-volume DRGs on all patient data, both of which supported our proposal. However, one of these commenters objected to the proposed assignment of a weight of 0.1460 to DRG 391 (Normal Newborn), the only DRG within MDC 15 for which the proposed relative weight decreased compared to the previous year's weights. This commenter stated that changes to the relative weight of DRG 391 should be postponed until our evaluation of claims data has been completed.

Response: In previous years, we computed the weight for the low-volume DRGs by adjusting the original weights of these DRGs as calculated based on 1981 bills by the percentage change in the average weight of the cases in the remaining DRGs. Thus, the weight for these DRGs was not based solely on actual experience and was, in some cases, artificially inflated. Using empirical data from more recent actual claims resulted in figures that more accurately reflect current utilization and resource use. We note that of the final 34 low-volume DRGs, only 8 experienced an increase in relative weight based on the all-patient data. Of these eight DRGs, four are in MDC 15. The decrease in the relative weight for DRG 391 is the one exception within that MDC. The decrease in weight is a function of the expanded data base and the difference between applying an automatic percentage increase and calculating a relative weight using an averaging process as we do for the other DRGs. Taking into account the changes in practice for treating normal newborns that have taken place over the last several years, it is not surprising that the weight for DRG 391 has decreased.

In any case, we see no reason why we should adjust all the low-volume weights to the new data except DRG 391. Therefore, we will proceed with the proposed methodology for updating these weights.

4. MDC 24 (Multiple Significant Trauma)

Several years ago, we created a new MDC 24 to classify cases of multiple significant trauma. In order to be assigned to this MDC, a patient must have a principal diagnosis of trauma and at least two significant trauma diagnosis codes from two different body sites reported as either principal or secondary diagnoses. We recognize eight different body site categories: head, chest, abdomen, kidney, urinary, pelvis and spine, upper limb, and lower limb.

It was brought to our attention that diagnosis code 851.06 (Cerebral cortex contusion with loss of consciousness of unspecified duration) was excluded from the list of diagnoses that count as principal or secondary diagnoses in the significant head trauma section of MDC 24. Because this code is clinically similar to those already on the list of principal or secondary diagnoses that cause assignment to DRG 487 (Other Multiple Significant Trauma), we proposed to add this diagnosis to the significant head trauma list effective with discharges occurring on or after October 1, 1995.

The one comment we received in response to this proposal stated that the change was appropriate. Thus, we have included this change in the final DRG classifications.

---

[1] A single title combined with two DRG numbers is used to signify pairs. Generally, the first DRG is for cases with CC and the second DRG is for cases without CC. If a third number is included, it represents cases of patients who are age 0–17. Occasionally, a pair of DRGs is split on age >17 and age 0–17.

5. Surgical Hierarchies

Some inpatient stays entail multiple surgical procedures, each one of which, occurring by itself, could result in assignment of the case to a different DRG within the MDC to which the principal diagnosis is assigned. It is, therefore, necessary to have a decision rule by which these cases are assigned to a single DRG. The surgical hierarchy, an ordering of surgical classes from most to least resource intensive, performs that function. Its application ensures that cases involving multiple surgical procedures are assigned to the DRG associated with the most resource-intensive surgical class.

Because the relative resource intensity of surgical classes can shift as a function of DRG reclassification and recalibration, we reviewed the surgical hierarchy of each MDC, as we have for previous reclassifications, to determine if the ordering of classes coincided with the intensity of resource utilization, as measured by the same billing data used to compute the DRG relative weights.

A surgical class can be composed of one or more DRGs. For example, in MDC 5, the surgical class "heart transplant" consists of a single DRG (DRG 103) and the class "coronary bypass" consists of two DRGs (DRGs 106 and 107). Consequently, in many cases, the surgical hierarchy has an impact on more than one DRG. The methodology for determining the most resource-intensive surgical class, therefore, involves weighting each DRG for frequency to determine the average resources for each surgical class. For example, assume surgical class A includes DRGs 1 and 2 and surgical class B includes DRGs 3, 4, and 5, and that the average charge of DRG 1 is higher than that of DRG 3, but the average charges of DRGs 4 and 5 are higher than the average charge of DRG 2. To determine whether surgical class A should be higher or lower than surgical class B in the surgical hierarchy, we would weight the average charge of each DRG by frequency (that is, by the number of cases in the DRG) to determine average resource consumption for the surgical class. The surgical classes would then be ordered from the class with the highest average resource utilization to that with the lowest, with the exception of "other OR procedures" as discussed below.

This methodology may occasionally result in a case involving multiple procedures being assigned to the lower-weighted DRG (in the highest, most resource-intensive surgical class) of the available alternatives. However, given that the logic underlying the surgical hierarchy provides that the GROUPER searches for the procedure in the most resource-intensive surgical class, which may sometimes occur in cases involving multiple procedures, this result is unavoidable.

We note that, notwithstanding the foregoing discussion, there are a few instances when a surgical class with a lower average relative weight is ordered above a surgical class with a higher average relative weight. For example, the "other OR procedures" surgical class is uniformly ordered last in the surgical hierarchy of each MDC in which it occurs, regardless of the fact that the relative weight for the DRG or DRGs in that surgical class may be higher than that for other surgical classes in the MDC. The "other OR procedures" class is a group of procedures that are least likely to be related to the diagnoses in the MDC but are occasionally performed on patients with these diagnoses. Therefore, these procedures should only be considered if no other procedure more closely related to the diagnoses in the MDC has been performed.

A second example occurs when the difference between the average weights for two surgical classes is very small. We have found that small differences generally do not warrant reordering of the hierarchy since, by virtue of the hierarchy change, the relative weights are likely to shift such that the higher-ordered surgical class has a lower average weight than the class ordered below it.

Based on the preliminary recalibration of the DRGs, we proposed to modify the surgical hierarchy as set forth below:

- In MDC 2 (Diseases and Disorders of the Eye), we proposed to reorder Extraocular Procedures Except Orbit (DRGs 40 and 41) above Retinal Procedures (DRG 36).
- In MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue), we proposed to reorder Major Thumb or Joint Procedures or Other Hand or Wrist Procedures with CC (DRG 228) above Major Shoulder/Elbow Procedures or Other Upper Extremity Procedures with CC (DRG 223).

We received one comment in support of both surgical hierarchy changes. In addition, based on a test of the proposed changes using the most recent MedPAR file and the revised GROUPER software, we have found that the changes are still supported by the data and no additional changes are indicated. Therefore, we are now incorporating the proposed surgical hierarchy as final.

6. Refinement of Complications and Comorbidities List

a. Addition or Deletion of CCs. There is a standard list of diagnoses that are considered complications or comorbidities (CCs). We developed this list using physician panels to include those diagnoses that, when present as a secondary condition, would be considered a substantial complication or comorbidity. In preparing the original CC list, a substantial CC was defined as a condition that, because of its presence with a specific principal diagnosis, would increase the length of stay by at least 1 day for at least 75 percent of the patients.

Based upon clinical review by our medical consultants and analysis of charge data, we proposed to revise the list of diagnoses that are considered CCs as follows:

- We proposed to add diagnosis code 008.49 (Bacterial enteritis) to the CC list. This diagnosis would be considered a CC for any principal diagnosis not shown in Table 6f, Addition to the CC Exclusions List (see discussion of CC Exclusions list in section V of the addendum below).
- We proposed to delete diagnosis code 276.8 (Hypopotassemia) from the CC list. This diagnosis would no longer be considered a CC for any principal diagnosis.

Comment: We received one comment that supported our addition of diagnosis code 008.49 to the list of CCs. However, two commenters disagreed with our proposal to remove diagnosis code 276.8 from the list. The commenters state that hypokalemia, which is one of the conditions coded to 276.8, is a serious medical condition that can complicate a patient's treatment and increase the length of stay.

Response: We agree that severe cases of hypokalemia can affect a patient's clinical course. However, based on our analyses and the judgment of our expert medical advisors, we believe that when a patient has a case of hypokalemia severe enough to affect the clinical course of treatment, there will be additional manifestations of the condition. Thus, we expect that in such cases, in addition to an abnormal laboratory report finding of low potassium, the patient will have other manifestations of this condition, many of which are coded to diagnoses considered to be CCs. Therefore, we believe that a patient with severe hypoalemia will be classified to a CC DRG based on his other secondary diagnoses. However, an abnormal

laboratory finding of low potassium, which is one of the conditions coded to 276.8, does not by itself generally result in increased resource use.

Comment: One commenter requested that we add the following diagnoses to the CC list:

008.45	Clostridium difficile
331.0	Alzheimer's disease
423.9	Unspecified disease of the pericardium
348.5	Cerebral edema
333.4	Huntington's chorea
458.0	Orthostatic hypotension
458.9	Hypotension, not otherwise specified

In addition, the commenter suggested that the following diagnoses be added as CCs for DRGs 121 and 122 only:

434.xx	Occlusion of cerebral arteries
436	Acute but ill-defined, cerebrovascular disease

Response: Our analysis of FY 1994 MedPAR data did not support granting CC status to these diagnoses. However, we have limited Medicare data on several of these codes. We will reevaluate these codes as part of our DRG analysis for FY 1997.

b. CC Exclusion List. We proposed a limited revision of the CC Exclusions List to take into account the changes that will be made in the ICD–9–CM diagnosis coding system effective October 1, 1995, as well as the proposed CC changes in Section II.B.6.a. described above. (See section II.B.8 for a discussion of the diagnosis coding system changes.) The proposed revisions were made in accordance with the principles established when we created the CC Exclusions List in 1987.

Tables 6G and 6H in section V of the addendum to this final rule contain the revisions to the CC Exclusions List that will be effective for discharges occurring on or after October 1, 1995. Each table shows the principal diagnoses with changes to the excluded CCs. Each of these principal diagnoses is shown with an asterisk, and the additions or deletions to the CC Exclusions List are provided in an indented column immediately following the affected principal diagnosis.

CCs that are added to the list are in Table 6G—Additions to the CC Exclusions List. Beginning with discharges occurring on or after October 1, 1995, the indented diagnoses will not be recognized by the GROUPER as valid CCs for the asterisked principal diagnosis.

CCs that are deleted from the list are in Table 6H—Deletions from the CC Exclusions List. Beginning with discharges occurring on or after October 1, 1995, the indented diagnoses will be recognized by the GROUPER as valid CCs for the asterisked principal diagnosis.

Copies of the original CC Exclusions List applicable to FY 1988 can be obtained from the National Technical Information Service (NTIS) of the Department of Commerce. It is available in hard copy for $84.00, plus $6.00 for shipping and handling and on microfiche for $20.50, plus $4.00 for shipping and handling. A request for the FY 1988 CC Exclusions List (which should include the identification accession number (PB) 88–133970) should be made to the following address: National Technical Information Service; U.S. Department of Commerce; 5285 Port Royal Road, Springfield, VA 22161; or by calling (703) 487–4650.

Users should be aware of the fact that all revisions to the CC Exclusions List (FYs 1989, 1990, 1991, 1992, 1993, 1994, and 1995) and those in Tables 6G and 6H of this document must be incorporated into the list purchased from NTIS in order to obtain the CC Exclusions List applicable for discharges occurring on or after October 1, 1995.

Alternatively, the complete documentation of the GROUPER logic, including the current CC Exclusions List, is available from 3M/Health Information Systems (HIS), which, under contract with HCFA, is responsible for updating and maintaining the GROUPER program. The current DRG Definitions Manual, Version 13.0, which includes the changes set forth in this final rule, is available for $195.00, which includes $15.00 for shipping and handling. Manuals may be obtained by writing 3M/HIS at: 100 Barnes Road; Wallingford, CT 06492; or by calling (203) 949–0303.

7. Review of Procedure Codes in DRGs 468, 476, and 477

Each year, we review cases assigned to DRG 468 (Extensive OR Procedure Unrelated to Principal Diagnosis), DRG 476 (Prostatic OR Procedure Unrelated to Principal Diagnosis), and DRG 477 (Nonextensive OR Procedure Unrelated to Principal Diagnosis) in order to determine whether it would be appropriate to change the procedures assigned among these DRGs.

DRGs 468, 476, and 477 are reserved for those cases in which none of the OR procedures performed is related to the principal diagnosis. These DRGs are intended to capture atypical cases, that is, those cases not occurring with sufficient frequency to represent a distinct, recognizable clinical group. DRG 476 is assigned to those discharges in which one or more of the following prostatic procedures are performed and are unrelated to the principal diagnosis:

60.0	Incision of prostate
60.12	Open biopsy of prostate
60.15	Biopsy of periprostatic tissue
60.18	Other diagnostic procedures on prostate and periprostatic tissue
60.2	Transurethral prostatectomy
60.61	Local excision of lesion of prostate
60.69	Prostatectomy NEC
60.81	Incision of periprostatic tissue
60.82	Excision of periprostatic tissue
60.93	Repair of prostate
60.94	Control of (postoperative) hemorrhage of prostate
60.95	Transurethral balloon dilation of the prostatic urethra
60.99	Other operations on prostate

All remaining OR procedures are assigned to DRGs 468 and 477, with DRG 477 assigned to those discharges in which the only procedures performed are nonextensive procedures that are unrelated to the principal diagnosis. The original list of the ICD–9–CM procedure codes for the procedures we consider nonextensive procedures if performed with an unrelated principal diagnosis was published in Table 6c in section IV of the addendum to the September 30, 1988 final rule (53 FR 38591). As part of the final rules published on September 4, 1990, August 30, 1991, September 1, 1992, September 1, 1993, and September 1, 1994, we moved several other procedures from DRG 468 to 477. (See 55 FR 36135, 56 FR 43212, 57 FR 23625, 58 FR 46279, and 59 FR 45336, respectively.)

a. Adding Procedure Codes to MDCs. We annually conduct a review of procedures producing DRG 468 or 477 assignments on the basis of volume of cases in these DRGs with each procedure. Our medical consultants then identify those procedures occurring in conjunction with certain principal diagnoses with sufficient frequency to justify adding them to one of the surgical DRGs for the MDC in which the diagnosis falls. This year's review did not identify any necessary changes; therefore, we did not propose to move any procedures from DRG 468 or DRG 477 to one of the surgical DRGs.

b. Reassignment of Procedures Among DRGs 468, 476, and 477. We also reviewed the list of procedures that produce assignments to each of DRG 468, 476, and 477 to ascertain if any of those procedures should be moved to one of the other DRGs based on average charges and length of stay. Generally, we move only those procedures for which we have an adequate number of discharges to analyze the data. Based on our review this year, we proposed to move a limited number of procedures.

In reviewing the list of OR procedures that produce DRG 468 assignments, we analyzed the average charge and length of stay data for cases assigned to that DRG to identify those procedures that are more similar to the discharges that currently group to either DRG 476 or 477. We identified several procedures that are significantly less resource intensive than the other procedures assigned to DRG 468. These procedures occur in the same "family" (that is, they relate to procedures on the same body part or system) and at least one of this family of codes is already present within DRG 477. Therefore, we proposed to move the following procedures to the list of procedures that result in assignment to DRG 477:

18.21 Excision of preauricular sinus
18.31 Radical excision of lesion of external ear
18.39 Other excision of external ear
18.5 Surgical correction of prominent ear
18.6 Reconstruction of external auditory canal
18.71 Construction of auricle of ear
18.72 Reattachment of amputated ear
18.9 Other operations of external ear

We conducted a similar analysis of the procedures that are assigned to DRG 477 to determine if any of those procedures might more appropriately be classified to DRG 468. Again, we analyzed charge and length of stay data to identify procedures that were more similar to discharges assigned to DRG 468 than to those classified in DRG 477. We did not identify any procedures in DRG 477 that should be assigned to DRG 468.

Comment: We received one comment that objected to our proposed move of procedure codes 18.21, 18.31, 18.39, 18.5, 18.6, 18.71, 18.72, 18.9 from DRG 468 to DRG 477. The commenter did not indicate the basis of the objections.

Response: In analyzing the procedures that produce assignments to each of DRG 468, 476, and 477 for possible reassignment, we evaluate both average charge and length of stay, as well as clinical evaluation to determine the appropriate classification. These procedure codes were significantly less resource intensive than other procedures assigned to DRG 468, and more closely resembled the average charge and length of stay for procedures classified to DRG 477. Our data continue to support the reclassification of these procedures to DRG 477. Therefore, we are reassigning these procedures from DRG 468 to DRG 477 as proposed.

All of the reassignments of procedures in DRGs 468 and 477 will be effective with discharges occurring on or after October 1, 1995.

8. Changes to the ICD–9–CM Coding System

As discussed above in section II.B.1 of this preamble, the ICD–9–CM is a coding system that is used for the reporting of diagnoses and procedures performed on a patient. The ICD–9–CM Coordination and Maintenance Committee, a Federal interdepartmental committee formed in 1985, is charged with the mission of maintaining and updating the ICD–9–CM. That mission includes approving coding changes, and developing errata, addenda, and other modifications to the ICD–9–CM to reflect newly developed procedures and technologies and newly identified diseases. The Committee is also responsible for promoting the use of Federal and non-Federal educational programs and other communication techniques with a view toward standardizing coding applications and upgrading the quality of the classification system.

The Committee is co-chaired by the National Center for Health Statistics (NCHS) and HCFA. The NCHS has lead responsibility for the ICD–9–CM diagnosis codes included in *Volume 1—Diseases: Tabular List* and *Volume 2—Diseases: Alphabetic Index*, while HCFA has lead responsibility for the ICD–9–CM procedure codes included in *Volume 3—Procedures: Tabular List and Alphabetic Index*.

The Committee encourages participation in the above process by health-related organizations. In this regard, the Committee holds public meetings for discussion of educational issues and proposed coding changes. These meetings provide an opportunity for representatives of recognized organizations in the coding fields, such as the American Health Information Management Association (AHIMA) (formerly American Medical Record Association (AMRA)), the American Hospital Association (AHA), and various physician specialty groups as well as physicians, medical record administrators, health information management professionals, and other members of the public to contribute ideas on coding matters. After considering the opinions expressed at the public meetings and in writing, the Committee formulates recommendations, which then must be approved by the agencies.

The Committee presented proposals for FY 1996 coding changes at public meetings held on May 5 and December 1 and 2, 1994, and finalized the coding changes after consideration of comments received at the meetings and in writing within 30 days following the December 1994 meeting. The initial meeting for consideration of coding issues for implementation in FY 1997 was held on May 4, 1995. Copies of the minutes of these meetings may be obtained by writing to one of the co-chairpersons representing NCHS and HCFA. We encourage commenters to address suggestions on coding issues involving diagnosis codes to: Sue Meads, Co-Chairperson; ICD–9–CM Coordination and Maintenance Committee; NCHS; Rm. 9–58; 6525 Belcrest Road; Hyattsville, MD 20782.

Questions and comments concerning the procedure codes should be addressed to: Patricia E. Brooks, Co-Chairperson; ICD–9–CM Coordination and Maintenance Committee; HCFA, Office of Hospital Policy; Division of Prospective Payment System; Room C5–06–27; 7500 Security Boulevard; Baltimore, MD 21244–1850.

The ICD–9–CM code changes that have been approved will become effective October 1, 1995. The new ICD–9–CM codes are listed, along with their DRG classifications, in Tables 6a and 6b (New Diagnosis Codes and New Procedure Codes, respectively) in section V of the addendum to this final rule. As we stated above, the code numbers and their titles were presented for public comment in the ICD–9–CM Coordination and Maintenance Committee meetings. Both oral and written comments were considered before the codes were approved. Therefore, we solicited comments on the proposed DRG classifications only.

Further, the Committee has approved the expansion of certain ICD–9–CM codes to require an additional digit for valid code assignment. Diagnosis codes that have been replaced by expanded codes, other codes, or have been deleted, are in Table 6c (Invalid Diagnosis Codes). The procedure codes that have been replaced by expanded codes or have been deleted are in Table 6d (Invalid Procedure Codes). These invalid diagnosis and procedure codes will not be recognized by the GROUPER beginning with discharges occurring on or after October 1, 1995. The corresponding new or expanded codes are included in Tables 6a and 6b. Revisions to diagnosis and procedure code titles are in Tables 6e (Revised Diagnosis Code Titles) and 6f (Revised Procedure Code Titles), which also include the DRG assignments for these revised codes.

There are three new procedure codes that were previously included in codes

classified as operating room procedures even though the specific procedures specified by the new codes may not be routinely performed in an operating room. The three codes are as follows:

48.36 [Endoscopic] polypectomy of rectum
59.72 Injection of implant into urethra and/or bladder neck
92.3 Stereotactic radiosurgery

In the proposed rule, these three new codes were classified as non-OR procedures that affect DRG assignment and are indicated as such in Table 6b—New Procedure Codes. We will continue to assign these three codes to the surgical DRGs to which they are currently assigned.

Comment: We received over 700 comments requesting that we assign cases involving the insertion of a coronary artery stent along with percutaneous transluminal coronary angioplasty (PTCA) to a different DRG than conventional PTCA. These cases are all currently assigned to DRG 112 (Percutaneous Cardiovascular Procedures). The commenters stated that hospital costs for inserting coronary stents along with an angioplasty are significantly greater than those for conventional angioplasty alone and the clinical results of the stent implantation are significantly better, leading to a reduction in the need for repeat interventions and to improved quality of care. These comments are based on two studies that were published in the August 25, 1994, *New England Journal of Medicine* as well the results of an analysis commissioned by the manufacturer of one of the two stent devices currently approved by the Food and Drug Administration (FDA).

In this latter analysis, the contractor used the Medicare cases reported to DRG 112 in the FY 1994 MedPAR file and information provided voluntarily by 19 hospitals on interventional catheter procedures performed between July 1, 1994, and September 30, 1994, including information on coronary stent implantation. By matching the individual hospital data to the MedPAR file, the contractor identified 655 cases of PTCA, 68 of which involved insertion of a stent device. The following are the findings of the analysis:

- The difference between the average length of stay for the stent cases and the non-stent cases is 2.8 days (7.7 days versus 4.9 days).
- The difference between the average standardized charges for stent cases and non-stent cases was approximately $8,500 ($22,500 versus $14,000).
- The contractor projects that approximately 10 percent of the PTCA cases assigned to DRG 112 during FY 1996 will receive a stent, resulting in approximately 10,000 stent cases.

One commenter stated that section 1886(d)(4)(C) of the Act gives HCFA the authority to adjust the DRG classifications and relative weights annually to "reflect changes in treatment patterns, technology, and other factors that may change the relative use of hospital resources." Because insertion of the coronary stent is both a new technology and a change in treatment patterns, the commenter believes that we have a duty to revise the DRG classification for this procedure.

The commenter also noted that we have used this authority in the past, citing two other changes made in response to technology changes. Effective for discharges occurring in FY 1993, we reclassified certain automatic implantable cardiac defibrillator (AICD) cases from DRG 120 (Other Circulatory System OR Procedures) to DRG 116 (Other Permanent Cardiac Pacemaker Implant or AICD Lead or Generator Procedure). (See 57 FR 39749, September 1, 1992.) The commenter stated that this change was made in response to complaints that hospitals were not adequately compensated for these procedures. Also, effective for discharges occurring in FY 1987, we reclassified all extracorporeal shockwave lithotripsy (ESWL) cases to DRG 323 (Urinary Stones with CC and/or ESWL) even in the absence of a CC (which would have resulted in classification to DRG 324 (Urinary Stones without CC)). (See 51 FR 31485, September 3, 1986.) The commenter stated that we made this change even though we did not conduct an analysis of Medicare data and instead relied on an outside source for the analysis. Thus, the commenter believes that HCFA could make a change in the assignment of stent cases even though HCFA cannot, at this time, conduct a complete analysis based on Medicare data. The commenter requested that a separate DRG be created for coronary stent implantation and that payment be established at a level that is appropriate for the cost of the procedure.

We received one comment supporting our proposed assignment of coronary stent implant as non-OR. The commenter stated that the published studies that were the basis for FDA approval do not show an overwhelming improvement in any clinical event when a stent was used in place of balloon PTCA. Thus, the commenter believes that it is obvious that coronary stenting is not a "good buy," and further studies are needed.

Response: Currently, the insertion of coronary stents are included in the codes for PTCA (procedure codes 36.01, 36.02, and 36.05). That is, there is no separate code to indicate that a coronary stent was inserted during a PTCA procedure. Therefore, at this time, we cannot identify which PTCA cases in the MedPAR file include insertion of a stent. Effective October 1, 1995, a new procedure code for insertion of a coronary stent (code 36.06) will be introduced. We have designated this code as non-OR and have not assigned it to a specific DRG (see Table 6b in section V of the addendum to this final rule). However, since it is always performed in connection with PTCA, the cases will continue to be assigned to DRG 112.

When a new code is introduced, our longstanding practice is to assign it to the same DRG category as its predecessor code. One compelling reason for this practice is our inability to move the cases associated with a new code to a new DRG assignment as part of DRG reclassification and recalibration. We have discussed this policy in several previous rules, most recently in the September 1, 1994, final rule (59 FR 45340).

Since coronary angioplasty with stent is currently assigned currently to the same DRG as those without stent, this classification will continue until data on the new procedure code are available. Hospitals will begin coding claims with procedure code 36.06 beginning with discharges in FY 1996. Therefore, the resource use and other data associated with that code will be available to us for analysis as part of the FY 1998 DRG changes. We will evaluate the DRG assignment of coronary stent insertion at that time.

We agree with the commenter who stated that section 1886(d)(4)(C) of the Act gives HCFA the authority to adjust DRG classification and relative weights. In fact, that section of the law *requires* that the Secretary adjust the DRG classifications and relative weights annually. However, we virtually always limit our adjustments to those that are supported by Medicare data we have collected through the claims submittal process. Although the change in DRG assignment for AICD procedures was requested by commenters because they did not believe that the payment associated with DRG 120 was adequate compensation, the revision in DRG assignment was based on our analysis of the FY 1991 MedPAR data. In fact, we had conducted other analyses of these cases in several previous years that did not support a DRG change. (See final rules published September 1, 1989 (54

FR 36465), September 4, 1990 (55 FR 36023), and August 30, 1991 (56 FR 43216).)

Concerning the change for ESWL cases made effective October 1, 1986, we note that this revision was made in response to a ProPAC recommendation and was based on ProPAC's analysis, which found that payment under DRG 324 substantially understated the cost of ESWL. As discussed in detail in the September 3, 1986 final rule, a commenter had requested that the ESWL cases be assigned to a separate DRG based on a study conducted by the National Health Services and Practice Pattern Survey (51 FR 31486). Our response was that we are generally opposed to the creation of a single procedure DRG and that ". . . this avenue should be employed only if there is substantial evidence of inequity through classification in any of the existing clinically consistent groupings." In addition, we stated that we intended ". . . to monitor ESWL closely as Medicare data become available. If it becomes apparent that reclassification is necessary in the future, we will consider the alternative of developing a specific DRG for ESWL among the options for reclassification." We note that, since 1986, the assignment of ESWL has never been revised.

We intend to maintain the non-OR designation of procedure code 36.06 until we have collected claims data from all hospitals performing this procedure, which will be available in 1997. We will carefully examine these data as part of our analysis of DRG changes for FY 1998 and we will discuss our findings in the FY 1998 proposed rule.

9. DRG Refinements

For several years, we have been analyzing major refinements to the DRG classification system to compensate hospitals more equitably for treating severely ill Medicare patients. These refinements, generally referred to as severity of illness adjustments, would create DRGs specifically for hospital discharges involving very ill patients who consume far more resources than do other patients classified to the same DRGs in the current system. This approach has been taken by various other groups in refining the Medicare DRG system to include severity measurements, most notably the research done for Yale, the changes incorporated by the State of New York into its all patient (AP) DRG system, and the all-patient refined (APR) DRGs, which are a joint effort of 3M/HIS and the National Association of Children's Hospitals and Related Institutions.

In the May 27, 1994, proposed rule, we announced the availability of a paper we had prepared that describes our preliminary severity DRG classification system as well as the analysis upon which our proposal was formulated. Comments were due to HCFA by September 30, 1994. We received 99 individual letters commenting on the DRG refinements. Many of the commenters supported the change in theory, but there were numerous specific comments on the methodology.

Our plan was to incorporate comments and suggestions we received and to consider proposing the complete revised DRG system as part of the FY 1996 prospective payment system proposed rule. However, as the final rule published on September 1, 1992 (57 FR 39761) indicated, we would not propose to make significant changes to the DRG classification system unless we were able either to improve our ability to predict coding changes by validating in advance the impact that potential DRG changes may have on coding behavior, or to make methodological changes to prevent building the inflationary effects of the coding changes into future program payments.

Besides the mandate of section 1886(d)(4)(C)(iii) of the Act, which provides that aggregate payments may not be affected by DRG reclassification and recalibration changes, we do not believe it is prudent policy to make changes for which we cannot predict the effect on the case-mix index and, thus, payments. Our goal is to refine our methodology so that we can fulfill, in the most appropriate manner, both the statutory requirement to make appropriate DRG classification changes and to recalibrate DRG relative weights (as mandated by section 1886(d)(4)(C) of the Act) as well as to make DRG changes in a budget neutral manner.

One approach to this problem would be to maintain the average case weight at 1.0 after recalibration, thereby eliminating the process of normalization. In other words, after recalibration, we would not scale the new relative weights upward to carry forward the cumulative effects of past case-mix increases. We would, instead, make an adjustment or include in the annual update factor a specific allowance for any real case-mix change that occurred during the previous year. This is a relatively simple and straightforward system for preventing the effects of year-to-year increase in the case-mix index from accumulating in the DRG weights and to account for expected changes in coding practice. In addition, we are exploring a means of estimating anticipated case-mix change due to changes in coding practice that are a result of DRG classification revisions. (See section VII.E of this preamble for a more detailed description of this process in response to a ProPAC recommendation.) However, since we have not yet resolved these issues, we were unable to propose our refined DRG severity system for FY 1996. We will continue to analyze the comments we received and validate our previous research with later MedPAR data. We remain committed to proposing our revised system as soon as possible.

We received several comments on our plan to introduce refinements to the DRG classification to include a measure of severity. In general, these comments were supportive of the concept of a severity-adjusted DRG system to improve compensation for the treatment of severely ill patients.

Comment: One commenter supported HCFA's decision to postpone a final proposal until all related issues were resolved. Another commenter stated we should not postpone new refinements on the basis of political reasons that arise due to shifts in payments. Other commenters, while stating appreciation of our desire to predict beforehand the effect of severity changes on coding behavior, urged us to resolve the issues regarding the effect of severity-adjusted DRGs on case mix, payment, and budget neutrality. One commenter stated we should set standards for "predictive accuracy" that are reasonable and attainable.

Response: We continue to maintain our position that, until we can improve our ability to predict coding changes, or prevent inflationary effects of coding change through methodological changes to DRG recalibration, we will not propose any significant changes to the DRG classification system. However, we note that we have continued to evaluate approaches to resolve this issue.

One approach to improving our ability to predict coding changes is to develop a data base of abstracted medical records to be used to estimate the real and coding components of case-mix change and to forecast future coding improvements. As we stated in the proposed rule (60 FR 29247), HCFA has recently implemented a record reabstracting process being conducted by two clinical data abstraction centers (CDACs) under contract with the Health Standards and Quality Bureau (HSQB). This will provide a data base consisting of 30,000 records per year. When we have evaluated the results of this reabstracting effort, we will determine if it is suitable for predicting coding

behavior. We believe we are proceeding at an appropriate pace that will result in both reasonable and attainable predictive standards.

As to the statement that HCFA should not postpone DRG refinements because of political reasons due to payment shifts, we note that we are constricted by the mandate of section 1886(d)(4)(C)(iii) of the Act, which provides that aggregate payments may not be affected by DRG reclassification and recalibration changes. We have experienced severe inflationary effects in prior years (see the September 1, 1989, final rule for a discussion of the inflationary effect of the FY 1987 DRG changes (54 FR 36468)), and reiterate our position that it would not be prudent payment policy to make changes for which we cannot predict nor control the effects.

Comment: One commenter recommended that HCFA issue a GROUPER that includes the severity refinements for review and comment by the industry.

Response: We believe it would be neither cost effective nor efficient to issue a GROUPER preliminary to a decision to proceed with the severity refinements. Thus, because the severity methodology is still in the preliminary planning stages, we have not prepared a public use GROUPER for release. The figures used in the initial analysis will be subject to change based on more current data and to modification based on comments received. At such time as the severity-adjusted methodology is officially implemented, a GROUPER will be made available. This is consistent with HCFA policy on the availability of GROUPER software for other modifications to the DRG classification system. We note that we made a complete FY 1992 MedPAR file with the current and revised (severity) DRG designations available to the public as part of the May 27, 1994 proposed rule (59 FR 27756).

10. Other Issues

a. Epilepsy (DRGs 24, 25, and 26). *Comment:* We received two comments concerning the classification in DRGs 24, 25, and 26 (Seizure and Headache) of patients with intractable epilepsy, specifically those admitted for neurodiagnostic monitoring. The commenters believe that a revision to the existing DRGs is necessary to account for the greater resource use and length of stay for these patients. The commenters stated that the financial risk is greatest in DRG 25, the DRG most commonly used by specialized centers to evaluate patients, and that these patients are typically under age 40.

The commenters referred to an analysis conducted by HCFA based on FY 1993 Medicare data that indicated that the charges for cases assigned to DRG 25 were twice as great per patient for intractable epilepsy patients with monitoring than for all other patients in that DRG. This analysis was discussed in the September 1, 1994, final rule (59 FR 45343). Based on these results, the commenters argue that a change in the DRG classification system for FY 1996 is imperative, using the following criteria to classify patients into a separate DRG:

- A diagnosis of intractable epilepsy (diagnosis codes 345.0 through 345.9, with a 5th digit of 1); and
- Procedure code 89.19 for video and radio-telemetered monitoring.

In addition, one commenter noted that the relatively low volume of cases of intractable epilepsy with telemetered monitoring (fewer than 500) is not a valid objection to establishing a separate DRG for these cases because there are currently over 70 DRGs with 500 or fewer cases.

Response: The epilepsy treatment community has for some time expressed concern that the resources used to treat intractable epilepsy patients far exceeded those needed for other patients in the same DRGs, and that Medicare payment is inadequate to meet these costs. We have addressed the issue of Medicare payment for intractable epilepsy cases for the past 4 years. As a result of our previous analyses, we concluded that although intractable epilepsy patients incur higher average charges than other patients in the same DRGs, there is neither sufficient differential in the charges nor sufficient volume to warrant a DRG change.

We updated our most recent study and evaluated the March 1995 update of the FY 1994 MedPAR file. We identified 2,385 intractable epilepsy cases with an average charge of $9,084, compared to an average charge of $7,636 for all patients in the same DRGs (that is, DRGs 24, 25, and, 26).

We note that, although the incidence of inpatient admissions for all cases of epilepsy decreased nearly 30 percent in FY 1993, in FY 1994 intractable epilepsy inpatient admissions increased by a little over 4 percent, with nonintractable epilepsy admissions continuing to decrease (down 21 percent). The largest increase in admissions occurred in DRG 25, up more than 16 percent. Nonintractable epilepsy cases incurred an average charge of $7,458, for 10,536 cases.

The following table summarizes our most recent epilepsy analysis findings, comparing the average charges between epilepsy and other cases assigned to the same DRG (the number of cases is included in parentheses):

DRG	Intractable epilepsy	Nonintractable epilepsy	All epilepsy	All cases
24	$11,083 (1,065)	$8,626 (7,342)	$8,937 (8,407)	$8,649 (58,726)
25	7,471 (1,320)	4,762 (3,190)	5,555 (4,510)	4,946 (22,121)
26	0 (0)	$13,060 (4)	$13,060 (4)	7,834 (43)
All cases	9,084 (2,385)	7,458 (10,536)	7,758 (12,921)	7,636 (80,890)

Based on the recommendation of the commenters, we focused our analysis on DRG 25, with and without video-telemetered monitoring (procedure code 89.19). Our results parallel the expectations of the commenters. That is, patients with intractable epilepsy who receive monitoring incur charges significantly higher than both intractable cases without monitoring and nonintractable cases with monitoring. Also, this differential is greatest in DRG 25, with an average charge of $11,088 for intractable patients with monitoring compared to $5,397 for intractable patients not receiving monitoring. We note that the number of intractable epilepsy inpatient admissions has increased over last year; the number of cases with monitoring has increased almost 34 percent in DRG 25. Thus, it would appear that access to care is not being jeopardized, particularly in this area over which commenters expressed the greatest concern. It is notable, also, that the charges for treating intractable epilepsy patients with monitoring increased 9 percent, while the cost of treating these patients without monitoring decreased 2 percent. The results of our analysis of DRG 25 are summarized in the following table:

DRG	Intractable epilepsy	Nonintractable epilepsy
24 with 89.19	$14,299 (107)	$9,826 (35)
24 without 89.19	10,724 (958)	8,620 (7,307)
25 with 89.19	11,088 (481)	7,454 (88)
25 without 89.19	5,397 (839)	4,685 (3,102)
26 with 89.19	0 (0)	0 (0)
26 without 89.19	0 (0)	13,060 (4)

As we did last year, we evaluated the experience of intractable epilepsy patients under age 65 in DRG 25. These patients qualify for Medicare benefits on the basis of disability rather than age. We focused our analysis on DRG 25 because patients admitted for neurodiagnostic monitoring must be relatively healthy and, thus, do not usually have any complicating conditions. Again, we found that those patients under 65 years of age with intractable epilepsy and telemetered monitoring (454 cases) incurred higher average charges ($11,330) than similar patients (27 cases) over 65 ($7,030).

The results of our analysis of DRG 25 by age category are as follows:

DRG 25	Age <65	Age ≥65	All ages
All Epilepsy	$6,002 (2,659)	$4,911 (1,851)	$5,555 (4,510)
All Intractable	7,757 (1,161)	5,383 (159)	7,470 (1,320)
Intractable with 89.19	11,330 (454)	7,030 (27)	11,088 (481)
Intractable without 89.19	5,464 (707)	5,046 (132)	5,397 (839)
All Nonintractable	4,643 (1,498)	4,867 (1,692)	4,762 (3,190)
Nonintractable with 89.19	7,679 (78)	5,699 (10)	7,454 (88)
Nonintractable without 89.19	4,476 (1,420)	4,862 (1,682)	4,685 (3,102)

We also reviewed the intractable cases where sphenoidal electrodes were inserted and identified 62 cases, with an average charge of $12,220. It is interesting to note that while there was more than a 14 percent increase in the incidence of these cases, the average charge actually decreased. These patients continue to incur higher charges than those with video-telemetered monitoring.

We note that, as a group, the intractable epilepsy cases are not the most resource intensive set of cases assigned to DRGs 24, 25, and 26. The highest volume of epilepsy cases are coded 345.3 (Epilepsy, Grand Mal status), with 5,608 cases and an average charge of $12,054. Of the epilepsy diagnoses, the average charge for grand mal epilepsy is exceeded only by intractable epilepsy partialis continua (diagnosis code 345.71) with an average charge of $13,095, but only 94 cases.

In response to the commenters' contention that epilepsy centers are at financial risk, we also evaluated the distribution of epilepsy cases across hospitals. There were 740 hospitals treating intractable epilepsy patients: approximately 55 percent treated only one patient; an additional 20 percent treated 2 patients; and 7 percent treated 3 patients. Of the providers treating 10 or more cases of intractable epilepsy (7 percent or 52 hospitals), 34 treated more than 20 intractable cases (approximately 5 percent of the total providers). Recognized epilepsy specialty centers accounted for about 3 percent of total intractable admissions (24 epilepsy center providers). As in our prior analyses, we found that among the high volume hospitals, charges for these cases were normally distributed, with only 21 percent incurring charges greater than the average charge for intractable epilepsy cases with telemetered monitoring, and 33 percent above the average for all epilepsy cases. Accounting for those cases that fall within the average range, 69 percent of the providers incurred average charges below the overall average for intractable cases with monitoring, and 61 percent incurred charges below the average for all epilepsy cases.

Of the 30 recognized epilepsy treatment centers, only 24 reported any intractable epilepsy discharges in FY 1994. Approximately 71 percent (17 of 24 centers) treated 10 or more cases. However, of the total 2,385 intractable epilepsy cases, only 20 percent (477 cases) were treated at epilepsy centers. There were 16 centers (67 percent) with average charges at or below the average charge of $9,084 for all intractable epilepsy cases; only 8 centers incurred average charges above the intractable average charge for treating intractable epilepsy cases.

As we have stated in previous final rules, we acknowledge that, even though the volume of hospitals is small, many hospitals treating high numbers of intractable epilepsy patients may incur charges above the average. This is particularly true for the specialized treatment centers. However, we note that these hospitals are, for the most part, large urban or teaching hospitals or both and, as such, receive some of the highest Medicare payment rates.

We are not recommending any DRG modification for epilepsy cases at this time. Although the intractable epilepsy cases, especially those using procedure 89.19, result in higher charges than other cases in the same DRGs, neither the volume nor the differential in average charges is sufficient to justify a separate DRG for these patients.

Concerning the comment that there are over 70 DRGs with fewer than 500 cases, we note that the vast majority of these lower volume DRGs (59 out of 89 for FY 1994) are for patients age 0 to 17 years, or are located in MDC 14 (Pregnancy, Childbirth, and Puerperium) or MDC 15 (Newborns and Other Neonates with Conditions Originating in the Perinatal Period). None of these is reflective of the Medicare population, who are primarily

---

age 65 or older. Many of the remaining lower volume DRGs are for cases that are generally no longer performed in the hospital inpatient setting. That is, they are assigned to surgical procedures that have moved from being generally performed in the inpatient setting to being performed in an outpatient setting. A few remaining DRGs were established during the initial classification of cases and were determined to have no other clinically appropriate DRG assignment (for example, DRG 43 (Hyphema)). This is not true for epilepsy cases, which are clinically similar to other cases in the DRGs to which they are currently assigned.

Comment: One commenter expressed concern that, in order to ensure access to care, DRG revisions must occur to account for the higher charges incurred by intractable epilepsy patients receiving neurodiagnostic monitoring.

Response: We believe that the increase in the number of intractable epilepsy cases overall (up 4 percent) and the 27 percent increase in intractable epilepsy admissions for video-telemetered monitoring are evidence that access to care is adequate for these patients. Also, a hospital may not refuse to provide a covered service to a Medicare beneficiary if it provides that service to other patients. Specifically, the Medicare regulations at 42 CFR 489.53(a)(2) provide that HCFA may terminate a hospital's Medicare provider agreement if it finds that the hospital places restrictions on the persons it accepts for treatment and fails to apply them to Medicare beneficiaries the same as to all other persons seeking care.

Comment: One commenter noted that many other payers utilize Medicare's DRG classification system, causing an even greater financial loss attributable to treating intractable epilepsy patients because of an arguably inadequate DRG payment.

Response: We have regularly cautioned against the use of the DRG classification system for populations other than the one for which it was designed. Medicare serves a predominantly elderly population, and, thus, the assignment of cases reflects the unique needs and conditions of this age group. To attempt to classify other populations within this structure may result in inappropriate designation of cases. We do not believe that we should develop a system that reflects the experience of another patient group and expect to apply such categorizations to the elderly population. Nor can we assume responsibility for other payers who may attempt to use the Medicare classification system for populations for which it was not intended.

b. Cochlear Implants (DRG 49).

Comment: We received one comment regarding cochlear implants. The commenter expressed concern that the proposed weight for DRG 49 (Major Head and Neck Procedures) is insufficient to compensate hospitals for the cost of providing the cochlear implant to Medicare patients. The commenter is concerned that this will exacerbate a growing access problem for those who need the device. The commenter stated that several hospitals each year have determined that the loss suffered in providing the cochlear implant to the Medicare population makes an ongoing cochlear implant program unsustainable. The commenter quotes utilization figures for the past 4 years, indicating a steady decline in Medicare patient volume.

Because the cochlear implant is a technology-intensive rather than a labor-intensive procedure, the commenter believes that the current system, designed to encourage hospitals to control their costs, suppresses the diffusion of the cochlear implant among the Medicare population. In the absence of a payment policy that the commenter believes will adequately reimburse technology intensive procedures, they requested the following:

- Cochlear implant procedures be placed in DRG 1 (Craniotomy Age >17 except for Trauma).
- HCFA allow separate payment of the speech processor which is not provided during the hospital stay.
- A separate, temporary DRG be created, with a weight of at least 3.0, until such time that a more acceptable policy for technology-intensive DRG's is implemented.

Response: Cochlear implants were first covered by Medicare in 1986 and were assigned to DRG 49 (Major Head & Neck Procedures), the highest weighted surgical DRG in MDC 3 (Diseases and Disorders of the Ear, Nose, Mouth and Throat). Since that time, the cochlear industry has contended that the weight of DRG 49 is too low and does not adequately reflect the resources necessary for the cochlear implant procedure. In response to these concerns, we have analyzed Medicare data every year since 1986.

Our latest analysis, using FY 1994 Medicare claims data, identified a total of 76 cochlear implant cases. Of these cases, 67 were assigned to DRG 49 (9 cases were assigned to DRG 468, Extensive OR Procedure Unrelated to Principal Diagnosis), representing 3.3 percent of all cases in DRG 49. These 67 cases incurred an average charge of $21,793, compared to an average charge of $15,938 for all cases in DRG 49. The average charge for cochlear implant cases is down slightly from FY 1993 claims ($22,386) while the average charge for all cases in DRG 49 shows a small increase (up from $15,679). This increase is most likely a function of the reclassification, effective October 1, 1993, of the low charge procedure, partial glossectomy, from DRG 49 to DRGs 168 and 169 (Mouth Procedures).

Although there is a higher charge for the 67 cochlear cases than for many of the other cases in DRG 49, we note that the cochlear cases are distributed across 44 hospitals, with no more than 6 cases at any one hospital. The majority of hospitals (30 of 44 hospitals, or 68 percent) have only one case.

We have repeatedly addressed the recommendation that we assign cochlear implants to DRG 1, most recently in the September 1994 prospective payment final rule (59 FR 45342). Our rejection of this suggestion continues to be based on our conclusion that the diagnosis code associated with cochlear cases (diagnosis code 389, hearing loss) is not clinically coherent with the diagnosis codes assigned to MDC 1. A basic premise of DRG classification is the assignment of clinically similar discharges within categories based on a common body system or organ system. To reassign cochlear implant cases to MDC 1, we would have to move the principal diagnosis code 389 from MDC 3, the clinically appropriate MDC.

The commenter requested that HCFA allow separate payment of the speech processor, which is typically provided to the patient 4 to 6 weeks after the surgery, thus "unbundling" these costs from other inpatient supplies and services to be billed by the surgeon or audiologist to Medicare Part B. Prior to implementation of the prospective payment system, it was a practice for certain nonphysician services and supplies furnished to hospital inpatients to be billed directly to patients under Medicare Part B. However, with the enactment of Public Law 98–21 and the implementation of the prospective payment system, several statutory changes concerning the bundling policy were made. Specifically, section 1862(a)(14) of the Act provides that, to qualify for Medicare payment, all nonphysician services (with limited exceptions) furnished to hospital inpatients must be provided directly or arranged for by the hospital. Thus, these services become inpatient hospital services payable under Medicare Part A. Section 1833(d) of the Act, in turn, provides that services payable under

Part A may not be paid for under Part B. Therefore, all the services provided to a Medicare beneficiary as part of the inpatient hospital stay are covered under Part A and may not be billed under Part B. This includes the external components of the cochlear device that are implanted during an inpatient stay covered under Part A. Therefore, we do not allow separate Part B payment for part of the cochlear device.

In response to the recommendation submitted by the commenter to assign cochlear implant cases to a new DRG with a weight of at least 3.0, we believe the process for assigning cases as well as calculating DRG relative weights needs to be clarified. HCFA does not assign weights to DRGs arbitrarily, but, rather, calculates the weight for each DRG based on the resources necessary to treat patients assigned to that DRG relative to all other DRGs. A DRG weight cannot be adjusted or a new DRG created without affecting the weight of other DRGs. It would be inappropriate and inadvisable for us to create a new DRG with a specified weight assigned, as such action would impact the weight and, therefore, the payment, for other DRGs. The process by which DRG weights are recalibrated is described in detail below in section II.C of this preamble.

We acknowledge that the Medicare payment for cochlear implant patients has been an issue for several years. However, we find no justification for creating a special DRG for cochlear implants. We have consistently classified clinically similar patients in DRGs who use approximately the same amount of hospital resources. In addition, we prefer to maintain DRGs with enough cases to ensure a normal distribution and relative stability over time.

Although some technologies may not be flexible in their costs, and thus, not lend themselves readily to cost control techniques, there are other areas within the hospital's control that are responsive to cost containment. Thus, the incentive to the hospital is to treat a mix of patients and to manage its operations in such a way to offset lower payment-to-cost cases with those where the payment is in excess of cost.

We continue to believe that the low volume of these cases does not justify the establishment of a new DRG specific to cochlear implants. Nor do we generally create DRGs that are specific to a single technology, especially those available through a single source manufacturer.

In response to the commenter's concern that cochlear implants may not be available to Medicare beneficiaries in the future, as stated above in section II.B.10.a of this preamble, we note that a hospital may not refuse to provide a covered service to a Medicare beneficiary if it provides that service to other patients. Specifically, the Medicare regulations at § 489.53(a)(2) provide that HCFA may terminate a hospital's Medicare provider agreement if it finds that the hospital places restrictions on the number of Medicare beneficiaries it will accept for a particular treatment without placing the same restriction on the other populations it treats.

c. Bipolar Hip Replacement (DRG 209). We received a comment concerning the DRG assignment of certain cases in MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue).

Comment: The commenter believes that cases of bipolar hip replacement should be assigned to DRGs 210, 211, and 212 (Hip and Femur Procedures Except Major Joint) rather than to its current assignment, DRG 209 (Major Joint and Limb Reattachment Procedures of Lower Extremity). The commenter stated that procedure code 81.52 (partial hip replacement) is very similar to procedure code 79.35 (open reduction of fracture of the femur with internal fixation), which is already assigned to DRGs 210, 211, and 212. Further, the commenter believes that partial hip replacement patients are generally more frail individuals as compared to the population that elects total hip replacement surgery, and that they should, therefore, not be assigned to the same DRG.

Response: In recent years, we have conducted several analyses of the procedures assigned to the surgical DRGs in MDC 8. In the final rules dated September 4, 1990 (56 FR 43205) and September 1, 1993 (58 FR 46286), we addressed two of those analyses in detail. Although the specific issues that concern the commenter were not addressed, the result of our analyses was to retain the current DRGs 209, and 210, 211, and 212 classifications. We will, however, reexamine these assignments as part of our annual update and revision process for FY 1997.

d. Add-On Payment for Blood Clotting for Hemophiliacs. We received one comment regarding payment for blood clotting factors administered to hemophilia inpatients.

Comment: The commenter questioned why there was no reference in the proposed rules to the continuation of the add-on payment for blood clotting factors administered to Medicare hemophilia patients. The commenter believes that if this additional payment program is not continued, then some other mechanism should be developed to help alleviate the financial burden of treating these patients.

Response: We did not include a discussion of the payment for blood clotting factors provided to hemophilia inpatients in the proposed rule because the legislation that required this add-on payment expired effective with discharges beginning on or after October 1, 1994.

Section 6011 of the Omnibus Budget Reconciliation Act of 1989 (Public Law 101–239), as amended by section 13505 of the Omnibus Budget Reconciliation Act of 1993 (Public Law 103–66), provided that prospective payment hospitals receive an additional payment for blood clotting factors furnished to Medicare hospital inpatients who are hemophiliacs for discharges occurring on or after June 19, 1990, and before October 1, 1994.

We discussed the issue of payment for Medicare inpatients with hemophilia who require blood clotting factors in detail in the September 1, 1992 final rule in response to a ProPAC recommendation that the add-on payment was no longer necessary. Briefly, ProPAC found that, even though hemophiliacs were more costly to treat than the average case within a given DRG, there were insufficient data to indicate that these differences were due to the administration of the clotting factor. In addition, ProPAC found that not only was there a low volume of patients receiving the blood clotting factor, there were very few hospitals with a significant number of cases. Analyses performed by HCFA resulted in similar findings. Thus, we agreed with ProPAC's conclusion that this add-on payment for blood clotting factors is not necessary.

e. Stem Cell Transplant. Comment: We received one comment requesting that we classify procedure code 41.04 (autologous hematopoietic stem cell transplant) as an OR procedure. The code was effective beginning October 1, 1994, and was classified as a non-OR procedure at that time. The commenter believes that we should reconsider this policy based on the resource use associated with stem cell transplant. In addition, the commenter requested that the code be assigned to DRG 481 (Bone Marrow Transplant) along with the other codes in category 41.0 (bone marrow transplant).

Response: As discussed in the September 1, 1994, final rule in response to a similar comment, prior to the creation of procedure code 41.04 for stem cell transplants, this procedure was included in procedure code 99.73 (therapeutic erythrocytapheresis), a non-OR procedure (59 FR 45340). As we have noted several times, our practice is to assign a new code to the same category as its predecessor code. Because we could not separately identify the stem cell transplant cases from the other cases coded with 99.73 in order to reclassify them and their charges to another DRG, we were unable to predict the resources required for this code and unable to calculate the new weights of both the DRG in which this code was classified and the DRG to which it would be assigned. Therefore, we were prevented from redesignating code 41.04 as an OR procedure and assigning it to another DRG.

Although it was requested that this code be reassigned to DRG 481, we note that the procedure represented by this code is not a bone marrow transplant procedure. While it may consume hospital resources similar to those transplant procedures, we will be unable to verify that assumption until we can evaluate the newly coded stem cell transplant cases in the FY 1995 MedPAR file. That file will be available in calendar year 1996 and we will analyze the cases with procedure code 41.04 as a part of our DRG agenda for FY 1997.

C. Recalibration of DRG Weights

We proposed to use the same basic methodology for the FY 1996 recalibration as we did for FY 1995. (See the September 1, 1994, final rule (59 FR 45347).) That is, we proposed to recalibrate the weights based on charge data for Medicare discharges. However, we proposed to use the most current charge information available, the FY 1994 MedPAR file, rather than the FY 1993 MedPAR file. The MedPAR file includes fully-coded diagnostic and surgical procedure data for all Medicare inpatient hospital bills.

The proposed recalibrated DRG relative weights were constructed from FY 1994 MedPAR data, based on bills received by HCFA through December 1994, from all hospitals subject to the prospective payment system and short-term acute care hospitals in waiver States. The FY 1994 MedPAR file at that time included data for approximately 10.9 million Medicare discharges. The MedPAR file updated through June 1995 includes data from approximately 11 million discharges and is the file used to calculate the weights set forth in Table 5 of the addendum to this final rule.

Although we are using the same basic methodology for recalibration, we are making two revisions which are described below. The methodology used to calculate the DRG relative weights from the FY 1994 MEDPAR file is as follows:

- To the extent possible, all the claims were regrouped using the DRG classifications discussed above in section II.B of this preamble. As noted in section II.B.4, due to the unavailability of final GROUPER software, we must simulate some classification changes to approximate the placement of cases under the revised reclassification. However, there are some changes that cannot be modeled.
- Charges were standardized to remove the effects of differences in area wage levels, indirect medical education costs, disproportionate share payments, and, for hospitals in Alaska and Hawaii, the applicable cost-of-living adjustment.
- The average standardized charge per DRG was calculated by summing the standardized charges for all cases in the DRG and dividing that amount by the number of cases classified in the DRG.
- We then eliminated statistical outliers. In computing the FY 1995 weights, we eliminated all cases outside of 3.0 standard deviations from the mean of the log distribution of charges per case for each DRG. For the FY 1996 relative weights, we proposed to eliminate a case only if it met the current criterion and also was outside of 3.0 standard deviations from the mean log of distribution of charges per day. We believe that this refinement to the methodology reduces the risk of eliminating cases with unusually low or high total charges that are nevertheless accurately reported. For example, a case with extremely high charges and a corresponding extremely long length of stay would be less likely to be eliminated under the revised methodology.

We received no comment on this refinement and we have identified the statistical outliers in the final recalibration using this methodology.

- The average charge for each DRG was then recomputed (excluding the statistical outliers) and divided by the national average standardized charge per case to determine the relative weight. The second revision we proposed to make is in the treatment of transfer cases. In past recalibrations, we have counted transfer cases as full cases. This may distort the average standardized charges, particularly in DRGs with a high percentage of transfer cases, because the charges associated with a transfer case often do not reflect the resources necessary for a complete course of treatment. Therefore, in calculating the proposed FY 1996 relative weights, a transfer case was counted as a fraction of a case based on the ratio of its length of stay to the geometric mean length of stay of the cases assigned to the DRG. That is, a 5-day length of stay transfer case assigned to a DRG with a geometric mean length of stay of 10 days was counted as 0.5 of a total case.

We received one comment concerning this methodology, which supported our change. Therefore, we have included it in the final recalibration.

- We established the relative weight for heart and liver transplants (DRGs 103 and 480) in a manner consistent with the methodology for all other DRGs except that the transplant cases that were used to establish the weights were limited to those Medicare-approved heart and liver transplant centers that have cases in the FY 1994 MedPAR file. (Medicare coverage for heart and liver transplants is limited to those facilities that have received approval from HCFA as transplant centers.) Similarly, we limited the lung transplant cases we used to establish the weight for DRG 495 (Lung Transplant) to those hospitals that are established lung transplant centers. (As discussed in detail in the final notice with comment period of Medicare coverage of lung transplants published in the **Federal Register** on February 2, 1995 (60 FR 6543), payment for lung transplants is limited to Medicare-approved facilities, effective July 31, 1995.)
- Acquisition costs for kidney, heart, liver, and lung transplants continue to be paid on a reasonable cost basis. Unlike other excluded costs, the acquisition costs are concentrated in specific DRGs (DRG 302 (Kidney Transplant); DRG 103 (Heart Transplant); DRG 480 (Liver Transplant); and DRG 495 (Lung Transplant)). Because these costs are paid separately from the prospective payment rate, it is necessary to make an adjustment to prevent the relative weights for these DRGs from including the effect of the acquisition costs. Therefore, we subtracted the acquisition charges from the total charges on each transplant bill that showed acquisition charges before computing the average charge for the DRG and before eliminating statistical outliers.

When we recalibrated the DRG weights for previous years, we set a threshold of 10 cases as the minimum number of cases required to compute a reasonable weight. We proposed to use that same case threshold in recalibrating the DRG weights for FY 1996. Using the final FY 1994 MedPAR data set, there are 34 DRGs that contain fewer than 10 cases. As discussed in detail in section II.B.3 of this preamble, we computed the weight for the 34 low-volume DRGs using the non-Medicare cases from 19 States.

The weights developed according to the methodology described above, using the DRG classification changes, result in an average case weight that is different from the average case weight before recalibration. Therefore, the new weights are normalized by an adjustment factor, so that the average case weight after recalibration is equal to the average case weight before recalibration. This adjustment is intended to ensure that recalibration by itself neither increases nor decreases total payments under the prospective payment system.

Section 1886(d)(4)(C)(iii) of the Act requires that, beginning with FY 1991, reclassification and recalibration changes be made in a manner that assures that the aggregate payments are neither greater than nor less than the aggregate payments that would have been made without the changes. Although normalization is intended to achieve this effect, equating the average case weight after recalibration to the average case weight before recalibration does not necessarily achieve budget neutrality with respect to aggregate payments to hospitals because payment to hospitals is affected by factors other than average case weight. Therefore, as we have done in past years and as discussed in section II.A.4.b of the Addendum to this final rule, we are making a budget neutrality adjustment to implement that the requirement of section 1886(d)(4)(C)(iii) of the Act.

III. Changes to the Hospital Wage Index

A. Background

Section 1886(d)(3)(E) of the Act requires that, as part of the methodology for determining prospective payments to hospitals, the Secretary must adjust the standardized amounts "for area differences in hospital wage levels by a factor (established by the Secretary) reflecting the relative hospital wage level in the geographic area of the hospital compared to the national average hospital wage level." In accordance with the broad discretion conferred by this provision, we currently define hospital labor market areas based on the definitions of Metropolitan Statistical Areas (MSAs) issued by the Office of Management and Budget (OMB). In addition, as discussed below, we adjust the wage index to take into account the geographic reclassification of hospitals in accordance with sections 1886(d)(8)(B) and 1886(d)(10) of the Act.

Section 1886(d)(3)(E) of the Act also requires that the wage index be updated annually beginning October 1, 1993. This section further provides that the Secretary base the update on a survey of wages and wage-related costs of short-term, acute care hospitals. The survey should measure, to the extent feasible, the earnings and paid hours of employment by occupational category and must exclude data with respect to the wages and wage-related costs incurred in furnishing skilled nursing services.

For determining prospective payments to hospitals in FY 1996, the wage index is based on the data collected from the Medicare cost reports submitted by short-term, acute care hospitals for cost reporting periods beginning in FY 1992 (that is, cost reporting periods beginning on or after October 1, 1991 and before October 1, 1992). The FY 1996 wage index includes wages and salaries paid by a hospital, home office salaries, fringe benefits, and certain contract labor costs. The current computation for the wage index excludes salaries and wages associated with nonhospital-type services, such as skilled nursing facility services, home health agency services, or other subprovider components that are not subject to the prospective payment system.

As discussed in detail below, we proposed to use updated wage data to construct the wage index as required by section 1886(d)(3)(E) of the Act. Set forth below is a discussion of that update as well as a discussion of other wage index issues. In addition, we proposed to change certain guidelines for hospital reclassification used by the Medicare Geographic Classification Review Board (MGCRB). That change is discussed in section III.E of this preamble.

B. FY 1996 Wage Index Update

We proposed to base the FY 1996 wage index, effective for hospital discharges occurring on or after October 1, 1995 and before October 1, 1996, on the data collected from the Medicare cost report (Worksheet S–3, Part II) submitted by hospitals for cost reporting periods beginning in FY 1992.

We proposed to use all of the categories of data collected from Worksheet S–3, Part II. Therefore, the FY 1996 wage index reflects the following:

- Total short-term, acute care hospital salaries and hours.
- Home office costs and hours.
- Fringe benefits associated with hospital and home office salaries.
- Direct patient care related contract labor costs and hours.
- The exclusion of salaries and hours for nonhospital services such as skilled nursing facility services, home health services, or other subprovider components that are not subject to the prospective payment system.

Although we did not propose any changes in the reporting of hospital wage index data, we received some comments on this issue.

Comment: One commenter noted that, in early 1995, HCFA distributed special audit instructions to the fiscal intermediaries that defined "direct patient care" as "hands on care." The commenter believes that the "hands on" definition will create problems because it may be subject to various interpretations. Also, the commenter objects to a recent HCFA statement that "travel time" in connection with contract labor is excluded in costs and hours if the information is specifically identified, but otherwise is included. Again, the commenter believes there will be inconsistencies when travel time cannot be identified. Rather than continually refining the definition of direct patient care, the commenter suggested that we adopt a different approach, such as "chargeable services" or "services provided in revenue producing cost centers." In addition, the commenter recommends that HCFA consult with industry representatives before any special data requests or audit instructions are issued that involve large numbers of hospitals.

Response: Before FY 1994, the wage index did not include any costs associated with contract services because the data collected on contract services as part of the 1988 wage survey were unreliable. (See the September 1, 1993 final rule, 58 FR 46295.) However, many hospitals indicated that they were inappropriately disadvantaged because they were forced to contract out for nurses and technicians due to shortages of these services in their areas. To alleviate this problem, we revised the cost report effective for FY 1990 to collect the data associated with any direct patient care service contracts such as service contracts for nurses, therapists, and diagnostic imaging technicians. We specifically excluded any Part B services, Part A physician services, management contracts, or any contract for services not directly involved with patient care.

The contract labor definition is limited to those services directly related to hands-on patient care. This definition was adopted to address the main concern expressed by hospitals with respect to the inclusion of contract labor in the wage index, that is, that many hospitals have problems hiring nurses in areas experiencing nursing shortages and must rely on contract labor sources. We believe that defining direct patient care as "chargeable services" or "services provided in revenue producing cost centers" would result in confusion on the part of hospitals attempting to exclude nonlabor-related expenses such as payments for equipment and supplies and nonpatient care contract services such as management and housekeeping services.

Regarding the exclusion of travel time in connection with contract labor, we believe that it is appropriate to exclude from the wage data those nonlabor costs associated with contract services that are billed separately. Contract labor typically involves negotiating a dollar amount for labor to be provided. This negotiated amount may include other costs involved in providing the labor, such as travel costs for lodging, mileage, and time. However, if these nonlabor costs are billed separately from the negotiated contract, they are not to be included in the contract labor wage data.

We believe that our definition of direct patient care is accurate and clear. Special audit instructions were issued earlier this year because we were receiving many inquiries regarding contract labor for services such as pharmacy and clinical laboratory. In the instructions, which were issued in February 1995, we provided all fiscal intermediaries with written guidelines concerning our policy to exclude payments and hours not attributable to direct patient care-related contract services, which would include pharmacy and clinical laboratory services.

We believe it is appropriate to issue clarifying instructions to our fiscal intermediaries on policies without industry input, but we agree with the commenter that we should consult with industry representatives before making changes in the types of costs that are included in the wage index. In fact, virtually all our recent proposals were made in response to requests from hospital and industry representatives. In addition, we have conducted special surveys and task forces to address these issues. One example of our efforts to involve industry representatives before making a change in policy is the summer 1993 survey concerning which costs should be recognized as fringe benefit costs. (See the September 1, 1994 final rule (59 FR 45356).)

Comment: The national representative of a group of fiscal intermediaries requested that the February 1995 special instruction be distributed to all fiscal intermediaries.

Response: The February 1995 instruction on direct patient care related contract services was distributed to all fiscal intermediaries. Therefore, there should be consistent application of this policy in future data collection.

Comment: One commenter noted that the wage index for seven out of eight MSAs in one State decreased between FY 1995 and the proposed FY 1996 values while other areas of the country experienced significant increases. The commenter suggested that HCFA review in detail those MSAs that experience significant increases in their wage index values from the prior year in order to maintain consistency and equity of the payment system.

Response: HCFA does review the percent change in the updated wage index from the prior year wage index, by MSA and by urban and rural hospital location. In addition, we review the wage data for any area that experiences a wage index change of 10 percent or more to determine the reason for the fluctuation. When necessary, we contact the appropriate fiscal intermediary to ensure the validity of the data or to obtain an explanation for the change. We note that none of the MSAs referred to by the commenter experienced a change of 10 percent or more. Therefore, they were not subject to any special review.

We also analyze the impact of the updated wage index on hospitals using categories such as census division, teaching status, and geographic reclassification status. This impact analysis is located in section VI.C of Appendix A to this final rule. We include this impact analysis in both the proposed and final rules.

1. Verification of Wage Data from the Medicare Cost Report

The data for the FY 1996 wage index were obtained from Worksheet S–3, Part II, of the HCFA–2552 form submitted and certified for accuracy by short-term, acute care hospitals for cost reporting periods beginning during FY 1992 (October 1, 1991 through September 30, 1992). The wage data are reported electronically to HCFA through the Hospital Cost Report Information System (HCRIS). As in past years, we initiated an intensive review of the wage data submitted by hospitals and performed numerous edits to ensure quality and accuracy. Medicare intermediaries were instructed to transmit any revisions in wage data made as a result of their review through HCRIS by early January 1995. In the proposed rule, we discussed in detail our review of the wage data as well as the process that hospitals could use to verify their wage data and to submit corrections if necessary (60 FR 29211).

The wage file used to construct the proposed wage index included data obtained in late January 1995 from the HCRIS data base and subsequent changes we received from intermediaries through March 21, 1995. To allow sufficient time to process changes, we instructed hospitals to submit requests for corrections to their intermediaries by May 15, 1995. To be reflected in the final wage index, wage data corrections had to be reviewed, verified, and transmitted to HCFA through HCRIS on or before June 15, 1995 (except for tabulation or data entry errors). All data elements that failed edits have been resolved and are reflected in this final rule.

Comment: One commenter stated that the fiscal intermediaries should not be given as much discretion to make determinations regarding which costs should be allowed as wage data for purposes of calculating the wage index. The commenter believes that HCFA should clearly define allowable items, and intermediaries should be required to use those definitions. It is the commenter's opinion that this action would greatly improve the comparability of wage data from one MSA to another.

Response: We promote consistency in the treatment of allowable wage costs to the extent possible. We have provided the intermediaries with the wage data cost report instructions and guidelines for allowable wage data in the desk review, but it is not possible to define every allowable wage data item. (See the September 1, 1993 final rule, 58 FR 46299.) We believe that the fiscal intermediaries are generally in the best position to make determinations regarding the appropriateness of a particular cost and whether it should be included in the wage index data. We note that, effective October 1, 1994, hospital cost reports were revised to further promote equitable and consistent treatment of wage-related costs (59 FR 45357, September 1, 1994).

Comment: One commenter is concerned that HCFA's edits are not adequate to ensure consistent treatment of the wage data by the fiscal intermediaries and to produce wage index values that reflect the true labor market situation. The commenter is also concerned about delays in making changes to improve the wage index.

Response: In response to concerns voiced in the past about inconsistent treatment of wage data, we have taken steps that we believe should eliminate most inconsistencies. Specifically, in November and December of each year, the fiscal intermediaries perform desk reviews on the wage data reported by each hospital. These reviews are conducted based on reasonableness parameters (edits) established by HCFA. HCFA also edits the wage data using additional edits, such as comparing each hospital's current year wage data to the prior year wage data, comparing each hospital's wage data to its MSA's data, and reviewing aggregate data such as all hospitals with average hourly wages below the second percentile for all hospitals nationally. The FY 1992 data that were used to calculate the FY 1996 wage index were subjected to a total of 55 edits. We have also instructed fiscal intermediaries to contact HCFA when questions arise. In addition, if a hospital disagrees with how a fiscal intermediary deals with a particular issue, the hospital is encouraged to bring it to our attention.

Regarding the fluctuations in the wage index by area, as discussed in a previous response, we analyze the impact of the updated wage index and review the data for any area that experienced a wage index value change of 10 percent or more to determine the reason for the fluctuation. When necessary, we contact the intermediary to determine the validity of the data or to obtain an explanation for the change.

Regarding changes to improve the wage index, we note that the cost report form for reporting wage data has been revised effective for FY 1995 (that is, for cost reporting periods that begin on or after October 1, 1994 and before October 1, 1995). Because this revised cost report form and instructions are more specific, we expect that the reporting of wage data and the review of that data will be more consistent across hospitals and fiscal intermediaries. However, because of the 4-year time lag between improved data reporting and the use of those data in the wage index, there is a necessary delay before the changes can affect the wage index.

2. Requests for Wage Data Corrections

In the proposed rule, we noted that we would make a diskette available in mid-August that would contain the finalized raw wage data used to construct the wage index values in this final rule. As with the diskette made available in March 1995, HCFA made the August diskette available to hospital associations and the public. The August diskette is available only for the limited purpose of identifying any potential errors made by HCFA or the intermediary in the entry of the final wage data that result from the process described above, not for the initiation of new wage data correction requests (60 FR 29212).

If, after reviewing the data in the August diskette or in this final rule, a hospital believes that its wage data are incorrect due to a fiscal intermediary or HCFA error in the entry or tabulation of the final wage data, it should send a letter to both its fiscal intermediary and HCFA. These letters should outline why the hospital believes an error exists. These requests must be *received by* the intermediary and HCFA no later than September 21, 1995 to allow inclusion in the wage index values effective October 1, 1995. Requests should be sent to: Office of Hospital Policy; Attention: Nancy Edwards, Director; Division of Prospective Payment System; Room C5–06–27; 7500 Security Boulevard; Baltimore, Maryland 21244–1850. The intermediary will review requests upon receipt, and, if it is determined that an intermediary or HCFA error exists, the fiscal intermediary will notify HCFA immediately.

As noted in the proposed rule, after mid-August, we will make changes to the hospital wage data only in those very limited situations involving an error by the intermediary or HCFA that the hospital could not have known about before its review of the August diskette. Specifically, neither the intermediary nor HCFA will accept the following types of requests in conjunction with this mid-August process: requests for wage data corrections that were submitted too late to be included in the data transmitted to the HCRIS system on or before June 15, 1995; requests for correction of errors made by the hospital that were not, but could have been, identified during the hospital's review of the March 1995 data; or requests to revisit factual determinations or policy interpretations made by the intermediary or HCFA during the wage data correction process. Verified corrections to the wage index made as a result of an intermediary or HCFA error received timely (that is, by September 21, 1995) will be effective October 1, 1995.

We believe the wage data correction process described above provides hospitals with sufficient opportunity to bring errors made by the hospital during the preparation of Worksheet S–3 to the intermediary's attention. Moreover, because hospitals had access to the raw wage data in mid-August, they will have had the opportunity to detect any data entry or tabulation errors made by the intermediary or HCFA before the implementation of the prospective payment rates on October 1. We believe that if hospitals avail themselves of these opportunities, the wage index implemented on October 1 should be free of such errors. Nevertheless, in the unlikely event that such errors should occur, we retain the right to make midyear changes to the wage index under very limited circumstances.

Specifically, in accordance with § 412.63(s)(2), we may make midyear corrections to the wage index only in those limited circumstances where a hospital can show: (1) that the intermediary or HCFA made an error in tabulating its data, and (2) that the hospital could not have known about the error, or did not have an opportunity to correct the error, before the beginning of FY 1996 (that is, by the September 21, 1995 deadline). As indicated earlier, since a hospital will have the opportunity to verify its data, and the intermediary will notify the hospital of any changes, we do not foresee any specific circumstances under which midyear corrections would be made. However, should a midyear correction be necessary, the wage index change for the affected area will be made prospectively from the date the correction is made. We received several comments concerning the collection and verification of the wage data.

Comment: One commenter is concerned that the definition of "HCFA or intermediary error" related to requests for wage data corrections has been modified to mean only those errors relating to the entry or tabulation of the wage data. The commenter also stated that it is not clear if this would remove inconsistent applications or interpretations of HCFA policy by the intermediary from the definition of an error. The commenter disagrees with excluding an inconsistent application of policy from the definition of errors.

Response: In the proposed rule, we stated that, after mid-August, we would make changes to the hospital wage data only in those very limited situations involving an error by the intermediary or HCFA that the hospital could not have known about before its review of the diskette we made available in August (60 FR 29212). We specified that after the May 15 deadline for submission of requests for corrections, hospitals would not be able to request that we reconsider factual determinations or policy interpretations made by the intermediary or HCFA. We believe that hospitals had sufficient opportunities to raise these types of issues, including review of the March 1995 data. Thus, after May 15, correctable errors to the wage data are limited to data entry or tabulation errors made by HCFA or the intermediary.

Comment: One commenter believes that any wage data and wage index changes made for one hospital after the final rule is published should not have a negative impact on other hospitals. While acknowledging budget neutrality limitations, the commenter stated that, last year, several MSAs were subject to wage index changes even though only one MSA had a hospital that made a mistake in reporting certain data.

Response: We do not believe it is appropriate to make a "partial correction," that is, correcting a hospital's wage data but not incorporating the effects of the correction into the wage index value for all hospitals in the MSA. We note that we make both types of corrections—those that decrease the wage index value of an MSA as well as those that result in an increase in the wage index value.

Comment: One commenter requested that we specify a date by which intermediaries must notify hospitals regarding determinations on wage data correction requests. The commenter believes the rules should be changed to specify a date prior to the June 15 deadline, in order to give hospitals the opportunity to appeal the intermediary decision to HCFA.

Response: In order to allow sufficient time to review and process the wage data so that the final wage index and prospective payment rates can be published by September 1, it is necessary that the intermediary transmit any wage data corrections to HCFA through HCRIS on or before June 15. The raw hospital wage data become available to the public in mid-March, and we allow hospitals 2 months to review their wage data and submit wage data corrections, including all documentation necessary to support the requested change. We then allow the intermediary 1 month in which to review, verify and submit revised data in response to these correction requests. We do not believe that it would be appropriate to shorten the time available to the intermediaries for these determinations.

In each of the past two years, a commenter has suggested that we establish a formal appeals process for disputes over corrections submitted by hospitals to intermediaries (58 FR 46301 and 59 FR 45351). We continue to believe that a formal appeals process is neither necessary nor feasible. We believe that maintaining the current timeframes gives hospitals more flexibility in their review. We encourage hospitals to submit their wage data correction requests to the fiscal intermediary as soon as possible in order to allow the intermediary sufficient time to review the request prior to June 15.

Comment: One commenter requested changes in the format of the wage data diskette that we make available to the industry. The commenter believes that HCFA should provide additional information on the wage data diskette, such as each hospital's MSA, redesignated MSAs, and inflation factors. This would allow purchasers of the diskette to group hospitals by MSA in order to make comparisons and to verify the published wage index.

Response: The purpose of the diskette that HCFA makes available is to allow each hospital to review its wage data in order to verify that it is correct before it is used in the calculation of the final wage index. We agree with the commenter that the hospital's MSA should be included in the diskette and we will revise the format accordingly. However, we are unable to add any other data elements to the diskette because of space limitations. That is, we would be forced to expand to two diskettes, requiring the purchase of both diskettes to obtain all wage data. We are, however, considering the possibility of providing all of the requested data elements electronically (that is, on-line). In the meantime, we note that there is a Payment Impact file available for both the proposed and final rules. This file contains the data used to estimate payments, and we suggest that members of the public who wish to make comparisons order this disk. See our June 2, 1995 proposed rule for ordering information (60 FR 29250).

3. Effect of Judicial Reversal of Wage Data Denial

It has been our longstanding policy to make midyear revisions to wage index data prospectively only (see, for example, 49 FR 258 (January 3, 1984); 54 FR 36478 (September 1, 1989)), and we continue to believe that, to the extent that midyear wage data revisions are appropriate, those revisions should be made prospectively only. Some hospitals whose requests for wage data revisions have been denied by HCFA have sought relief in the Federal courts. While no court has yet reversed an HCFA decision denying a hospital's wage data revision request, these cases have the potential to present the question of what effect we would give to such a final judicial decision.

Because we had not previously addressed this question in any rulemaking, we proposed to clarify our position regarding the temporal effect of a final judicial decision reversing an HCFA denial of a hospital's request for a wage data revision. We proposed to add a new § 412.63(s)(5) to clarify that such a decision has limited retroactive effect. If a final judicial decision reverses an HCFA denial of a hospital's wage data revision request, we proposed to treat the hospital as if HCFA's decision on the hospital's wage data revision request had been favorable rather than unfavorable. HCFA would pay the hospital by applying a revised wage index that reflects the revised wage data at issue. The revised wage data would not be considered for purposes of revisiting past adjudications of requests for geographic reclassification under section 1886(d)(10) of the Act. Under the statutory scheme established by Congress, decisions on applications for MGCRB reclassification must be finalized prior to the Federal fiscal year for which the reclassifications would take effect.

In some Federal fiscal years, wage data revision requests were initially reviewed by the fiscal intermediaries and forwarded to HCFA for a determination of whether a revision should be made. In other years, the fiscal intermediaries themselves have made determinations on wage data revision requests (with input from HCFA when necessary). The latter is our current policy. In the foregoing discussion, the phrases "HCFA denial of a hospital's wage data revision request" and "HCFA decision on the hospital's wage data revision request" mean the decision by either HCFA's Office of Hospital Policy or the intermediary denying a hospital's request for a wage data revision.

We considered proposing to apply a strict policy of prospectivity to final judicial decisions reversing HCFA denials of wage data revision requests—that is, adopting a policy to apply such judicial decisions prospectively from the date they are made. While we continue to believe that prospective-only changes are most appropriate under a prospective rate-setting system such as the hospital inpatient prospective payment system, we also recognize that hospitals have sought, and will continue to seek, judicial review of unfavorable HCFA decisions on hospitals' requests for wage data revisions. Applying a policy of strict prospectivity to final judicial decisions reversing HCFA denials of wage data revision requests might be viewed, in some cases, as frustrating the purpose of judicial review, since such a decision might not be made until after the close of the fiscal year or years at issue. Therefore, on balance, we believe the better policy is the one we proposed, under which we would give effect to a final judicial decision reversing a HCFA denial of a hospital's wage data revision request by applying a revised wage index that reflects the revised wage data as if HCFA's decision had been favorable rather than unfavorable.

No comments were received on this proposal. Therefore, we will implement the change as proposed effective beginning FY 1996, that is, October 1, 1995.

4. Computation of the Wage Index

As noted above, we are basing the FY 1996 wage index on wage data reported on the FY 1992 cost report. The final wage index is based on data from 5,269 hospitals paid under the prospective payment system and short-term, acute care hospitals in waiver States. The method used to compute the FY 1996 wage index is as follows:

Step 1—We gathered data from each of the non-Federal short-term, acute care hospitals for which data were reported on the Worksheet S–3, Part II of the Medicare cost report for the hospital's cost reporting periods beginning on or after October 1, 1991, and before October 1, 1992.

Each hospital was assigned to its appropriate urban or rural area prior to any reclassifications under section 1886(d)(8) or 1886(d)(10) of the Act. In addition, we included data from a few hospitals that had cost reporting periods beginning in September 1991 and had reported a cost reporting period exceeding 52 weeks. The data were included because no other data from these hospitals would be available for the cost reporting period described above, and particular labor market areas might be affected due to the omission of these hospitals. However, we generally describe these wage data as FY 1992 data.

Step 2—For each hospital, we subtracted the excluded salaries (that is, direct salaries attributable to skilled nursing facility services, home health services, and other subprovider components not subject to the prospective payment system) from gross hospital salaries to determine net hospital salaries. To the net hospital salaries, we added hospital contract labor costs, hospital fringe benefits, and any home office salaries and fringe benefits reported by the hospital to determine total salaries plus fringe benefits.

Step 3—For each hospital, we inflated or deflated, as appropriate, the total salaries plus fringe benefits resulting from Step 2 to a common period to determine total adjusted salaries. To make the wage inflation adjustment, we used the percentage change in average hourly earnings for each 30-day increment from October 15, 1991 through September 14, 1993, for hospital industry workers from Standard Industry Classification 806, Bureau of Labor Statistics Employment and Earnings Bulletin. The annual inflation rates used were 5.6 percent for FY 1991, 4.8 percent for FY 1992, and 3.6 percent for FY 1993. The inflation factors used to inflate the hospital's data were based on the midpoint of the cost reporting period as indicated below.

MIDPOINT OF COST REPORTING PERIOD

After	Before	Adjustment factor
10/14/91	11/15/91	1.059411
11/14/91	12/15/91	1.055280
12/14/91	01/15/92	1.051165
01/14/92	02/15/92	1.047066
02/14/92	03/15/92	1.042983
03/14/92	04/15/92	1.038916
04/14/92	05/15/92	1.034865
05/14/92	06/15/92	1.030830
06/14/92	07/15/92	1.026810
07/14/92	08/15/92	1.022806
08/14/92	09/15/92	1.018818
09/14/92	10/15/92	1.014845
10/14/92	11/15/92	1.011859
11/14/92	12/15/92	1.008881
12/14/92	01/15/93	1.005912
01/14/93	02/15/93	1.002952
02/14/93	03/15/93	1.000000
03/14/93	04/15/93	0.997057
04/14/93	05/15/93	0.994123
05/14/93	06/15/93	0.991197
06/14/93	07/15/93	0.988280
07/14/93	08/15/93	0.985372
08/14/93	09/15/93	0.982472

For example, the midpoint of a cost reporting period beginning January 1, 1992 and ending December 31, 1992 is June 30, 1992. An inflation adjustment factor of 1.026810 would be applied to the wages of a hospital with such a cost reporting period. In addition, for the data for any cost reporting period that began in FY 1992 and covers a period of less than 360 days or greater than 370 days, we annualized the data to reflect a 1-year cost report. Annualization is accomplished by dividing the data by the number of days in the cost report and then multiplying the results by 365.

Step 4—For each hospital, we subtracted the reported excluded hours from the gross hospital hours to determine net hospital hours. We increased the net hours by the addition of any reported contract labor hours and home office hours to determine total hours.

Step 5—As part of our editing process, we deleted data for 37 hospitals for which we lacked sufficient documentation to verify data that failed edits because the hospitals are no longer participating in the Medicare program or are in bankruptcy status. We retained the data for other hospitals that are no longer participating in the Medicare program because these hospitals contributed to the relative wage levels in their labor market areas during their FY 1992 cost reporting period.

Step 6—Within each urban or rural labor market area, we added the total adjusted salaries plus fringe benefits obtained in Step 3 for all hospitals in that area to determine the total adjusted salaries plus fringe benefits for the labor market area.

Step 7—We divided the total adjusted salaries plus fringe benefits obtained in Step 6 by the sum of the total hours (from Step 4) for all hospitals in each labor market area to determine an average hourly wage for the area.

Step 8—We added the total adjusted salaries plus fringe benefits obtained in Step 3 for all hospitals in the nation and then divided the sum by the national sum of total hours from Step 4 to arrive at a national average hourly wage. Using the data as described above, the national average hourly wage is $18.9296.

Step 9—For each urban or rural labor market area, we calculated the hospital wage index value by dividing the area average hourly wage obtained in Step 7 by the national average hourly wage computed in Step 8.

Comment: One commenter noted that Flagstaff, Arizona, a new MSA, was not designated as an MSA for either wage index or hourly wage purposes in the proposed rule. The commenter requested that we reflect this change in the final rule.

Response: After publication of the proposed rule on June 2, Office of Management and Budget (OMB) Bulletin Number 95–04 established two new MSAs effective June 30, 1995: Flagstaff, Arizona-Utah MSA (comprising Coconino County, Arizona and Kane County, Utah) and Grand Junction, Colorado MSA (comprising Mesa County, Colorado). The bulletin also changed the name of the Hickory-Morganton, North Carolina MSA to Hickory-Morganton-Lenoir, North Carolina MSA. These new MSAs and the revised designation are incorporated in the final wage index (see Tables 4a and 4d).

Comment: One commenter requested that we establish a wage index floor for each of the labor market areas in Puerto Rico equal to the level of the wage index at the time Puerto Rico became subject to the prospective payment system (October 1, 1987). An alternative proposal made by the commenter was to

establish a wage index floor based on the current wage index for rural Mississippi. The commenter also suggested that, after making either of the two recommended wage index changes, we should adjust the Puerto Rico standardized amounts to reflect the higher wage index values leading to a decrease in the labor share percentage of the Puerto Rico standardized amounts.

Response: At this time, we do not believe it would be appropriate to set up a floor level for the wage index. The wage index measures relative hospital wage levels, so that labor market areas that experience slower wage growth than the national average wage growth (on a percentage basis) experience wage index decreases while those who experience faster growth receive wage index increases. Since the wages in Puerto Rico have increased at a significantly slower level than national wages, Puerto Rico's wage index values have decreased accordingly. The average hourly wage for rural Puerto Rico has increased 51.7 percent (from $5.40 to $8.19) from FY 1984 to FY 1992, while the national average hourly wage has increased 94.0 percent (from $9.76 to $18.93). Consequently, the wage index for rural Puerto Rico has decreased from 0.5536 in FY 1988, which is based on the FY 1984 data, to 0.4326 in FY 1996, which is based on the FY 1992 wage data.

While we are concerned about the fall in the wage index values in Puerto Rico, the implementation of a wage index floor would create new problems. For example, we also must consider that the introduction of a wage index floor would have to be executed in a budget neutral manner. Thus, any wage index floor would deprive hospitals with wage index values above the floor level of their appropriate payment level through lower standardized amounts. We will continue to study this issue in the hope of finding a solution that is equitable to hospitals in all areas. Since we do not believe a wage index floor is appropriate, we will not be making any changes to the labor share percentage for Puerto Rico standardized amounts.

Comment: One commenter suggested that we eliminate the Puerto Rico Rural Area classification and classify those hospitals to their nearest geographic area (that is, one of the urban Puerto Rico areas). The commenter's suggestion is based on the belief that there is no socioeconomic difference between the rural hospitals and any other hospital on the island.

Response: We do not believe it is appropriate to offer special treatment for any rural area. Unless and until we decide to adopt a new method for defining labor market areas, we will continue to use rural areas for hospitals in counties that are not designated as part of MSAs. We note that the Puerto Rico rural wage index value has increased since publication of the proposed rule based on corrections we have received. The final rural area wage index value is 0.4326, an increase of 11 percent over the proposed value of 0.3888, and only a slight decrease from the FY 1995 wage index value.

C. Allocation of General Service Salaries and Hours to Areas Excluded From the Wage Index

In constructing the wage index, we exclude the direct wages and hours associated with certain subprovider components of the hospital, such as skilled nursing facilities and home health agencies. The cost reporting form used to collect the FY 1992 wage data also includes within the definition of excluded areas any rehabilitation and psychiatric distinct part units of the hospital that are excluded from the prospective payment system. Thus, the wage index is constructed by including only the direct wages and hours associated with those areas of the hospital subject to the prospective payment systems. However, the general service hours associated with excluded areas are not currently excluded from the wage index calculation.

In the May 26, 1993 proposed rule, we discussed our analysis of our first attempt to allocate overhead salaries and hours to areas of the hospital that are excluded from the prospective payment system (58 FR 30237). This analysis was prompted by several suggestions from hospital representatives that, in addition to excluding the direct salaries and hours for subprovider components of the hospital, HCFA should also exclude the general service, or overhead, wages and hours that are associated with these areas. For example, we currently include all of the wage costs associated with housekeeping in the wage index data, even if a facility has excluded subprovider components that receive housekeeping services. As we discussed in detail in the May 26, 1993 proposed rule, we identified several problems with the data collected that led us to the conclusion that it would be inappropriate to use the data in allocating the overhead wages and hours. Thus, we did not allocate general service salaries and hours to the excluded areas of hospitals in calculating the FY 1994 wage index.

In the September 1, 1993 final rule, we indicated that we would revisit this issue when the data for cost reporting periods beginning in FY 1992 became available (58 FR 46298). We believed that the retroactive determination of overhead hours for the FY 1990 cost reports may have caused some of the problems with the data. We stated that the FY 1992 cost report might allow a more accurate allocation since both overhead salaries and overhead hours would be directly reported on the cost report.

In calculating the FY 1996 wage index, we used data for cost reporting periods beginning in FY 1992. We received general service hour data for 4,356 of the 4,441 hospitals that reported excluded salaries. We analyzed these data to determine whether we could reasonably allocate the overhead wages and hours to the excluded areas of the hospital. First, we determined the total general service wages (including fringe benefits) from Worksheet A of the cost report. We then developed a ratio of total indirect costs (net of capital costs) allocated to the excluded areas of the hospital to total noncapital general service costs (using Worksheet B, Parts I, II, and III from the cost report). We call this the "indirect cost ratio." We computed the general service salaries and hours allocated to the excluded areas by multiplying the indirect cost ratio by the total general service salaries and by the total general service hours reported by the hospital on the cost report.

For example, if 10 percent of a hospital's total indirect costs were allocated to excluded areas, we allocated 10 percent of its overhead salaries and 10 percent of its overhead hours to the excluded areas.

In the June 2, 1995 proposed rule (60 FR 29214), we discussed in detail our analysis of the general service allocation. We found that after we completed the data edits, 4,199 hospitals still had overhead allocations. Of these, 71 percent (2,978) had average hourly wages that were lower after the overhead allocation was made to the excluded areas. The average difference between the pre- and post-allocation average hourly wage was −0.14 percent. Eighty-six hospitals had a percentage change of more than 10 percent in their average hourly wage, of which 45 were decreases. An additional 158 hospitals had a percentage change of between 5 and 10 percent, of which 104 were decreases. Thirty-seven of 49 rural labor market areas would experience decreases in their wage index value if we performed the allocation, while 195 of 317 urban areas would experience decreases. The average wage index value for all hospitals would decrease

0.08 percentage points if we performed the overhead allocation.

Thus, we again concluded that it would not be appropriate to perform the allocation of overhead salaries and hours to excluded areas of the hospital in computing the wage index. The data still have the same variations that were prevalent when we declined to use this methodology in the proposed rule for FY 1994: many hospitals were removed due to the edits, many have large swings in their average hourly wages, and many more hospitals' average hourly wages would decrease as a result of the allocation than would increase, particularly for rural hospitals. As we noted in the September 1, 1993 final rule (58 FR 46297), if these allocations are accurate, it would mean that for the majority of hospitals with excluded areas, the average hourly wage for the overhead areas (such as laundry and housekeeping) is higher than that for patient care areas (such as nursing). We do not believe that this could be the case for such a large number of hospitals, and we have therefore concluded that the reported data regarding overhead hours are inaccurate. As a result, we decided not to employ the allocation of general service salaries and hours to excluded areas of the hospital in constructing the FY 1996 wage index.

We note that hospital representatives that support the allocation of overhead salaries to excluded areas do so because they believe that, for those hospitals with excluded areas, the current average hourly wage is artificially weighted downward. (See the September 1, 1994 final rule (59 FR 45359).) They believe that the current methodology, which removes the higher nursing costs in excluded areas from the hospital's direct salaries, but leaves in the lower general services salaries, distorts wages downward. The reported data, however, are not consistent with this concern.

While we continue to believe that an allocation of overhead salaries and hours to the excluded subprovider components may be appropriate, it would not benefit the hospital industry or the Medicare program to implement an allocation that is not reliable. Clearly, the overhead hours reported by many hospitals did not accurately reflect the salaries reported. In addition, we realize that the allocation method described above may not necessarily be the most accurate method to make this allocation. We invited public comment concerning alternative methods that might produce a more accurate and uniform allocation method and at the same time impose little or no additional reporting burden on the hospital industry. We noted that, under any acceptable allocation method, we would require that the method be used by all hospitals with excluded areas and that the intermediary be able to verify the accuracy of the reported data.

The cost report effective for FY 1995 (that is, for cost reporting periods that begin on or after October 1, 1994 and before October 1, 1995) will collect overhead data, both paid hours and the related salaries, by general service area. These data will be used to construct the wage index for FY 1999. We proposed to reevaluate an allocation of overhead salaries and hours to excluded areas of the hospital once the data from this new cost report are available or possibly earlier if we receive comments or suggestions from the public or otherwise determine alternative methods to better allocate overhead salaries.

Comment: Three commenters expressed support for the exclusion of overhead salaries and hours associated with excluded areas of the hospital and made suggestions regarding allocation methods. One commenter stated that HCFA's allocation method had merits in terms of modeling the impact and collectability of the data and requested that we continue to apply the same methodology in future studies. Another commenter suggested that HCFA incorporate in this final rule the collection of data on overhead dollars and hours separately and the exclusion of overhead salaries and hours associated with excluded subprovider components. A third commenter suggested a stepped-down cost finding basis for the allocation of salaries and hours from general service areas. This commenter believes that the data necessary to perform the step-down would be readily available to the intermediary and recommended that HCFA add cost center hours to Worksheet B–1 of the HCFA 2552–89 to facilitate data collection.

Response: As discussed above, while we agree with the commenters that an allocation of overhead salaries and hours to the excluded subprovider components may be appropriate, we believe that it would not benefit the hospital industry or the Medicare program to implement at this time an allocation that is not reliable.

Both the commenters who suggested a change in methodology based that change on the collection of new data. We do not agree with one commenter's suggestion to employ an allocation method based on stepped-down cost finding as it would impose additional reporting burden on the hospital industry. The approach would require a new or revised cost reporting form to allocate overhead hours and salaries to all of a hospital's cost centers. In addition, hospitals would have to adopt uniform statistics for allocating costs to cost centers to ensure data comparability. As we noted above, any method we use should impose little or no additional reporting burden. At this time, we do not believe the merits of an allocation of general service salaries and hours to excluded areas warrant the additional reporting burden. We have implemented new cost reporting instructions concerning overhead data. We will wait to evaluate those data (which will be available for the FY 1999 wage index) before imposing any additional data collections.

D. Revisions to the Wage Index Based on Hospital Redesignation

Under section 1886(d)(8)(B) of the Act, hospitals in certain rural counties adjacent to one or more Metropolitan Statistical Areas (MSAs) are considered to be located in one of the adjacent MSAs if certain standards are met. Under section 1886(d)(10) of the Act, the Medicare Geographic Classification Review Board (MGCRB) considers applications by hospitals for geographic reclassification for purposes of payment under the prospective payment system.

The methodology for determining the wage index values for redesignated hospitals is applied jointly to the hospitals located in those rural counties that were deemed urban under section 1886(d)(8)(B) of the Act and those hospitals that were reclassified as a result of the MGCRB decisions under section 1886(d)(10) of the Act. Section 1886(d)(8)(C) of the Act provides that the application of the wage index to redesignated hospitals is dependent on the hypothetical impact that the wage data from these hospitals would have on the wage index value for the area to which they have been redesignated. Therefore, pursuant to section 1886(d)(8)(C) of the Act, the wage index values were determined by considering the following:

- If including the wage data for the redesignated hospitals reduces the MSA wage index value for the area to which the hospitals are redesignated by 1 percentage point or less, the MSA wage index value determined exclusive of the wage data for the redesignated hospitals applies to the redesignated hospitals.
- If including the wage data for the redesignated hospitals reduces the wage index value for the area to which the hospitals are redesignated by more than 1 percentage point, the hospitals that are redesignated are subject to the wage index value of the area that results from including the wage data of the redesignated hospitals (the "combined" wage index value). However, the wage index value for the redesignated hospitals cannot be reduced below the wage index value for the rural areas of the State in which the hospitals are located.

- Rural areas whose wage index values would be reduced by excluding the data for hospitals that have been redesignated to another area continue to have their wage index calculated as if no redesignation had occurred. Those rural areas whose wage index value increases as a result of excluding the wage data for the hospitals that have been redesignated to another area have their wage index calculated exclusive of the redesignated hospitals.
- The wage index value for an urban area is calculated exclusive of the wage data for hospitals that have been reclassified to another area. However, geographic reclassification may not reduce the wage index for an urban area below the Statewide rural average, provided the wage index prior to reclassification was greater than the Statewide rural wage index value.
- A change in classification of hospitals from one area to another may not result in the reduction in the wage index for any urban area whose wage index is below the rural wage index for the State. This provision also applies to any urban area that encompasses an entire State.

We note that, except for those rural areas where redesignation would otherwise reduce the rural wage index value, and for urban areas whose wage index values are already below the rural wage index and would otherwise be reduced by redesignations, the wage index value for each area is computed exclusive of the data for hospitals that have been redesignated from the area for purposes of their wage index. As a result, several MSAs listed in Table 4a have no hospitals remaining in the MSA. This is because all the hospitals originally in these MSAs have been reclassified to another area by the MGCRB. For those areas, we have listed the Statewide rural wage index value.

Comment: We received one comment on our policy of assigning the Statewide rural wage index value to MSAs where all of the hospitals have been reclassified to another area. The commenter believes that our policy is unfair to new hospitals that open in such an MSA, because they would be automatically assigned the Statewide rural wage index value, which is generally much lower than the pre-reclassified value for the MSA. The commenter stated that the Statewide rural wage index value would not reflect the labor costs in the labor market in which the hospital would be operating. Therefore, the commenter requested that we revise this policy and assign the MSA's pre-reclassified wage index value to the empty MSA.

Response: We adopted our current policy in response to comments as part of the August 30, 1991 final rule (56 FR 43222). Upon reconsideration, we agree with the commenter that the wage levels a new hospital must pay may be better reflected by the pre-reclassified wage index value for the area than the Statewide rural wage index value. Therefore, effective October 1, 1995, we will assign the pre-reclassified wage index value for an MSA to any MSA where all of the hospitals have been reclassified to another area. That value would apply as long as the MSA remains empty or until the new hospital has reported wage data that are used to calculate a wage index value (approximately 4 years). This change has been incorporated into the final wage index tables.

The final revised wage index values for FY 1996 are shown in Tables 4a, 4b, and 4c of the addendum to this final rule. Hospitals that are redesignated should use the wage index values shown in Table 4c. For some areas, more than one wage index value will be shown in Table 4c. This occurs when hospitals from more than one State are included in the group of redesignated hospitals, and one State has a higher Statewide rural wage index value than the wage index value otherwise applicable to the redesignated hospitals. Tables 4d and 4e list the average hourly wage for each labor market area based on the FY 1992 wage data. In addition, Table 3c (Hospital Case-Mix Indexes for Discharges) includes the average hourly wage for each hospital based on the FY 1992 data. Hospitals may use the average hourly wage published in this final rule for purposes of applying to the MGCRB for wage index reclassifications in FY 1997.

We note that in adjudicating these wage reclassification requests during FY 1996, the MGCRB will use the average hourly wages for each hospital and labor market area that are reflected in the final FY 1996 wage index. The FY 1996 wage index values incorporate all hospital redesignations for FY 1996. At the time the final wage index was constructed, the MGCRB had completed its review. Any changes to the wage index that resulted from withdrawals of requests for reclassification, wage index corrections, appeals, and the Administrator's review process are incorporated into the wage index values published in the final rule. For FY 1996, 420 hospitals are redesignated for purposes of the wage index (including hospitals redesignated u[illegible]er both sections 1886[illegible](8)[illegible] 1886(d)(10) of the Act).

E. Changes to t[illegible] B Guidelines

1. Limitations on Hospital Reclassification (§§ 412.230, 412.232, and 412.234)

a. Elimination of Individual Hospital Reclassification From Rural to Other Urban Areas for Purposes of the Standardized Amount. Section 1886(d)(10)(C)(i)(I) of the Act requires the MGCRB to consider applications of hospitals requesting reclassification for purposes of the standardized amount. Section 1886(d)(10)(D)(i)(II) of the Act requires that the MGCRB utilize guidelines published by the Secretary for determining whether the county in which a particular hospital is located should be treated as being a part of a particular MSA. Accordingly, the MGCRB allows reclassifications for purposes of the standardized amount for individual hospitals that meet the guidelines under § 412.230, and for groups of rural and urban hospitals that represent an entire county and that meet the guidelines under §§ 412.232 and 412.234 respectively.

As required by section 1886(d)(3)(A)(iii) of the Act, effective for discharges occurring on or after October 1, 1994, the average standardized amount for hospitals located in a rural area was made equal to the average standardized amount for hospitals located in other urban areas. The standardized amount effective for those areas is now known as the standardized amount for "other areas." Large urban areas continue to receive a separate, higher standardized amount. The effect of this provision is that in FY 1995 or later, hospitals reclassified from rural to other urban areas for purposes of the standardized amount receive no increase in their standardized payment amount, since the two rates are now the same.

However, we continue to receive applications from individual hospitals seeking to be reclassified from rural to other urban areas for the standardized amount because of certain payment advantages that accompany the urban designation. When an individual hospital reclassifies from a rural to an urban area for purposes of the standardized amount, we consider the hospital urban for all purposes except the wage index. For some rural hospitals, the urban designation enables them to qualify as a disproportionate share hospital (DSH) and to receive special payment adjustments. For other rural hospitals that already qualify for DSH payments, the urban designation qualifies them for a higher DSH adjustment than they would receive as a rural hospital.

We proposed to provide under new § 412.230(a)(5)(ii) that a hospital may not be reclassified for purposes of the standardized amount if the area to which the hospital seeks reclassification does not have a higher standardized amount than that currently received by the hospital. This change would be effective for hospital applications due October 2, 1995, requesting reclassification for FY 1997. (Since October 1 is a Sunday, the MGCRB will accept applications through October 2, 1995.)

We note that, under this change. individual rural hospitals could continue to receive reclassifications to large urban areas, since the standardized amount for large urban areas is greater than that of rural (or other urban) areas. Also, group applications from all hospitals in a rural county for reclassification to urban areas would not be affected, since these hospitals are required to meet a different "metropolitan character" criterion under § 412.232(b) and would receive the other area's wage index.

We received 15 comments in response to our proposal to eliminate standardized amount reclassifications for individual hospitals from a rural area to an other urban area. All of the commenters were opposed to our proposed change. Four of the comments we received were from individual hospitals that stated that they would no longer qualify for higher DSH payments as a result of the change.

Comment: Several commenters raised questions about whether the statute gives us the authority to eliminate standardized amount reclassifications from rural to other urban areas and whether we are interpreting the MGCRB provisions of the statute correctly. One commenter stated that the statute contains no language that modifies or limits the areas to which hospitals may seek reclassification, or restricts the types of hospitals that may seek changes in the standardized amount. The commenter believes that, because section 1886(d)(10)(C)(i) of the Act provides that the MGCRB *shall* consider applications of hospitals seeking reclassification, rather than stating that the MGCRB *may* consider such applications, the MGCRB is obligated to consider applications from hospitals seeking to be reclassified from rural areas to other urban areas. The commenter argues that the statute gives the Secretary the authority only to establish guidelines for evaluating hospital-specific facts, not to preclude specific classes of hospitals from being reclassified. Another commenter stated that since Congress had not specifically provided in legislation that rural to other urban standardized amount reclassification would no longer be allowed after the rural and other urban rates were made equal, HCFA does not have the statutory authority to make this change.

Response: We believe the proposed policy of eliminating individual hospital reclassifications from rural areas to other urban areas for purposes of the standardized amount is fully consistent with the language and purpose of the Medicare statute. Although the statute states that the MGCRB "shall" consider applications for reclassification, the statute does not require the Board to consider a reclassification request for any purpose whatsoever. Instead, the relevant terms of the statute provide that the Board "shall consider" applications for reclassification "for purposes of determining * * * the hospital's average standardized amount." Accordingly, the statute *requires* the Board to consider requests for standardized amount reclassification only if the "purpose" of the request is for the hospital to receive the other area's standardized amount. Since the standardized amount for rural areas now equals the standardized amount for other urban areas, there is no reason for a rural hospital to be reclassified to another urban area "for purposes of" the standardized amount itself.

Under the proposed policy, qualifying rural hospitals (and other urban hospitals too) may continue to seek standardized amount reclassification to large urban areas because large urban areas have a different standardized amount (base payment rate). Thus, consistent with the statute, the Board "shall consider" applications for standardized amount reclassification from hospitals seeking to receive the other area's (higher) standardized amount. As explained further below, we also believe that the proposed change is consistent with the purpose of the statute, as well as the language of the statute.

Comment: Several commenters argued that the proposed policy is contrary to the purpose of the geographic reclassification system. Some commenters believe that our proposal is contrary to congressional intent that geographic reclassification be available to hospitals to address competitive inequities. One commenter stated that HCFA had previously interpreted the purpose of geographic reclassification as addressing those situations where a hospital is more like the hospitals in a geographic adjacent area than the hospitals in its own geographic area, and that the proposed policy of not allowing rural hospitals to be reclassified to other urban areas contravened the agency's interpretation of the statute and placed those hospitals at a competitive disadvantage. Another commenter stated that we were changing our standard as to the purpose of geographic reclassification from providing hospitals with a more appropriate geographic classification to providing only a more appropriate standardized payment rate.

One commenter suggested that HCFA was interpreting the statute very narrowly in this instance, but in other cases, such as allowing rural to rural reclassification, HCFA had been more liberal. Another commenter acknowledged that the statute addressed only the wage index and standardized amount as reasons for reclassification, but said that the intent of the MGCRB provisions was to provide an opportunity for rural hospitals sharing certain characteristics with urban hospitals to partially escape the disadvantage of their rural status. Still another commenter believes Congress intended that, if a rural hospital satisfied HCFA's criteria for standardized amount reclassification to an other urban area, the hospital should be considered urban for purposes of disproportionate share payments as well because the hospital had proved that it was similar to urban hospitals.

Response: We believe the proposed policy is fully consistent with the purpose of the statute, as well as the language. The geographic reclassification process enables hospitals to be reclassified to another geographic area for purposes of receiving the other area's standardized amount or wage index, the two major components of a hospital's prospective payment rate. As indicated in the June 4, 1991 final rule implementing the reclassification process, "we believe geographic reclassification should be limited to those hospitals which are disadvantaged by their current geographic classification because they compete with the hospitals that are located in the geographic area to which they seek to be reclassified." (56 FR 25469.)

For purposes of determining an appropriate standardized amount, a hospital is not disadvantaged by its "current geographic classification" if the area to which it seeks reclassification has the same standardized amount. Rural hospitals requesting reclassification to another urban area would receive the same standardized amount. We believe it is appropriate to limit reclassifications "for purposes of" the standardized amount to hospitals seeking reclassification to an area with a higher standardized amount. We note that the statute confers broad authority on the Secretary to determine the circumstances under which reclassification is appropriate.

In essence, the commenters are arguing that hospitals should be allowed to seek reclassification solely for purposes of the DSH adjustment. However, the statute specifies only two purposes for which hospitals may seek reclassification—the standardized amount and the wage index, the two major components that determine a hospital's base prospective payment rate. We believe that, if it is appropriate not to reclassify a hospital for purposes of the base payment rate itself, as contemplated by the statute, it is appropriate not to reclassify the hospital solely for purposes of the DSH adjustment to the base payment rate.

In response to the arguments that our proposed policy would place rural hospitals unable to receive higher DSH payments at a competitive disadvantage, any hospital unable to satisfy the criteria for reclassification could claim it was placed at a competitive disadvantage. For example, rural hospitals slightly beyond the qualifying mileage requirement of 35 miles do not qualify for reclassification even if they have costs like those of an urban hospital. Almost every rural hospital in the country could argue that it shares some characteristics with urban hospitals. However, a rural hospital cannot argue now that it is disadvantaged because it is unable to receive the standardized amount of an adjacent other urban area.

Since all hospitals pay for geographic reclassification through the budget neutrality process, it is HCFA's responsibility to develop guidelines to determine when reclassification is appropriate. We believe it is appropriate not to reclassify individual rural hospitals to other urban areas for purposes of the standardized amount.

Comment: Some commenters stated that the proposed change was inconsistent with our previous policy of allowing rural hospitals to reclassify to other urban areas and considering them urban for all purposes (except the wage index). Many of the commenters were concerned about the equity of our proposal since rural hospitals located near large urban areas could continue to reclassify for the standardized amount and receive higher DSH payments if they qualified, but rural hospitals located next to other urban areas could not. Some of the commenters also stated that since rural hospitals have proved that their costs are similar to those of other urban hospitals they should be eligible for any payments and adjustments that those hospitals receive.

Response: We believe that our proposed policy is consistent with the previous policy of allowing rural hospitals to reclassify to other urban areas for purposes of the standardized amount and considering such hospitals urban for all purposes, including DSH payments. It is important to consider the circumstances underlying each policy. At the time the previous policy was implemented, the standardized amount for rural areas was different from the standardized amount for other urban areas, so it was appropriate to reclassify qualifying rural hospitals to other urban areas and to consider them urban for purposes of the standardized amount. We decided that, once a hospital was reclassified as urban for purposes of the standardized amount, the hospital would also be considered to be urban for all purposes (except the wage index).

As this analysis suggests, there is a two-step inquiry in determining whether a rural hospital should be considered urban for a purpose *other than* the standardized amount. The first, and threshold, question is whether it is appropriate to reclassify the hospital for purposes of the standardized amount itself, as contemplated by the statutory language? Only if this threshold question is answered affirmatively does one reach the second question: should the hospital be considered urban for other purposes as well?

Applying this analysis, rural hospitals seeking standardized amount reclassification to other urban areas would now receive the same standardized amount. Therefore, as explained earlier, we believe it is appropriate not to reclassify these rural hospitals as urban "for purposes of" the standardized amount. Since there is now no reason to consider these hospitals as urban for purposes of the standardized amount, we do not reach the second question of whether the hospitals should be considered urban for other purposes as well.

We recognize that there may be some possible inequity between rural hospitals seeking reclassification to other urban areas and rural hospitals seeking reclassification to large urban areas. However, the statute does not mandate that hospitals reclassified as urban for purposes of the standardized amount also be considered urban for purposes of DSH. We could have decided initially that rural hospitals reclassified to large urban areas for purposes of the standardized amount would *not* be considered urban for other purposes. But then arguably there would be some inequity between hospitals located in urban areas and rural hospitals reclassified as urban for purposes of the standardized amount.

As explained above, we believe the most appropriate policy is to first address the threshold question: whether it is appropriate to reclassify certain rural hospitals for purposes of the standardized amount. If the answer is yes, then we reach the second question: whether the hospitals should be considered urban for other purposes. We believe that all of our policies are consistent with this analysis.

Comment: One commenter suggested that we were continuing to allow rural hospitals adjacent to large urban areas to seek reclassification because the large urban standardized amount is much higher than the other standardized amount and few hospitals would be able to qualify for such reclassification.

Response: As stated earlier, we believe, consistent with the statutory language and purpose, that it is appropriate for hospitals to seek reclassification from rural areas to large urban areas for purposes of the standardized amount because the other area has a higher standardized amount.

Comment: Two commenters mentioned the impact that this change would have on rural referral centers. One commenter stated that many hospitals had voluntarily relinquished their rural referral center status in order to qualify for higher DSH payments and that HCFA had previously acknowledged the benefit of such reclassification to these hospitals. The commenters also stated that 18 hospitals eligible for rural referral center status were reclassified to other urban areas in FY 1995 and would lose $13.8 million if the proposal were implemented.

Response: While we recognize that many hospitals voluntarily relinquished their rural referral center status in the past to qualify for DSH as an urban hospital and we are sympathetic to the financial impact that the loss of higher DSH payments will have on these hospitals, we believe it is appropriate not to allow these hospitals to be reclassified for purposes of the standardized amount to another area with the same standardized amount. Eligible hospitals may seek to have rural referral center status reinstated. Although these hospitals would not be considered urban for purposes of DSH payments, we note that, under section 1886(d)(5)(F)(iv) of the Act, rural referral centers receive special treatment for purposes of DSH. In addition, we have previously recognized the role that sole community hospitals and rural referral centers play in preserving access to care for rural Medicare beneficiaries by means of the MGCRB special access rule, which waives the mileage requirement for such hospitals seeking reclassification. (*See* 42 CFR 412.230(a)(3).)

Comment: One commenter claims that our proposed change contravenes the rationale behind HCFA's requirement that DSH be included in the standardized amount reclassification test. The commenter asserts that since HCFA has noted that DSH payments change depending on whether or not a hospital is urban or rural and should be included in the standardized amount calculation, hospitals that can qualify to reclassify based upon including their DSH payments and costs should be allowed to do so.

Response: Again, there is a two-step analysis: first, is it appropriate to reclassify rural hospitals to other urban areas (or large urban areas) for purposes of the standardized amount; second, if the answer to that threshold question is yes, then should the hospitals be considered urban for purposes other than the standardized amount? As indicated above, we believe it is appropriate not to reclassify a rural hospital to an other urban area for purposes of the standardized amount because the hospital would receive the same standardized amount. In contrast, it is appropriate to reclassify rural hospitals to large urban areas for purposes of the standardized amount, and when a rural hospital qualifies to be considered urban for purposes of the standardized amount, we believe it is appropriate to consider the hospital urban for purposes of DSH. Applying this policy in determining the geographic area (rural or large urban) to which a hospital should be classified for purposes of the standardized amount, we believe that applicable DSH payments and costs should be included in the qualifying cost test because they reflect the costs and payments of the hospital under the alternative scenarios.

After considering the comments, we have decided to adopt the change as proposed.

b. Reclassification for Purposes of the Wage Index. Section 1886(d)(10)(C)(i)(II) of the Act requires the MGCRB to consider the application of any prospective payment hospital for purposes of changing its applicable wage index. Sections 412.230, 412.232, and 412.234 set forth the types of individual and group reclassifications that are currently allowed. An individual rural hospital may reclassify to another rural area or to an urban area. An individual urban hospital may reclassify to another urban area for purposes of the wage index, the standardized amount or both. A rural group may reclassify to an urban area and an urban group may reclassify to another urban area, but only for purposes of both the wage index and the standardized amount. In the proposed rule we stated that we do not believe it is appropriate for hospitals to seek reclassification to an area with a lower wage index in an effort to use the MGCRB system inequitably (60 FR 29217).

Therefore, under the proposed rule, a hospital that seeks to reclassify for the purpose of the wage index may apply for reclassification only to an area that has a higher pre-reclassified average hourly wage than the pre-reclassified average hourly wage in the hospital's original geographic area. We proposed revisions to §§ 412.230, 412.232, and 412.234 to reflect these changes.

For group reclassifications, we proposed that either the pre-reclassified average hourly wage or the standardized amount of the area to which the hospitals seek reclassification must be higher than the corresponding figure of the area in which the hospitals are located for the group to qualify for reclassification. These revisions are effective for applications for reclassification due by October 2, 1995, for reclassifications effective October 1, 1996. We received two comments on our proposal to prohibit a hospital from reclassifying to an area in which the pre-reclassification average hourly wage is lower than the pre-reclassification average hourly wage in the hospital's current area, both of which agreed with our changes. Therefore, we will implement this requirement beginning with MGCRB applications due October 2, 1995, effective for reclassifications for FY 1997.

Comment: Although we made no proposal regarding the 108 percent criterion, two commenters wrote to state their concern about the impact of that criterion in relation to hospital reclassification for wage index purposes. The current regulations require that among other criteria, a hospital that seeks to be reclassified must have an average hourly wage that equals or exceeds 108 percent of the average hourly wage of the area in which it is located. One commenter believes that this test is inappropriate, especially for hospitals that are the predominant wage payers in an area. The commenter states that as a hospital's wage influence in a labor market area increases, it becomes proportionately less likely to satisfy the 108 percent rule.

Response: We continue to believe that the 108 percent test is a reliable measure for determining whether hospitals are truly aberrant within their labor market areas and merit reclassification. We also do not believe that it would be appropriate to exclude a hospital from its labor market area in order for the hospital to qualify for reclassification. Our policy has been that the wage data for all hospitals located in a labor market area is to be used when determining reclassification qualification. If one hospital is so dominant as to affect the labor market area to the extent noted by the commenter, the resulting average hourly wage (and thus the wage index value of the area) is also affected by that hospital. Removing the dominant hospital's data from the hourly wage calculation for purposes of meeting the 108 percent test would, in our view, lead to inappropriate reclassifications.

2. Hospital Requests for Wage Data from HCFA

Currently, regulations at § 412.266 provide that a hospital may request from HCFA certain wage data that are necessary for a complete reclassification application to the MGCRB. The regulations also set forth dates by which HCFA must respond to such requests. Before 1994, hospitals needed to obtain data on average hourly wages directly from HCFA, since the data were not available from any other source. Beginning with the May 27, 1994, proposed rule, we have included the average hourly wage data for each hospital in the proposed and final rules as part of Table 3c. Therefore, hospitals no longer need to contact HCFA to obtain the data necessary to apply for reclassification. Thus, we are revising § 412.266 to indicate that hospitals are to obtain the necessary data from the **Federal Register** document. We received no comments on this change and are adopting it as proposed.

3. Elimination of the MGCRB

As discussed above, under section 1886(d)(10) of the Act, the MGCRB is charged with reviewing and making decisions on hospital requests for geographic reclassification. Since implementation of this process 5 years ago, many changes have been made to the criteria that hospitals must meet in order to qualify for reclassification. The majority of these criteria are now

objective standards that are easily assessed. However, the MGCRB application process remains essentially unchanged. We solicited comments concerning alternatives for revising and simplifying the reclassification system (60 FR 29218) including the possibility of eliminating the MGCRB and transferring its decisionmaking authority to HCFA. In addition, we suggested that if the reclassification process was revised and simplified, it might be possible to use more current wage data in making reclassification decisions.

Comment: We received seven comments in response to our suggestion that the MGCRB could be eliminated. Five of the commenters were opposed to this suggestion and two stated that they were not opposed to such a change. One of the latter two commenters agreed with us that the criteria for reclassification are essentially mechanical and can be applied unambiguously by an administering agency.

The commenters opposed to the elimination of the MGCRB believe that the Board remains the appropriate entity for reviewing reclassification applications and should be preserved. Commenters stated that the independent administrative review offered by the MGCRB is necessary to counterbalance the authority that HCFA holds over the process through its implementation of strict numerical standards and the statutory prohibition on judicial review of MGCRB and Administrator decisions. Several commenters requested that, rather than eliminate the Board because of the more mechanical nature of its review, HCFA should restructure the qualifying criteria for reclassification to allow the MGCRB the ability to consider a wide range of hospital-specific facts in determining whether geographic reclassification would be appropriate for a particular hospital or group of hospitals.

One commenter stated that in proposing to use more current wage data HCFA must not have examined its own time line. Using more current data would require either not allowing hospitals time to review their wage data prior to reclassification, or moving the fiscal intermediary review of wage data to earlier in the wage data verification process. The commenter believes that it is essential not to limit the amount of time hospitals have to review their own wage data before it is implemented.

Another commenter noted that it might be possible to improve the MGCRB process without transferring the Board's functions to HCFA. The commenter stated that they would support a legislative proposal to change the March 30 deadline for MGCRB decisions if it would allow for the improvement of the process and the use of more accurate data.

Response: We will take the commenters' suggestions into account as we consider whether to pursue statutory changes in the law governing the reclassification process. Regarding the comments that eliminating the Board would grant too much authority to HCFA, we believe that instituting a process in which HCFA rather than the MGCRB makes the geographic reclassification decisions would not result in a significantly different outcome. This is because of the basically objective nature of the current reclassification criteria and provision for the Administrator's discretionary review as set forth in the regulations at § 412.278(c). In addition, we believe that a process that is handled entirely by HCFA could lead to some administrative simplification in the application process. We understand the concerns about using more recent wage data that has not been thoroughly verified through the process described in section III. B of this preamble and will bear these concerns in mind as we further analyze potential changes.

4. MGCRB Address Change

The MGCRB has recently moved its offices to a new location. Therefore, hospitals that wish to apply to the MGCRB for geographic reclassification for FY 1997 should submit their applications to the following new mailing address: MGCRB; P.O. Box 31713; Baltimore, MD, 21207–8713. The address for deliveries is: MGCRB; 7500 Security Boulevard; Room C1–09–13; Baltimore, MD 21244–1850.

F. Alternative Labor Market Areas

In the proposed rule, we summarized our position with regard to further research into changing labor market areas and summarized the major comments we received in response to last year's proposals for potential revisions to labor market areas. There was no consensus among the commenters on the potential options for new labor market areas. Many individual hospitals that commented expressed dissatisfaction with all of the proposals.

One of the options for revising labor market areas was a blended wage index that used the MSA-based system but generally gave a hospital's own wages a higher weight than under the current system. Under this option the wage index of each hospital would be based on a average of that hospital's own average hourly wages and the average hourly wages of other hospitals in its labor area (either an MSA or Statewide rural area). We stated that while we believed a blended wage index might have merit, we were not planning to propose it given the generally negative comments we received on changes in the labor market areas.

Comment: We received two comments in response to our summary of labor market comments in the proposed rule. One commenter endorsed our statement that there was no clear "best" labor market option to pursue. The commenter also stated that the current wage areas coupled with the reclassification process best measures hospital labor market areas. The other commenter expressed disappointment that we had decided not to endorse an alternative labor market classification system such as the blended wage index. This commenter asserted that a blended wage index, in which a hospital's wages would generally be given greater weight in developing the hospital's wage index than under the current system, would not cause hospitals to increase their wages in order to increase payments. The commenter also expressed disappointment that we did not propose a method for redefining the Boston New England County Metropolitan Area (NECMA) which the commenter believes is too large to encompass the actual Boston labor market area.

Response: The Boston NECMA was expanded by OMB as part of its revised MSA definitions based on 1990 data. As we noted in the September 1, 1993 final rule (58 FR 46292) in response to a similar comment, pursuant to our broad discretion under section 1886(d)(3)(E) of the Act, we currently define labor market areas for purposes of the wage index on the basis of MSAs and NECMAs. Thus, until alternative labor market areas are established we believe the MSA definitions should be applied consistently for purposes of the wage index. Since there does not appear to be a consensus among hospitals on new labor market areas, we have not made any proposals in this area. As we stated in the proposed rule, we are willing to conduct additional research if we receive recommendations of feasible options that we have not explored previously.

IV. Other Decisions and Changes to the Prospective Payment System for Inpatient Operating Costs

A. Payment for Transfer Cases (Section 412.4)

The prospective payment system distinguishes between "discharges," situations in which a patient leaves an acute-care hospital after receiving complete treatment, and "transfers," situations in which the patient is transferred to another acute-care hospital for related care. If a full DRG payment were made to each hospital involved in a transfer situation irrespective of the length of time the patient spent in the "sending" hospital before transfer, this would create a strong incentive to increase transfers, thereby unnecessarily endangering patients' health. Therefore, the regulations at § 412.4(d) provide that, in a transfer situation, full payment is made to the final discharging hospital and each transferring hospital is paid a per diem rate for each day of the stay, not to exceed the full DRG payment that would have been made if the patient had been discharged without being transferred.

Currently, the per diem rate paid to a transferring hospital is determined by dividing the full DRG payment that would have been paid in a nontransfer situation by the geometric mean length-of-stay for the DRG into which the case falls. Transferring hospitals are also eligible for outlier payments for cases that meet the cost outlier criteria established for all cases (nontransfer and transfer cases alike) classified to the DRG. They are not, however, eligible for day outlier payments. Two exceptions to the transfer payment policy are transfer cases classified into DRG 385 (Neonates, Died or Transferred to Another Acute Care Facility) or DRG 456 (Burns, Transferred to Another Acute Care Facility), which are not paid on a per diem basis but instead receive the full DRG payment.

In the May 27, 1994 proposed rule, we proposed to revise our payment methodology for transfer cases. Under the proposal, for the first day of a transfer, the per diem amount would be doubled, while a flat per diem amount would be paid for each succeeding day, up to the full DRG payment (59 FR 27734). We also proposed at that time to change our definition of a transfer case to include cases transferred from an acute-care setting paid under the prospective payment system to a hospital or unit excluded from the prospective payment system. When we published the September 1, 1994 final rule with comment period, we withdrew these proposals for FY 1995 (59 FR 45362) based on negative comments and further analysis. In that final rule, however, we stated our intention to continue to evaluate the appropriateness of our transfer policy.

For FY 1996, we again proposed to adopt a graduated per diem payment methodology for transfer cases. Again, under this methodology, we would pay double the per diem amount for the first day and the per diem amount for subsequent days (up to the full DRG amount). We did not propose to revise our definition of transfers. However, we noted that we were concerned about an accelerating trend toward earlier discharges to postacute settings. Therefore, we solicited public comments regarding this trend and the implications this has for the design of our payment systems. In its March 1, 1995 report, ProPAC supported our proposed payment methodology (Recommendation 11) and expressed its concern "about the continuity of care across treatment settings." The Commission also indicated its willingness to work with the Secretary to explore this issue. The following discussion describes our change to the transfer payment methodology and some of the issues identified by our further analysis of transfer cases.

1. Payment for Transfer Cases

As part of a study of Medicare transfer cases funded by HCFA ("Transfers of Medicare Hospital Patients under the Prospective Payment System", PM–191–HCFA, January 1994), RAND found that among cases transferred before reaching the geometric mean length-of-stay, 1-day stays cost 2.096 times the per diem payment amount for cases in nonsurgical DRGs and 2.576 times the per diem for surgical DRGs (based on FY 1991 data). Among nonsurgical transfer cases, the costs of 2-day stays were about 1.215 times the per diem payment amount, and cases transferred after 2 days cost about 10 percent more than the applicable per diem amount. Among surgical cases, the costs of stays of 2 or more days were actually about 7 percent below the applicable per diem amount.

In order to pay hospitals more appropriately for the treatment they furnish to patients before transfer, we proposed to revise § 412.4(d)(1) to pay transfers twice the per diem amount for the first day of any transfer stay plus the per diem amount for each of the remaining days before transfer, up to the full DRG amount. (Our concerns about basing the gradation of the per diem scale on the actual coefficients as estimated by RAND were described in last year's proposed and final rules, as referenced above.) This change will apply uniformly for both medical and surgical transfer cases; although surgical transfer cases appear to be more costly on average for the first day, they are relatively less costly for the second day and beyond.

If the patient is transferred again before final discharge, then, under this change, all sending hospitals involved would be paid using the graduated per diem methodology rather than the flat per diem rate they currently receive. For example, a case transferred from a community hospital to a tertiary care hospital for a procedure that is not performed at the community hospital, may subsequently be transferred back to the community hospital, which ultimately discharges the patient home. In such a case, the community hospital and the tertiary care hospital would be paid using the transfer payment methodology for the first two phases of the hospitalization, and the community hospital would also receive a DRG amount for the final phase when it discharges the patient. This is our current policy, as well. Each phase of the hospitalization is assigned a DRG based on the diagnosis and procedures applicable to that particular phase; therefore, a different DRG could be assigned to each phase.

Transfer cases would continue to be eligible for additional payments as cost outliers. In the September 1, 1993 final rule, we set forth revised qualifying criteria for transfer cases to be eligible for cost outlier payments (58 FR 46305). Before that change, transfer cases were required to meet the same criteria to qualify for cost outliers as were discharges. The revised policy adjusts the outlier threshold for transfer cases to reflect the fact that transfer cases were receiving a reduced payment amount under the per diem methodology. Last year, when we revised the cost outlier qualifying criteria so that it was based on a fixed loss threshold, the qualifying criteria for transfers continued to reflect the fact that their payment amounts are reduced relative to the full DRG amount. Although we did not state this explicitly in the September 1, 1994 final rule, it is the policy we have employed, and intend to continue to employ, since the fixed loss threshold was implemented October 1, 1994. In the proposed rule, we described the cost outlier threshold for transfer cases as equal to the fixed loss amount (for FY 1995, the prospective payment rate for the DRG plus $20,500), divided by the geometric mean for the DRG, multiplied by the length of stay before transfer. In order to maintain the correct relationship between the payment received under the new graduated per diem methodology and the outlier threshold, for FY 1996, the per diem outlier threshold should be multiplied by the length of stay before transfer plus one day. Of course, the threshold is limited

to the prospective payment rate for the DRG plus the fixed loss amount.

Using the graduated per diem methodology, RAND estimated the payment-to-cost ratio of transfer cases that were transferred before reaching the geometric mean length of stay would be 0.9321. While this is somewhat less than the payment-to-cost ratio for nontransfer cases (0.9645), it represented a significant improvement over the current ratio for transfer cases (0.7224). Using more recent data (FY 1993 MedPAR) and payment policies (FY 1995), we estimated the improvement in the payment-to-cost ratio for transfer cases to be from 0.7548 under the current flat per diem policy to 0.9701 under the graduated per diem policy.

Section 109 of the Social Security Act Amendments of 1994 (Public Law 103–432), which amended section 1886(d)(5)(I) of the Act, authorized the Secretary to make adjustments to the prospective payment system standardized amounts so that adjustments to the payment policy for transfer cases do not affect aggregate payments. In light of this authority, we believe the benefits of the graduated per diem methodology now outweigh the concerns that we expressed in the September 1, 1994 final rule. Our methodology for applying this adjustment was described in section II of the Addendum to the proposed rule and is included in this final rule as well.

Finally, we proposed to revise the DRG recalibration methodology so that transfer cases are treated as a proportion of a full case based on the transfer payment amount (as discussed above in section II.C of this preamble). Specifically, we proposed to weight transfer cases as less than a full discharge based on the proportion of the total DRG amount the hospital receives under the graduated per diem transfer payment methodology. This has the effect of increasing the relative weights of the DRGs with a high number of short-stay transfer cases.

Comment: All of the comments we received regarding our revision to the transfer payment methodology were in support of the proposal. ProPAC wrote that "(t)his policy will improve payment equity for hospitals that must transfer a large number of patients to other hospitals."

Response: All of the comments favored our proposal, and we have adopted the proposal without change. We appreciate ProPAC's valuable contribution to the analysis of the transfer payment methodology. We share its conclusion that this change will appropriately benefit hospitals that transfer large numbers of patients.

2. Definition of a Transfer Case

Under current policy, cases that are transferred from an acute-care hospital paid under the prospective payment system to another type of provider or unit are considered to be discharges (as opposed to transfers) from the acute-care hospital. As a discharge, payment for the case is the full DRG amount.

As noted above, we are concerned that the current trend of declining average lengths of stay as hospitals transfer Medicare patients into alternative health care settings (other than acute care) in less time may result in a misalignment of payments and costs under our existing payment systems. In particular, we are concerned that hospitals paid under the prospective payment system may be shifting costs (for which they are compensated through the DRG payments) to alternative settings, which in turn may be paid on a cost basis.

In the September 1, 1994 final rule, we explained our rationale for proposing to consider patients transferred to excluded hospitals or units as transfers rather than discharges. Briefly, our proposal was "based upon the premise that an increasing number of patients are being transferred to excluded hospitals or units and that these patients are still in the acute care phase of treatment when they are transferred." (See 59 FR 45364.) We also explained our reason for continuing to consider patients going to a skilled nursing facility (SNF) as discharges. In that regard, we stated that "(w)e did not propose to consider discharges to SNFs as transfers because we do not consider SNFs to be hospital settings; thus, there is generally little overlap with acute care hospitals in the services provided." Based upon further analysis of patient discharge trends and research on the type and outcomes of care provided in SNFs, as well as anecdotal evidence drawn from the health care industry, we no longer believe there is a clear distinction between the type of care provided in SNFs and the type of care provided in hospitals or units excluded from the prospective payment system, such as rehabilitation and long-term care facilities.

Therefore, we considered proposing to expand our definition of transfers to include not only cases going from one hospital paid under the prospective payment system to another but also cases transferred to excluded hospitals and units as well as SNFs. However, as discussed below, our analysis has identified problems that need to be addressed. Nevertheless, once we are convinced these problems can be effectively handled, we intend to proceed with implementing policy changes designed to remedy this issue.

First, our analysis (as well as anecdotal evidence) indicates that the settings where acute care is now being delivered are rapidly expanding and evolving. To the extent that payment is affected by where a patient goes after an acute hospitalization, it is critical to understand the clinical capabilities of different types of settings, so that the incentives created by the payment system do not unduly influence the choice of where to send a patient for postacute care. That is, all like provider settings should be treated equally in terms of payment incentives. Currently, the settings that are considered as alternatives to acute care are expanding rapidly, and we want to be sure that we do not create unforeseen financial incentives toward one alternative over another by any redefinition of transfers.

In addition, as discussed in last year's final rule, hip replacement cases (which, as a group, constitute one of the largest sources of Medicare cases moving from acute to postacute settings) would be systematically underpaid under either the current or the proposed per diem methodology. This is because the cost of the surgery including the prosthetic device, which is incurred in the first day or two of the stay, constitutes a large percentage of the total cost of the stay. A graduated per diem would have to be skewed greatly toward the first day to approximate the daily cost distribution.

We, therefore, solicited public comment with regard to these issues. Specifically, we were interested in suggestions on how best to adapt our payment methodologies for hospitals and units (both acute care paid under the prospective payment system and those excluded from this system), SNFs, and home health agencies in response to the evolving integrated delivery systems. We were particularly interested in comments and suggestions on how to design a comprehensive payment system that better matches payments with the costs providers actually incur in furnishing care (that is, reducing hospital payments when a significant phase of a patient's acute episode is treated in other than an acute hospital inpatient setting). A major issue in developing such an integrated payment system is to neutralize the incentives that arise in terms of where patients are treated. For example, hospitals should continue to be adequately compensated for acute inpatient hospitalization where appropriate, so that there will not be an adverse incentive to move patients prematurely to alternative settings.

We appreciate the numerous comments we received in response to this solicitation. Many of them shed new light on our understanding of the complicated issues involved, and will serve to enhance our analysis as we grapple with these issues in the future.

Comment: Many commenters misinterpreted our discussion related to the definition of transfer cases as a proposal to expand the definition to include patients moving from an acute care hospital to a hospital or unit excluded from the prospective payment system or to an SNF.

Response: We wish to make clear that we did not propose a change to the definition of transfers. We identified an expanded definition (one that would encompass patients going to SNFs) as one possible approach. We went on, however, to discuss why we were not proposing to make such a change to the definition at this time. Furthermore, we did not suggest that we would pay postacute care providers on the basis of the hospital DRGs.

Comment: The majority of the commenters who discussed an expanded definition of transfers as one approach to address the blurring distinction between different sites of care were opposed to it. Several commenters argued that there remains a clear distinction between the care provided in acute care hospitals and that provided by postacute care providers, and therefore it would be inappropriate to consider these cases as transfers. The point was also raised that defining these cases as transfers would create a financial incentive to hold them in the acute care hospital longer, in order to avoid a reduction in payment. On the other hand, some commenters pointed to "perverse incentives" under the current system that encourage early discharges.

Some commenters who argued against last year's proposal wrote to support a redefinition of transfers that includes SNFs. These commenters indicated they were in favor of an expanded definition if it included cases going to SNFs as transfers. Conversely, several commenters opposed including cases going to SNFs, arguing that "HCFA will *not* accomplish its goal since it will effectively remove any incentive for hospitals to move patients into a more cost-effective setting for subacute care." Not surprisingly, opinions on whether any redefinition of transfers should include cases going to SNFs divided along lines of whether the commenter represented SNFs or excluded hospitals.

Response: We would like to make clear that we recognize the importance of rehabilitative care as a necessary and distinct phase of the episode of care for many patients. Similarly, we recognize the historical distinctions between different providers of postacute care, as evidenced, for example, by our different payment policies for excluded hospitals and SNFs. Nevertheless, we are convinced these distinctions have recently become increasingly ill-defined. Part of the difficulty in addressing this issue, however, is that, while some providers have taken great strides toward integrating their health care delivery systems, many others continue to operate under the more traditional approach, with clear distinctions existing between the providers at different phases of patients' care.

We have repeatedly indicated our belief that the incentives created by our payment policy should be neutral in terms of the settings where patients receive care. That is, the payment received should correspond to the costs of the care provided, so that decisions regarding the appropriate site of care are based on clinical, not economic, concerns. As noted above, our concern stems from increasing indications that in certain contexts our present payment system no longer reflects provider costs as accurately as it once did. On the other hand, we believe that, for the most part, our per diem payment methodology for transfer cases does meet this test. Although payments for transfer cases are reduced relative to full discharges, they reflect the reduction in resources hospitals commit to these cases (particularly under our graduated per diem methodology). However, one of the issues of expanding this transfer payment methodology to cases going to excluded hospitals and units, as well as SNFs, is the underpayment for hip replacements. To the extent that the transfer payment is below costs, economic considerations are more likely to enter into the decision of when to release a patient and to which type of setting.

Finally, with regard to whether any redefinition of transfers should or should not include SNFs, we noted in the proposed rule (and reiterated above) that patients appear to be going to SNFs sooner from acute care settings. On the whole, the comments we received reinforced this belief. We will, however, continue to evaluate this issue.

Comment: Some commenters indicated that the redefinition of transfers should apply only to hospital-based distinct part units or in the case of long-term care hospitals, to a "hospital within a hospital," where the incentive to transfer early is strongest. In the words of two commenters: "(t)his perverse situation is becoming more common as States make it easier for hospitals to circumvent the normal health planning process to convert excess acute care beds to cost-based, distinct part units."

Response: We share many of the concerns expressed in these comments regarding the special potential for abuse that exists in such situations, and have addressed some of the potential abuses inherent in the "hospital within a hospital" arrangements in section IV of this preamble. However, we have historically recognized that many of the distinct part unit situations arise from legitimate efficiency incentives on the part of hospital administrators. In addition, implementing such a proposal would likely multiply the types of problems arising in the "hospital within a hospital" issue, as hospitals devise new relationships for postacute care.

Comment: It was suggested that, if we redefine transfers to include cases moving to excluded hospitals and units as well as SNFs, one State should be exempted because, among other reasons, the State's hospitals cannot establish exempt units without receiving a State Certificate of Need.

Response: One of the major factors leading us to pursue refinements with respect to this issue is the fact that not all areas of the country have equal access to postacute care alternatives. Currently, among those DRGs experiencing the most dramatic declines in length of stay, the relative weights are declining as the resources expended for these cases by acute care hospitals around the country decline. Because, effective for FY 1996, for purposes of recalibrating the DRGs, transfer cases are weighted in proportion to their payments, expanding the definition of transfer cases would alleviate some of the downward impact these cases have on the DRG weights. Hospitals lacking the opportunity to decrease their lengths of stay by transferring patients to postacute care settings would thereby benefit.

Comment: A number of commenters suggested that the appropriate means to address the issue of declining lengths of stay was through the DRGs and the prospective payment system, not the definition of a transfer. One commenter, for example, correctly asserts that the reduced resources attributable to cases discharged early from the acute hospital would ultimately result in lower DRG weights. Others called for the system to be rebased in order to capture the savings from the shorter lengths of stay.

Many commenters argued that it would be inappropriate to reduce payments for cases discharged prior to the mean without simultaneously increasing payments for cases discharged after the mean.

Response: An integral concept of the prospective payment system is that a predetermined payment can be made for an identifiable and distinct phase of care. To the extent that hospitals can provide this acute phase of patients' care at costs below average, they profit under this system. In response to this incentive, lengths of stay declined dramatically in the first few years after implementation of the prospective payment system.

Our concern regarding the misalignment of payments and costs arises when the acute phase of care may no longer be completed within the hospital. At that point, it is no longer sufficient to rely on the recalibration of the relative weights of the DRGs to correct the balance between payments and costs. Recalibration is, by definition, a budget neutral process. While payments will decline for the DRGs with cases that are being moved earlier out of the hospital, this decline will necessarily be offset by relative increases for other DRGs. The net result is that total payments systemwide are the same despite the cost reductions.

One way of potentially capturing these reductions would be to rebase the standardized amounts using more recent cost data. We are not convinced at this time, however, that such a dramatic approach is warranted. In addition, due to the need to use audited cost data in any such rebasing, it is questionable to what extent rebasing at this time would capture these savings, since this trend has apparently begun to accelerate only in the last year or two.

We disagree with the comments that it is inappropriate to reduce payments for cases discharged prior to the mean without simultaneously increasing payments for cases discharged after the mean. Cases with long lengths of stay may be eligible for outlier payments. In addition, as we pointed out in last year's final rule, generally fewer than 10 percent of cases in the DRGs most likely to receive postacute care leave the acute care hospital before the geometric mean length of stay, minus one day, and would therefore receive payment under the per diem methodology (59 FR 45365).

Comment: Several commenters noted that our current payment methodologies are predominately fee-for-service, and that this method of paying for health care will become much less prevalent in the near future. These commenters suggested that under a Medicare capitated payment methodology many of the issues with which we are concerned will resolve themselves.

Response: We agree that issues pertaining to properly allocating payments among service providers is significantly a function of our fee-for-service payment systems, which are largely required by the Medicare law. Nevertheless, given the amount of money currently paid through our fee-for-service systems, and the projections from the Office of the Actuary regarding the Medicare Trust Fund, the need to address this issue is pressing. Therefore, given the uncertainty about major legislative changes to our payment systems, we intend to pursue a solution that can be implemented relatively soon.

Comment: In response to our request, we received numerous suggestions for alternative approaches to address the evolving integration of the various phases of a patient's care across different provider settings. In the timeframe we are under to publish this final rule, we cannot appropriately analyze and respond to all of them. Additional comments we received included the following:

- There is no current infrastructure to accommodate a bundled payment system for acute and postacute care.
- HCFA should rely on the utilization review process to identify individual abusive providers and deal with them on an individual basis.
- HCFA should pursue its stated intention to better understand the clinical capabilities of various postacute settings.
- All types of providers of inpatient rehabilitation services should be under the same payment system (the Functional Related Groups concept was suggested).
- Hospital outpatient services should be included in the analysis of postacute care.
- HCFA should establish a commission to consider both the financial and clinical aspects of postacute care.
- A new discharge status code should be established for patients transferred for subacute, rather than postacute, care.

A number of revisions to SNF payment policy were also recommended, including a more stringent review of cost limit exception requests, a cap on exceptions based on like providers, elimination of the 3-day hospital stay requirement for Medicare SNF coverage, permitting providers to establish multiple distinct parts, and applying the hospital-based routine cost limits to freestanding SNFs.

Response: As noted above, we appreciate the many suggestions we received and will take each into consideration as we pursue our options. In addition, we anticipate that we will continue to work with the hospital industry as we proceed in our efforts to address this problem.

B. Physician Attestation (Section 412.46)

Under current Medicare regulations at § 412.46(a), physicians are required to sign an attestation statement for each hospital discharge before the claim can be submitted to the intermediary for payment. With this attestation, the physician is certifying the accuracy of the principal and secondary diagnoses and the major procedures performed for each patient during the inpatient stay. Because this information dictates which DRG is assigned to a case, it is extremely important that it be correct so that proper Medicare payment can be made.

The attestation statement the physicians sign reads as follows:

> I certify that the narrative descriptions of the principal and secondary diagnoses and the major procedures performed are accurate and complete to the best of my knowledge. (§ 412.46(a).)

Although a hospital official is required to certify on each Medicare claim form that all the data are correct, when the prospective payment system was first implemented, we believed that we needed a clear statement for each claim concerning the validity of that data. At the time, we believed that the physician was in the best position to attest to the information.

The hospital must also have on file a signed and dated acknowledgement from the attending physician that the physician has received the following notice:

> Notice to Physicians: Medicare payment to hospitals is based in part on each patient's principal and secondary diagnoses and the major procedures performed on the patients, as attested to by the patient's attending physician by virtue of his or her signature in the medical record. Anyone who misrepresents, falsifies, or conceals essential information required for payment of Federal funds, may be subject to fine, imprisonment, or civil penalty under applicable Federal laws. (§ 412.46(c)(1).)

We implemented these requirements to ensure a means of holding hospitals and physicians accountable for the information they submit on the Medicare claims form. At the time, we believed that these statements were valuable tools for ensuring the validity of DRG claims.

Over the years, we have received many complaints from both hospitals and physicians concerning the administrative burden of completing the attestation and acknowledgement statements. In a final rule with comment period published in the **Federal Register** on March 9, 1994 (59 FR 11003), we revised the regulations to require that a physician need sign the acknowledgement statement only upon receiving admitting privileges at a hospital and no longer was required to sign the statement every year.

In practice, review of attestation statements by the Peer Review Organizations (PROs) as a part of DRG validation review has resulted in less than a 0.01 percent denial rate of sampled claims. Therefore, in an effort to reduce burden, we are revising the regulations to eliminate the physician attestation requirement.

We believe that this will reduce the burden on both physicians, who must sign an attestation on each of the approximately 11 million Medicare inpatient claims a year, and on hospitals, which are responsible for obtaining the signatures before they can submit completed claims for payment. In addition, the hospital claim form (UB–92), which must be signed by a hospital representative, contains a certification statement that reads as follows:

> Anyone who misrepresents or falsifies essential information requested by this form may upon conviction be subject to fine and imprisonment under Federal or State law.

Because the hospital remains responsible for certifying that the hospital claim is accurate, we believe that we can hold the hospital responsible for the accuracy of the diagnostic and procedural information. We are revising revise § 412.46 by eliminating paragraphs (a), (b), (d), and (e). We note that on January 20, 1995, HCFA notified its Regional Offices that the PROs would no longer be responsible for performing attestation review.

Although this revision was not included in the proposed rule, we did receive many comments requesting that we eliminate the physician attestation requirement. In addition, this change was announced in July by Vice President Albert Gore, as one of the Administration's health care regulatory reforms.

C. Rural Referral Centers (Section 412.96)

Under the authority of section 1886(d)(5)(C)(i) of the Act, § 412.96 sets forth the criteria a hospital must meet in order to receive special treatment under the prospective payment system as a rural referral center. For discharges occurring before October 1, 1994, rural referral centers received the benefit of payment based on the other urban payment rate rather than the rural payment rate. As of that date, the other urban and rural payment rates are the same. However, rural referral centers continue to receive special treatment under both the disproportionate share hospital payment adjustment and the criteria for geographic reclassification.

One of the criteria under which a rural hospital may qualify as a referral center is to have 275 or more beds available for use. A rural hospital that does not meet the bed size criterion can qualify as a rural referral center if the hospital meets two mandatory criteria (number of discharges and case-mix index) and at least one of three optional criteria (medical staff, source of inpatients, or volume of referrals). With respect to the two mandatory criteria, a hospital may be classified as a rural referral center if its—

- Case-mix index is at least equal to the lower of the median case-mix index for urban hospitals in its census region, excluding hospitals with approved teaching programs, or the median case-mix index for all urban hospitals nationally; and
- Number of discharges is at least 5,000 discharges per year or, if fewer, the median number of discharges for urban hospitals in the census region in which the hospital is located. (The number of discharges criterion for an osteopathic hospital is at least 3,000 discharges per year.)

1. Case-Mix Index

Section 412.96(c)(1) provides that HCFA will establish updated national and regional case-mix index values in each year's annual notice of prospective payment rates for purposes of determining rural referral center status. In determining the proposed national and regional case-mix index values, we followed the same methodology we used in the November 24, 1986 final rule, as set forth in regulations at § 412.96(c)(1)(ii). Therefore, the proposed national case-mix index value included all urban hospitals nationwide, and the proposed regional values were the median values of urban hospitals within each census region, excluding those with approved teaching programs (that is, those hospitals receiving indirect medical education payments as provided in § 412.105).

The values in the proposed rule were based on discharges occurring during FY 1994 (October 1, 1993 through September 30, 1994) and included bills posted to HCFA's records through December 1994. Therefore, in addition to meeting other criteria, we proposed that to qualify for initial rural referral center status or to meet the triennial review standards for cost reporting periods beginning on or after October 1, 1995, a hospital's case-mix index value for FY 1994 would have to be at least—

- 1.3165; or
- Equal to the median case-mix index value for urban hospitals (excluding hospitals with approved teaching programs as identified in § 412.105) calculated by HCFA for the census region in which the hospital is located. (See the table set forth in the June 2, 1995 proposed rule at 60 FR 29222.)

Based on the latest data available (FY 1994 bills received through June 1995), the final national case-mix value is 1.3184 and the median case-mix values by region are set forth in the table below:

Region	Case-mix index value
1. New England (CT, ME, MA, NH, RI, VT)	1.2135
2. Middle Atlantic (PA, NJ, NY)	1.2077
3. South Atlantic (DE, DC, FL, GA, MD, NC, SC, VA, WV)	1.3141
4. East North Central (IL, IN, MI, OH, WI)	1.2288
5. East South Central (AL, KY, MS, TN)	1.2814
6. West North Central (IA, KS, MN, MO, NE, ND, SD)	1.1892
7. West South Central (AR, LA, OK, TX)	1.2986
8. Mountain (AZ, CO, ID, MT, NV, NM, UT, WY)	1.3630
9. Pacific (AK, CA, HI, OR, WA)	1.3300

For the benefit of hospitals seeking to qualify as referral centers or those wishing to know how their case-mix index value compares to the criteria, we are publishing each hospital's FY 1994 case-mix index value in Table 3C in section V of the addendum to this final rule. In keeping with our policy on discharges, these case-mix index values are computed based on all Medicare patient discharges subject to DRG-based payment.

2. Discharges

Section 412.96(c)(2)(i) provides that HCFA will set forth the national and regional numbers of discharges in each year's annual notice of prospective payment rates for purposes of determining referral center status. As specified in section 1886(d)(5)(C)(ii) of the Act, the national standard is set at 5,000 discharges. However, we proposed to update the regional standards. The proposed regional standards were based on discharges for urban hospitals' cost reporting periods that began during FY 1993 (that is, October 1, 1992 through September 30, 1993). That is the latest year for which we have complete discharge data available.

Therefore, in addition to meeting other criteria, we proposed that to qualify for initial rural referral center status or to meet the triennial review standards for cost reporting periods beginning on or after October 1, 1995, the number of discharges a hospital must have for its cost reporting period that began during FY 1994 would have to be at least—

- 5,000; or
- Equal to the median number of discharges for urban hospitals in the census region in which the hospital is located. (See the table set forth in the June 2, 1995 proposed rule at 60 FR 29222.)

Based on the latest discharge data available, the final median numbers of discharges for urban hospitals by census regions are as follows:

Region	No. of discharges
1. New England (CT, ME, MA, NH, RI, VT)	6815
2. Middle Atlantic (PA, NJ, NY)	8618
3. South Atlantic (DE, DC, FL, GA, MD, NC, SC, VA, WV)	7500
4. East North Central (IL, IN, MI, OH, WI)	7155
5. East South Central (AL, KY, MS, TN)	5582
6. West North Central (IA, KS, MN, MO, NE, ND, SD)	5135
7. West South Central (AR, LA, OK, TX)	4464
8. Mountain (AZ, CO, ID, MT, NV, NM, UT, WY)	8179
9. Pacific (AK, CA, HI, OR, WA)	5594

We reiterate that, to qualify for rural referral center status for cost reporting periods beginning on or after October 1, 1995, an osteopathic hospital's number of discharges for its cost reporting period that began during FY 1994 would have to be at least 3,000.

3. Retention of Referral Center Status

Section 412.96(f) states the general rule that each hospital receiving the referral center adjustment is reviewed every 3 years to determine if the hospital continues to meet the criteria for referral center status. To retain status as a referral center, a hospital must meet the criteria for classification as a referral center specified in § 412.96 (b)(1) or (b)(2) or (c) for 2 of the last 3 years, or for the current year. A hospital may meet any one of the three sets of criteria for individual years during the 3-year period or the current year. For example, a hospital may meet the two mandatory requirements in § 412.96(c)(1) (case-mix index) and (c)(2) (number of discharges) and the optional criterion in paragraph (c)(3) (medical staff) during the first year. During the second or third year, the hospital may meet the criteria under § 412.96(b)(1) (rural location and appropriate bed size).

A hospital must meet all of the criteria within any one of these three sections of the regulations in order to meet the retention requirement for a given year. That is, it will have to meet all of the criteria of § 412.96(b)(1) or § 412.96(b)(2) or § 412.96(c). For example, if a hospital meets the case-mix index standards in § 412.96(c)(1) in years 1 and 3 and the number of discharge standards in § 412.96(c)(2) in years 2 and 3, it will not meet the retention criteria. All of the standards would have to be met in the same year.

In accordance with § 412.96(f)(2), the review process is limited to the hospital's compliance during the last 3 years. Thus, if a hospital meets the criteria in effect for at least 2 of the last 3 years or if it meets the criteria in effect for the current year (that is, the criteria for FY 1996 outlined above in this section of the preamble), it will retain its status for another 3 years. We have constructed the following chart and example to aid hospitals that qualify as referral centers under the criteria in § 412.96(c) in projecting whether they will retain their status as a referral center.

Under § 412.96(f), to qualify for a 3-year extension effective with cost reporting periods beginning in FY 1996, a hospital must meet the criteria in § 412.96(c) for FY 1996 or it must meet the criteria for 2 of the last 3 years as follows:

For the cost reporting period beginning during FY	Use hospital's case-mix index for FY	Use the discharges for the hospital's cost reporting period beginning during FY	Use numerical standards as published in the **Federal Register** on
1995	1993	1993	September 1, 1994.
1994	1992	1992	September 1, 1993.
1993	1991	1991	September 1, 1992.

Example: A hospital with a cost reporting period beginning July 1 qualified as a referral center effective July 1, 1993. The hospital has fewer than 275 beds. Its 3-year status as a referral center is protected through June 30, 1996 (the end of its cost reporting period beginning July 1, 1995). To determine if the hospital should retain its status as a referral center for an additional 3-year period, we will review its compliance with the applicable criteria for its cost reporting periods beginning July 1, 1993, July 1, 1994, and July 1, 1995. The hospital must meet the criteria in effect either for its cost reporting period beginning July 1, 1996, or for two out of the three past periods. For example, to be found to have met the criteria at § 412.96(c) for its cost reporting period beginning July 1, 1994, the hospital's case-mix index value during FY 1992 must have equaled or exceeded the lower of the national or the appropriate regional standard as published in the September 1, 1993 final rule with comment period. The hospital's total number of discharges during its cost reporting year beginning July 1, 1992, must have equaled or exceeded 5,000 or the regional standard as published in the September 1, 1993 final rule with comment period.

For those hospitals that seek to retain referral center status by meeting the criteria of § 412.96(b)(1)(i) and (ii) (that is, rural location and at least 275 beds), we will look at the number of beds shown for indirect medical education purposes (as defined at § 412.105(b)) on the hospital's cost report for the appropriate year. We will consider only full cost reporting periods when determining a hospital's status under § 412.96(b)(1)(ii). This definition varies from the number of beds criterion used to determine a hospital's initial status as a referral center because we believe it is important for a hospital to demonstrate that it has maintained at least 275 beds throughout its entire cost reporting period, not just for a particular portion of the year.

Comment: One commenter noted that the American Osteopathic Hospital Association had changed its name to the American Osteopathic Healthcare Association and requested that § 412.96(c)(2)(B)(ii) be revised to reflect this change.

Response: Section 412.96(c)(2)(B)(ii) specifies that a rural osteopathic hospital that is recognized by the American Osteopathic Hospital Association can meet the number of discharges criterion at § 412.96(c)(2) if it has at least 3,000 discharges for the hospital's most recently completed cost reporting period. As requested, we are revising § 412.96(c)(2)(B)(ii) to reflect the organization's new name. To qualify as an osteopathic hospital, the hospital must be recognized by the American Osteopathic Healthcare Association (or any successor organizations).

D. Determination of Number of Beds Used in Calculating the Indirect Medical Education Adjustment (Section 412.105)

In the September 1, 1994 final rule (59 FR 45373), in an effort to clarify our policy, we amended the regulations at § 412.105(b), that describe how to determine the number of beds in a hospital for purposes of the indirect medical education adjustment. At that time, we added language to the regulations that specifically excludes "nursery" beds assigned to newborns "that are not in intensive care areas" from the bed count. This change was supposed to clarify that, with regard to infants, only beds in a nursery used for newborns (see section 2815 of the Provider Reimbursement Manual-Part 2) are excluded from the count. As we stated in the May 27, 1994 proposed rule (59 FR 27741), we made this revision "to exclude specifically only beds assigned to newborns *in the nursery"* (emphasis added). Furthermore, when we published the final rule, we added the reference to nursery beds directly into the text of § 412.105(b) "(t)o prevent any future confusion about the term 'newborn' " (59 FR 45374).

Although we received no comments in response to the May 27, 1994 proposed rule as to whether beds occupied by sick infants in areas other than a neonatal intensive care area or a nursery could be counted, we continue to receive questions on this issue. Therefore, in the June 2, 1995 proposed rule, we proposed to revise § 412.105(b) to further clarify our bed counting policy. This year, rather than specifically identifying intensive care beds occupied by infants as eligible to be counted, we proposed to delete that phrase and insert the phrase "beds in the healthy newborn nursery." As we stated in the June 2 proposed rule, our policy is and has been that only beds in a healthy, or regular, baby nursery are excluded from the count. All other beds available for occupancy by a newborn are to be counted. We received a number of comments on our policy clarification.

Comment: Several commenters believe that, rather than a policy clarification, the proposed language represents a policy shift in how we count beds. Several of these commenters indicated that the proposed language was not supported within the construct of current regulations and manual instructions. Specifically, commenters stated that the current § 412.105(b) and the manual instructions at section 2202.7.II of the Provider Reimbursement Manual-Part 2 (which defines intensive care units) indicate that the only beds assigned to infants that are to be counted are those in a neonatal intensive care unit.

Response: This change to the regulation language does not represent a policy shift. While the manual section referenced by the commenters does distinguish explicitly between neonatal intensive care units and a regular well-baby unit, this distinction clearly is not exhaustive of all of the possibilities for counting beds assigned to infants. In fact, the same manual section goes on to indicate that subintensive care type units, that is, those not meeting the criteria for intensive care units, are considered as general routine care areas. Although this discussion does not specifically mention neonatal subintensive care units, we believe it is applicable for these units as well.

In addition, section 2815 of the Provider Reimbursement Manual-Part 2 has long included a definition of newborn inpatient days that indicates that our policy for including inpatient days attributable to sick infants is not restricted to the neonatal intensive care unit in describing the days that are to be included in the completion of Worksheet D–1 of the Provider Cost Reporting Form 2552.

> "Newborn inpatient days are the days that an infant occupies a newborn bed in the nursery. Include (as inpatient days) an infant remaining in the hospital after the mother is discharged who does not occupy a newborn bed in the nursery, an infant delivered outside the hospital and later admitted to the hospital but not occupying a newborn bed in the nursery, or an infant admitted or transferred out of the nursery for an illness in inpatient days. Also, include an infant born in and remaining in the hospital and occupying a newborn bed in the nursery after the mother is discharged in newborn inpatient days."

Total inpatient days reported on that form exclude those days applicable to newborn days. However, as clearly stated, days of care for newborns outside the nursery are not considered to be newborn days.

We believe this decades-old manual instruction (in place since 1975) supports our position that all references to the exclusion of the costs, days, or beds of nursery units refer only to the regular, healthy baby nursery, and that the proposed language represents a clarification rather than a shift in policy. We recognize that some of these references may not have been as precise as they could have been when they refer only to "newborn beds" or "nursery beds," and this imprecision occasionally has led to confusion both within and outside the agency. However, where the instructions are specific, these terms are sufficiently well-defined so that they can reasonably be interpreted to refer only to a regular, healthy baby nursery.

Comment: Commenters suggested that past practice on the part of Medicare's fiscal intermediaries with regard to counting these beds has been inconsistent. That is, some intermediaries have allowed hospitals to exclude only those days that a newborn is in the nursery, while other intermediaries have allowed hospitals to exclude any day a newborn is not in a certified-intensive care unit. Therefore, the commenters believe it would be improper to begin to exclude them now. Commenters questioned whether we would require intermediaries to adjust unsettled past cost reports where these beds were excluded incorrectly. It was suggested that doing so would constitute retroactive rulemaking.

Response: We recognize that there have been inconsistencies in the application of this policy. We believe this has stemmed from the absence of a specific provision in the instructions on the treatment of subintensive/intermediate care beds, which this clarification should remedy. In light of these previous inconsistencies, we expect that all fiscal intermediaries that have not been correctly counting newborn beds consistent with our policy, as clarified in this final rule, must ensure that they revise their practices effective for cost reporting periods beginning on or after October 1, 1995. We expect that those fiscal

intermediaries that have been applying our policy appropriately will continue that practice.

Comment: Several commenters questioned whether the costs of these neonatal intermediate units were included in the calculation of the prospective payment system standardized amounts. They stated that unless we could demonstrate that the costs of these units were included in the base year used to calculate the standardized amounts, there is no basis for counting these beds when determining the resident-to-bed ratio.

Response: As indicated above in a previous response to comment, our policy to include the days, costs, and beds of these units predates the prospective payment system, as well as the base year (1981) that was used to set the standardized payment amounts. Consequently, we disagree that we should be prohibited from clarifying this policy due to apparent inconsistencies in its implementation.

Comment: Additional comments related specifically to how we differentiate between healthy baby nursery beds and special care beds. Commenters requested guidance on the status of those beds that are occasionally used to treat less healthy newborns, but that are actually located within a regular, healthy baby nursery. The commenters noted that currently there is no clear definition in the regulations or manual instructions that could be used to identify an intermediate level of special care between a healthy, or regular, nursery and a neonatal intensive care unit. Finally, one commenter suggested that we consider licensure criteria for distinguishing between treatment units.

Response: Our bed counting policy essentially is determined by our policies for including or excluding costs and days from the calculation of Medicare costs on the cost report. These policies have consistently followed the general principle that we do not attribute costs or days to individual beds, but rather to units or departments. Therefore, individual beds that are occasionally used to treat less healthy infants, but that are located within a regular, healthy baby nursery, continue to be treated as part of the unit in which they are located, that is, as part of the healthy baby nursery. In considering whether the beds used to treat sick infants constitute an intermediate neonatal care unit, one must consider the cost center concept. Section 2302.8 of the Provider Reimbursement Manual-Part 2 describes a cost center "as an organizational unit, generally a department or its subunit, having a common functional purpose for which direct and indirect costs are accumulated * * *." A regular, healthy baby nursery serves as a custodian of healthy infants, whereas the intermediate or subintensive neonatal care unit provides medical care to sick infants with very different types of costs being incurred. Therefore, the appropriate cost center with which to count the beds of an intermediate neonatal care unit is the Adults and Pediatrics cost center.

While there is a great deal of variation in the types of units that exist to care for infants, the Medicare fiscal intermediaries have been required for some time to distinguish between nurseries and intermediate units for cost reporting purposes.

Also, concerning the suggestion that we rely on licensure designations to differentiate between units, we do not believe this would be a feasible alternative due to variations in licensing criteria across the country.

Comment: A representative of a group of Medicare's fiscal intermediaries requested that we retain the language in § 412.105(b) specifically including neonatal intensive care beds in the bed count. This commenter also pointed out that what we refer to as beds are often referred to instead as bassinets, and that we should include both phrases in the regulations. Finally, we were asked to clarify our policy regarding the counting of beds or bassinets kept in the mother's room, for example, in an alternative birthing center.

Response: We proposed deleting the reference to the inclusion of neonatal intensive care unit beds from the regulations because we believe that reference led to confusion concerning the beds excluded from the hospital bed count. We continue to believe that the proposed wording, combined with the policy clarification published in last year's proposed and final rules, sufficiently defines our intentions as to which beds are to be excluded. We agree that "bassinets" should be included in the definition for determination of the number of beds. Therefore, we are revising § 412.105(b) accordingly.

With regard to beds placed in the mother's room rather than in a healthy baby nursery, these beds or bassinets are not counted in addition to the mother's bed already present in that room. We do not believe, however, that it is necessary at this time to add a reference to this issue in § 412.105. Nevertheless, we will continue to evaluate the policy implications of these arrangements in the future.

E. Disproportionate Share Adjustment (Section 412.106)

Section 1886(d)(5)(F) of the Act provides for additional payments for hospitals that serve a disproportionate share of low income patients. A hospital's disproportionate share adjustment is determined by calculating two patient percentages (Medicare Part A/Supplemental Security Income (SSI) covered days to total Medicare covered days, and Medicaid but not Medicare Part A covered days to total inpatient hospital days), adding them together, and comparing that total percentage to the hospital's qualifying criteria. These calculations are done by HCFA and the fiscal intermediary on a Federal fiscal year basis. However, § 412.106(b)(3) currently states that if a hospital prefers that HCFA use its cost reporting period instead of the Federal fiscal year, it must furnish to its intermediary, in machine-readable format as prescribed by HCFA, data on its Medicare Part A patients for its cost reporting period. These data take the place of the Federal fiscal year MedPAR file data in obtaining the Medicare Part A/SSI percentage. To ensure that the hospital is reporting actual Medicare Part A patient days, we match the hospital's data to the HCFA MedPAR data. In addition, we have required that a hospital accept the recalculated percentage, even if it is lower than the Federal fiscal year percentage.

In the last few years, this process has proven to be unsatisfactory for several reasons. First, it is an administrative burden for the hospital to prepare a tape that includes all its Medicare Part A inpatient days. In addition, the hospital's tape data have seldom exactly matched the MedPAR data. In that case, we can use only the data that match. Finally, and probably often due to this second problem, the resulting disproportionate patient percentages are invariably lower than the original HCFA determined percentage. We proposed to alleviate these problems by continuing to provide hospitals an alternative to base their percentage on their cost reporting year, but relieving them of the tape requirement.

Therefore, we proposed that if a hospital wishes a recalculation based on its cost reporting period, the hospital would notify HCFA in writing of its request that the Medicare Part A/SSI percentage be calculated based on its own cost reporting year. The hospital would be required to provide HCFA with its name, provider number, and cost report period end date. HCFA, in turn, would use all MedPAR records for that hospital from the requested time period, as opposed to only those records that matched between the MedPAR file and the hospital's tape data. This should provide hospitals with more appropriate Medicare Part A/SSI percentages.

In addition, we proposed to process these requests on a quarterly basis. Processing these individual requests for recalculation on a flow basis has become an administrative burden on the available HCFA computer processing resources. Therefore, we believe it is necessary to batch these requests and run the MedPAR data on a set schedule. This will be much more efficient and predictable.

Accordingly, we proposed to revise § 412.106(b)(3) to provide that HCFA will accept a hospital's written request, transmitted through its fiscal intermediary, for a recalculation of its Medicare Part A/SSI percentage based on its cost reporting period. The written request should include the hospital's name, provider number, and cost report period end date. We would perform a recalculation only once per hospital per cost report period, and the resulting percentage becomes the hospital's official Medicare Part A/SSI percentage for that period.

Comment: We received three comments, all of which supported our proposal to use the MedPAR file data to recalculate Medicare Part A/SSI percentages rather than continuing the requirement that hospitals submit a tape of their Medicare Part A data based on their cost reporting periods. However, one commenter was concerned that HCFA provide an opportunity for hospitals to verify the data, and another commenter requested that we add a provision that would hold a hospital harmless if the Medicare Part A/SSI percentages decreased when this alternative was requested. The latter commenter suggested that a hospital affected by the "hold harmless" provision be subject to a processing fee for the unused cost reporting period.

Response: Since there was no opposition to the proposed change, we are adopting it in this final rule. Because the SSI data used in the calculation are protected by the Privacy Act, we cannot provide an opportunity for hospitals to verify these data. The data that the Social Security Administration (SSA) uses to determine the Medicare Part A/SSI percentage are not released to HCFA and therefore we are unable to produce these data for hospitals. We must accept the data that are officially collected and compiled by the SSA on a monthly basis. The SSA is responsible for administering the SSI program and keeps track, on a monthly basis, of those individuals who receive SSI benefits.

Concerning the request for a "hold harmless" provision, it has been our consistent policy that a hospital that requests a recalculation of its Medicare Part A/SSI percentage based on its cost reporting period must accept the result of that calculation in place of the Federal fiscal year calculation. We believe that this policy prevents hospitals from taking advantage of the opportunity to request this procedure merely so that they can choose the higher percentage. Ideally, a hospital will request a recalculation only if it has not qualified for a disproportionate share adjustment but believes it is close to qualifying.

F. Essential Access Community Hospitals (EACHs) and Rural Primary Care Hospitals (RPCHs) (Sections 412.109, 413.70, 424.15, 485.603, 485.606, 485.614, 485.620, and 485.639, 485.645)

On May 26, 1993, we published a final rule to implement the EACH program (58 FR 30630). The rule set forth the requirements for designating certain hospitals as EACHs or RPCHs, the conditions that an RPCH must meet to participate in Medicare, and the rules for Medicare payment for services furnished by EACHs and RPCHs. The final rule implemented section 1820 of the Act, as added by sections 6003(g) and 6116(b)(2) of Public Law 101–239 and revised by section 4008(d) of Public Law 101–508. The amendments were intended to promote regionalization of rural health services in grant States, improve access to hospital and other health services for rural residents, and enhance the provision of emergency and other transportation services related to health care.

Section 102 of the Social Security Act Amendments of 1994, Public Law 103–432 (SSAA '94), made significant changes in the provisions of the Medicare law governing the EACH/RPCH program. To implement these changes, we proposed to revise the regulations as follows:

1. Designation of Urban Hospitals as EACHs (Section 412.109)

Section 1820(e) of the Act previously provided that only rural facilities could be designated as EACHs, and all EACHs were to be paid as sole community hospitals (SCHs). Section 102(b)(1) of SSAA '94 revised section 1820(e) of the Act to allow hospitals located in urban areas to be designated as EACHs if they have entered into network agreements with RPCHs and meet other applicable requirements. As EACHs, these urban facilities may qualify for EACH grants. However, they are not eligible for the special payment methodology afforded rural EACHs. For payment purposes, rural EACHs are treated as sole community hospitals (SCH). Section 1886(d)(5)(D) of the Act was amended to clarify that only hospitals designated as EACHs *and* located in rural areas are treated as SCHs for payment purposes. Urban EACHs will therefore continue to be paid at the applicable urban rates.

To implement this provision, we proposed to revise § 412.109 to remove the current rural location requirement for EACH designation, and to provide that payment as an SCH is limited to EACHs in rural areas. As explained below, we also proposed to revise that section to allow a State that has received an EACH grant to designate an otherwise qualified hospital in an adjoining State as an EACH.

In conjunction with this change, we proposed to make a technical correction to a reference in § 485.603.

We received no comments in response to these proposals, and are, therefore, adopting them as proposed.

2. Designation of EACHs and RPCHs in States Adjoining Grant States (Sections 412.109 and 485.606)

Section 1820(c) of the Act previously provided that hospitals could be designated as EACHs only if they were located in States receiving EACH grants. Section 1820(i)(2) of the Act did authorize designation of RPCHs outside the grant States; however, the number of facilities designated under this authority was limited to 15 nationally, and only the Secretary, not individual grant States, could make the designation. Section 1820(i)(2) of the Act further requires the Secretary, in making the special designations, to give preference to facilities that have entered into network agreements with other facilities in grant States, thus indicating a strong preference for designation of RPCHs in States adjoining grant States. Section 102(b)(2) of SSAA '94 amended section 1820 of the Act to authorize the individual grant States to make designations of both EACHs and RPCHs in adjoining States, if the facilities so designated are otherwise qualified and have entered into network agreements with EACHs or RPCHs in the grant State. The legislation does not limit the number of such designations. To implement this change, we proposed to revise §§ 412.109 and 485.606 to permit these new designations of EACHs and RPCHs by adjacent States that have received grants. We proposed that hospitals designated in this way will be required to meet other applicable requirements, and we plan to make such designations subject to review and

approval by the HCFA regional offices on the same basis as designations of facilities in the grant State. That is, the designation will not result in recognition of a facility as an EACH or RPCH for Medicare or Medicaid purposes until HCFA has determined that the requirements are met.

We received no comments in response to these proposals, and are, therefore, adopting them as proposed.

3. Designation of EACHs and RPCHs by States That Have Received Grants (Sections 412.109 and 485.606)

Section 1820(a)(1) of the Act establishes a program under which the Secretary makes grants available to not more than seven States to carry out certain activities, including designating hospitals or facilities in the State as either an EACH or an RPCH. Because there is no assurance that funding of this grant program will continue, some or all of the seven States may not receive grants under section 1820(a)(1) of the Act in the future. Since States may not continue to "receive" grants, we proposed to revise the regulations pertaining to EACHs and RPCHs by replacing references to "States receiving grants" with references to "States that have received grants" or "a State that has received a grant," as appropriate. Specifically, we proposed to revise the designation of EACHs and RPCHs under current § 412.109(b) and (c), and § 485.606, respectively, to include these revised references. Should the grant program expire, these proposed revisions would prevent any uncertainty that may arise as to the status of designations made by States that have received grants.

We received no comments in response to these proposals, and are, therefore, adopting them as proposed.

4. Change in Payment for Outpatient RPCH Services (Section 413.70)

Previously, section 1834(g) of the Act provided that payments to RPCHs for outpatient services under the cost-based facility fee plus professional charges method were to be determined under section 1833(a)(2)(B) of the Act. That section states that payment is to be made at the lesser of the reasonable cost of the services or the customary charges for the services. (This is commonly referred to as "LCC," that is, the lesser of costs or charges.) Current regulations at § 413.70(b)(2)(i) require that payment to RPCHs under the cost-based facility fee plus professional services be made in accordance with the LCC principle. This principle is set forth under § 413.13.

Section 102(e)(2) of SSAA '94 amended section 1834(g)(1) of the Act to provide that payment for outpatient RPCH services under the cost-based facility fee plus professional charges method are to be determined without regard to the amount of the customary charge. To implement this change, we proposed to amend § 413.70(b)(2)(i) to provide that for payment for RPCH outpatient services made under the cost-based RPCH payment plus professional services method, the principle of the lesser of costs or charges does not apply.

We received no comments in response to these proposals, and are, therefore, adopting them as proposed.

5. Content of Required Physician Certification (Section 424.15)

Section 1814(a)(8) of the Act previously provided that Medicare Part A could pay for inpatient RPCH services only if a physician certified that the services were required to be furnished immediately on a temporary, inpatient basis. Section 102(a)(3) of SSAA '94 deleted this requirement and provided instead that Medicare Part A will pay for the inpatient RPCH services only if a physician certifies that the individual may reasonably be expected to be discharged or transferred to a hospital within 72 hours after admission to the RPCH. We proposed to revise § 424.15 to reflect the new requirement.

We received no comments in response to this proposal, and are, therefore, adopting it as proposed.

6. Length-of-Stay Requirement for RPCHs (Sections 485.614 and 485.620)

Section 1820(f)(1)(F) of the Act previously allowed all RPCHs to keep inpatients no longer than 72 hours before discharging them or transferring them to a full-service hospital, unless discharge or transfer was precluded by inclement weather or other emergency conditions. Section 102(a)(1) of SSAA '94 removed the per-stay limitation and substituted for it a provision under which the Secretary may terminate the designation of a facility as an RPCH if the Secretary finds that the average length of stay in the preceding year exceeded 72 hours. The provision further states that periods of stay in excess of 72 hours that occurred because discharge or transfer were precluded by inclement weather or other emergency conditions are not to be taken into account in computing a facility's average length of stay for this purpose.

To implement this change, we proposed to revise §§ 485.614 and 485.620 to delete the current per-stay limitation, and to replace it with a requirement for a facility-wide average length of stay that does not exceed 72 hours, excluding parts of stays in excess of 72 hours that occurred because of inclement weather or other emergencies. In the case of a currently participating RPCH, termination of the RPCH designation can be made effective only by ending Medicare participation. Therefore, we proposed to revise § 489.53 to authorize termination of the provider agreement of an RPCH if HCFA finds that it does not maintain the required average length of stay.

We received no comments in response to these proposals, and are, therefore, adopting them as proposed.

7. Restriction on Scope of Surgical Services to RPCH Inpatients (Section 485.614 and new Section 485.639)

Before the Social Security Act Amendments of 1994 were enacted, there were no explicit restrictions on the type or extent of surgical activity that could be performed in a RPCH. These facilities and their practitioners were, however, required to conform to applicable State licensure and scope of practice laws. Section 102(a)(1) of SSAA '94 added an explicit restriction on surgical activity by RPCHs. Specifically, a State may not designate a facility as an RPCH if the facility provides inpatient hospital services consisting of surgery or any other service requiring the use of general anesthesia (other than surgical procedures specified by the Secretary under section 1833(i)(1)(A) of the Act), unless the attending physician certifies that the risk associated with transferring the patient to a hospital for such services outweighs the benefits of transferring the patient to a hospital for such services. The procedures specified by the Secretary under section 1833(i)(1)(A) of the Act are those that are performed on an inpatient basis in a hospital but which also can be performed safely on an ambulatory basis in an ambulatory surgical center (ASC) or in a hospital outpatient department. Implementing regulations for section 1833(i)(1)(A) of the Act are set forth at § 416.65. HCFA also publishes a list of covered surgical procedures in Addendum A to Part 3 of the *Medicare Carriers Manual*.

To implement this change, we proposed to revise § 485.614 to reflect the new statutory provision. We note that the law still does not limit the scope of surgical procedures that can be performed for RPCH outpatients, and that both hospitals and ASCs, the other two facilities in which ASC procedures can be performed, are subject to specific health and safety rules on administration of anesthesia and performance of the surgery. To ensure adequate health and safety protection for RPCH patients and to apply Medicare standards uniformly to ASC-type procedures, we also proposed to add, at § 485.639, a new RPCH condition of participation for surgical services. We note that the new condition would apply the same rules in the RPCH as now apply in an ASC, and that it would apply to both inpatient and outpatient surgery. Given the similarities between RPCHs and ASCs and the fact that identical procedures can be performed in each, we believe uniform health and safety rules are needed.

We received no comments in response to these proposals, and are, therefore, adopting them as proposed.

G. New Provision Subject to Public Comment To Allow Provision of Skilled Nursing Facility (SNF) Services by RPCHs (Section 485.645)

When we issued regulations (§ 485.645) to implement the RPCH provisions in section 1820 of the Social Security Act (see 58 FR 30630, May 26, 1993), we made a number of interpretations or elaborations to deal with situations that were not explicitly dealt with by the statute. Among them were these two policies: an RPCH with a swing-bed agreement could have no more than 12 beds for the use of inpatients (§ 485.645(a)(1)); and all 12 beds could "swing," that is, could be used to furnish both RPCH-level (acute) care as well as a SNF-level of care, as the individual patient required.

Congress changed those policies when it enacted section 102 of the Social Security Act Amendments of 1994. First, Congress rejected the 12-bed limit. Section 102(c) of SSAA '94 amended section 1820(f)(3) of the Act to provide instead that in the case of a hospital with a swing-bed agreement under section 1883 of the Act that applies to become a RPCH, the number of beds that the RPCH can use for furnishing SNF-level services may not exceed the total number of beds that were licensed beds at the time the hospital applies to become an RPCH, minus the number of inpatient RPCH beds. (Thus, the number of beds an RPCH may have for SNF-level care could be more or fewer than 12.)

Second, amended section 1820(f)(3) now refers only to "the number of beds used [by the RPCH] for the furnishing of such [SNF-level] services." This language does not also refer to using those beds to furnish such SNF-level services along with RPCH-level services.

Third, Congress provided that the six RPCH-level beds could not also be used to furnish SNF-level services. Specifically, section 1820(f)(3) now explicitly states that the number of beds an RPCH can use for furnishing SNF-level services must be calculated "minus the number of inpatient beds used for providing inpatient [RPCH-level (acute)] care." The latter indicates that Congress did not anticipate the six RPCH-level beds would also be used to furnish SNF-level services.

Further, in section 102(g) of SSAA '94, Congress enacted a number of conforming technical amendments to make explicit that various provisions applicable to hospitals should also be applicable to RPCHs. In doing so, however, it conspicuously failed similarly to amend section 1883 of the Act, "Hospital Providers of Extended Care Services." That is the provision that permits hospitals to have swing beds. Not amending section 1883 is consistent with our conclusion that Congress intended to permit certain RPCHs to have a limited number of beds for furnishing SNF-level services, but not dual-purpose swing beds.

We believe these Congressional policy changes are based on sound policy reasons. First, the six-bed limit for inpatient RPCH-level care is reconfirmed. That was a major element in Congress' decision in the original legislation to encourage small rural hospitals to convert from being full service hospitals to become limited purpose facilities. Second, all RPCHs are now treated the same with respect to the limit on the number of RPCH-level inpatient beds. Third, hospitals that had swing-bed agreements can continue to furnish SNF-level services when they become RPCHs, without interfering with the other RPCH provisions.

As noted, although section 1820 of the Act, as amended by section 102(c) of SSAA '94, does not provide for an RPCH to continue to use its beds interchangeably to provide RPCH-level and SNF-level services, it does provide for an existing swing-bed hospital to be designated as an RPCH (with up to 6 beds used exclusively for inpatient RPCH-level services) and retain its remaining beds to be used exclusively for SNF-level services. Payment for the RPCH-level care provided by the RPCH would be determined in accordance with 42 CFR 413.70(a). In establishing the payment methodology for the SNF-level services provided by the RPCH, we have concluded that since SNF-level services provided by the hospital had previously been paid under the methodology specified for swing-bed hospitals at 42 CFR 413.114, it is consistent with sound application of these reasonable cost principles to continue to pay for those services under that methodology.

In this final rule, we are revising § 485.645 accordingly to set forth the eligibility and payment policies described above. We recognize that there may be concerns about the implementation of this provision with respect to facilities originally designated as RPCHs before the effective date of the new amendments, and are providing a 60-day public comment period on the § 485.645 changes only. (As discussed above in section IV.F of this preamble, the other changes needed to implement section 102 of SSAA '94 were included in the proposed rule and, in the absence of public comment, are being adopted without change.) Because we did not include these changes in the proposed rule, we considered delaying the implementation of section 102(c) further in order to allow time for full notice-and-comment rulemaking. However, the statutory effective date is October 31, 1994, and several facilities have indicated an interest in being designated as RPCHs under the new provisions. Moreover, we believe these changes may be necessary to assure access to SNF-level care in rural areas. In this context, we believe it would be contrary to the public interest to further delay implementation by the amount of time needed for proposed rulemaking. We will consider carefully all comments we receive, and make any further changes needed as the result of them in a final rule. We also are considering whether other, more stringent health and safety rules may be needed in light of the new provisions, and may propose further changes in this area in the future.

H. Rebasing the Hospital Market Basket

Our practice has been to update or rebase the market basket about every 5 years. Occasionally, we have adjusted this timing to coincide with the Department of Commerce, Bureau of Economic Analysis' schedule for updating the interindustry model of the United States (U.S.) economy, which is released every 5 to 7 years. The interindustry model includes detailed cost analyses of the entire U.S. economy including the hospital industry. In developing the current market basket, effective beginning October 1, 1990, we used 1987 hospital data from the American Hospital Association's (AHA's) 1988 Annual Survey for six major expense categories (wages and salaries, employee benefits, professional fees, depreciation, interest, and a residual "all other" category). We used AHA's Hospital Administrative Services (HAS) data from 1987 to derive the weights for professional liability

insurance, food, and pharmaceutical products. Weights for most of the remaining subcategories were derived from Department of Commerce, Bureau of Economic Analysis data trended forward to 1987. For a detailed description of the rebased market basket effective October 1, 1990, see the September 1, 1990 final rule (55 FR 36043).

Although it has been 5 years since the most recent rebasing of the market basket, in the proposed rule we announced our intention to schedule market basket rebasing for FY 1997. We believe that a 1-year delay in the usual schedule is advantageous for the following reasons. First, it provides an opportunity to review and incorporate two important new data sources that are not available at this time. The first of these, the FY 1992 and 1993 Medicare cost report data, contain more detailed data on labor-related and capital-related costs. We are planning on replacing the AHA Annual Survey data with Medicare cost report data for the main operating and capital cost weights. In the next several months, we are planning to compare and analyze the impact of this change to ensure the validity and consistency of the rebased market baskets for operating and capital costs. We believe that using the Medicare data would be an improvement since these data are reported directly to HCFA by Medicare participating hospitals, are readily available to us in a timely manner, and would free us from relying on data that is collected by outside organizations.

The second new data source we anticipate obtaining and analyzing is the 1992 Bureau of the Census' Assets and Expenditures Survey, which will be available later this year. The Census survey will provide much more detailed operating and capital cost data, and we anticipate that we will be able to use this survey to allocate the main cost category weights into more detailed subcategory weights for both operating and capital costs.

In addition to using the market basket to update the payment rates, we also use the percentages of the labor-related items (that is, wages and salaries, employee benefits, professional fees, business services, computer and data processing, blood services, postage, and all other labor-intensive services) to determine the labor-related portion of the standardized amounts. The labor-related portion of the standardized amounts is that portion that is subject to adjustment by the hospital wage index. In order to estimate if postponement of the market basket rebasing would adversely affect hospital payments due to a potential change in the labor-related portion of the payment amounts, we conducted an analysis using the 1987 index rebasing methodology (with 1992 equivalents of the data sources used in 1987). This analysis indicates only a minor difference in the 1987 and 1992 AHA cost shares for compensation costs, which are the major portion of labor-related costs. Therefore, we believe that delaying the market basket rebasing until FY 1997 will not disadvantage hospitals and will allow us to use more detailed and current data. We did not receive any comments opposing this plan, and we intend to rebase the market basket as a part of our FY 1997 changes to the prospective payment system.

V. Changes and Clarifications to the Prospective Payment System for Capital-Related Costs

A. Update Framework for Prospective Payment System for Inpatient Hospital Capital-Related Costs and Possible Revisions to the Federal Rate (Section 412.308(c)(1)(ii))

1. Introduction

For FY 1992 through FY 1995, § 412.308(c)(1) provides that the update for the capital prospective payment rates (Federal rate and hospital-specific rate) will be based on a 2-year moving average of actual increases in Medicare inpatient capital costs per discharge. The regulations provide that, beginning in FY 1996, HCFA will determine the update in the capital prospective payment rates based on an analytical framework that will take into account (1) changes in the price of capital (which we will incorporate into a capital input price index), and (2) appropriate changes in capital requirements resulting from development of new technologies and other factors (such as existing hospital capacity and utilization). The objective of the capital update framework is to determine a rate of increase in aggregate capital prospective payments that, along with a rate of increase in DRG operating payments, ensures a flow of capital and operating services for efficient and effective care for Medicare patients.

In the June 2, 1995 proposed rule we presented a formal proposal for an update framework for the prospective payment system for hospital inpatient capital-related costs (60 FR 29227). The proposal followed a series of preliminary models of an update framework in our FY 1992, FY 1993, FY 1994, and FY 1995 rulemaking documents. We received numerous public comments on the proposed framework, and we present our responses to those comments below.

The proposed update framework included a capital input price index (CIPI) that parallels the operating input price index. The CIPI measures the pure price changes associated with changes in capital-related costs (prices x "quantities"). The composition of capital-related costs is maintained at base-year FY 1987 proportions in the CIPI. As such, the composition of capital reflects the underlying capital acquisition process. We employ FY 1987 as the base year for this preliminary CIPI for consistency with the operating input price index. We will periodically update both the operating and the capital input price indexes to reflect the changing composition of inputs for capital and operating costs.

The proposed capital update framework, like the operating update framework, incorporated several policy adjustments in addition to the CIPI. We proposed to adjust the CIPI rate of increase for case-mix index-related changes, for intensity, and for error in previous CIPI forecasts. We also discussed a possible adjustment for the efficient and cost-effective use of capital (such as movable equipment, buildings and fixed equipment) in the hospital industry.

In the proposed framework, we attempted to maximize consistency with the current operating framework, in order to facilitate the eventual development of a single prospective payment system update framework. We also attempted to promote the goals that motivated the adoption of the capital prospective payment system, especially the goals of promoting more effective and efficient utilization of capital resources in the hospital industry and establishing incentives for hospitals to make cost-effective decisions regarding acquisition of new capital resources.

We invited comments and recommendations on all aspects of the proposed framework. We expressed interest in suggestions regarding the CIPI, the proposed policy adjustment factors, and alternative methodologies for deriving the factors. We were especially interested in comments on a possible efficiency adjustment.

2. ProPAC Recommendation for Updating the Capital Prospective Payment System Federal Rate

In its March 1, 1995 report to Congress, ProPAC recommended the use of an update framework that includes a capital market basket component. The ProPAC market basket measures 1-year changes in the purchase prices of a fixed basket of capital goods purchased by hospitals. The ProPAC framework also includes several policy adjustment factors. A forecast error correction factor adjusts payment rates so that the effects of past errors are not perpetuated. A financing policy adjustment accounts for the effects of substantial deviations from long-term trends in interest rates on hospital capital costs. The ProPAC capital update framework also includes adjustments for scientific and technological advances, productivity, and case-mix change similar to those employed in the ProPAC operating update framework. ProPAC also recommends the adoption of a single update framework for adjusting operating and capital prospective payment rates when the transition to full Federal rate capital payments is complete. ProPAC believes that using a simplified approach comparing annual price changes in capital would facilitate the development of such a unified framework.

Our long-term goal is to develop a single prospective payment system update framework. We will soon begin to study development of a unified framework. In the meantime, we will continue to maintain as much consistency as possible with the current operating framework in order to facilitate the eventual development of a unified framework.

The ProPAC and HCFA update frameworks share certain goals. The goal of each framework is to provide a rate of increase in capital prospective payments that, along with the rate of increase in operating prospective payments, will ensure a flow of capital and operating resources that will allow for efficient and effective care for Medicare patients. Both frameworks are designed to provide increases for the purchase of quality-enhancing new technologies. Both frameworks provide for case-mix adjustments to remove the effects of upcoding and to adjust for changes in within-DRG severity. Both frameworks also seek to encourage efficient capital spending behavior. Although the frameworks adopt different methodologies for promoting some of these goals, they are compatible to the degree that they share these goals.

The major difference between the ProPAC and HCFA frameworks concerns the purpose and structure of the capital input price index, or market basket. ProPAC's framework is based on the premise that capital prospective payments are only for future capital purchases and should not reflect the vintage nature of capital. Thus, ProPAC's proposed capital market basket reflects the projected increase in the purchase price of capital goods from one year to the next. HCFA's framework is based on the premise that capital prospective payments are for hospitals' capital-related expenses, which include the expenses related to future capital-related purchases. That is, HCFA's framework addresses the input price component of expenses associated with hospitals' given stock of capital in a particular fiscal year; ProPAC's framework ignores hospitals' present stock of capital and focuses on changes in input prices associated with capital purchases that hospitals will make in a particular fiscal year.

The HCFA CIPI projects the price changes associated with the accounting or vintage costs of capital assets. The HCFA CIPI is based on a definition of capital-related expenses and associated capital-related prices derived from accounting practice (including required HCFA prospective payment system accounting practice) and consistent with economic theory. HCFA believes that the concept of capital-related prices incorporated into the HCFA CIPI is more appropriate than the concept incorporated into the ProPAC market basket because the consumption of capital is not just what is purchased in one year. The consumption of capital has a time-dimension: Capital is not used up immediately but rather over time. This feature of capital is reflected in the accounting definition of capital cost, and it should be reflected as well in the concept of capital prices in the CIPI. The transition from reasonable cost reimbursement to payment under a prospective system does not cancel the applicability of general accounting practice or the HCFA accounting practice derived from it. Thus the concepts of capital-related expenses and capital-related prices continue to be appropriate. Furthermore, the base capital rates were computed on the basis of accounting costs. HCFA believes that it is more consistent to update those rates on the basis of the changes in prices associated with those costs rather than on the basis of changes in current year purchase prices alone.

The HCFA CIPI captures the vintage feature of capital price by using a vintage average approach, that is, weighted averages of purchase prices and interest rates up to and including the current year. The use of vintage averages as the measure of price changes tracks the flow of consumption of capital. The vintage approach better reflects what hospital cash-flow needs are as new assets are brought on, since hospitals still bear the costs of older assets as the new assets are brought on.

HCFA believes that the CIPI appropriately reflects the prices associated with past and current period purchases of capital. Under the HCFA approach, the price change associated with the capital costs for any year is a weighted average of the prices associated with depreciation, interest and other capital costs for that year. The prices associated with the depreciation costs during the year are an average of the prorated purchase prices for the assets in use during that year (25 years for buildings and fixed equipment, 10 years for movable equipment, including current year purchases). The prices associated with the interest costs during the year are an average of the interest rates on debt instruments in effect during that year (22 years, including debt instruments that are new in the current year). Capital-related costs for insurance have an annual time dimension, and therefore the prices associated with those expenses are current year prices only.

In addition to the disagreement over whether the CIPI should reflect the vintage nature of capital, HCFA and ProPAC also disagree over the treatment of interest. ProPAC proposes to account for interest rate changes through a separate financing policy adjustment that would account for significant changes in long-term interest rates. This adjustment would increase the update in case of significant long-term interest rate increases, and decrease the update in cases of significant interest rate decreases. (ProPAC has not identified the threshold that constitutes "significant" interest rate changes.)

HCFA believes that there must be an interest rate component in a capital input price index. Sound accounting practice includes interest, along with depreciation, as a component of capital cost. The interest and depreciation components of capital cost track the flow of consumption of capital inputs. Price is a component factor of cost (that is, cost is the product of price and quantity), and capital cost has both depreciation and interest components. There must therefore be an interest component of capital price just as there is an interest component of capital cost.

Furthermore, ProPAC's treatment of interest assumes that only current year interest rate changes need to be measured to capture the relevant price effects of interest rate changes. HCFA believes that the price aspects of interest costs, like the price aspects of depreciation costs, have a time dimension that must be captured in the CIPI. Whether the current year interest rate reflects a net lower price of financing to the hospital depends not on comparison of the current year's interest rate to the previous year's interest rate,

---

but on the effect of the current year interest rate on all the hospital's debt instruments. For example, assume that the previous year's interest rate was 8 percent, and the current year's interest rate is 5 percent. However, as the hospital enters new financing arrangements at the current rate of 5 percent, it retires debt instruments from 20 years earlier that bore an interest rate of 3 percent. The price effect of the current year's interest rate is thus higher, not lower, as new debt instruments at 5 percent replace old debt instruments at 3 percent. HCFA believes it to be a great advantage of its CIPI that it directly tracks price effects such as these.

Finally, the pure price aspects of interest costs (that is, the interest rate and the purchase price that is represented in the amount of loan principal) are typically beyond the control of the hospital industry. To be sure, the actual decision to purchase capital assets or acquire debt is a "quantity" decision and typically is discretionary for a particular span of time. However, in measuring the actual expected price per unit of real capital, independently of any evaluation of the propriety of any actual purchase decisions, it is essential to recognize that the industry has some control over the amount of capital it purchases but little or no control over the price it pays for capital. Thus, the pure price aspect of interest cost changes must be incorporated into the CIPI. Otherwise, the CIPI will not accurately reflect the prices faced by hospitals who must borrow to finance necessary capital acquisitions. Limitations on the quantity of capital are appropriately implemented through policy adjustment factors. The ProPAC approach artificially eliminates pure price changes related to interest costs from the CIPI and incorporates them into a discretionary adjustment factor. The HCFA CIPI retains all price components of increases in interest costs as one measure of inflation in capital-related expenses. It thereby keeps price and quantity aspects distinct, allowing separate analysis of each factor of increases in capital expenses.

We do not agree with the ProPAC that the approach of comparing annual price changes in capital is more conducive to a single update factor. We believe that price changes in current hospital capital expenses are analogous to price changes in current hospital operating expenses. The HCFA CIPI measures the price change in capital expenses, and is, therefore, the appropriate analog to the input price index used to update operating payments under prospective payment. We provide further comments on particular ProPAC recommendations in section V.A.3 of this preamble.

3. Measurement of Capital Input Price Increases

a. Introduction. HCFA discussed a capital input price index as one component in developing future update factors for the Federal rate in the September 1, 1992 **Federal Register** (57 FR 40016). We have presented revised versions of the capital input price index in the May 26, 1993 (58 FR 30448), September 1, 1993 (58 FR 46490), May 27, 1994 (59 FR 27876), and September 1, 1994 (59 FR 45517) issues of the **Federal Register**.

In the June 2, 1995 proposed rule (60 FR 29229), we formally presented a capital input price index for public comments prior to adoption of this final rule. The proposed CIPI parallels the operating input price index. Both the CIPI and the operating input price index are designed to measure input price changes for hospitals' current year expenses, that is, to separate pure price changes from quantity and expenditure changes. The operating sector input price index measures input price changes for operating-related expenses. The capital input price index measures input price changes for capital-related expenses, which include depreciation, interest, and other expenses (such as insurance related to capital goods).

b. HCFA Capital Input Price Index Methodology. The CIPI is based on the following assumptions:

- The Federal rate is based on the concept of capital-related expenses of capital assets used for patient care in the fiscal year and, therefore, any change in the Federal rate should take into account expected changes in the input price aspects of capital-related expenses.
- Capital-related expenses are defined as the sum of depreciation expense, capital-related interest costs, and other capital-related costs, including insurance and leases.
- The input prices related to capital-related expenses are typically beyond the control of the hospital industry (that is, the hospital is a price-taker, not a price-setter).

These assumptions lead directly to a definition of a CIPI that takes into account the price aspects of changes in depreciation expense, interest costs, and other capital-related costs. Thus, the CIPI includes three categories of capital-related expenses: depreciation, interest, and other capital-related costs (such as insurance). Further, the assumptions lead directly to input prices for depreciation and interest costs that, unlike operating costs, have a time dimension that must be captured in the CIPI.

Comment: A commenter suggested that the HCFA CIPI is flawed because it relies excessively on assumptions that could cause the update to be more likely to overstate or understate the true changes in prices than an input price index measuring year-to-year changes.

Response: We believe that the HCFA CIPI appropriately and accurately reflects the "pure" price change in capital expenses for the current year as well as other years or vintages. The CIPI was developed based on accepted accounting definitions of capital expenses and conceptually sound methodologies using appropriate data. We have continually improved the index by using more relevant data, as well as implementing comments received on three prior rulemaking documents. The assumptions we have made regarding price proxies, base year weights, and expected lives have been explained thoroughly and refined in the prospective payment system rulemaking documents for the last three fiscal years. These assumptions are based on accepted accounting, economic, and financial reasoning. Thus, we believe that those assumptions lead to valid results.

Current depreciation costs represent the summed depreciation for all purchases of capital assets that are still depreciable in the current period. The input prices associated with these depreciation expenses are the purchase prices attached to all past and current capital purchases for capital still depreciable in the current period. A weighted average of these purchase prices thus represents the input price associated with depreciation expenses in the current period. Thus, the depreciation input price for the current period measures price aspects of current depreciation expenses for capital, just as the operating input price index for the current period measures price aspects of current operating expenses for labor and non-capital goods and services. The depreciation input price appropriately differs from the operating input price in that the depreciation input price is a vintage-weighted composite of all past capital purchase prices, while the operating index input price measures purchase prices for current periods only.

Comment: Two commenters contended that HCFA's vintage-weighting approach will not provide sufficient updates to allow for replacement of capital. They conclude that the CIPI should therefore include only increases in current year purchase prices. One of the commenters submitted a detailed technical analysis concluding that the HCFA CIPI will allow HCFA to match payment increases for depreciation and interest with increases in depreciation and interest expenses, but will not allow HCFA to match increases in replacement costs of assets. This commenter questioned whether a focus solely on depreciation and interest is a necessary requirement for *prospective* payment for capital. The other commenter implied that the non-vintage approach will provide sufficient capital reimbursement to replace needed capital assets, while the HCFA CIPI looks at the current capital stock that has already been acquired and paid for.

Response: We concur with the comment that the HCFA CIPI captures increases in the price component of depreciation expenses, and, under reasonable assumption, will match price increases in interest rates. The issue of providing for replacement of capital assets is a difficult one. We agree with the commenters that an adequate update framework should be able to provide updates to payment rates sufficient to fund replacement of capital assets, where it is appropriate to do so. We do not necessarily believe, however, that it is appropriate for the Medicare program to support full replacement of assets where excess capital capacity exists.

As in the case of other issues regarding the update framework, the issue of replacement costs has both price and quantity aspects. Full replacement cost involves increases reflecting both price and quantity sufficient to replace existing assets. In this section, we discuss the replacement issue from the price aspect: that is, whether the vintage-weighting approach in the HCFA CIPI can provide, where appropriate, updates sufficient to fund full replacement. In this analysis, we make the assumption that it is appropriate to set the policy adjustments within the update framework at levels to provide for the quantities necessary to provide full replacement. In section V.A. below, we discuss our continuing analysis of capital cost increases during the period just prior to the implementation of prospective payment for capital. During that period, the Medicare program paid for operating costs on a prospective basis, but hospitals continued to receive cost-based payment for capital. That analysis suggests that an excess capacity of capital assets over efficient levels may exist. If that is the case, then adjustments to provide for less than full replacement of capital assets may be appropriate since underused capacity implies inefficient use of social resources.

We do not agree with the suggestion that the HCFA CIPI cannot adequately provide for replacement of assets. The HCFA CIPI provides increases in the price component of replacement costs for new capital by adequately reflecting price increases in capital expenses. Medicare's payment for capital has changed from retrospective cost-based reimbursement to prospective payment for an efficient level of capital. However, the concept of paying for capital expenses remains the same under capital prospective payment, just as the concept of paying for operating expenses has not changed. That is, under prospective payment, hospitals will be paid for an efficient level of operating and capital expenses.

The HCFA CIPI provides a conceptually sound measure of price changes associated with the capital expenses incurred by hospitals. The level of capital expenses incurred by a hospital in a given year is not a function merely of the annual percent change in the new capital purchase prices, but rather of the purchase prices and interest rates associated with all capital assets that are still in use for patient care and that are not yet fully depreciated. Because of the vintage nature of the CIPI, the percent change in the CIPI can appropriately be above, below, or equal to the annual percent change in capital purchase prices in any given year.

Analysis by the HCFA Office of the Actuary suggests that the CIPI should provide updates adequate to finance replacement of capital under reasonable assumptions about prudent hospital financial management. Industry sources and Medicare cost report data indicate that capital is not typically paid for in full when it is acquired. Rather, debt funding is the major form of capital financing used by hospitals. Actual cash outlays for capital thus consist primarily of payments for principal and interest on loans. The interest component inherent in the capital prospective payment system should cover interest costs for an efficient hospital.

The issue concerning replacement of assets is thus whether the depreciation component implicit in the prospective capital payment can, assuming an allowance for replacement of the full quantity of assets, cover the principal costs of debt for an efficient hospital while allowing accumulation of a reserve adequate to provide the necessary down payment for future capital purchases. In the early years of debt repayment, principal payments are relatively small. During that period, the portion of the rate payment related to depreciation in excess of principal costs of debt can be accumulated in a sinking fund. Sound financial management suggests that payments for capital expenses (depreciation and interest) that are in excess of the hospital's actual capital cash outlays (principal and interest) be accumulated and invested to provide for adequate replacement of assets. In other words, prudent hospitals would invest the sinking fund to earn interest. Based on examination of historical relationships and projected trends, we believe that accumulation of the sinking fund over the life of the asset will, on average, provide an adequate amount for asset replacement.

Current interest expenses represent the total interest costs for all still-active past debt instruments associated with past and current purchases of all capital assets currently used for patient care. The input prices associated with these interest expenses are the interest rates associated with all past debt instruments that are still active in the current period. A weighted average of these interest rates thus represents the input price associated with interest expenses in the current period. Thus, the interest input price for the current period measures price aspects of current interest expenses, just as the operating input price index for the current period measures price aspects of current operating expenses for labor and non-capital goods and services. The interest input price appropriately differs from the operating input price in that the interest input price is a vintage-weighted composite of all interest rates for debt instruments that are still active in the current period, while the operating index input price measures purchase prices for current periods only.

Comment: A commenter agreed with HCFA's inclusion of interest in the CIPI. However, the commenter did not agree with the HCFA vintage approach to determining the interest component. The commenter instead recommended measuring annual price changes in financing costs.

Response: We agree with this commenter that the price increases in interest are an integral and accepted component of capital costs and therefore should be included in the CIPI. However, we do not believe that using *annual* price changes in interest rates will appropriately measure the price change for interest expenses that have a vintage nature. The HCFA CIPI measures the price aspects associated with current interest expense, which include interest costs for all still-active past debt instruments appropriately weighted. It would be inappropriate to update the interest expense component of the CIPI by the annual change in the current year interest rate when current year interest expense reflects interest rates on debt in various years, or vintages. Also, using the change in the current year interest rate would create a volatile series in the CIPI that would lack predictability, as well as inappropriately measure price increases in current year interest expense. The HCFA CIPI should include a vintage-weighted interest component, appropriately weighted, to validly measure price increases in current year interest expense.

Comment: One commenter stated that once the negative interest adjustment proposed by HCFA is eliminated, ProPAC's CIPI and HCFA's CIPI show very little difference.

Response: HCFA has not proposed a negative adjustment for interest, but merely requires that the price aspect of interest expense be appropriately measured in the CIPI. In the most recent historical and forecasted periods, it is true that the interest component is negative; however, it is correctly negative because the effect of interest rate decreases in recent years has been to decrease the interest price faced by hospitals for all the debt instruments that are still in effect. In addition, the commenter's contention about the result of removing the interest component from the CIPI is erroneous. In many of the years from 1979 to 1994, removal of the interest component creates larger differences between the HCFA CIPI and the ProPAC CIPI.

Our original version of the CIPI employed proportional annual weights in determining the moving averages of the purchase prices associated with depreciation and interest. A commenter on a previous version of the CIPI recommended that proportional annual vintage weights for capital price proxies be replaced by non-proportional annual vintage weights that reflect the relative vintage purchases of capital. The commenter pointed out that annual purchases of real capital tend to increase over time. As annual purchases of real capital increase, the later years in the moving average of depreciation and interest costs should be weighted more heavily than the earlier years. We agree with this comment. Accordingly, a special data base was prepared to provide appropriate historical vintage weights for depreciation and interest input prices. The non-proportional vintage weights in the CIPI appropriately reflect the relative contributions of current capital purchase prices and current interest rates to total capital price in the current year.

Current year other capital-related expenses (for example, insurance) have an annual time dimension and, therefore, prices associated with these expenses are, like operating input prices, current year prices only.

Comment: One commenter recommended that HCFA use a more recent year as the base year for the CIPI to increase consistency with current hospital capital expenditure patterns. Another commenter agreed that delaying the rebasing will improve the market basket and, therefore, is appropriate.

Response: We agree that using a more recent base year is desirable and, as we discussed in the June 2, 1995 (60 FR 29229) proposed rule, we have done preliminary research into the effects of changing the base year from FY 1987 to FY 1992. The initial results from currently available data sources have shown small differences between the FY 1987 and FY 1992 base year weights, resulting in a minimal effect on the CIPI. We intend to use expanded capital-related data in the FY 1992 and FY 1993 Medicare cost reports in the rebasing effort. The expanded capital-related data is available beginning with FY 1992 cost reports; therefore, we are examining the data thoroughly for reliability and accuracy using FY 1993 as a validity check. To ensure that the data is reasonable, we plan to compare data from other sources, some of which are not available at this time, to the expanded capital-related data in the Medicare cost reports. Exercising this added discretion before using the expanded capital Medicare data will not only produce more representative and reliable data, but would also ensure that the data are less subject to interpretation and error. It is for these reasons that we delayed the rebasing originally planned for FY 1996.

The FY 1987 composite data base starts with financial variables from the American Hospital Association (AHA) Panel Survey. These data are augmented by data from the Medicare cost reports and from the Department of Commerce Capital Expenditure Survey. The composite data base provides annual estimates of nominal purchases for building and fixed equipment and for movable equipment. Leasing amounts were distributed among building and fixed equipment and movable equipment nominal purchases by first computing the percentage of total owner-operated nominal purchases attributable to each type of equipment, and then applying these percentages to total leasing amounts. Nominal purchases were then converted to annual real (that is, constant dollar) purchases by dividing nominal expenditures by an appropriate purchase price proxy.

Expected life for building and fixed equipment and for movable equipment were derived from Medicare cost reports by dividing the book value of assets by current year depreciation amounts. The relative distribution of real capital purchases within the respective life for building and fixed equipment (25 years) and for movable equipment (10 years) were derived from the special data base. These relative distributions are shown in Table 1. Relative distributions for a number of different time periods were averaged to obtain the distributions in Table 1. These distributions were all very similar regardless of the periods chosen and, therefore, we selected an average of the distributions in order to simplify the calculations.

Table 2 shows the historical, annual percentage changes in the capital-related price proxies employed in the CIPI prior to vintage-weighting. These proxies are as follows: the institutional construction index maintained by Boeckh for the unit prices of fixed assets; the machinery and equipment component of the Producer Price Index (PPI–11) for movable equipment; the average yield on domestic municipal bonds from the Bond Buyer index of 20 bonds (Muni); the average yield on Moody's corporate bonds (AAA); a composite of Muni and AAA indexes (Combined Muni/AAA); and the residential rent component of the Consumer Price Index (CPI Rent) for other capital costs.

We previously used the Engineering News-Record (ENR) building cost index as a price proxy for the unit price of fixed assets. However, we believe that the Boeckh institutional construction index is more applicable to the industry. The variation between the two indexes is minimal.

We applied the relative vintage depreciation weights from Table 1 to the appropriate non-vintage weighted historical, annual index levels (base year FY 1987) of depreciation price proxies to generate the current year, vintage-weighted component index levels for the CIPI depreciation sector. The annual percentage change between the non-vintage weighted historical, annual depreciation index levels are listed in Table 2. The annual percentage changes between the annual, vintage-weighted depreciation component index levels (base year FY 1987) are listed in Table 3. For example, the FY 1996 movable equipment index component percentage change of 1.8 percent in Table 3 was computed as the percentage change between the FY 1995 and FY 1996 vintage-weighted movable equipment component index levels. The FY 1996 movable equipment component index (base year FY 1987) represents the weighted-average of the index levels in the movable equipment price proxy (PPI–11 in Table 2) for the previous 10 years (that is, FY 1987 through 1996), weighted by the relative vintage weights listed for movable equipment in Table 1. These calculations are slightly different than prior versions of the CIPI in the **Federal Register**, and reflect a more refined weighting methodology.

As we have discussed in connection with previous versions of the CIPI, stability is an important criterion for evaluating such an index. Stability is an inherent characteristic of capital because of its vintage nature; since capital assets are consumed over time, they are replaced at a relatively slow rate. An input price index for capital should reflect the relative stability of capital assets themselves. Furthermore, excessive volatility in a price index deprives the index of predictability, thus inhibiting the ability of institutions to plan for changes in capital payments resulting from changes in the CIPI. We graphically demonstrated (using the projections available at that time) the stability of the annual HCFA vintage-weighted CIPI compared to annual changes in non-vintage-weighted capital purchase prices in Figures 1 and 2 in our discussion of May 27, 1994 (59 FR 27882).

ProPAC recommends a capital input price index based on annual changes in current capital purchase prices excluding consideration of weighted historical capital purchase prices (that is, not vintage weighted). We previously argued that the ProPAC index was not consistent with the operating input price index that is currently used to assist in updating DRG payment rates. We would add that the greater volatility in annual purchase prices would introduce an unacceptable degree of volatility in prospective capital payments and does not reflect the inherent stability that comes from the vintage nature of capital.

Comment: One commenter contended that the HCFA CIPI is excessively complicated, considering that its purpose is to update just a small portion (approximately 10 percent) of payments to hospitals for inpatient services. The commenter recommended that a simpler approach be adopted.

Response: Capital expenses for prospective payment hospitals are expected to be about $7.8 billion in FY 1996, a significant amount that warrants an appropriate input price index. While the HCFA CIPI does include vintage-weighting of both depreciation and interest prices, the HCFA CIPI is actually a simplification of the complicated capital accumulation process it is measuring. It would not be appropriate to accept an index that does not measure capital prices as well just because it is simpler. The HCFA CIPI is complicated only to the point that it accurately measures price increases for capital purchased in a financial world that is itself inherently complicated by the vintage nature of capital. Despite its necessary complexities, the HCFA CIPI provides an accurate, less volatile measure of price increases than annual price changes, providing hospitals with the ability to plan for changes in capital payments. As stated earlier, the vintage nature of capital requires that the index reflect the stability of capital assets.

Another commenter on a previous version of the CIPI recommended that data from Securities Data Corporation be incorporated into the CIPI interest computations. This source provides information on hospital issuances of municipal and commercial bonds. From this data base, we incorporated information showing that the average expected life of hospital bond debt instruments (that is, the time interval between the issue date and the maturation date) was about 13 years for municipal serial bonds and about 25 years for municipal term bonds. The weighted average life for the 2 types of bonds was 22 years.

The relative nominal capital purchases within various 22-year periods provided appropriate vintage weights for annual changes in interest rates. Not all capital purchases are funded by debt. Medicare cost reports suggest that about 80 percent of new capital acquisitions are financed by debt and about 20 percent by equity financing. However, if the proportion of total purchases financed by debt does not change substantially from year to year, then it is irrelevant whether we use the full amount or a constant proportion of the full amount of nominal capital acquisitions as weights for relative amounts of the debt instruments still active in the current period.

A third commenter on a previous version of the CIPI recommended that we investigate the effects on interest rate changes of changing structures of hospital bond ratings. If bond ratings are deteriorating, hospitals incur higher interest rate charges; if bond ratings improve, hospitals incur lower interest rates. Our CIPI currently recognizes only changes in pure interest rates and does not recognize changes in effective interest rates due to changes in bond ratings.

We reviewed a hospital municipal-bond data base from Securities Data Corporation to examine that issue. The data showed that serial bonds continue to dominate short-term financing and that term bonds dominate long-term financing. We classified all bond amounts by ratings found in the data base for years 1980 to 1993. The distribution of those issues described with a Moody's Quality Rating, shown in Table 4 (portions are applied to dollar amount of debt issued), indicates a trend toward higher quality issues since 1984. Although the annual, aggregate issue amounts in Moody's quality range Aaa through A have remained approximately constant since 1980, issue amounts in the highest quality band have become substantially higher since inception of the prospective payment system. Both issue amounts in the Aaa–Aa3 ranges and those in the Aaa–A range are greater in 1993 than at any time since 1980. We conclude there is not sufficient evidence to justify a component for deteriorating bond ratings in the CIPI.

TABLE 4.—PERCENT DISTRIBUTION OF HOSPITAL MUNICIPAL BOND AMOUNTS BY MOODY'S QUALITY RATING.*

	Pre-prospective payment system	Post-prospective payment system	
	1980–1983	1984–1988	1989–1993
	(percent)	(percent)	(percent)
Aaa–Aa3	7.1	36.8	49.0
Aa–A	50.6	24.1	21.7
Baa1–Ba	9.6	3.6	8.0
Not Rated	31.0	32.7	17.9

*Distributions do not sum to 100 percent due to a residual category of missing data.

Notes:

(1) Aggregate issues from Aaa–A have remained fairly constant since 1980.

(2) Issue amounts in the highest quality band have become substantially higher since inception of the prospective payment system.

(3) Both issue amounts in the Aaa–Aa3 ranges and those in the Aa–A ranges are greater in 1993 than at any time since 1980.

Relative vintage interest weights derived from our procedure are shown in Table 1. When combined with index levels (base year FY 1987) of annual, non-vintage weighted interest rate proxies, the relative interest weights provide current year, vintage-weighted component index levels for interest rates in the CIPI. The annual percentage change between the non-vintage-weighted historical, annual interest index levels are listed in Table 2. The annual percentage change between the annual, vintage-weighted interest component index levels (base year FY 1987) are listed in Table 3. Thus, for example, the interest rate component change of −2.5 percent in Table 3 for FY 1996 represents the annual percentage change between the 1995 and 1996 vintage-weighted interest component index levels. The 1996 interest component index level (base year FY 1987) is computed as the vintage-weighted average of the previous 22 years in the interest rate proxy index level (Combined Muni/AAA) in Table 2, weighted by the interest weights listed in Table 1. We use an index level for a combined municipal and AAA commercial bond interest rate (percent changes shown in Table 2 as Combined Muni/AAA), giving the municipal rate an 85 percent weight and the AAA rate a 15 percent weight, reflecting the relative hospital debts of the government/non-profit hospital sector and the for-profit sector.

Although Medicare cost reports show that only 60 percent of current hospital debt is in the form of notes or bonds (about 40 percent is in the form of mortgages), we assumed that the relative annual weights for all debt and the relative annual changes in interest rates for all debt were the same as bond-related weights and price changes. We are still searching for an appropriate source of information on hospital commercial mortgage data. We do not expect that the discovery of such data will materially alter our current conclusions about trends in effective interest rates over time.

c. Projection of the CIPI for Fiscal Year 1996. DRI projects a 1.5 percent increase in the CIPI for FY 1996 (Table 3). This is the outcome of a 2.8 percent increase in projected weighted depreciation prices in FY 1996, partially offset by a 2.5 percent decline in vintage-weighted interest rates in FY 1996.

d. ProPAC Input Price Index.

i. Introduction. Three major differences distinguish ProPAC's CIPI from HCFA's CIPI:

- The ProPAC CIPI measures changes in capital asset purchase prices in the year the asset is purchased (that is, not vintage-weighted). HCFA's CIPI is designed to measure changes in a vintage-weighted composite of capital asset purchase prices.
- The ProPAC CIPI uses the Marshall and Swift hospital equipment index as the movable equipment purchase price proxy while HCFA uses the Producer Price Index for machinery and equipment.
- The ProPAC CIPI has no interest component. ProPAC treats interest rate changes as an optional separate update policy adjustment factor.

Through 1996, for example, ProPAC expects that long term interest rates will remain relatively stable and, therefore, believes that it is not appropriate to adjust capital input prices for forecasted changes in interest rates in the target year.

HCFA incorporates a vintage-weighted composite of interest rates in its CIPI for the target year.

ii. Depreciation. ProPAC states that its CIPI is analogous to the prospective payment operating price index. We disagree. The components of the operating index represent price changes in ongoing hospital expenses for labor and non-capital goods and services. The analogous capital expenses in this context are current depreciation costs, interest costs, and other capital-related expenses (such as insurance). Current depreciation and interest costs, according to HCFA, IRS, and accounting principles, are a cumulative composite of segments of expenses incurred in current and prior periods. Current interest costs are a cumulative composite of segments of past and current year debt costs. Since both depreciation and interest costs have a vintage component, the price aspect of these costs must have a vintage component as well. The HCFA CIPI attempts to capture these vintage components.

Differences between HCFA and ProPAC with respect to choices for annual non-vintage-weighted rates of change in alternative price proxies for movable equipment are small for much of the historical period. (We illustrated this fact in Figure 8 (Inset) in the May 27, 1994 proposed rule (59 FR 27890), using earlier projections.) As noted in our September 1, 1992 final rule, one basic criterion for accepting price proxies is public availability of documentation on data sources and methodology (57 FR 40018–40019). Despite repeated efforts, neither we nor Data Resources Inc. have been able to obtain documentation on the movable price proxy recommended by ProPAC (Marshall and Swift hospital equipment index) that explains how it is derived and what sampling frame and sampling error attach to the estimates. In the absence of such information we cannot adopt the ProPAC alternative.

HCFA's assumption is that prices for movable equipment purchased by hospitals change at about the same rate as prices for machinery and equipment generally. This assumption is justified in part by the fact that not all movable equipment purchased by hospitals is medical equipment; it stands to reason that the prices for non-medical movable equipment purchased by hospitals, such as automobiles, desks, chairs, etc., would change at about the same rate as prices for all machinery and equipment. To examine this assumption further, we measured the rate of change in the HCFA movable price proxy relative to prices for medical equipment only by preparing a composite index of medical prices from the Bureau of Labor Statistics Producer Price Index (PPI) for two commodity categories—medical instruments/equipment and X-ray/electro-medical equipment. The two PPI commodity indexes were then merged using their respective PPI weights. Price changes for this index are not available for years prior to 1984. Annual price changes for medical equipment follow the annual HCFA price proxy more closely than the ProPAC price proxy for most of the historical period. We will continue to monitor trends in these indexes to ensure that appropriate price proxies are incorporated in the CIPI.

iii. Interest. ProPAC has proposed to project annual interest rates to future periods and then to decide whether to allow an add-on to the Federal capital rate depending on the magnitude of the projection. ProPAC has presented no objective criteria for determining when an interest adjustment is appropriate. We previously noted that a single-year projection for interest rates is conceptually inappropriate since interest costs must be vintage-weighted. In addition to this conceptual problem, the ProPAC approach is impractical because future annual interest rates are volatile, vulnerable to unpredictable market forces, and subject to exogenous influences (such as Federal Reserve Board decisions) that are difficult to anticipate. Thus, any projection of future annual interest rates is likely to be inaccurate, resulting in underpayment or overpayment of the Federal capital rate relative to the capital-related expenses that the rate is supposed to reflect. The resulting uncertainty in payments under future Federal capital rates further complicates future capital expenditure decisions by hospitals. On the other hand, the projected HCFA CIPI interest component for the target year is the weighted average change over 22 years of interest rate history, of which 20 years experience in the non-vintage weighted price proxy is appropriately historical. The projected annual, non-vintage weighted experience in the price proxy for the most recent 2 years may be as inaccurate as any ProPAC projection, but any error will have minimal effects on Federal rates due to the appropriately weighted effect of the historical data in the HCFA CIPI. This stability in the interest rate component of the HCFA CIPI provides hospital planners with a degree of certainty about future Federal rate payments, other things remaining equal.

iv. The Composite CIPI. Annual percentage changes in the historical and projected HCFA and ProPAC CIPIs differ markedly as shown in Table 5. The 2.9 percent increase for the ProPAC capital market basket in Table 5 for FY 1996 is lower than the 4.1 percent increase presented in ProPAC's March 1995 Report and Recommendation to the Congress. In the ProPAC March report, ProPAC used the 4th quarter 1994 DRI forecasts, while the figure in this final rule represents 2nd quarter 1995 DRI forecasts. Between 4th quarter 1994 and 2nd quarter 1995, DRI revised its forecast downward by 1.2 percentage points to reflect slower price growth in 1996 than originally expected. A lower forecast for the movable equipment price proxy (Marshall and Swift) was responsible for roughly 60 percent of the 1.2 percentage point decline between forecasts. The remaining 40 percent of the decline was the result of lower forecasts in the fixed equipment price proxy (Boeckh) and the other capital-related expenses price proxy (CPI-residential rent), which accounted for roughly 23 percent and 12 percent, respectively. We emphasize that the later forecast was not available when ProPAC released its March report.

The ProPAC CIPI is much more volatile than the HCFA CIPI in the historical period through 1994 because it does not reflect vintage-weighted capital input price factors for depreciation. Further, the ProPAC CIPI omits conceptually relevant interest rates. The cumulative effect of declining interest rates for all debt instruments in recent years has driven the rate of change in the HCFA vintage-weighted interest rate component downward, a trend projected by DRI into future rate years. The declining interest rate component appropriately brings the HCFA CIPI below the ProPAC CIPI in the projection period. Other things being equal, the ProPAC index would result in overpayment through the Federal rate because anticipated actual capital-related expenses will be less than ProPAC projects due to the effects of lower interest rates on capital-related expenses.

TABLE 5.—ANNUAL PERCENT CHANGES IN HCFA CAPITAL INPUT PRICE INDEX AND THE PROPAC CAPITAL MARKET BASKET, 1979 TO 2000

Fiscal year	HCFA capital input price index	ProPAC capital market basket
1979	5.6	8.3
1980	7.1	9.2
1981	8.8	10.0
1982	9.3	7.7
1983	6.7	4.6
1984	6.3	3.9
1985	5.1	2.2
1986	3.7	1.7
1987	3.1	2.1
1988	3.0	3.5
1989	2.7	4.6
1990	2.4	2.3
1991	2.1	3.0
1992	1.7	2.2
1993	1.3	2.1
1994	1.3	2.8
1995	1.5	3.4
1996	1.5	2.9
1997	1.7	3.4
1998	1.9	3.3
1999	1.9	3.2
2000	1.9	3.4

ProPAC believes that Medicare program payments should reflect both savings from low interest rate levels on new debt instruments and the additional costs of high interest rate levels. As explained above, the Commission has proposed accomplishing this through an interest policy adjustment. However, ProPAC has neither presented a threshold level for making an interest adjustment nor established a process for determining the amount of the adjustment. The HCFA CIPI, on the other hand, automatically registers the price effects of interest rate changes on new debt instruments that carry over into future periods, although those effects are appropriately registered only very gradually.

When interest rate levels decline, hospitals may refinance their existing debt. Refinancing has a price effect as new debt instruments with lower prices (interest rate levels) replace older debt instruments with higher prices (interest rate levels). ProPAC believes its interest policy adjustment can and should capture this behavior. In this way, Medicare can share in the savings from refinancing. The HCFA CIPI does not now automatically register the price effects of refinancing. Whether to do so or not is a policy judgment concerning whether HCFA should share in refinancing savings or allow hospitals to realize the full effects of refinancing. A refinancing adjustment would not only reflect actual hospital behavior, but would also add to the existing incentives of a rate-based system for hospitals to replace high interest debt instruments with lower interest debt instruments. However, the absence of a refinancing adjustment could allow individual hospitals to refinance and keep the savings, just as individual hospitals who become relatively more efficient in furnishing care for specific DRGs are rewarded for the more efficient behavior.

Since refinancing is a price matter, the adjustment would appropriately be on the price side of the framework, rather than on the policy adjustment side, which deals with quantities. However, the adjustment would not be included directly within the CIPI because the price effect of refinancing involves a shift in the vintage weights applied to index levels. That is, interest expense associated with prices (interest rate levels) in the year the debt is originated would be shifted to reflect interest expense associated with prices in the year the debt is refinanced. This essentially would reduce the relative vintage weights for interest in the CIPI (Table 1) in some years and increase the relative vintage weights for interest in other years. Yet by definition, the fixed-weight CIPI holds all weights constant. However, a discretionary adjustment could be made on the relative vintage weights. This is analogous to the separate adjustments for real case-mix changes in the update framework.

In the June 2, 1995 proposed rule we invited comments on whether to incorporate a refinancing adjustment within the HCFA framework. A refinancing adjustment would present specific problems because HCFA has not been able to obtain data to accurately determine refinancing amounts. Whether HCFA can ultimately propose a refinancing adjustment depends upon whether the necessary data can be obtained.

Comment: Two commenters stated that a proposed refinancing adjustment is not necessary. One commenter indicated that hospitals should be rewarded by keeping savings from

efficient behavior such as refinancing high interest debt. The other commenter indicated that it would not be proper for hospitals to be penalized or rewarded based on a theoretical refinancing threshold that would trigger an adjustment.

Response: These comments are useful in analyzing the merits and technical difficulties of including a refinancing adjustment in the HCFA update framework. We are continuing to determine whether a refinancing adjustment is appropriate, and, if so, how to implement one. We will provide any additional findings in upcoming notices. We encourage comments and suggestions, like those we have received, or recommendations of any studies or data sources that would be useful in assessing and/or implementing a refinancing adjustment.

4. Case-Mix Adjustment and Adjustment for Forecast Error

We proposed that the update framework contain adjustments for changes in the case-mix index and for forecast error.

The case-mix index (CMI) is the measure of the average DRG weight for cases paid under the prospective payment system. Because the DRG weight determines the prospective payment for each case, any percentage increase in the CMI corresponds to an equal percentage increase in hospital payments.

The CMI can change for any of several reasons: because the average resource use of Medicare patients changes ("real" case-mix change); because changes in hospital coding of patient records result in higher weight DRG assignments ("coding effects"); and because the annual DRG reclassification and recalibration changes may not be budget neutral ("reclassification effect"). We define real case-mix change as actual changes in the mix (and resource requirements) of Medicare patients as opposed to changes in coding behavior that result in assignment of cases to higher-weighted DRGs but do not reflect higher resource requirements. In the update framework for the prospective payment system for operating costs, we adjust the update upwards to allow for real case-mix change, but remove the effects of coding changes on the CMI. We also remove the effect on total payments of prior changes to the DRG classifications and relative weights, in order to retain budget neutrality for all CMI-related changes other than patient severity. (For example, we adjusted for the effects of the FY 1992 DRG reclassification and recalibration as part of our FY 1994 update recommendation.) The operating adjustment consists of a reduction for total observed case-mix change, an increase for the portion of case-mix change that we determine is due to real case-mix change rather than coding modifications, and an adjustment for the effect of prior DRG reclassification and recalibration changes. We proposed to adopt this CMI adjustment as well in the capital update framework.

For FY 1996, we are projecting a 0.8 percent increase in the case-mix index. We estimate that real case-mix increase will equal projected case-mix increase in FY 1996. We do not anticipate any changes in coding behavior in our projected case-mix change. The proposed net adjustment for case-mix change in FY 1996 is therefore 0.0 percentage points.

The −1.0 percent figure used in the ProPAC framework represents ProPAC's projection for observed case-mix change. ProPAC projects a 0.8 percent increase in real case-mix change across DRGs and a 0.2 percent increase in within-DRG complexity. ProPAC's net adjustment for case mix is therefore zero.

We estimate that FY 1994 DRG reclassification and recalibration resulted in a 0.3 percent increase in the case mix when compared with the case-mix index that would have resulted if we had not made the reclassification and recalibration changes to the DRGs. ProPAC does not make an adjustment for DRG reclassification and recalibration in its update recommendation.

The current operating update framework contains an adjustment for forecast error. The input price index forecast is based on historical trends and relationships ascertainable at the time the update factor is established for the following year. In any given year there can be unanticipated price fluctuations that can result in differences between the actual increase in prices faced by hospitals and the forecast used in calculating the update factors. We continue to believe that the capital update framework should include a forecast error adjustment factor. In setting a prospective payment rate under the proposed framework, we proposed to make an adjustment for forecast error only if our estimate of the capital input price index rate of increase for any year is off by 0.25 percentage points or more. There is a 2-year lag between the forecast and the measurement of the forecast error. Thus, for example, we would adjust for a forecast error made in FY 1996 through an adjustment to the FY 1998 update.

We received no comments on our proposed adjustments for case-mix increase and for forecast error. In this final rule, we are therefore adopting those adjustments as proposed.

5. Policy Adjustment Factors

The capital input price index measures the pure price changes associated with changes in capital-related costs (prices × "quantities"). The composition of capital-related costs is maintained at base-year 1987 proportions in the capital input price index. We proposed to address appropriate changes in the amount and composition of capital stock through the policy adjustment factors.

The current update framework for the prospective payment system for operating costs includes factors designed to adjust the input price index rate of increase for policy considerations. Under the revised operating framework, we adjust for service productivity (the efficiency with which providers produce individual services such as laboratory tests and diagnostic procedures) and intensity (the amount of services used to produce a discharge). The service productivity factor for the operating update framework reflects a forward-looking adjustment for the changes that hospitals can be expected to make in service-level productivity during the year. A hospital retains any productivity increases above the average.

The intensity factor for the operating update framework reflects how hospital services are utilized to produce the final product, that is, the discharge. This component accounts for changes in the use of quality-enhancing services, changes in within-DRG severity, and expected modification of practice patterns to remove cost-ineffective services. We proposed that the intensity adjustment factor in the operating framework be adopted in the capital update framework. Under the operating update framework, we calculate case-mix constant intensity as the change in total charges per admission, adjusted for price level changes (the CPI hospital component) and changes in real case mix. The use of total charges in the calculation of the proposed intensity factor makes it a total intensity factor, that is, charges for capital services are already built into the calculation of the factor. We therefore proposed to incorporate the intensity adjustment from the operating update framework into the capital update framework. In the absence of reliable estimates of the proportions of the overall annual intensity increases that are due, respectively, to ineffective practice patterns and to the combination of quality-enhancing new technologies and within-DRG complexity, we proposed to assume, as in the revised operating update framework, that one-half of the annual increase is due to each of these factors. The proposed capital update framework would thus provide an add-on to the input price index rate of increase of one-half of the estimated annual increase in intensity to allow for within-DRG severity increases and the adoption of quality-enhancing technology.

Comment: Several commenters objected that we derive the estimate of allowable intensity as a function of observed intensity, so that any level of intensity is presumptively 100 percent too high.

Response: Our analysis does derive allowable intensity from observed intensity. However, we do not believe that doing so involves an assumption that any level of intensity increase is 100 percent too high. In our analysis, and in determining the level of the intensity adjustment in the framework, we assume that half of observed intensity is due to the combination of quality-enhancing new technology and within-DRG complexity, and half to ineffective practice patterns. We adopted this assumption in the absence of any estimates of the comparative contributions of those factors to the observed level of intensity increases. Under such circumstances, we believe the assumption that half of observed intensity is allowable to be reasonable because it minimizes error.

We have decided to adopt the intensity measure as proposed. For FY 1996, we have developed a Medicare-specific intensity measure based on a 5-year average using FY 1990–1994. In determining case-mix constant intensity. we found that observed case-mix increase was 2.2 percent in FY 1990, 2.8 percent in FY 1991, 1.5 percent in FY 1992, 0.8 percent in FY 1993, and 0.8 percent in FY 1994. For FY 1990 through FY 1992, we estimate that 1.0 to 1.4 percent of the case-mix increase was real. (This estimate is supported by past studies of case-mix change by the RAND Corporation. The most recent study was "Has DRG Creep Crept Up? Decomposing the Case Mix Index Change Between 1987 and 1988" by G.M. Carter, J.P. Newhouse, and D.A. Relles, R–4098–HCFA/ProPAC (1991). The study suggested that real case-mix change was not dependent on total change, but was rather a fairly steady 1.0 to 1.5 percent per year. We use 1.4 percent as the upper bound because the RAND study did not take into account that hospitals may have induced doctors to document medical records more completely in order to improve payment.) We assumed that all of the observed case-mix increase of 0.9 percent for FY 1993 and 0.8 percent for FY 1994 was real. (This assumption is consistent with the FY 1996 CMI projections described above.) If we assume that real case-mix increase was 1.0 percent per year during FY 1990 through FY 1992 (but 0.9 percent in FY 1993 and 0.8 percent in FY 1994), case-mix constant intensity declined by an average 1.2 percent during FY 1990 through FY 1994, for a cumulative decrease of 6.1 percent. If we assume that real case-mix increase was 1.4 percent per year during FY 1990 through FY 1992 (but 0.9 percent in FY 1993 and 0.8 percent in FY 1994), case-mix constant intensity declined by an average 1.5 percent during FY 1990 through FY 1994, for a cumulative decrease of 7.2 percent. Since we estimate that intensity has declined during the FY 1990–1994 period, the intensity adjustment for FY 1996 is 0.0 percent.

In our discussion of a possible efficiency adjustment, we suggested that such an adjustment should take into account two considerations. One is that capital inputs, unlike operating inputs, are generally fixed in the short run. The productivity target in the revised operating framework operates on a short-term, year-to-year basis. Targets for capital efficiency and cost-effectiveness, however, must operate on a longer term basis. The other consideration is that, prior to the adoption of the capital prospective payment system, Medicare payment policy for capital-related costs, as well as the policies of other payers, did not provide sufficient incentives for efficient and cost-effective capital spending. Economic theory suggests that an industry with a guaranteed return on capital (such as the hospital industry prior to prospective payment for capital-related costs) would have a tendency to be overly capitalized relative to more competitive industries. This is because the incentive for firms in such an industry is to compete on the basis of more capital-intensive production processes than firms in other industries. As a result, capital costs per case, and therefore base year prospective capital rates, may be higher than would have been consistent with capital acquisition policy in more efficiency-oriented markets. A guiding principle in devising an efficiency adjustment is therefore that Medicare capital prospective payment rates should not provide for maintenance of capital in excess of the level that would be produced in an efficiency-oriented competitive market.

To examine this issue, we analyzed the change in actual Medicare capital cost per case for FY 1986 through FY 1992 in relation to the change in the capital input price index (which accounts for change in the input prices for capital-related costs), and the other adjustment factors that we were then proposing to include in the framework. (The other adjustment factors are the increase in real case mix and the increase in intensity due to quality-enhancing technological change and within-DRG complexity.) We found rates of increase in actual spending per case that exceeded the rate of increase attributable to inflation in capital input prices, quality-enhancing intensity increases, and real case-mix growth.

Our analysis was designed to examine whether hospitals had in fact responded to the incentives of the cost-based payment system for capital by expanding beyond what was necessary for efficient and cost-effective delivery of services. The analysis confirmed that volume and intensity of capital acquisition far outpaced the increase in capital input prices during the years between the implementation of the prospective payment system for operating costs and the introduction of the capital prospective payment system. Even accounting for real CMI increases and increases in intensity attributable to cost-increasing but quality-enhancing new technologies, there remains a large excess of capital-related spending.

The following table shows the results of our most recent analysis, based on the most current data available and the most recent projections. Differences between this table and the tables in previous discussions in the **Federal Register** reflect updated figures for average capital cost per case increases, based on the most recent data and projections, and our revised CIPI. This analysis encompasses all but 1 year of the period from the implementation of the prospective payment system for operating costs to the implementation of the prospective payment system for capital costs. (For FY 1984, sufficient data is not available to compute capital cost per case increases and intensity increases.) The results of the analysis in Table 6 are substantially similar to the results of previous analyses. In Table 6, real case-mix increase is assumed to be 1.0 percent annually.

TABLE 6.—CUMULATIVE PERCENTAGE CHANGE IN CAPITAL-RELATED COST PER CASE DUE TO INFLATION, REAL CMI, AND INTENSITY, 1985–1992

Year	CIPI[1]	Real CMI[2]	Allowable intensity[3]	Resulting increase[4]	Percent change cost/case[5]	Residual[6]
1985	5.1	1.0	3.7	10.1	12.5	2.2
1986	3.7	1.0	2.1	6.9	19.9	12.2
1987	3.1	1.0	2.5	6.7	14.9	7.6
1988	3.0	1.0	1.5	5.5	7.1	1.5
1989	2.7	1.0	0.5	4.3	7.8	3.4
1990	2.4	1.0	0.2	3.6	6.9	3.1
1991	2.1	1.0	0.1	3.2	5.5	2.3
1992	1.7	1.0	0.1	2.8	4.6	1.8
Cumulative (compounded)	....	....	....	52.0	111.3	39.0

[1] Figures from Table 1, section V.A.3 of this preamble.

[2] Assuming that real CMI increase is 1.0 percent annually.

[3] One half of observed intensity increase, as determined by the joint operating/capital intensity measure.

[4] The increase attributable to inflation, real CMI, and allowable intensity, calculated as the product of the rates of increase of those factors (that is, 1.031 × 1.01 × 1.025 = 1.067 for 1987).

[5] Figures supplied by HCFA's Office of the Actuary.

[6] The actual increase in average cost per case divided by the increase attributable to inflation, real CMI, and allowable intensity (that is, 1.149 /1.067 = 1.076, a 7.6 percent residual for 1987).

We believe that an adjustment for capital efficiency and cost-effectiveness should take into account the efficiency and effectiveness of the capital resources present in the base year for the capital prospective payment system. We do not believe that Medicare capital payment rates should provide for maintenance of capital in excess of the level that would be produced in an efficiency-oriented competitive market. A capital efficiency adjustment should be designed to give hospitals an incentive to reduce inefficiency and ineffectiveness in capital resources. The analysis in Table 6 suggests that, in order to restore the Federal rate to the level at which it would have been if capital costs had not been excessive in the years before the implementation of capital prospective payment, a cumulative reduction in the rate of as much as 28.1 percent (1.52/2.113=0.7194, or −28.1 percent) would be necessary.

We stated in the proposed rule that we were considering a range of options for such an efficiency adjustment. In particular, we have considered whether to provide, in the design of such an adjustment, for eventually reducing the rate by the entire 28.1 percent suggested by the above analysis. Alternatively, the eventual reduction to the rate could reflect some part, but not all, of the excess of actual capital cost increases over the identified factors. We have also considered the appropriate rate at which an adjustment based on the above analysis should be applied to the update factors. On the assumption that the updates to the rate should be reduced by the full 28.1 percent, such an adjustment could be accomplished over a shorter or longer period of time. For example, HCFA could adjust the updates to the rate over a period of 20 years at the rate of 1.4 percent per year. Similarly, the adjustment could be made over 5 years at the rate of 5.6 percent per year.

We proposed that HCFA have the discretion to apply an efficiency adjustment to the capital input price rate of change in determining the annual update factor. We invited comment on the advisability of such an adjustment, on the proportion of the residual that should be employed in adjustments to the update, and on the rate at which such an adjustment should be applied. We also solicited information on possible sources of data that would be useful in developing or refining such an adjustment, and on the possible effects of such an adjustment on various segments of the hospital industry.

Comment: Many commenters objected to a possible efficiency adjustment. Several commenters asserted that such an adjustment would be punitive because it would inappropriately punish hospitals for behavior in response to the incentives of the cost-based system. One of those commenters recommended that HCFA adopt positive incentives to motivate future behavior rather than an adjustment based on past behavior.

Response: We do not believe that an efficiency adjustment based on the analysis we have presented would necessarily be punitive. Hospitals received reasonable cost payments based on the costs we examined during the period just prior to the introduction of prospective payment for capital. We believe that the capital rates should not permanently reflect a level of cost in excess of an efficient use of capital inputs. However, we also believe that an adjustment to return the rates to a level reflecting greater efficiency in capital resources should not necessarily involve a drastic and precipitous reduction of the rates. We note for example, that with the expiration in FY 1996 of the requirement that capital prospective payments equal 90 percent of what would have been payable on a reasonable cost basis, the Federal rate is projected to increase by 22.59 percent. Thus, a substantial efficiency adjustment could be made without a net reduction in the Federal rate.

Comment: One commenter objected that the assumptions behind the analysis were not identified. Other commenters argued the analysis behind the proposed adjustment did not sufficiently account for the costs of quality improvements and other factors such as the need for design changes and features that attract patients. Several commenters objected that the analysis provided no empirical evidence that inefficiency accounts for capital expenses in excess of the expected levels.

Response: We attempted to explain all the assumptions behind our analysis. The basic assumption, which derives from economic theory, is simply that cost-based payment for capital, or any input, provides an incentive for the use of inefficiently high levels of that input. We also presented the available empirical data concerning capital cost per case increases during the period prior to the introduction of prospective payment for capital. The result of comparing actual capital cost increases during that period with the identifiable factors that contribute to cost increases, is consistent with that assumption: Cost increases exceeded the level that can be accounted for on the basis of price increases, intensity increases, and case-mix increases. We believe the factors that we have identified already account for quality increases, design changes, and the other factors mentioned by commenters. Our intensity measure, for example, accounts for any factor that affects the level of hospital charges. Presumably, hospitals account for the costs, including quality improvements and design changes to attract patients, that they face when they set the level of charges. As we discuss below, a large residual remains even when we allow for all the measured intensity changes during the period we examined. We believe that this analysis is certainly suggestive of a significant measure of inefficiency in capital costs in the pre-prospective payment period.

Comment: Several commenters from states with certificate of need (CON) requirements argued that those requirements prevent inefficient capital purchases.

Response: Our analysis was based on national figures, and it did not consider regional differences, such as the existence of CON requirements in various States, since we are evaluating an efficiency adjustment in the Federal rate.

Comment: Several commenters objected that rate reductions of the size contemplated in the discussion of a possible efficiency adjustment would jeopardize the ability of many hospitals to meet obligations entered under the existing rate levels. One commenter objected that the proposed 27.7 percent reduction in capital payments would have a devastating impact on hospitals.

Response: We did not suggest that capital payments would be reduced by 27.7 percent. Our proposal, in fact, called for a 20.5 percent increase in payments in FY 1996 compared to FY 1995. We did suggest that the rate of increase in the rates, and hence in payments, might appropriately be reduced by an adjustment to account for inefficiency in the level of costs on which the rates were based.

Comment: One commenter contended that the prospective payment system already has sufficient measures to promote efficiency and restrain the growth in capital expenditure.

Response: We agree that there are substantial incentives under the capital prospective payment system to promote efficiency and to restrain the growth of capital expenditures. However, the existence of these incentives does not resolve the problem that motivated our discussion of a possible efficiency adjustment. That problem is that the level of the capital prospective rates may reflect an inefficiently high level of capital costs. We do believe that the rates should not permanently reflect a level of capital costs in excess of an efficient use of capital inputs.

Comment: Several commenters objected that the estimate of inefficiency partially derives "efficient" capital growth due to allowable intensity as a function of observed intensity, so that any level of intensity is presumptively 100 percent too high.

Response: Our analysis does derive allowable intensity from observed intensity. However, we do not believe that doing so involves an assumption that any level of intensity increase is 100 percent too high. In our analysis, and in determining the level of the intensity adjustment in the framework, we assume that half of observed intensity is due to the combination of quality-enhancing new technology and within-DRG complexity, and half to ineffective practice patterns. We adopted this assumption in the absence of any estimates of the comparative contributions of those factors to the observed level intensity increases. This assumption does not undermine the validity of our analysis of capital cost increases before the introduction of the capital prospective payment system. On the contrary, varying our assumption about the level of allowable intensity increases yields substantially the same result. If we allow 100 percent of observed intensity increases, there remains a residual of 25.7 percent, as the following table shows:

TABLE 7.—CUMULATIVE PERCENTAGE CHANGE IN CAPITAL-RELATED COST PER CASE DUE TO INFLATION, REAL CMI, AND INTENSITY, 1985–1992

Year	CIPI[1]	Real CMI[2]	Allowable intensity[3]	Resulting increase[4]	Percent change cost/case[5]	Residual[6]
1985	5.1	1.0	7.4	14.0	12.5	−1.3
1986	3.7	1.0	4.1	9.0	19.9	10.0
1987	3.1	1.0	5.0	9.3	14.9	5.1
1988	3.0	1.0	2.9	7.0	7.1	0.1
1989	2.7	1.0	1.0	4.8	7.8	2.9
1990	2.4	1.0	0.4	3.8	6.9	2.9
1991	2.1	1.0	0.1	3.2	5.5	2.3
1992	1.7	1.0	0.2	2.9	4.6	1.7
Cumulative (compounded)				68.0	111.3	25.7

[1] Figures from Table 1, section V.A.3 of this preamble.

[2] Assuming that real CMI increase is 1.0 percent annually.

[3] Total observed intensity increase, as determined by the joint operating/capital intensity measure.

[4] The increase attributable to inflation, real CMI, and allowable intensity, calculated as the product of the rates of increase of those factors (that is, 1.031 × 1.01 × 1.05 = 1.093 for 1987).

[5] Figures supplied by HCFA's Office of the Actuary.

[6] The actual increase in average cost per case divided by the increase attributable to inflation, real CMI, and allowable intensity (that is, 1.149/1.093 = 1.051, a 5.1 percent residual for 1987).

Therefore, even under the assumption that all intensity increases are allowable, this analysis suggests that, in order to restore the Federal rate to the level at which it would have been if capital costs had not been excessive in the years before the implementation of capital prospective payment, a cumulative reduction in the rate of as much as 20.5 percent (1.68/2.113=0.7951, or −20.5 percent) would be necessary.

Comment: One commenter denied that cost-based payment for capital would influence the decision to purchase capital assets. According to the commenter, the decision to add capital resources is driven primarily by patient care needs, and not by the availability of additional reimbursement. At the same time, the

commenter asserted that low payment rates for capital often force hospitals to defer needed capital investments.

Response: The commenter's assertion that cost-based payment would not influence the decision to purchase capital assets is inconsistent with widely accepted economic theory. Several other commenters, in fact, agreed that economic theory does suggest incentives for overuse of capital under cost-based reimbursement.

Comment: Several commenters agreed that economic theory would suggest incentives for the overuse of capital during a period in which capital was paid on a cost basis while operating costs were paid on the basis of a prospective rate. However, the commenters contended that economic theory would also suggest that, if hospitals overpurchased capital, they conversely had to underemploy operating inputs. As a result, the commenters believe that reductions to the capital Federal rate to account for the inefficient overuse of capital should be matched by increases in the operating rates to account for inefficient underutilization of operating inputs.

Response: We agree with the commenters that the conjunction of rate-based payment for operating costs and cost-based payment for capital encouraged hospitals to substitute capital inputs for labor and other operating inputs. However, we do not agree that an inefficiently *high* level of capital inputs under those conditions necessarily implies an inefficiently *low* level of operating inputs. Rather, the conjunction of rate-based payment for operating costs and cost-based payment for capital could also lead to the substitution of inefficient capital inputs for inefficient operating inputs. Indeed, our previous analysis of efficient operating costs for hospitals during FY 1985 through FY 1991 (57 FR 40014), indicates that operating prospective payments during that period were sufficient for the efficient and cost-effective delivery of quality care. In conjunction with the analysis of capital spending during FY 1985 to FY 1992, these results suggest that hospitals may indeed have responded to the existing incentives by substituting an inefficiently high level of capital inputs for inefficient operating inputs. Under these circumstances, it would not be appropriate to increase operating rates in conjunction with a decrease in capital rates. Decreased capital rates, along with the existing level of operating rates, would provide the appropriate incentives for hospitals to achieve efficient levels of both capital and operating inputs.

Comment: One commenter objected that it is inappropriate to evaluate hospital behavior during a period of cost-based reimbursement for capital on the basis of standards characteristic of a more efficiency-oriented market system. Prior to the capital prospective payment system, hospitals operated within a system that did not reward efficiency. Providers should not be penalized by reducing future rates to account for their response to poor incentives in the past.

Response: We understand the commenter's concern about the use of a retrospective standard. At the same time, we do not believe that the Medicare program should necessarily base payments permanently on rates that reflect a known level of inefficiency in the use of capital inputs. We believe a solution that is fair both to hospitals and to the Medicare program can be found within the available range of options. As we have stated, an efficiency adjustment need not remove all the identified residual from the rates, nor need it do so precipitously.

Comment: One commenter argued that, since capital expenditures are associated with binding legal contracts that fix payments for capital assets, hospitals would actually be forced to reduce costs in areas other than capital in response to reductions in capital rates. The result, according to the commenter, would not be capital efficiency, but inefficiently low levels of spending in other areas. In addition, the commenter contended that rate reductions would result in inefficiencies on the capital side as hospitals delayed needed capital improvements.

Response: Implementation of an inefficiency adjustment would not necessarily produce an actual decrease in Medicare payments for capital. Rather, an efficiency adjustment could be implemented gradually so that the rate of increase in the rates and payments is reduced. Under those circumstances, the consequences that the commenter describes would not arise.

Comment: Several commenters suggested that the excess of actual capital costs over the levels accounted for in our analysis may be the result of substitution of debt financing for equity. Such substitution may have occurred as a response to negative margins under the prospective payment system. Debt financing may have increased capital costs, and the commenters urged that we test this possibility empirically.

Response: Cost report data (along with data from other sources) suggest that hospitals steadily have financed approximately 80 percent of their capital acquisitions by debt, and the remaining 20 percent by equity. We have seen no evidence that these proportions have been changing in recent years. We will continue to monitor the data, however.

Comment: ProPAC expressed concern about implementing a retroactive standard of efficient capital spending, and about the absence of a widely accepted definition of hospital efficiency.

Response: We recognize that there is not a widely accepted definition of hospital efficiency. However, we believe that the analysis we have presented suggests a significant measure of inefficiency in capital costs in the pre-prospective payment period. Nevertheless, we have decided not to implement an efficiency adjustment at this time. We will, however, continue to study the issue and attempt to refine the analysis we have presented. We continue to believe that an adjustment for capital efficiency, parallel to the productivity adjustment employed in the operating framework, would be an appropriate feature of the capital framework.

6. FY 1996 Update Factor

Table 8 summarizes HCFA's FY 1996 update factor under the framework adopted in this final rule, in comparison with the recommendation of ProPAC.

In its March 1995 report to Congress ProPAC recommended a 4.1 percent update for FY 1996. Based on more recent projections, ProPAC's recommended update would be 2.9 percent. On the basis of the projections and data available for this final rule, HCFA's update is 1.2 percent. As Table 5 shows, the different update methodologies adopted by ProPAC and HCFA, respectively, can be expected to result in higher ProPAC update recommendations during some years, and higher HCFA update recommendations during other years.

TABLE 8.—HCFA'S FY 1996 UPDATE FACTOR AND PROPAC'S RECOMMENDATIONS

	HCFA update factor	ProPAC recommendation
Capital input price index	1.5	2.9
Policy adjustment factors:		
Productivity		(1)
Efficiency	(2)	
Intensity:	0.0	
Science and technology		(1)
Intensity		(3)
Real within DRG change		(4)
Subtotal	0.0	0.0
Case mix adjustment factors:		
Projected case Mix change	−0.8	−1.0
Real across DRG change	0.8	0.8
Real within DRG change	(5)	0.2
Subtotal	0.0	0.0
Effect of FY 1994 reclassification and recalibration	−0.3	
Forecast error correction	0.0	0.0
Total update	1.2	2.9

[1] Adjustments for scientific and technological advance and productivity offset each other. No specific values were recommended.
[2] Efficiency adjustment may be adopted after public comment.

7. Possible Adjustments to the Federal Rate and the Hospital-Specific Rates

In the June 2, 1995 proposed rule, we discussed the effects of the expiration of the statutory budget neutrality provision on rates and aggregate payments under the capital-prospective payment system. Under that provision, we set the capital-prospective payment system rates during FY 1992 through FY 1995 so that payments would equal 90 percent of estimated Medicare payments that would have been made on a reasonable cost basis for the fiscal year. As a result of the provision's expiration, both the capital-prospective payment system rates and payments under the transition system will increase significantly. The proposed FY 1996 Federal rate was 21.3 percent higher than the FY 1995 Federal rate. We estimated that payments under the proposed rule would increase by 20.45 percent in FY 1996 compared to FY 1995, and that FY 1996 payments would exceed projected FY 1996 Medicare hospital inpatient capital costs by 4.52 percent.

In the proposed rule, we presented a discussion of possible revisions to the capital-prospective payment rates that would moderate these substantial increases in payments. These revisions could be made in conjunction with, or in place of, an update framework adjustment to account for possible inefficiency in capital spending prior to the capital-prospective payment system base period. While these possible revisions to the rate are not, strictly speaking, elements of the update framework, we presented them within the context of the proposed update framework in order to allow commenters the opportunity to consider all the possible rate revisions that might affect the future levels of rates and payments. We solicited comment on whether to make any of the possible revisions that we discussed. We expressed our belief that reductions in Medicare spending should be addressed in the context of health care reform.

Under § 412.308 of the regulations, HCFA determined the standard Federal rate, which is used to determine the Federal rate for each fiscal year, on the basis of an estimate of the FY 1992 national average Medicare capital cost per discharge. The FY 1992 national average Medicare capital cost per discharge was estimated by updating the FY 1989 national average Medicare capital cost per discharge by the estimated increase in Medicare inpatient capital cost per discharge. As we discussed in the August 30, 1991 capital prospective payment system final rule (56 FR 43366–43384), HCFA used the July 1991 update of HCRIS data to estimate an FY 1989 national average Medicare cost per case of $527.22. HCFA then updated that amount to FY 1992 by using an actuarial projection of a 31.3 percent increase in Medicare capital cost per discharge from FY 1989 to FY 1992. The standard Federal rate was thus based on an estimated FY 1992 national average Medicare capital cost per discharge of $692.24 (before the application of a transfer adjustment and a payment parameter adjustment).

Section 13501(a)(3) of Public Law 103–66 amended section 1886(g)(1)(A) of the Social Security Act to require that, for discharges occurring after September 30, 1993, the unadjusted standard Federal rate be reduced by 7.4 percent. As we discussed in the September 1, 1993 final rule for FY 1994 (58 FR 46316), the purpose of that reduction was to reflect revised inflation forecasts, as of May 1993, for the increases in Medicare capital cost per discharge during FY 1989 through FY 1992. By that time, the estimate of increases in Medicare inpatient capital costs per discharge from FY 1989 through FY 1992 had declined from 31.3 percent to 21.57 percent. The 7.4 percent reduction to the Federal rate was calculated to account for these revised forecasts (1.2157/1.313=.926, a 7.4 percent decrease). That provision of Public Law 103–66 also required that, for cost reporting periods beginning on or after October 1, 1993, the Secretary redetermine which hospital payment methodology should be applied under the capital prospective payment system transition rules to take into account the 7.4 percent reduction to the Federal rate.

As a result of the reduction required by Public 103–66, the standard Federal rate is now based on an estimated FY 1992 Medicare inpatient capital cost per case of $641.01 ($692.24×0.926). At the time of the Public Law 103–66 reduction to the Federal rate, actual cost report data on the FY 1992 Medicare capital cost per discharge were not yet available. The reduction was based on cost report data for FY 1990 and FY 1991, and a revised projection of the rate of increase in Medicare capital costs per discharge during FY 1992.

We now have extensive cost report data for FY 1992. The December 1994 update of HCRIS data showed an audit-adjusted FY 1992 Medicare inpatient capital cost per discharge of $593.15, or 7.47 percent lower than the estimate (reflecting the 7.4 percent reduction mandated by Public Law 103–66) on which the Federal rate is currently based. We do not believe that the Federal rate should necessarily remain at a level that reflects a known over-estimation of base year costs. We therefore invited comment on the appropriateness of an estimated 7.47 percent reduction to the unadjusted standard Federal rate to account for that over-estimation. (The June 1995 update of HCRIS data shows an audit-adjusted FY 1992 Medicare inpatient capital cost per discharge of $596.28, or 6.98 percent lower than the estimate on which the Federal rate is currently based.)

Under § 412.328, HCFA determined the FY 1992 hospital-specific rate by using a process similar to the process for determining the FY 1992 Federal rate. The intermediary determined each hospital's allowable Medicare inpatient capital cost per discharge for the hospital's latest cost reporting period ending on or before December 31, 1990. The intermediary then updated each hospital's FY 1990 allowable Medicare capital cost per discharge to FY 1992 based on the estimated increase in Medicare inpatient capital cost per case. As in the case with the Federal rate updates, current data demonstrate that the estimates used to update the hospital specific rates from FY 1990 to FY 1992 were overstated. On the basis of the data available in the proposed rule, we indicated that we were also considering whether to correct for the original rate of increase estimates by prospectively decreasing the hospital-specific rates by 8.27 percent. Such a reduction would not apply to hospital-specific rates that have been redetermined for a later cost reporting period. This is because the rate of increase estimates were not employed for redeterminations after FY 1992.

Finally, we suggested that the analysis of capital cost increases prior to the implementation of the prospective payment system for capital-related costs could be the basis for an immediate adjustment to the Federal rate to compensate for the effects of the expiration of budget neutrality. At the time of the proposed rule, the available data suggested that a reduction to the Federal rate of up to 27.7 percent would be necessary to restore the rate to the level at which it would have been if capital costs had not exceeded the level that can be accounted for on the basis of known factors. (As discussed in section V.A.5 above, the current data suggest that a reduction of up to 28.1 percent would be necessary to restore the Federal rate to that level.) Such an adjustment could be accomplished gradually over a number of years within the context of the update framework. We suggested in the proposed rule that some large part of the residual could be removed from the rate in a single adjustment. For example, we suggested that retaining the FY 1995 budget neutrality adjustment of 0.8432 in the standard Federal rate would have the effect of recapturing a large part of the residual of capital cost increase over the identifiable factors. The remainder of the residual, if appropriate, could be removed from the rate on a gradual basis through an adjustment to the update factor, as discussed in section V.A.6 above. We therefore requested comments on the appropriateness of such measures, particularly on the appropriateness of retaining the FY 1995 budget neutrality adjustment in the rate as an efficiency measure.

Comment: Many commenters objected to possible measures to reduce the Federal rate. Some commenters contended that the error in forecasting the FY 1992 cost per case likely resulted from a substantial decline in the rate of growth in capital expenditures as hospitals anticipated the introduction of prospective payment for capital. Under these circumstances, the commenters contended, reduction to the rates would punish providers for responding to the new incentives of prospective payment.

Response: Current cost report data show a modest decline in the rate of increase in Medicare capital cost per case immediately before the introduction of the capital prospective payment system. (See Table 6 above.) From the information at our disposal, however, it is impossible to determine the degree to which this modest decline is due to behavioral changes induced by anticipation of prospective payment for capital as opposed to other factors. For example, during the last years under reasonable cost payment, the payment for capital costs was discounted; that is, the program paid 85 percent of Medicare capital costs. It is likely that the discounting of reasonable cost payment contributed to the modest decrease in the rate of increase in capital cost during that time. In any event, we intended to base the Federal capital rate on the FY 1992 Medicare capital cost per case. We do not believe it is reasonable to expect that the rate permanently reflect the level of cost that would have existed if the poor incentives that existed prior to the implementation of capital prospective payment had remained in place.

Comment: Other commenters contended that continued retrospective lookbacks to FY 1992 are inappropriate in a prospective payment system.

Response: The core notion of prospective payment is that the payment rate be set in advance of the actual payment. None of the measures that we discussed would violate that principle. In each case, rate revisions would apply prospectively, that is, only to payments in the future. Under a prospective system, prior period rates are the basis for determining rates in subsequent years. However, we believe that future rates should not be based permanently on initial estimates that we now know to be incorrect. Our intention was always to base the capital rates on FY 1992 costs per case. At the time of the final rule establishing the prospective payment system for capital-related costs, we estimated FY 1992 costs on the basis of the best data and projections then available.

Comment: Several commenters argued that retaining the FY 1995 budget neutrality adjustment in the rate would disadvantage hospitals after they have responded to the incentives under the capital prospective payment system.

Response: The purpose of retaining the FY 1995 budget neutrality adjustment in the rate would be to address a known overestimation in the costs used to establish [illegible] rate, and possibly excessive [illegible] that may be inappropriate [illegible] permanently in the rate. While [illegible] that hospitals should be able to gain from responding to the incentives of prospective payment, it does not follow that this should include permanent benefit from excessively high rate levels.

Comment: Several commenters contended that it would be illegal for HCFA to retain the FY 1995 budget neutrality adjustment in the base rate. These commenters observed that Congress mandated the sunset of budget neutrality for capital, and asserted that retaining the budget neutrality adjustment in the rate was a covert way of attempting to extend the provision beyond the statutory sunset.

Response: The purpose of the measure we discussed would not be to extend the budget neutrality provision. Rather it would be to set the rate at an appropriate level in the light of information that is now available concerning cost increases in the years up to and including FY 1992. Retaining the budget neutrality adjustment factor would simultaneously address our original overestimation of FY 1992 costs and some significant proportion of the inefficiency represented in the FY 1992 cost per case. The use of the FY 1995 budget neutrality adjustment factor would merely accomplish a major rate revision in a manner that provides substantial stability in the level of payments. As such, the adjustment would not be a budget neutrality adjustment per se, but rather an adjustment to address past estimates. Section 1886(g) of the Social Security Act confers broad authority on the Secretary to establish a prospective payment system for capital-related costs.

Comment: A number of commenters contended that the reductions discussed in the proposed rule would jeopardize the ability of many hospitals to meet current obligations and reduce their ability to meet future capital needs.

Response: The measures discussed in the proposed rule would not necessarily result in actual reductions in capital payments compared to the level of FY 1995. For example, the reduction to account for the overestimation of FY 1992 costs per case would still allow annual increases in rates and payments of over 10 percent in FY 1996, and approximately 3 to 5 percent per year through the rest of the transition.

Comment: One hospital association observed that Congress may choose to enact one or more of the measures discussed in the proposed rule. The commenter suggested that any measures to reduce the growth of Medicare expenditures would create the need for HCFA to increase the protections for hospitals that undertake major capital projects during the transition period to fully prospective capital payment. The commenter emphasized that its recommendation was budget neutral.

Response: We do not yet know what if any action Congress will take with respect to the capital prospective payment system. Thus, it would be premature to consider proposals that, under a budget neutrality provision, would involve redistribution of funds from hospitals generally to those hospitals that might benefit from expanded exceptions protection.

Comment: Several commenters contended that it would be illegal for HCFA to implement any of the identified reductions to the rates (including an efficiency adjustment). Two commenters characterized the rate reduction options as thinly disguised attempts to rebase hospitals' base year capital costs, and asserted that Congress has not given the Secretary of Health and Human Services the authority to rebase hospital capital costs. One commenter stated that the rate revisions discussed in the proposed rule would violate a fundamental principle of prospective payment: that the system provide certain and predictable payment rates.

Response: Section 1886(g) of the Social Security Act requires payment for capital-related costs under a prospective payment system "*established by the Secretary.*" (Emphasis added.) The statute prescribes only that the system provide for payment on a per discharge basis, employ appropriate weighting of payment rates by classification of discharge, and reduce payments during FY 1992 through FY 1995 by an amount estimated to equal 10 percent of what would have been paid on the basis of reasonable costs. The statute gives the Secretary wide discretion in determining the particular features of the system, including the appropriate level of payment rates. We believe that any rate revision implemented prospectively would satisfy the principle of certainty and predictability under a prospective system.

Comment: One commenter argued that reducing the rate to account for overestimation of FY 1992 cost per case amounts to rebasing the capital rates from FY 1989 to FY 1992. The commenter contended that such a measure would amount to more than a technical correction and would, in fact, require revisiting the entire discussion that gave rise to prospective payment for capital. Finally, the commenter objected that there is no evidence that FY 1992 represents a typical year in capital spending as opposed to a "trough" in capital expenses.

Response: The methodology that we adopted in the September 1, 1992 final rule provided for using the FY 1989 cost per case as the basis for estimating the FY 1992 cost per case. We used FY 1989 as the basis for estimating because it was at that time the most recent year for which substantial cost report information was available. Thus FY 1992, not FY 1989, has always been the base year for the rate. The issue is not rebasing the rate but only the appropriateness of addressing previous estimates of base year costs. We believe that the commenter's concern about whether FY 1992 was a "trough" year in capital spending is misguided. The Medicare accounting rules, which were used to determine the capital costs on which the capital Federal rate is based, count depreciation costs for all capital still in use and interest on loans for depreciable assets. Current year purchases thus have only a small effect on the accounting of capital costs for the year. Capital costs for FY 1992 include depreciation and interest costs related to capital purchases over many previous years. There is no evidence that the period up to FY 1992 represented a "trough" in capital spending.

Comment: One commenter objected that making the rate reductions under consideration would be inconsistent with HCFA's refusal over the years to "make up" for shortfalls in actual outlier payments compared to estimates.

Response: We believe that we have been completely consistent in our policies regarding rate-setting and issues of revising prior year payments under the prospective payment system. As discussed earlier, we believe that prospective adjustments to the rates may be appropriate to address errors in estimating base year costs that would otherwise be built into the rates for future fiscal years. In contrast, any difference between actual outlier payments and estimated outlier payments are not built into the rates for future years; thus, for example, if actual outlier payments in a fiscal year were 4.0 percent rather than the projected 5.1 percent, the 1.1 percent difference does not mean that prospective payment rates would be 1.1 percent lower than if we had accurately projected outliers.

The case of the outlier offset cited by the commenter is more analogous to the budget neutrality adjustments under the capital prospective system than it is to the reductions to the base capital rate that we discussed. In the cases of outliers and budget neutrality, temporary annual adjustments to the rates have been made to meet certain payment targets (that is, a designated percentage of outlier payments, in the one case, and 90 percent of what would have been paid for capital costs on a reasonable cost basis, in the other). In both cases, we have refused to make any changes in the level of the rates or payments during subsequent years to account for differences between actual and estimated payments. Thus, we have not decreased subsequent year payments to account for actual payments that have apparently exceeded the payment target of 90 percent of estimated capital costs under the expiring budget neutrality provision. We do, however, examine past experience for purposes of refining the estimation methodology used to set the outlier offsets and budget neutrality adjustments for subsequent years.

As in the case of outlier payments and budget neutrality, none of the rate changes that we discussed in the proposed rule would "make up" for past payments. In making any of those revisions, we would instead be employing better data that is now available in order to set the permanent base rate more accurately for future years.

Comment: ProPAC commented that the large increase in rates with the expiration of budget neutrality raises two sets of questions. First, it raises the issue of an appropriate update mechanism, about which HCFA and ProPAC have conducted a vigorous discussion. (See section V.A above.) The second and perhaps more important issue is the need to determine the appropriate base rate to which the update is to be applied. ProPAC believes that, because updates during the first four years of the prospective payment system were based on historical cost increases rather than on an analytical framework reflecting current factors, the updated payment rates grew more rapidly than estimated reasonable costs. The result was a widening gap between the updated base rate and the rates actually used for payment under the budget neutrality provision. The expiration of budget neutrality thus results in a 21 percent increase in both rates and payments. ProPAC believes that the appropriate level of the base payment rate is an issue that merits attention by the Secretary and Congress. The Commission identifies several possible approaches to setting the base rate at an appropriate level, including those identified in this year's proposed rule. They identify one approach that we did not discuss: updating actual FY 1992 costs to FY 1996 on the basis of an analytical framework, rather than actual cost increases.

Response: We agree with ProPAC that the appropriate level of the capital base payment rate is an important issue. We presented the discussion of possible rate revisions in the proposed rule precisely in order to initiate a discussion of that issue.

Comment: Several commenters contended that rate revisions with the potential magnitude of those discussed in the proposed rule should not be implemented through rulemaking. The commenters argued that proposals of this scope should require enabling legislation.

Response: We do not believe that it would be inappropriate for HCFA to implement rate revisions of the kind under discussion after appropriate notice and comment rulemaking. As we have previously stated, the statute gives the Secretary broad discretion in the design of the system in general and in the determination of the appropriate rate level in particular. Nevertheless, it is clear that Congress will be considering major changes in the Medicare program, including substantial budget savings proposals, during the coming months. Under the circumstances, we have decided not to proceed at this time with any possible capital rate revisions through the rulemaking process while Congress considers whether to include any such measures within more comprehensive legislation dealing with Medicare and the Federal budget.

B. Adjustment to the Capital Prospective Payment System Federal Rate for Capital-Related Taxes

In our June 2, 1995 proposed rule, we discussed an adjustment to the capital prospective payment system for capital-related tax costs. As we noted in that discussion, such an adjustment would be designed to remove a possible inequity in the capital prospective payment system. While capital-related taxes constitute a cost imposed on an identifiable group of hospitals, those costs are currently reflected in the Federal capital rate paid to all hospitals. Since the inception of the prospective payment system for capital-related costs, several commenters have pointed out that all hospitals are thus being reimbursed for costs that only some hospitals pay.

In the proposed rule, we presented a proposal for an adjustment for capital-related tax costs. However, we noted in the proposed rule that introducing an adjustment posed several serious problems which we had not been able to resolve. These issues involve equity to hospitals that may become subject to capital-related taxes in the future. They also involve our responsibility to protect the Medicare Trust Fund from possible manipulation as well as from any new open-ended commitments to increase Medicare payments. We presented a formal proposal in order to facilitate discussion of the merits of implementing a special tax adjustment. We believed that presentation and analysis of a proposal provided the best opportunity for a full and public discussion of all the issues surrounding a possible adjustment for capital-related tax costs. We presented our proposal in the hope that the process of public comment would produce a solution that could simultaneously protect the Trust Fund and satisfy the equity concerns of all hospitals.

In order to facilitate discussion of the issues surrounding the treatment of capital-related taxes, we proposed to provide for a special adjustment for the capital-related tax costs of hospitals that paid such taxes for cost reporting periods beginning in FY 1992. The tax costs of those hospitals were included in the computation of the capital Federal rate. Under our proposal, hospitals that began operation after FY 1992 would also be eligible for an adjustment. We further proposed an adjustment of the Federal rate to offset the amount of capital-related tax costs originally included in the computation of the rate. In this way, adoption of the tax adjustment would be budget neutral: Aggregate capital payments would neither increase nor decrease merely because of the tax adjustment.

For those hospitals that would be eligible for an adjustment, we proposed to apply a hospital-specific Medicare tax cost per discharge amount to the Federal rate portion of each payment for each discharge from the hospital, beginning October 1, 1995. Under our proposal, the hospital-specific Medicare tax cost per discharge was to be determined on the basis of the updated FY 1992 base year cost.

Some of the serious issues that arose in connection with the implementation of a tax adjustment concern hospitals whose tax-paying status has changed since FY 1992. Some hospitals that paid capital-related taxes in FY 1992 may no longer be subject to such taxes (for example, because they converted to non-proprietary status in a taxing jurisdiction that does not tax non-proprietary hospitals). Other hospitals may have been in operation during FY 1992, but have only become subject to tax payments since that time, either by a change in status (that is, from non-proprietary to proprietary) or by the action of State or local authorities to impose capital-related taxes on entities that had not previously been subject to such taxes.

Hospitals that subsequently become subject to taxes through the action of State or local authorities pose the most serious issues of equity and protection of the Trust Fund. On the one hand, it may seem unfair to prohibit hospitals on whom a tax cost is imposed *after* FY 1992 from receiving an adjustment available to hospitals on whom a tax cost was imposed *in* FY 1992. On the other hand, a capital Federal rate tax adjustment should not be vulnerable to possible efforts by state or local authorities to gain revenues from increased Medicare payments to hospitals. Nor should a tax adjustment provide an open-ended commitment to increase the overall level of Medicare capital payments as State and local governments extend taxation to previously tax-exempt facilities. The capital Federal rate tax adjustment that we proposed reflected only the FY 1992 capital-related tax costs included in the original computation of the Federal rate. It could not reflect costs imposed on hospitals by the extension of State and local capital-related taxes after FY 1992. Therefore, in the absence of some additional budget neutrality provision, extending the tax adjustment to hospitals that become subject to capital-related taxes after FY 1992 could significantly increase the overall level of Medicare capital payments.

We proposed that hospitals would not qualify for the adjustment if they became subject to tax payments because of state or local action to change tax laws (for example, by extending taxation to non-proprietary hospitals) since FY 1992. We did so both to prevent the possibility that State and local authorities could inappropriately gain revenues through increased Medicare payments, and to prevent the adoption of a tax adjustment from producing large increases in Medicare capital payments if additional jurisdictions impose taxes on non-proprietary hospitals. We recognized, however, that this policy might be viewed as penalizing newly taxed hospitals for changes in circumstances over which they have no control. We invited comment on the appropriateness of this proposal, which raised issues of equity between hospitals subject to capital-related taxes in FY 1992 and those newly subject to such taxes after FY 1992. We specifically invited suggestions and comments on other approaches to dealing with the situation of hospitals that become subject to taxes after FY 1992. We stated our belief that any proposal to deal with the situation of such hospitals should protect the Medicare Trust Fund against an open-ended commitment to increase Medicare payments in order to reimburse hospitals for Medicare's share of newly imposed capital-related tax obligations.

In particular, we invited comment on the possibility of providing an adjustment to such hospitals on a budget-neutral basis. Under such an approach, an annual tax adjustment budget neutrality factor would be applied to the Federal rate to account for the estimated cost of the tax adjustment over and above the costs attributable to capital-related taxes in the FY 1992 base year. In this way, aggregate payments, including tax adjustments to hospitals that have become subject to taxes since FY 1992, would not exceed the amount of payments in the absence of extending the adjustment to such hospitals. Such an approach would prevent the tax adjustment from becoming an open-ended drain on the Medicare Trust Fund. However, such an approach necessarily involves reducing the Federal rate beyond the level accounted for by the capital-related tax costs originally included in the rate computation. In other words, such a budget neutrality adjustment would reduce the amount of other capital-related costs incorporated in the original rate computation. Under such an approach, the reductions in payments to hospitals that do not pay taxes would exceed the amount of capital-related taxes included in the original rate computation; arguably, then, this approach would inappropriately disadvantage hospitals that do not pay capital-related taxes.

With regard to the situation of other hospitals whose tax status has changed since FY 1992, we stated our belief that hospitals that are no longer subject to capital-related taxes should not receive an adjustment to their capital Federal rate payments. Therefore, we proposed that a hospital (or a related organization) must be directly subject to capital-related taxes in order to qualify for the capital Federal rate tax adjustment.

In addition, we proposed that no adjustment would be made for hospitals whose status changed from non-proprietary to proprietary after FY 1992. The decision to change status to a proprietary hospital is a voluntary decision of the hospital's management, and we therefore believe that an adjustment to allow special payment for additional taxes that result from such a decision is not warranted.

However, we also proposed that hospitals that were not in operation in FY 1992 should be able to qualify for the adjustment. We therefore provided that intermediaries should accept data on capital-related tax payments from hospitals that have begun operation since FY 1992. Such hospitals were to contact their intermediaries as soon as possible, but in any case no later than July 31, 1995, to submit the appropriate data and documentation.

Comment: In Opposition: We received comments opposed to the proposed property tax adjustment from six associations representing a large number of hospitals and from two individual providers. These commenters were opposed to a tax adjustment for several related reasons. Several commenters argued that tax-exempt hospitals incur substantial costs for services they must provide to maintain tax-exempt status. They pointed out that the Internal Revenue Code requires tax-exempt hospitals to satisfy a community benefit standard. This standard requires the operation of a full-time emergency room open to all persons without regard to their ability to pay. It also requires provision of care for every person in the community regardless of ability to pay. The commenters asserted that costs faced by hospitals to provide these services may be higher than property tax levels. They objected that our proposal did not offer any special adjustment to compensate for the cost of community benefit services.

One commenter characterized the proposal as an attempt to address a perceived inequity for one group of hospitals that in turn creates new inequities for many other hospitals. In particular, the commenter objected to our suggestion that extending the adjustment to hospitals newly subject to taxes could be financed by further reducing the Federal rate paid to all hospitals. The commenter suggested that, in light of the acknowledged problems in treating all hospitals equitably in implementing an adjustment, the most equitable solution would be to maintain the integrity of the prospective payment system by refusing to provide special treatment for this cost.

Another commenter objected that the proposed tax adjustment would shift payments from hospitals that exist to serve the needs of the community to those whose primary purpose is to return a profit to its shareholders. The commenter expressed concern that this shift could aggravate existing access problems.

Several commenters objected to the proposal based on reasons related to Medicare reimbursement principles. One commenter argued that the proposed tax adjustment contradicted an established policy of the Medicare program, that organizational decisions made by a hospital should not affect payments. Another commenter contended that the proposed adjustment would subsidize the decision to become a for-profit entity. The same commenter termed the proposed adjustment a return to a cost-based reimbursement system, and thus a retreat from the principles of prospective payment. Another commenter contended that tinkering with a prospective payment system to reflect a specific component of cost may invite requests for further adjustments. One commenter specifically requested that we provide an adjustment for capital-related interest costs in the same manner as we proposed to adjust for capital-related property taxes.

Several commenters raised questions of fairness among tax-paying and tax-exempt providers. The commenter contends that for-profit hospitals do not share equally in the burden of providing care to indigent patients. Furthermore, payment reductions will affect the ability of the non-profit hospitals to maintain current service levels to Medicare beneficiaries.

Several commenters recommended either that we drop the proposal to institute a capital-related property tax adjustment, or that we introduce a tax adjustment only in conjunction with an adjustment for the costs of charity care.

In Favor: We also received numerous comments in favor of the proposed adjustment for capital-related property taxes. Most comments (129) came from tax-paying proprietary hospitals who supported the tax adjustment as proposed. Another 38 commenters supported the concept of the proposed rule, but advocated revisions to the proposal, such as expansion of the eligibility criteria.

Two hospital associations responded generally in favor of the proposed adjustment, but also requested some modifications of the proposed provisions. In particular, those commenters requested the inclusion of hospitals that did not pay property taxes in 1992, but are now paying property taxes. To prevent gaming, the commenters suggested the adoption of a 3-year waiting period before hospitals newly subject to taxes could become eligible for an adjustment. To protect the Trust Fund, the commenters recommended that future capital rate updates be reduced to provide the funds for extending the adjustment to hospitals newly subject to taxes. The commenters also suggested that hospitals should only qualify for an adjustment if they pay bona-fide taxes that apply to all businesses in an area.

Other commenters contended that we should include taxes paid on leased property or equipment in the adjustment, at least in cases where the lease provided for direct payment to taxing authorities. One commenter agreed that a level playing field exists for leases on fixed equipment, but recommended that an adjustment be provided for taxes paid on leased facilities. Another commenter requested that we allow an adjustment for municipal hospitals that have city services allocated to their facility rather than a direct property tax bill.

Two commenters pointed out that they provide charity care and community services, as the tax-exempt hospitals do, but they must also pay taxes.

Response: We have decided not to proceed with implementation of a tax adjustment at this time. Two considerations motivated this decision. First, we have not been able to resolve the problems with implementing a tax adjustment that we identified in the proposed rule. Those commenters in favor of an adjustment did suggest several means for preventing gaming by states and to protect the Medicare Trust Fund from expenditure increases. Several of the suggestions for preventing gaming have some merit. We agree with the commenters, for example, that requiring hospitals newly subject to taxes to wait 3 years before qualifying for an adjustment may reduce the possibilities for gaming. At the same time, we are concerned that some of their other suggestions, such as the adoption of rules to determine *bona fide* taxes, would prove difficult to administer. Even if these measures could prevent gaming, however, we have not been able to determine a method for protecting the Trust Fund that does not create possible new inequities. Commenters in favor of a tax adjustment have suggested reducing future rate updates by an amount sufficient to fund the extension of adjustments to hospitals newly subject to taxes. Under such a measure, however, hospitals that do not pay taxes would necessarily receive lower payments than they would in the absence of a tax adjustment. (Even some hospitals that pay taxes would receive lower payments, if the amount of the Federal rate reduction exceeds the amount of the hospital-specific adjustment.) If the problem that motivated our consideration of an adjustment is an inequity, such a measure would certainly create an inequity as well. As several commenters noted, it would not be appropriate to proceed with a proposal that replaces one possible inequity with another.

The second consideration in our decision not to implement a tax adjustment at this time is that, in the light of the comments, we believe the proposed adjustment may be incompatible with a prospective payment system for capital-related costs. Prospective payment involves an averaging system under which differences in costs among hospitals are generally not accorded special treatment. Many hospitals and groups of hospitals can cite costs which may be unique to them. Among the commenters on the proposed adjustment, for example, some claimed that capital-related tax costs deserve special treatment because they are unique to one group, while others cited charity care as a unique cost to another group of hospitals. By ignoring such differences, a prospective system provides incentives for realizing greater efficiency in the provision of services than can be achieved under a cost-based payment system. Such a system is not inequitable as long as it is consistent in rejecting special treatment for specific costs.

It is true, as the commenters in favor of a tax adjustment pointed out, that the prospective system does provide adjustments for several costs. For example, adjustments are provided under both the operating and capital systems to those hospitals that have graduate medical education programs for the costs associated with that activity. However, the adjustment for the indirect cost of graduate medical education (as well as the disproportionate share adjustment) ultimately reflects a decision specifically to encourage the activity associated with those costs. As several commenters pointed out, adoption of a tax adjustment would have amounted to subsidizing a decision about hospital organizational structure (that is, the choice of proprietary status). While many nonproprietary hospitals would have qualified for a tax adjustment, our final data showed that those hospitals would have received, on average, a capital-related tax adjustment of $6.42 per discharge. As a result, tax-paying nonproprietary hospitals would, on average, have gained only slightly more from the tax adjustment than they would have lost from the reduction to the Federal rate. This is because the amounts that voluntary hospitals pay in taxes is relatively small. In contrast, tax-paying proprietary hospitals would have received, on average, a tax adjustment of $70.47 per discharge. As a result, those hospitals would have gained much more from the adjustment than they would have lost from the reduction to the Federal rate. A tax adjustment would have subsidized proprietary hospitals that pay capital-related taxes at the expense of all other groups. Therefore, we believe that the proposed tax adjustment may not be consistent with the principles behind prospective payment.

We recognize that many hospitals that might have benefited from the implementation of a tax adjustment have been inconvenienced by the time and effort required to comply with our requests for documentation of their tax costs. Because of our decision, those hospitals will now receive no benefit in return for complying with our requests. We regret that it was not possible to make a final determination about the merits of implementing a tax adjustment before proceeding with data collection and verification. It was necessary to collect and verify data on tax costs in order to determine the dimensions of the issue before proceeding with any proposal to make an adjustment. Without verified data, we would not have been able to inform interested parties of the estimated size of the change in payments for hospitals that do not pay taxes. Once we published the proposal, it was necessary to complete data collection and verification in order to be prepared for possible implementation of the adjustment following comments. On the one hand, then, we could not proceed with a proposal without data. On the other hand, we also could not decide to implement the proposal in the final rule simply because the data had been collected. It would be inconsistent with the integrity of the rulemaking process to allow preparations necessary for the possible implementation of a proposal to dictate the results of the notice and comment process.

The issue of taking capital-related tax payments into account when determining capital-related prospective payments is an important one in the effort to create a payment system that is both fair and feasible. Providers that submitted data needed in the analysis of this issue and for the design of a payment system made an indispensable contribution toward informing the debate, influencing the formulation of this important public policy, and reaching the decision that the proposed change in the capital-related prospective payment system should not be made at this time.

As noted, we received numerous other comments about the specific features of a possible tax adjustment. Since we have decided not to proceed with such an adjustment, we will not respond to those comments at this time.

VI. Changes for Hospitals and Units Excluded From the Prospective Payment Systems

A. New Requirements for Certain Long-Term Care Hospitals Excluded From the Prospective Payment Systems (§§ 412.23(e))

1. Effect of Change of Ownership on Exclusion of Long-Term Care Hospitals

As discussed in the June 2, 1995 proposed rule, some questions have arisen as to whether a hospital's compliance with the length-of-stay requirement for long-term care (LTC) hospitals is affected by its sale to a new owner. After reviewing this issue, we concluded that if a change of ownership occurs at the start of a cost reporting period, or at any time during the 6 months immediately preceding the start of that period, the hospital should not be required to begin a new qualifying period. Therefore, we proposed to clarify current regulations by specifying under § 412.23(e)(2) that if a hospital undergoes a change of ownership at the start of a cost reporting period, or at any time within the preceding 6 months, it may be excluded from the prospective payment system as an LTC hospital if it is otherwise qualified and maintained an average length of stay in excess of 25 days, under both current and previous ownership, for that 6-month period (60 FR 29244). To qualify for the exclusion, the hospital must have been continuously in operation for all of the qualifying period and participated continuously in Medicare as a hospital. That is, periods during which the hospital was closed or did not participate in Medicare could not be counted toward the required experience.

We received no public comments on this proposal and are, therefore, adopting the regulations as proposed.

2. Revised Criterion on Purchase of Services by LTC "Hospitals Within Hospitals"

Recently, some entities began to organize themselves under what they refer to as the "hospital within a hospital" model. Under this model, an entity may operate in space leased from a hospital and have most or all services furnished under arrangements by employees of the lessor hospital. The newly organized entity may be operated by a corporation formed and controlled by the lessor hospital, or by a third entity that controls both. In either case, the new entity seeks State licensure and Medicare participation as a hospital, demonstrates that it has an average length of stay of over 25 days, and seeks to obtain an exclusion from the prospective payment systems. As explained in the rulemaking documents for FY 1995, we believe it would be inappropriate to extend the LTC hospital exclusion to what is for all practical purposes a LTC hospital unit.

To avoid granting LTC hospital exclusions inappropriately to hospital units while still allowing adequate flexibility for legitimate networking and sharing of services, we set forth additional exclusion criteria for these "hospitals within hospitals" in our September 1, 1994 final rule (59 FR 45389–45393). These regulations provide that, in addition to meeting the other LTC hospital exclusion requirements set forth in § 412.23, to be excluded from the prospective payment systems, a hospital located in the same building or in one or more entire buildings located on the same campus as another hospital must have a separate governing body, a separate chief medical officer, a separate medical staff, and a separate chief executive officer. These criteria are stated in regulations at §§ 412.23(e)(3)(i)(A) through 412.23(e)(3)(i)(D). In addition, the hospital must either perform most basic hospital functions without any assistance from the hospital with which it shares space (or from a third entity that controls both) (§ 412.23(e)(3)(i)(E)) or receive at least 75 percent of its inpatient referrals from a source other than the other hospital during the period used to demonstrate compliance with the length-of-stay criterion (§ 412.23(e)(3)(ii)). The criterion under § 412.23(e)(3)(i)(E) does permit a hospital seeking exclusion to obtain certain services from a hospital occupying space in the same building, including food and dietetic services and housekeeping, maintenance, and other services necessary to maintain a clean and safe physical environment.

Since publication of the September 1, 1994 final rule, hospital representatives have stated that there are some situations in which basic hospital services other than those related to dietetic, housekeeping and maintenance functions could be furnished in a more cost-effective manner, or more conveniently for patients, if they were provided by the hospital in which the LTC hospital is located. As discussed in the June 2, 1995 proposed rule, we recognize the need to allow LTC hospitals within hospitals greater discretion to purchase services like these from their "host" facilities, when it is done in a cost-effective and convenient way. However, it is also important that the LTC hospital exclusion criteria be clear and definite enough to limit LTC exclusions to bona fide separate hospitals. To balance these competing objectives, we proposed to revise the exclusion criteria to describe the scope of services that can be obtained from the host hospital in financial terms, rather than by type of service (60 FR 29244).

Under our proposal, an otherwise qualified hospital could obtain a LTC hospital exclusion if the operating cost of services that it furnishes directly or obtains from a source other than the hospital with which it shares a building or campus (or from a third entity which controls both hospitals) constitutes at least 85 percent of its total inpatient operating costs. This test would be applied with respect to the cost reporting period or other time period used to establish the hospital's compliance with the length of stay criterion. (If a period other than a full cost reporting period is used, the LTC hospital must provide HCFA with verifiable information on its costs for that part of the period.)

We proposed a criterion of 85 percent of total inpatient operating costs as an appropriate test of separateness based on the level of dietetic, housekeeping, and maintenance expenses incurred by a small sample of LTC hospitals for which we have readily available data. Our review showed that these expenses generally ranged from 5 to 17 percent of total inpatient operating costs for the periods under review. By setting the maximum acceptable level at 15 percent, we believe that we would allow hospitals an adequate margin for purchase of a limited range of services, without encouraging a level of dependence that calls into question the LTC hospital's status as a separate institution.

To implement this policy, we proposed to specify under § 412.23(e)(3)(i)(E) that the costs of any services a hospital obtains under contract or other agreements with a hospital occupying space in the same building or campus, or with a third entity that controls both hospitals, may not exceed 15 percent of the hospital's total inpatient operating costs, as defined under § 412.2(c). Thus, a LTC hospital would be permitted to obtain dietetic, housekeeping, maintenance or other services from another hospital with which it shares a building or campus (or from a controlling third entity), provided that the aggregate cost of these services is no more than 15 percent of its total inpatient operating costs.

Public comments on this proposal are addressed below.

Comment: One commenter objected to an exclusion criterion for LTC hospitals within hospitals that is stated in terms of the cost, rather than the type, of services purchased from the host facility. This commenter stated that hospitals within hospitals are units of acute care hospitals and should be treated as such. The commenter also stated that the proposed criterion will further complicate an already complex system, encourage more facilities to reorganize themselves in an attempt to gain exclusions from the prospective payment system, and increase Medicare administrative costs. For all of these reasons, the commenter recommended that we not only abandon the proposed change but also revise the regulations to prohibit LTC hospitals within hospitals from being excluded from the prospective payment system.

Response: Although we share the commenter's concern about possible abuse of the exclusion provisions, we do not believe that either our current regulations or our proposals encourage inappropriate exclusions. On the contrary, the current regulations provide reasonable assurance that facilities excluded as LTC hospitals are functioning as separate hospitals, and we believe that our proposed changes will preserve our ability to achieve this result. Moreover, we expect that the shift from a type-based to a volume-based standard will reduce, rather than add to, the complexity and cost of our regulations. Thus, we do not agree that it is necessary to prohibit all LTC hospitals within hospitals from being excluded from the prospective payment system, nor do we believe that the proposed changes will encourage more facilities to pursue exclusions. For these reasons, we did not adopt this commenter's suggestions.

Comment: One commenter stated that hospitals within hospitals typically are set up to serve only the LTC needs of patients of the host hospital, and are unlikely to receive referrals from other sources. A hospital of this type also may have a low occupancy level, thus leading to very high per-stay costs, which will be paid for by Medicare. To prevent this situation from occurring, the commenter recommended that the 75 percent alternative criterion in § 412.23(e)(3)(ii) be made a basic requirement for exclusion. Under this commenter's recommendation, a hospital within a hospital would be excluded as a LTC hospital only if it met the 75 percent criterion and also provided all basic services without assistance from the host hospital. The commenter argued that this approach will limit the exclusion of LTC hospitals within hospitals to those that meet legitimate community needs.

Response: Although we agree that an approach of this kind might help to prevent abuse of the exclusion provisions, we are concerned that such a standard might deny exclusion to some legitimately separate institutions. We believe that the revised criteria are sufficiently rigorous to identify only situations when exclusion is appropriate, yet flexible enough to recognize legitimate variations in the ways hospitals obtain needed services and supplies. Therefore, we did not adopt this comment.

Comment: Several commenters expressed support for our proposal to focus on the volume, rather than the type, of services purchased from the host hospital. However, these commenters also stated that a criterion set at 15 percent of total inpatient operating costs is too restrictive. One commenter favored setting the criterion at 25 percent of the LTC hospital's total inpatient operating costs, with an exception for higher levels of purchases where the LTC hospital can show that obtaining services in this way is cost-effective. Another commenter suggested setting the criterion at 35 percent of total inpatient operating costs. Still another commenter favored retaining the requirement that hospitals provide most basic hospital services but allowing some percentage of basic hospital services, as measured by cost, to be purchased from the host hospital.

Several commenters expressed concern about the range of costs considered in arriving at the 15 percent figure. One commenter stated that the 15 percent threshold is too low because it does not include those services that were prohibited in the prior years, and recommended eliminating any limit on the type or cost of services that a LTC hospital can purchase from its host hospital. Another commenter asked for more detailed information on how the 15 percent figure was derived and how the measurement will be implemented. The commenter believes the 15 percent figure is necessarily too low since several categories of costs (telephone, administrative and general, laundry and linen, social services, and physical, recreational, and respiratory therapy costs) were not included in the costs sampled to arrive at that figure. One commenter stated that the methodology used to arrive at the 15 percent figure appears to be inadequate, in that it assessed only dietetic, housekeeping, and maintenance expenses, and did not take into account services such as hyperbaric oxygen therapy, surgical services, physical therapy, and security, which can often be obtained most cost-effectively from the host hospital. Because of concern about these issues, the commenter recommended that we revise the regulations to base exclusion on the level of patient needs, rather than the volume of costs, met by services obtained from the host hospital. Two commenters recommended that the regulations be revised to state that the inpatient operating costs to which the 15 percent criterion is applied will not include any costs of leased space or of equipment rental, maintenance, or utilities for the space.

Finally, one commenter noted that some new hospitals have structured their operations for their initial 6-month period of operation to comply with the requirement that they furnish basic hospital services without assistance from the host facility, and have not held the inpatient operating costs of services purchased from the host hospital within the 15 percent ceiling allowed by the proposed regulations. The commenter stated that by shifting to a cost-based standard, we would in effect be denying exclusion to facilities that operated in compliance with the exclusion criteria in effect when they began to provide services. To avoid this scenario, the commenter suggested that we delay the effective date of the 15 percent rule by an additional year (that is, until cost reporting periods beginning on or after October 1, 1996) for hospitals meeting the criterion related to provision of basic hospital services without assistance from the host hospital.

Response: These comments appear to reflect some misunderstanding of the purpose of our proposed change to an exclusion criterion based on volume of services (as measured by costs) rather than type of services. The purpose of the proposal is not to identify the most cost-effective way for a hospital within a hospital to obtain services, but to describe a pattern of functioning that provides reasonable assurance that a facility seeking to be excluded from the prospective payment system as a LTC hospital actually functions as a separate hospital. Clearly, when a facility operates within another institution, it may be more cost-effective in many cases to obtain services from the surrounding institution. It may be even more cost-effective to integrate the governance and medical direction of the hospital and the entity. A hospital component that wishes to organize itself in this way may do so, but it would not constitute a separate hospital under section 1886(d)(1)(B) of the Act, which provides for the exclusion of LTC hospitals, but not LTC units, from the prospective payment system.

In assessing the level of dietetic, housekeeping, and maintenance expenses incurred by a sample of LTC hospitals, our goal was not to set the criterion at a level that could easily be met by all potential hospitals within hospitals, but to assess the proportion of costs that a separate hospital may need to spend for the range of services it can buy under current exclusion rules. Thus, our intent was to devise a criterion that would properly assess the level of independence of a hospital within a hospital, but would allow more discretion as to the types of services to be supplied by the host facilities. We recognize that not all hospitals located within hospitals may be able to meet the criterion, and that in some cases hospitals may need to reduce their level of purchases from host facilities to qualify for exclusion under the criterion.

In response to the comments asking for the basis for establishing the threshold at 15 percent, the proposed 15 percent criterion was based on our analysis of the best available data. The Hospital Cost Report Information System (HCRIS), the automated cost report data base submitted by the fiscal intermediaries, does not contain cost data for the specific general service cost centers, such as dietary, housekeeping and maintenance costs, that represent a large portion of the costs of shared services. As a result, we instead analyzed cost report data from the hard copies of cost reports that we had on file. Specifically, we analyzed data for LTC hospitals that had requested a review of costs in relation to the TEFRA limits. This data showed that the aggregate of these specific operating costs, in comparison to total operating costs, ranged from a low of 5 percent to a high of 17 percent. Based on this range, we concluded that 15 percent was a reasonable level at which to establish the standard, as we proposed in our June 2, 1995 rule.

In response to public comments on this proposal, we conducted further analysis of the cost reports aimed at estimating more precisely the proportion of total inpatient operating costs that is attributable to basic hospital services. To do so, we refined our analysis to include additional costs (that is, maintenance and repairs, operation of plant, and laundry and linen services), to account for ancillary costs of inpatient hospital services, and to exclude ancillary costs related to nonhospital components of the institution, such as distinct part skilled nursing facilities. The new analysis indicated a range of 7 percent to 27 percent, with an average of slightly below 15 percent.

Thus, based on this analysis, we continue to believe that a 15 percent standard represents a valid and reasonable basis for identifying hospitals within hospitals that actually function independently. However, we are concerned that some hospitals that have been excluded appropriately under criteria related to the types of services they provide independently from their hosts may not be able to meet the new criterion by the time it becomes effective (that is, by the start of cost reporting periods beginning on or after October 1, 1995). To avoid this problem as well as to widen, as appropriate, the range of compliance options available to hospitals within hospitals, we have decided to make the 15 percent standard an alternative to, rather than a replacement for, our current criterion on provision of basic hospital services. This approach will enable hospitals the flexibility to buy whatever services they wish from the host, subject to the 15 percent limit, but will not require hospitals that qualify for exclusion under current rules to alter their operations to meet a new requirement. We note that because we are making the 15 percent rule an alternative to the current criterion rather than a replacement for it, a new hospital that has organized itself to meet the current requirements will not be disadvantaged. Thus, there is no need to delay application of the 15 percent rule.

With respect to the costs to which the 15 percent criterion will apply, we are clarifying proposed § 412.23(e)(3) to state that the criterion apply to total inpatient operating costs, as defined under § 412.2(c), except that, for purposes of the prospective payment system exclusion provisions, the costs of preadmission services are those specified at § 413.40(c)(2), not those described in § 412.2(c). Costs incurred under leases or rental agreements are taken into account only to the extent they fall within the § 412.2(c) definition of operating costs.

Finally, concerning the suggestion on patient needs, we note that those needs often can be defined only subjectively, and we believe that any test or measurement used for exclusion should be an objective one that is susceptible to verification by both the provider and HCFA. Thus, we did not adopt this suggestion.

Comment: One commenter stated that current rules relating to the types of services obtained by an LTC hospital within a hospital from its host are clear and adequate for distinguishing a separate hospital from a hospital unit, and that a separate rule relating to the volume of services is not needed. This commenter suggested that instead of shifting to a volume-based standard, another way to allow greater flexibility for cost-effective purchasing from the host hospital would be to allow specific types of basic hospital services, such as laboratory services, to be purchased from the host facility. Another commenter recommended that the 15 percent limitation be applied only to basic hospital services as defined under current regulations, and that an LTC hospital within a hospital be allowed to buy other services without limitation from the host hospital.

Response: We agree that either proposed approach would increase hospital flexibility. However, the types of services available from host facilities

and from other sources vary from one community to another, and from hospital to hospital within a community, and it would be difficult to specify a range of basic hospital services that could acceptably be obtained from the host facility in all cases, without permitting so many types of services to be obtained from the host facility that the criterion would no longer be a useful measure of independent functioning. With regard to the second comment, we are concerned that applying the 15 percent criterion only to basic hospital services would effectively lower the level of independent functioning necessary for a hospital to qualify for exclusion, relative to our current requirements, and thus might permit inappropriate exclusions. Therefore, we are not adopting either of these suggestions.

Comment: A commenter suggested that the creation of a hospital within a hospital is potentially abusive only where the LTC hospital is operated by a corporation owned and controlled by the host hospital, or by a third entity that controls both the host and the LTC hospitals. The commenter recommended that the 15 percent rule be applied only where operational control of this kind exists.

Response: We do not agree with this commenter that simply satisfying the structural criteria (those related to having a separate governing body, medical staff, chief executive officer, and chief medical officer) and average length of stay criteria should be sufficient to support exclusion of an LTC hospital within a hospital. On the contrary, we believe it is essential for such an entity to show that it actually functions as a separate hospital. If the two facilities meet only the separate control criteria but the LTC facility either receives fewer than 75 percent of its inpatients from sources other than the host or receives more services, or different types of services, from the host than allowed under our regulations, we question the validity of excluding the facility from the prospective payment system as a separate LTC hospital. Under these circumstances, the facility would in reality be a unit of the host hospital. Therefore, we did not adopt this comment.

Comment: Two commenters stated that the regulations on hospitals within hospitals should be revised to apply only when an LTC hospital wishes to share a building or campus with a prospective payment hospital, not to comparable situations involving a long-term care hospital and a rehabilitation hospital.

Response: Although the "hospital within a hospital" rules were designed primarily in response to situations involving LTC and prospective payment hospitals, the possibility of inappropriate exclusion of a hospital unit can also arise if an excluded hospital such as a psychiatric or rehabilitation hospital seeks to set up an LTC hospital within itself. In both situations, our concern is that an entity that is in essence a hospital unit may seek to obtain an inappropriate exclusion from the prospective payment system. Section 1886(d)(1)(B) of the Act provides for exclusion of LTC hospitals but not of LTC units. Because newly created hospitals within hospitals are eligible for a separate TEFRA target rate and may be eligible for a new hospital exemption from the rate-of-increase ceiling under § 413.40(f), we believe it is important to prevent inappropriate exclusions in all circumstances, not merely those involving prospective payment hospitals. Thus, we do not believe it is appropriate to limit the criteria as the commenter suggested.

Comment: One commenter recommended that we revise the regulations to include a "grandfather" clause under which LTC hospitals within hospitals that were excluded from the prospective payment system before October 1, 1994, would not need to meet the current exclusion criteria in order to continue to qualify for exclusion.

Response: The adoption of the 15 percent criterion as an alternative to the existing exclusion criteria under § 412.23(e) gives hospitals within hospitals three alternatives for showing that they function as separate hospitals. Moreover, § 412.23(e)(4) specifies that the criteria concerning the performance of basic hospital functions (under § 412.23(e)(3)) do not apply to any previously excluded hospital until the hospital's first cost reporting period beginning on or after October 1, 1995. In view of the three options available to hospitals for establishing eligibility to be excluded from the prospective payment system, and the delayed effective date already provided for in regulations, we believe we have established equitable policies for previously excluded LTC hospitals within hospitals. Thus, a grandfather clause is unnecessary. Moreover, we are concerned that indefinitely exempting a set of previously excluded hospitals from the regulations would be both inequitable to newer hospitals, and difficult to administer, since similar facilities would be subject to different payment rules, based only on their initial date of exclusion. Finally, it would be contrary to the statutory scheme to exclude LTC units from the prospective payment system. Thus, we have not adopted this suggestion.

Comment: One commenter asked whether the revised criterion on purchase of services would apply to the initial qualifying period of 6 months that is used to establish length of stay for a new LTC hospital.

Response: As stated in proposed § 412.23(e)(3)(i)(E), the new criterion on purchase of services applies to the same period of at least 6 months used to determine compliance with the length-of-stay criterion in § 412.23(e)(2).

Comment: One commenter stated that if an acute care hospital is allowed to set up a LTC hospital within a hospital, it may have a financial incentive to discharge patients prematurely from the acute hospital to the long-term care hospital. The commenter suggested that we adopt further regulations limiting the acute care hospital's ability to discharge a patient to a LTC hospital that it owns or controls.

Response: We understand and share this commenter's concern, and the LTC exclusion criteria are designed to prevent inappropriate exclusions. However, HCFA has no authority to restrict the range of hospitals to which a patient may be referred following discharge from acute care. We intend to review this issue, and may propose further payment changes to avoid financial incentives for inappropriate placement of patients.

B. Clarifying Changes for Excluded Hospitals and Units (§§ 412.23, 412.29, 412.30 and 412.130)

For clarity, we proposed to revise § 412.23(e)(3) to state more clearly that a hospital sharing space with another can qualify for exclusion only if it meets all of the requirements of paragraphs (e)(3)(i)(A) through (e)(3)(i)(D) of that section and, in addition, those in *either* paragraph (e)(3)(i)(E), which deals with separate performance of services, or § 412.23(e)(3)(ii), which deals with the source of the hospital's patients.

In addition, we proposed to restate the rules in §§ 412.29 and 412.30 to differentiate more clearly between criteria that apply when a hospital seeks exclusion of a rehabilitation unit that is created through an addition to its existing bed capacity, and the criteria that apply when a hospital seeks exclusion of a unit that has been created by converting existing bed capacity from other uses. We also proposed to clarify the rules that apply when a hospital expands an existing rehabilitation unit by increasing its bed capacity or by converting existing capacity. These revisions were developed in response to complaints from some hospital representatives that the current regulations do not state our criteria clearly. We emphasized that these proposals merely restate, and do not change, existing rules. In conjunction with this proposed change, we also stated that we would make a technical change to a reference in § 412.130.

Comment: One commenter objected to the provision of § 412.30(c)(1)(ii) under which the beds a hospital seeks to add to its existing rehabilitation unit will be considered new only if over 50 percent of the beds represent newly licensed and certified beds. The commenter stated that this represents a substantive change in the rules which inappropriately restricts the ability of a hospital to convert acute care capacity to uses excluded from the prospective payment system.

Response: As the commenter noted, § 412.30(b) does not deal explicitly with situations in which a hospital seeks to expand an excluded rehabilitation unit by adding bed capacity that is made up partly of newly licensed capacity and partly of existing capacity. One purpose of the revision was to clarify our policy on this issue. However, § 412.30(a)(2) does state explicitly that "a unit that includes some beds that were previously licensed and certified and some new beds is recognized as new only if more than one half of the beds are new." Thus, the revision merely restates a current rule as to what will be considered "new" when an existing facility adds a mixture of newly licensed and existing capacity.

C. Changes to the Regulations Addressing Limitations on Reimbursable Costs (§§ 413.30 (e) and (f), and 413.35(b))

We proposed to remove obsolete material from the regulations. Specifically, we proposed to remove § 413.30 (e)(1), (e)(3), and (e)(4), since sole community hospitals, risk-basis HMOs, and rural hospitals with less than 50 beds are included under 42 CFR part 412, which governs the prospective payment system for operating costs. In addition, we proposed to remove § 413.30(f)(5), (f)(6), (f)(7) (a reserved paragraph), and (f)(9), concerning exceptions for hospital routine care, essential community hospital services, and hospital case-mix changes for cost reporting periods beginning before October 1, 1983. In conjunction with these proposed changes, we stated that we would incorporate the exemption requirements for new providers into paragraph (e) of § 413.30, redesignate subparagraphs under paragraph (f) of § 413.30, and make technical changes to references in §§ 413.30(f) and 413.35(b)(2).

We received no comments on these proposals, and are therefore adopting the changes as proposed.

D. Payment Window for Hospitals and Hospital Units Excluded from the Prospective Payment Systems (§ 413.40(c))

On January 12, 1994, we published an interim final rule with comment period to specify that inpatient hospital operating costs include costs of certain preadmission services furnished by the hospital (or by an entity that is wholly owned or operated by the hospital) to the patient up to 3 days before the date of the patient's admission to the hospital (59 FR 1654). The interim final rule implemented section 4003 of the Omnibus Budget Reconciliation Act of 1990 (Public Law 101–508), which amended section 1886(a)(4) of the Act. Because the definition of inpatient operating costs in section 1886(a)(4) of the Act applies to both prospective payment system hospitals and hospitals excluded from the system, the January 12, 1994 interim final rule revised the regulations governing excluded hospitals as well as those governing prospective payment hospitals. Specifically, we revised § 413.40(c)(2) of the regulations to reflect the 3-day payment window as required by the statute. We received 11 comments in response to this issue. Although we stated in the proposed rule that we intended to address these comments in this final rule, we have revised our plans. We will instead issue the final rule addressing the 3-day payment window as a separate document to be published in the **Federal Register**.

On October 31, 1994, Congress enacted the Social Security Act Amendments of 1994. Section 110 of that legislation amended section 1886(a)(4) of the Act to state that, for hospitals excluded from the prospective payment system, the preadmission services to be included are those furnished during the 1 day (not 3 days) before a patient's admission.

To implement this provision, we proposed to revise § 413.40(c)(2) to provide for a 1-day payment window for hospitals and hospital units excluded from the prospective payment system. We note that the term "day" refers to the calendar day immediately preceding the date of admission, not the 24-hour time period that immediately precedes the hour of admission.

We received no comments on this proposal, and are therefore adopting the changes as proposed.

E. Ceiling on the Rate of Increase in Hospital Inpatient Costs (§ 413.40(e) and (g))

We proposed to revise § 413.40(e)(1) to clarify that a request for a payment adjustment must be *received* by a hospital's fiscal intermediary no later than 180 days from the date of the notice of program reimbursement (NPR). Currently, this section states that a request must be "made" rather than "received." We have consistently interpreted the word "made" to mean "received by the fiscal intermediary" since the original regulation was promulgated (47 FR 43282, September 30, 1982). However, use of the word "made" in § 413.40(e)(1) has resulted in varying interpretations of the timely filing requirement by hospitals and their fiscal intermediaries. In the interest of a uniform and consistent application of our policy, we proposed to clarify the regulation by substituting "received by the hospital's fiscal intermediary" for "made" in § 413.40(e)(1).

In § 413.40(g)(1), we proposed to clarify the determination of the amount of payment made to a hospital that receives a TEFRA adjustment. Since October 1, 1991, a hospital with operating costs in excess of its ceiling has been paid the ceiling plus an additional amount, as provided at § 413.40(d)(3). For these cost reporting periods, a hospital receives some payment for costs in excess of the ceiling. We also proposed to add a sentence to clarify that the amount of payment made after a TEFRA adjustment may not exceed the difference between a hospital's operating costs and the payment previously allowed.

Comment: We received two comments requesting that the postmark date of the request be used as the determinant of whether the comment is received timely. One commenter expressed concern about problems with the intermediary's delivery procedures and delays in the mail room. Both commenters requested that we use the postmark date to determine timely filing of an exception request because it provides "incontrovertible proof" that a request was made timely and is consistent with a final rule published in the **Federal Register** on June 27, 1995 (60 FR 33137) with regard to timely filing of the cost report.

One of the commenters also objected to our proposed policy of using the receipt date by the intermediary, stating that HCFA often takes 18 months or longer to respond to exception requests. The commenter added that a request based on sound merits should be

considered whether it is received on the 180th or 181st day after the notice of program reimbursement.

Response: The commenter's statement regarding the use of a postmark date for determining whether cost reports are considered timely filed is based on language from our response to a comment in a final regulation published in the **Federal Register** on June 27, 1995 (60 FR 33139) that extended the due dates for filing cost reports to five months from the end of the cost reporting period. In that response, we explained that we use the postmark date in the cost report context in accordance with section 2219.4C of the Medicare Intermediary Manual.

In the appeals context, however, there are certain statutes and regulations that impact on our decision as to when payment exceptions must be requested to be considered timely. While section 1886(b)(4)(A) of the Act, which provides the Secretary with the authority to grant exceptions to the per discharge limit, does not specify requirements with regard to timely filing of an exception request, we believe it is appropriate to examine section 1878 of the Act. That section addresses timely filing of a hearing request with the Provider Reimbursement Review Board (PRRB). Such a request, like an exception request, involves a provider seeking reimbursement in addition to that set forth in its notice of program reimbursement. For that reason, we believe that our policy with regard to the timely filing of an exception request should be consistent with section 1878 of the Act.

Section 1878(a)(3) of the Act states that if a provider files a request for a hearing within 180 days after notice of the intermediary's final determination, the provider can obtain a hearing with the PRRB. We note that *Black's Law Dictionary* defines the term "file" as follows:

> To deposit in the custody or among the records of a court. To deliver an instrument or other paper to the proper officer or official for the purpose of being kept on file by him as a matter of record or reference in the proper place.

Accordingly, we are continuing to use the date received by the intermediary to determine timely filing of an adjustment request by a provider. Under this policy, intermediaries will date stamp requests upon receipt, and we will consider the date stamped on the exception request by the intermediary as the receipt date to determine timely filing, unless the provider demonstrates that the intermediary received the request on some other date. For example, a provider may mail through an overnight delivery service a request that is not stamped until the day after delivery. Where the provider can show that it was delivered on the previous day the request will be considered timely.

With regard to the comment that HCFA often takes 18 months or longer to respond to exception requests, we regret these delays, which have resulted from the significant volume of exception requests we have received. We are making efforts to reduce the backlog and expedite processing of exception requests. However, we do not agree that all exception requests should be evaluated on their merits regardless of whether they are received on the 180th or 181st day after the NPR. To ensure effective administration of the program, intermediaries must consistently apply the timely filing requirements.

Comment: One commenter interprets our proposal to clarify that the amount of payment made after a TEFRA adjustment may not exceed the difference between a hospital's operating costs and the payment previously allowed to mean that the TEFRA penalty payment would not apply.

Response: The commenter's interpretation is not correct. Our proposal was intended only to ensure that total payments to an excluded hospital or unit that receives an exception do not exceed total inpatient operating costs. Currently, hospitals with costs above the TEFRA limit receive their per discharge limit plus 50 percent of costs in excess of the limit, up to 110 percent of the target amount. If the hospital receives an adjustment to its TEFRA target amount, the amount of penalty payment is recalculated based on the adjusted target amount. Under our policy, the hospital could continue to receive the TEFRA penalty payment and any additional adjustment amounts, but only up to its total inpatient operating costs. Accordingly, the total payment would not exceed total inpatient operating costs.

VII. ProPAC Recommendations

As required by law, we reviewed the March 1, 1995 report submitted by ProPAC to Congress and gave its recommendations careful consideration in conjunction with the proposals set forth in the proposed rule. We also responded to the individual recommendations in the proposed rule. The comments we received on the treatment of the ProPAC recommendations are set forth below along with our responses to those comments. However, if we received no comments from the public concerning a ProPAC recommendation or our response to that recommendation, we have not repeated the recommendation and response in the discussion below. Recommendations 1, 4, and 5, concerning the update factors for inpatient operating costs, the update factor for hospitals paid on the basis of hospital-specific rates, and the update factor for hospitals excluded from the prospective payment system and distinct-part units, respectively, are discussed in Appendix C to this final rule. Recommendations 2 and 3, concerning the update factors for inpatient capital costs and the single operating and capital update factor, respectively, are discussed in Section V of this final rule. Recommendation 11, concerning improving Medicare transfer payment policy, is discussed in section IV.A of the preamble. The remaining recommendations on which we received comments are discussed below.

A. Update to the Composite Rate for Dialysis Services (Recommendation 6)

Recommendation: For FY 1996, the composite rate for dialysis services should be updated to account for the following:

- The projected increase in the market basket index for dialysis services, currently estimated at 3.7 percent;
- A net adjustment of zero percentage points for scientific and technological advances and productivity; and
- A negative discretionary adjustment of 3.7 percentage points to reflect the relationship between payments and estimated fiscal year 1995 costs.

This would result in an update of zero percent.

Response in the Proposed Rule: We agree with ProPAC's recommendation not to propose a payment rate increase for dialysis services. ProPAC's cost analysis indicates that, in aggregate, Medicare payments to independent dialysis facilities were about 12 percent higher than their Medicare allowable costs, and thus there is no basis to increase the composite rate. Furthermore, ProPAC concludes that without documented explanations for reported higher costs in hospital-based facilities, it cannot justify a differential update for these facilities.

ProPAC's analysis of the 1993 unaudited cost data shows that Medicare allowable costs for independent facilities are less than their payment rate. Since 1983, the number of independent facilities has continued to increase in response to growing patient demand, even though payment rates have remained constant. As noted by ProPAC, the margin between independent facilities' composite payment rates and their Medicare allowable costs continues to decrease. Because of this trend, we will closely monitor the costs of dialysis treatments as reported by facilities on their cost reports. Further, if Medicare's conditions of coverage are revised to include an adequacy of dialysis standard, we will examine the need to adjust composite payment rates. The current composite payment rates are mandated by statute.

To improve the quality of the cost report data and to address concerns about the cost report, we have revised the independent facilities' cost report, Form HCFA 265–94. The new cost report eliminates the allocation of the facility's overhead to the drug recombinant human erythropoietin (EPO). In addition, we are revising the independent cost reports edits. These edits would screen cost report data to ensure that data elements outside edit ranges are investigated by intermediaries.

Comment: One commenter asserted that the difference in cost levels between freestanding facilities and hospital-based renal facilities is obvious; hospital-based renal facilities treat a more resource intensive and complicated patient base. The commenter recommended updating the composite payment rates using the hospital market basket index.

Response: ProPAC addressed this issue in its report. Its analysis did not attribute the difference in cost to factors such as patient mix, for which the composite payment rate system should compensate renal facilities. Rather, it showed that the higher cost per treatment in hospital-based facilities was due to higher labor expenses and the method by which costs are allocated between inpatient and outpatient departments. Differences between independent and hospital-based facilities in quality of care and patient outcomes have not been demonstrated. Patient data showed in the aggregate that there is no difference between hospital and independent renal patient medical populations. For renal facilities treating an atypical patient population, there is an exception process. This process gives renal facilities an opportunity, on a case by case basis, to demonstrate that their payment rates should be adjusted to account for higher costs attributable to differences in patient mix.

Comment: ProPAC commends the Secretary's efforts to improve the quality of cost report data by eliminating the allocation of facilities' overhead to the drug recombinant human erythropoietin (EPO) and by revising the independent cost report edits to screen cost report data more effectively. The Commission believes, however, that annual audits are necessary to develop the quality data needed to monitor dialysis costs over time and to ensure that payments for dialysis services are updated appropriately.

Response: Audits are important to ensure the quality of cost reporting data and would improve the quality of the data. However, audits are expensive for HCFA and for renal facilities, and they only correct the data being audited. The best way to improve the quality of cost data is through education, such as that being conducted by the National Renal Administrator Association. We are in the process of developing a national standard to measure the adequacy of dialysis. We will conduct audits once this standard is implemented. These audits should then document the costs associated with improved dialysis care.

B. Level of the Indirect Medical Education (IME) Adjustment to Prospective Payment System Operating Payments (Recommendation 7)

Recommendation: For FY 1996, the IME adjustment to prospective payment system operating payments should be reduced by 13 percent, from a 7.7 percent to a 6.7 percent increase for every 10 percent increment in teaching intensity. Ultimately, the IME adjustment should be reduced by about 40 percent, to a 4.5 percent increase for every 10 percent increment in teaching intensity.

Response in the Proposed Rule: ProPAC's IME estimate of 4.5 percent represents a significant acceleration in the downward trend of its estimates in the last several years (5.7 percent in 1992, 5.4 percent in 1993, and 5.2 percent in 1994). Coupled with FY 1993 cost report data showing major teaching hospitals' Medicare operating margins (difference between payments and costs as a percentage of payments) rising to over 11 percent, this declining IME estimate adds to the argument that the current adjustment is too high. Legislation would be required to reduce the IME adjustment. However, savings proposals of this sort would only be appropriate in the context of health care reform.

Comment: ProPAC's comment largely reiterated the discussion contained in its March 1995 report. ProPAC did indicate that, contrary to our assertion that its IME estimate of 4.5 percent represents an acceleration in the downward trend of its recent estimates, this apparent downward trend reflects its "continuing efforts to improve both the methods used to analyze this relationship and the accuracy of the resulting estimates." The Commission's comment goes on to indicate that, applying its current estimating methodology to prior year's data, "the results do not vary much from the current 4.5 percent estimate.

Response: We agree that, in our June 2, 1995 response to ProPAC's recommendation, we may have misinterpreted ProPAC's most recent IME estimates as indicating an accelerating downward trend. Upon further discussion with ProPAC, it appears that, rather than a declining relationship over time, the decline in the most recent estimate results from a change in how ProPAC controls for cost differences resulting from hospital location (that is, large urban, other urban or rural). Specifically, in its most recent estimate, ProPAC included dummy variables in the regression to indicate that a hospital is located in a large or other urban area, rather than standardizing the dependent variable costs per discharge for differences in the standardized amounts.

C. Making DRG Payment Rates More Accurate (Recommendation 9)

Recommendation: The Secretary should implement, as soon as practicable, the DRG severity refinements developed by HCFA. At the same time, she should improve the accuracy of basic DRG payment rates and outlier payments by changing the methods used to calculate the DRG relative weights. The weights should be based on the national average of hospital-specific relative values for all cases in each DRG, rather than the national average standardized charge per case.

Response in the Proposed Rule: In the May 27, 1994 proposed rule (59 FR 27716), we announced the availability of a paper we prepared that describes our preliminary severity DRG classification system and the analysis upon which our proposal was formulated. Based on the 100 comments we received on that paper, we are further analyzing and adjusting the severity DRG classifications. We are also examining the stability of the severity classifications over time. We agree with the Commission's judgment that adopting the severity DRGs would tend to reduce current discrepancies between payments and costs for individual cases and thereby improve payment equity among hospitals. We therefore remain committed to implementing the severity DRG classification system as soon as possible. (See discussion in Section II.B of this preamble.)

We also agree with the Commission that basing DRG weights on standardized charges results in weights that are somewhat distorted as measures of the relative costliness of treating a typical case in each DRG. The Commission notes several sources of distortion, including the following: systematic differences among hospitals in cost-to-charge ratios; variation in mark-ups for services across hospitals; variation among DRGs in the average mark-up implicit in case level charges; standardization factors that inaccurately represent cost differences among hospitals; and the absence of adjustments to account for factors such as variations in practice patterns and efficiency. We recognize that the hospital-specific relative value method of setting weights may reduce or eliminate distortions from these sources, and we are studying its effect on DRG weights and hospital payments.

The Commission also addresses two issues regarding current outlier financing policies: (1) how to account for outlier payments in setting a DRG weight that accurately reflects the relative costliness of treatment for typical cases; and (2) how to finance outlier payments so that the burden of treating such cases is spread fairly among all hospitals. We are studying these issues and look forward to working with ProPAC to find solutions.

Because the effects on DRG weights of implementing DRG severity refinements and changing the methods used to calculate DRG relative weights are interactive, we believe that appropriate changes should be adopted concurrently. However, as stated in the final rule published on September 1, 1992 (57 FR 39761) and in subsequent rules, as well as in this rule, we would not make significant changes to the DRG classification system unless we are able either to improve our ability to predict coding changes by validating in advance the impact that potential DRG changes may have on coding behavior, or to make methodological changes to prevent building the inflationary effects of the coding changes into future program payments. (See comment and response following Recommendation 10 below).

D. Improving Annual Update Policies (Recommendation 10):

Recommendation: The Secretary should be given authority to adjust the standardized amounts if anticipated coding improvements would increase aggregate payments by more than 0.25 percent during the coming year. This adjustment should be separate from the annual update. It should be based on findings from empirical analysis of the new HCFA data base of reabstracted medical records. Once sufficient data are available, the Secretary should also make a correction if there is more than a 0.1 percentage point error in a previous adjustment.

Response in the Proposed Rule: We agree with ProPAC that anticipated coding changes should be taken into account and that the most appropriate method for recognizing valid increases in case mix as a result of improved coding practices is within the framework of the standardized payment amount. We acknowledge, with ProPAC, that shifts in the mix of cases among DRGs may result from changes in practice patterns, new technology, or variations in the incidence of illness, as well as changes in the coding of diagnoses and procedures.

As ProPAC states, under section 1886(d)(4)(C) of the Act, we are required to make DRG reclassification and recalibration changes in a budget neutral manner. To meet this requirement, we normalize the DRG relative weights so that, for the discharges in the data base, the average DRG weights before and after reclassification and recalibration are equal. The recalibration of the DRG weights is accompanied by a budget neutrality adjustment to the standardized payment amount to ensure that estimated aggregate payments remain unchanged.

We share ProPAC's concern that introduction of any major modification to the DRG classification system will result in major shifts in the distribution of cases among the DRGs. Because the severity refinements to the DRGs would create many new DRGs with relatively high weights, there will be increased incentive to hospitals to report those secondary diagnoses that result in assignment to the higher weighted DRG. We agree with ProPAC that this is not inappropriate and is indeed anticipated. We further agree that we need to ensure that hospitals are fairly compensated for increases in costs that reflect real increases in the level of severity of illness of their patient population.

In order to protect the Medicare program from payment increases that are a consequence of improved coding practices that do not reflect a real increase in case mix, we have developed a methodology that would recalibrate the DRG relative weight to 1.0 each year, thus eliminating the normalization process and the concomitant inflationary adjustment to the DRG weights. This would prohibit upcoding and other coding improvements from having an impact on the DRG relative weight. To account for real case-mix increases, we have recommended an annual upward adjustment to the standardized amounts equal to the lesser of the total observed case-mix increase or 1.0 percent. Anticipated case-mix change due to upcoding would be accounted for through a prospective adjustment to the standardized amounts. This adjustment would be for one year at a time and would not be cumulative.

ProPAC recommends that an ongoing data base of reabstracted medical records be used to estimate the real and coding components of case-mix change and provide the basis for forecasting future coding changes. HCFA has recently implemented a record reabstracting process being conducted by two clinical data abstraction centers (CDACs) under contract with the Health Standards and Quality Bureau (HSQB). The CDACs will review a national random sample of 30,000 records per year from the National Case History file, gathered on a monthly basis. Registered Record Administrators (RRAs) and Associate Record Technicians (ARTs) will reabstract the medical record and perform complete record medical coding, which will be stored with the original coding.

We will evaluate the results of this reabstracting process before making a decision to base adjustments for anticipated coding changes only on this data base. Our estimate of an annual real case-mix increase of 1.0 percent is supported by past studies of case-mix change by the Rand Corporation. The most recent study by RAND, "Has DRG Creep Crept Up? Decomposing the Case Mix Index Change Between 1987 and 1988", by G.M. Carter, J.P. Newhouse and D.A. Relles, R–4098–HCFA/ProPAC (1991), uses medical records from those Federal fiscal years, using consistent standards, to determine real case-mix change.

As we pursue options and alternatives to payment adjustments to account for real case-mix increases, we will take into consideration ProPAC's recommendations to limit adjustments to those occasions in which coding changes would increase aggregate payments by more than 0.25 percent or when forecasts differ from observed, actual experience by more than 0.1 percent. We note, also, that we are considering a number of related modifications to the calculation of the DRG relative weights that will have an impact on the prospective payment rates. (See response to ProPAC Recommendation 9, above.)

Comment: In its comment on our response to ProPAC Recommendation 9 and 10 (Improvements in the DRG Payment Rates and Annual Update Policies), the Commission indicated that it continues to believe that refinements to the DRG definitions and relative weights should be implemented as soon as possible. While the Commission agrees that adopting the refined DRGs could lead to changes in hospital coding behavior, it states that recalibrating the weights annually to 1.0 in not necessary to protect Medicare from the effects of coding change. ProPAC believes this may actually interfere with reducing the program's financial risk if it is perceived as an arbitrary means of reducing spending. Additionally, it does not believe that limiting future increases in payments to the lesser of the measured real change or 1.0 percent is plausible if the real change turns out to be higher.

The Commission, although stating appreciation of our desire to evaluate the new reabstracted data base, states that this data base exceeds the size and representativeness of any data base previously used to determine adjustments for coding change. ProPAC reiterates its recommendation that an adjustment, separate from the annual update, be applied in situations when changes in coding, anticipated in response to major revisions in the DRG definitions or the relative weights, are expected to lead to an increase in aggregate payments of at least 0.25 percent. The projected effect of changes in coding would be based on empirical analysis of the reabstracted medical records available to HCFA, and corrections would be made when significant forecast errors are detected.

Response: Although we agree with the Commission that these policy changes will improve equitable payment across hospitals, we believe it would be irresponsible for HCFA to implement the severity adjustment to the DRGs before we are able to predict or control the impact of coding changes on final DRG assignment and, thus, on payment. We do not agree that recalibration of the DRG relative weights to 1.0 will be perceived as arbitrary. With sufficient understanding of the rationale and results, as well as of the other modifications to the payment rate and DRG weights, the health care community should appreciate our efforts to identify and measure real case-mix increases. Nor do we agree that our rationale for limiting adjustments to the standardized amounts for real change in case mix to the lesser of the measured real change or 1.0 percent is not plausible. As stated in the proposed rule (60 FR 29247), our estimate of annual real case-mix increase of 1.0 percent is supported by past studies of case-mix change by RAND. We are willing to re-examine this issue, if empirical evidence provided through analysis of the reabstracted data from the clinical data abstraction centers (CDACs) demonstrates that real case-mix change is significantly more or less than 1.0 percent.

As discussed in section II.B. of this preamble, collection of data from the CDACs has recently been implemented, and we will evaluate the results of this reabstracting process. Only through this evaluation will we be able to confirm the reliability and validity of these data as a basis for predicting case-mix increases. We will consider ProPAC's recommendations to adjust the standardized amount only when coding changes increase aggregate payments by more than 0.25 percent. However, we believe it is prudent and responsible policy to defer DRG changes, as well as adjustments in anticipation of coding changes, until such adjustments can be based on empirical analysis of the reabstracted medical records. As noted by ProPAC in its recommendations, the current statute prevents us from making any adjustment to the standardized amount to account for coding improvements.

VIII. Other Required Information

A. Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995, agencies are required to provide 60-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. In order to fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires that we solicit comment on the following issues:

- Whether the information collection is necessary and useful to carry out the proper functions of the agency;
- The accuracy of the agency's estimate of the information collection burden;
- The quality, utility, and clarity of the information to be collected; and
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

Therefore, we are soliciting public comment on each of these issues for the two information collection requirements discussed below.

As discussed in detail in section IV.B of this preamble, we are eliminating the requirement under § 412.46(a) that a physician sign an attestation statement for each Medicare patient discharged from a hospital. When the prospective payment system for hospitals was established in 1983, we believed that the physician attestation statement was a valuable tool for ensuring the validity of DRG claims. Over the years, however, we have received many complaints from both hospitals and physicians concerning the administrative burden of completing the attestation statements. Moreover, in practice, review of attestation statements by the Peer Review Organizations (PROs) as a part of DRG validation review has resulted in less than a 0.01 percent denial rate of sampled claims. Therefore, we believe it is now appropriate to eliminate the physician attestation requirement. Also, we note that the Administration has identified the elimination of physician attestation as one of its health care regulatory reforms.

This change would reduce significantly the paperwork and information collection burden on physicians and hospitals. We estimate that currently physicians spend about 192,000 hours per year completing attestations. This estimate is based on 11,500,000 hospital inpatient claims per year and 1 minute of physician time per claim. In addition, any time that hospitals spend following up on overdue and unsigned attestations would also be saved.

The only remaining requirement under § 412.46 is that a hospital have on file a signed statement from each attending physician acknowledging that he or she has received a notice from the hospital explaining the penalties applicable for misrepresenting, falsifying, or concealing essential information required for payment. We estimate that this requirement imposes on physicians and hospitals a shared one-time burden of 5 minutes for acknowledgement for each physician that gains admitting privileges. We further estimate that no more than 1–2 percent of the nation's roughly 700,000 active physicians gain admitting privileges at a hospital each year, resulting in an estimated annual burden of approximately 1,200 hours.

Under § 412.106(b)(3), for purposes of the DSH adjustment, a hospital's Medicare Part A/SSI percentage may be calculated based on its cost reporting period rather than the Federal fiscal year. (See section IV.E of the preamble.) Under current policy, a hospital must submit, in machine-readable format, data on its Medicare Part A patients for its cost reporting period. As discussed in detail in the preamble, this process has not resulted in accurate recalculations of the disproportionate

patient percentages, and thus requiring hospitals to submit data has not proven useful or necessary. Therefore, we are revising this requirement to provide that hospitals need only make a written request for the recalculation and need not submit the data. We estimate that the current burden associated with submitting the data is approximately 24 hours per request. Under the revision, we estimate a burden of 1 hour per request. Based on an estimate of 12 requests per year, the total burden will be 12 hours, in comparison to the current total burden of approximately 288 hours.

These information collection and recordkeeping requirements are not effective until they have been approved by OMB. A notice will be published in the **Federal Register** when approval is obtained. Organizations and individuals desiring to submit comments on these information collection and recordkeeping requirements should direct them to the Office of Management and Budget, Human Resources and Housing Branch, Room 10235, New Executive Office Building, Washington, D.C., 20503, Attention: Allison Eydt, HCFA Desk Officer.

B. Requests for Data From the Public

In order to respond promptly to public requests for data related to the prospective payment system, we have set up a process under which commenters can gain access to the raw data on an expedited basis. Generally, the data are available in computer tape format or cartridges; however, some files are available on diskette. In our June 2, 1995 proposed rule, we published a list of data sets that are available for purchase (60 FR 29249). We received no comments concerning this process.

C. Waiver of Notice of Proposed Rulemaking and 30-Day Delay in the Effective Date for the Elimination of the Physician Attestation Requirement

We ordinarily publish a notice of proposed rulemaking for a rule to provide a period for public comment. However, we may waive that procedure if we find good cause that prior notice and comment are impractical, unnecessary, or contrary to public interest. We find good cause to implement this rule as a final rule because the delay involved in prior notice and comment procedures for the new provisions of this rule would be contrary to the public interest.

One provision of this rule that was not part of our June 2, 1995 proposed rule is the elimination of the requirement in 42 CFR § 412.46(a) that a physician sign an attestation statement for each Medicare patient discharged from a hospital. Although this change was not part of the proposed rule, we received close to 1,000 letters from physicians and hospitals requesting that we eliminate the physician attestation requirement. As discussed above, this change will reduce significantly the paperwork and information collection burden on physicians and hospitals. We believe that it is appropriate to implement this revision as part of this final rule as the most expeditious means of removing this burden on physicians and hospitals. Thus, particularly in view of the many unsolicited letters we have already received on this subject, we find that the delay involved in prior notice and comment would be contrary to the public interest. Therefore, we have concluded that it is appropriate to implement the revisions to § 412.46 as final in this instance.

We also normally provide a delay of 30 days in the effective date of a regulation. However, if adherence to this procedure would be impractical, unnecessary, or contrary to public interest, we may waive the delay in the effective date. We may also waive the delay in the case of a rule that grants an exemption or relieves a restriction. We find good cause to waive the usual 30-day delay in this instance. As explained above, it is in the public interest for the elimination of the physician attestation requirement to take effect as soon as possible. A 30-day delay in the effective date would only extend unnecessarily an onerous requirement on physicians and hospitals. Therefore, we believe that a 30-day delay in the effective date for this provision would be contrary to the public interest, and we find good cause to waive the usual 30-day delay in the effective date.

D. Waiver of Notice of Proposed Rulemaking for Allowing the Provision of Skilled Nursing Facility (SNF) Services by Rural Primary Care Hospitals (RPCHs)

In addition to the elimination of the physician attestation requirement under § 412.46, this final rule contains one other provision that was not included in the June 2, 1995 proposed rule. Specifically, the proposed rule did not include the changes contained in this final rule to § 485.645, Special requirements for RPCH providers of long-term care services ("swing beds"). As noted above, we ordinarily publish a notice of proposed rulemaking for a substantive rule to provide a period of public comment. Again, however, we may waive that procedure if we find good cause that prior notice and comment are impractical, unnecessary, or contrary to public interest.

As explained in detail in section IV.G of this preamble, effective October 31, 1994, section 102(c) of the Social Security Act Amendments of 1994 (SSAA '94) allows a hospital with a swing-bed agreement in effect when it applies for RPCH designation to maintain as many beds for the furnishing of SNF-level services as it had on its hospital license when it applied to the State for designation as a RPCH, minus the number of inpatient beds (not to exceed six) used for the provision of RPCH inpatient care. The new legislation further states that the number of beds the facility uses for SNF-level care is not to include any beds of a unit of the facility that is licensed as a distinct-part SNF at the time the facility applies to the State for designation as a RPCH. To implement this provision, we are amending § 485.645 to reflect the new statutory language. We also are providing that swing-bed RPCHs that applied for RPCH designation before October 31, 1994, may either continue to provide care in accordance with the prior provisions of the regulations or request redesignation under the new provisions.

The regulations published in final in this rule implement the provisions of section 102(c) of SSAA '94 as the statute intends. The statutory effective date of the provisions of section 102(c) is October 31, 1994, and several facilities have indicated an interest in being designated as RPCHs under the new provisions. Moreover, we believe these changes may be necessary to assure access to SNF-level care in rural areas. Thus, we believe that it is both unnecessary and contrary to the public interest to delay implementation of these provisions until the process of publishing both a proposed and a final rule can be completed. Therefore, we find good cause to waive proposed rulemaking for the revised requirements set forth under § 485.645 and to issue these regulations as final. However, we are providing a 60-day period for public comment, as indicated at the beginning of this rule, on the changes to § 485.645.

E. Response to Comments

Because of the large number of items of correspondence we normally receive on **Federal Register** documents published for comment, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the DATES section of this preamble, and we will respond to these comments in subsequent rulemaking document. Comments on changes to the revised requirements under § 485.645 will be considered if we receive them by the date specified in the DATES section of this preamble. We will not consider comments concerning provisions that remain unchanged from the June 2, 1995 proposed rule or that were changed based on public comments.

List of Subjects

42 CFR Part 412

Administrative practice and procedure, Health facilities, Medicare, Puerto Rico, Reporting and recordkeeping requirements.

42 CFR Part 413

Health facilities, Kidney diseases, Medicare, Puerto Rico, Reporting and recordkeeping requirements.

42 CFR Part 424

Emergency medical services, Health facilities, Health professions, Medicare.

42 CFR Part 485

Grant programs-health, Health facilities, Medicaid, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 489

Health facilities, Medicare, Reporting and recordkeeping requirements.

42 CFR chapter IV is amended as set forth below:

A. Part 412 is amended as follows:

PART 412—PROSPECTIVE PAYMENT SYSTEMS FOR INPATIENT HOSPITAL SERVICES

1. The authority citation for part 412 continues to read as follows:

Authority: Secs. 1102, 1815(e), 1820, 1871, and 1886 of the Social Security Act (42 U.S.C. 1302, 1395g(e), 1395i–4, 1395hh, and 1395ww).

Subpart A—General Provisions

2. Section 412.4 is amended as follows:

a. In the first sentence of paragraph (d)(1), the phrase "is paid a per diem rate" is removed and the phrase "is paid a graduated per diem rate" is added in its place.

b. In paragraph (d)(1), a new sentence is added at the end of the paragraph.

The addition reads as follows:

§ 412.4 Discharges and transfers.

* * * * *

(d) *Payment to a hospital transferring an inpatient to another hospital.* (1) * * * Payment is graduated by paying twice the per diem amount for the first day of the stay, and the per diem amount for each subsequent day, up to the limit as described in paragraph (d)(1) of this section.

* * * * *

Subpart B—Hospital Services Subject to and Excluded from the Prospective Payment Systems for Inpatient Operating Costs and Inpatient Capital-Related Costs

3. Section 412.23 is amended as follows:

a. Paragraphs (e)(2) and (e)(3) are revised.

b. In paragraph (e)(4), the phrase "in paragraphs (e)(3) of this section" is removed and the phrase "in paragraph (e)(3) of this section" is added in its place.

The revisions read as follows:

§ 412.23 Excluded hospitals: Classifications.

* * * * *

(e) *Long-term care hospitals.* * * *

(2) The hospital must have an average length of inpatient stay greater than 25 days—

(i) As computed by dividing the number of total inpatient days (less leave or pass days) by the number of total discharges for the hospital's most recent complete cost reporting period;

(ii) If a change in the hospital's average length of stay is indicated, as computed by the same method for the immediately preceding 6-month period; or

(iii) If a hospital has undergone a change of ownership (as described in § 489.18 of this chapter) at the start of a cost reporting period or at any time within the preceding 6 months, the hospital may be excluded from the prospective payment system as a long-term care hospital for a cost reporting period if, for the 6 months immediately preceding the start of the period (including time before the change of ownership), the hospital has the required average length of stay, continuously operated as a hospital, and continuously participated as a hospital in Medicare.

(3) Except as provided in paragraph (e)(4) of this section, for cost reporting periods beginning on or after October 1, 1994, a hospital that occupies space in a building also used by another hospital, or in one or more entire buildings located on the same campus as buildings used by another hospital, must meet the following criteria:

(i) *Separate governing body.* The hospital has a governing body that is separate from the governing body of the hospital occupying space in the same building or on the same campus. The hospital's governing body is not under the control of the hospital occupying space in the same building or on the same campus, or of any third entity that controls both hospitals.

(ii) *Separate chief medical officer.* The hospital has a single chief medical officer who reports directly to the governing body and who is responsible for all medical staff activities of the hospital. The chief medical officer of the hospital is not employed by or under contract with either the hospital occupying space in the same building or on the same campus or any third entity that controls both hospitals.

(iii) *Separate medical staff.* The hospital has a medical staff that is separate from the medical staff of the hospital occupying space in the same building or on the same campus. The hospital's medical staff is directly accountable to the governing body for the quality of medical care provided in the hospital, and adopts and enforces bylaws governing medical staff activities, including criteria and procedures for recommending to the governing body the privileges to be granted to individual practitioners.

(iv) *Chief executive officer.* The hospital has a single chief executive officer through whom all administrative authority flows, and who exercises control and surveillance over all administrative activities of the hospital. The chief executive office is not employed by, or under contract with, either the hospital occupying space in the same building or on the same campus or any third entity that controls both hospitals.

(v) *Performance of basic hospital functions.* The hospital meets one of the following criteria:

(A) The hospital performs the basic functions specified in §§ 482.21 through 482.27, 482.30, and 482.42 of this chapter through the use of employees or under contracts or other agreements with entities other than the hospital occupying space in the same building or on the same campus, or a third entity that controls both hospitals. Food and dietetic services and housekeeping, maintenance, and other services necessary to maintain a clean and safe physical environment could be obtained under contracts or other agreements with the hospital occupying space in the same building or on the same campus, or with a third entity that controls both hospitals.

(B) For the same period of at least 6 months used to determine compliance with the length-of-stay criterion in paragraph (e)(2) of this section, the cost of the services that the hospital obtained under contracts or other agreements

with the hospital occupying space in the same building or on the same campus, or with a third entity that controls both hospitals, is no more than 15 percent of the hospital's total inpatient operating costs, as defined in § 412.2(c). For purposes of this paragraph, however, the costs of preadmission services are those specified under § 413.40(c)(2) rather than those specified under § 412.2(b)(5).

(C) For the same period of at least 6 months used to determine compliance with the length-of-stay criterion in paragraph (e)(2) of this section, the hospital has an inpatient population of whom at least 75 percent were referred to the hospital from a source other than another hospital occupying space in the same building or on the same campus.

* * * * *

4. In § 412.29, the introductory text is republished, and paragraph (a) is revised to read as follows:

§ 412.29 Excluded rehabilitation units: Additional requirements.

In order to be excluded from the prospective payment systems, a rehabilitation unit must meet the following requirements:

(a) Have met either the requirements for—

(1) New units under § 412.30(a); or

(2) Converted units under § 412.30(b).

* * * * *

5. Section 412.30 is amended as follows:

a. Paragraph (a) is revised.

b. Paragraphs (b) and (c) are redesignated as paragraphs (c) and (d).

c. A new paragraph (b) is added.

d. Redesignated paragraph (c) is revised.

e. In redesignated paragraph (d), the phrase "under paragraph (b) of this section," is removed and the phrase "under paragraph (c) of this section," is added in its place.

The revisions and addition read as follows:

§ 412.30 Exclusion of new rehabilitation units and expansion of units already excluded.

(a) *New units.* (1) A hospital unit is considered a new unit if the hospital—

(i) Has not previously sought exclusion for any rehabilitation unit; and

(ii) Has obtained approval, under State licensure and Medicare certification, for an increase in its hospital bed capacity that is greater than 50 percent of the number of beds in the unit.

(2) A hospital that seeks exclusion of a new rehabilitation unit may provide a written certification that the inpatient population the hospital intends the unit to serve meets the requirements of § 412.23(b)(2) instead of showing that the unit has treated such a population during the hospital's most recent cost reporting period.

(3) The written certification described in paragraph (a)(2) of this section is effective for the first full cost reporting period during which the unit is used to provide hospital inpatient care. If the hospital has not previously participated in the Medicare program as a hospital, the written certification also is effective for any cost reporting period of not less than 1 month and not more than 11 months occurring between the date the hospital began participating in Medicare and the start of the hospital's regular 12-month cost reporting period.

(4) A hospital that has undergone a change of ownership or leasing as defined in § 489.18 of this chapter is not considered to have participated previously in the Medicare program.

(b) *Converted units.* A hospital unit is considered a converted unit if it does not qualify as a new unit under paragraph (a) of this section. A converted unit must have treated, for the hospital's most recent 12-month cost reporting period, an inpatient population of which at least 75 percent required intensive rehabilitation services for the treatment of one or more conditions listed under § 412.23(b)(2).

(c) *Expansion of excluded rehabilitation units.*

(1) *New bed capacity.* The beds that a hospital seeks to add to its excluded rehabilitation unit are considered new beds only if—

(i) The hospital's State-licensed and Medicare-certified bed capacity increases at the start of the cost reporting period for which the hospital seeks to increase the size of its excluded rehabilitation unit, or at any time after the start of the preceding cost reporting period; and

(ii) The number of beds the hospital seeks to add to its excluded rehabilitation unit is greater than 50 percent of the number of beds by which the hospital's State licensed and Medicare certified bed capacity increased under paragraph (c)(1)(i) of this section.

(2) *Conversion of existing bed capacity.*

(i) Bed capacity is considered to be existing bed capacity if it does not meet the definition of new bed capacity under paragraph (c)(1) of this section.

(ii) A hospital may increase the size of its excluded rehabilitation unit through conversion of existing bed capacity only if it shows that, for all of the hospital's most recent cost reporting period of at least 12 months, the beds have been used to treat an inpatient population meeting the requirements of § 412.23(b)(2).

* * * * *

Subpart C—Conditions for Payment Under the Prospective Payment Systems for Inpatient Operating Costs and Inpatient Capital-Related Costs

6. Section 412.46 is revised to read as follows:

§ 412.46 Medical review requirements: Physician acknowledgement.

(a) *Basis.* Because payment under the prospective payment system is based in part on each patient's principal and secondary diagnoses and major procedures performed, as evidenced by the physician's entries in the patient's medical record, physicians must complete an acknowledgement statement to this effect.

(b) *Content of physician acknowledgement statement.* When a claim is submitted, the hospital must have on file a signed and dated acknowledgement from the attending physician that the physician has received the following notice:

> Notice to Physicians: Medicare payment to hospitals is based in part on each patient's principal and secondary diagnoses and the major procedures performed on the patient, as attested to by the patient's attending physician by virtue of his or her signature in the medical record. Anyone who misrepresents, falsifies, or conceals essential information required for payment of Federal funds, may be subject to fine, imprisonment, or civil penalty under applicable Federal laws.

(c) *Completion of acknowledgement.* The acknowledgement must be completed by the physician at the time that the physician is granted admitting privileges at the hospital, or before or at the time the physician admits his or her first patient. Existing acknowledgements signed by physicians already on staff remain in effect as long as the physician has admitting privileges at the hospital.

Subpart D—Basic Methodology for Determining Prospective Payment Federal Rates for Inpatient Operating Costs

7. In § 412.63, a new paragraph (s)(5) is added to read as follows:

§ 412.63 Federal rates for inpatient operating costs for fiscal years after Federal fiscal year 1984.

* * * * *

(s) * * *

(5) If a judicial decision reverses a HCFA denial of a hospital's wage data revision request, HCFA pays the

hospital by applying a revised wage index that reflects the revised wage data as if HCFA's decision had been favorable rather than unfavorable.

Subpart G—Special Treatment of Certain Facilities Under the Prospective Payment System for Inpatient Operating Costs

§ 412.92 [Amended]

8. In paragraph (b)(5) of § 412.92, remove the phrase "under § 413.30(e)(1) of this chapter", wherever it appears.

9. In § 412.96, the first sentence of paragraph (c)(2)(ii) is revised to read as follows:

§ 412.96 Special treatment: Referral centers.

* * * * *

(c) * * *

(2) * * *

(ii) For cost reporting periods beginning on or after January 1, 1986, an osteopathic hospital, recognized by the American Osteopathic Healthcare Association (or any successor organization), that is located in a rural area must have at least 3,000 discharges during its most recently completed cost reporting period to meet the number of discharges criterion. * * *

* * * * *

10. In § 412.105, paragraph (b) is revised to read as follows:

§ 412.105 Special treatment: Hospitals that incur indirect costs for graduate medical education programs.

* * * * *

(b) *Determination of number of beds.* For purposes of this section, the number of beds in a hospital is determined by counting the number of available bed days during the cost reporting period, not including beds or bassinets in the healthy newborn nursery, custodial care beds, or beds in excluded distinct part hospital units, and dividing that number by the number of days in the cost reporting period.

* * * * *

11. In § 412.106, paragraph (b)(3) is revised to read as follows:

§ 412.106 Special treatment: Hospitals that serve a disproportionate share of low-income patients.

* * * * *

(b) * * *

(3) *First computation: Cost reporting period.* If a hospital prefers that HCFA use its cost reporting period instead of the Federal fiscal year, it must furnish to HCFA, through its intermediary, a written request including the hospital's name, provider number, and cost reporting period end date. This exception will be performed once per hospital per cost reporting period, and the resulting percentage becomes the hospital's official Medicare Part A/SSI percentage for that period.

* * * * *

12. Section 412.109 is amended as follows:

a. Paragraph (a) is revised.

b. Paragraphs (b) through (e) are redesignated as paragraphs (c) through (f).

c. A new paragraph (b) is added.

d. Redesignated paragraphs (c)(1), (c)(2)(ii), (d) introductory text, and (d)(1) are revised.

e. The paragraph heading of redesignated paragraph (e) and redesignated paragraph (e)(1) are revised.

The revisions and addition read as follows:

§ 412.109 Special treatment: Essential access community hospitals (EACHs).

(a) *General rule.* For payment purposes, HCFA treats as a sole community hospital any hospital that is located in a rural area as described in paragraph (b) of this section and that HCFA designates as an EACH under the criteria in paragraph (c) of this section. The payment methodology for sole community hospitals is set forth at § 412.92(d).

(b) *Location in a rural area.* For purposes of this section, a hospital is located in a rural area if it—

(1) Is located outside any area that is a Metropolitan Statistical Area as defined by the Office of Management and Budget or that has been recognized as urban under § 412.62;

(2) Is not deemed to be located in an urban area under § 412.63;

(3) Is not classified as an urban hospital for purposes of the standardized payment amount by HCFA or the Medicare Geographic Classification Review Board; or

(4) Is not located in a rural county that has been redesignated to an adjacent urban area under § 412.232.

(c) *Criteria for HCFA designation.* (1) HCFA designates a hospital as an EACH if the hospital is located in a State that has received a grant under section 1820(a)(1) of the Act or in an adjacent State and is designated as an EACH by the State that has received the grant.

* * * * *

(2) * * *

(ii) Is not eligible for State designation solely because the hospital is located in a rural area, has fewer than 75 beds and is located 35 miles or less from any other hospital; and

* * * * *

(d) *Criteria for State designation.* A State that has received a grant under section 1820(a)(1) of the Act may designate as an EACH any hospital in the State or in an adjoining State that meets the criteria of this paragraph (d).

(1) *Geographic location.* The hospital meets one of the following requirements:

(i) If it is located in a rural area as described in paragraph (b) of this section, the hospital is located more than 35 miles from any hospital that either has been designated as an EACH, or has been classified as a rural referral center under § 412.96.

(ii) The hospital meets other criteria relating to geographic location, imposed by the State with HCFA's approval.

* * * * *

(e) *Adjustment to the hospital-specific rate for rural EACH's experiencing increased costs*—(1) *General rule.* HCFA increases the applicable hospital-specific rate of an EACH that it treats as a sole community hospital if, during a cost reporting period, the hospital experiences an increase in its Medicare inpatient operating costs per discharge that is directly attributable to activities related to its membership in a rural health network.

* * * * *

Subpart H—Payments to Hospitals Under the Prospective Payment Systems

§ 412.130 [Amended]

13. In paragraph (a)(3) of § 412.130, remove the reference "§ 412.30(b)" wherever it appears and add, in its place, the reference "§ 412.30(c)".

Subpart L—The Medicare Geographic Classification Review Board

14. In § 412.230, paragraph (a)(1) is revised and a new paragraph (a)(5) is added to read as follows:

§ 412.230 Criteria for an individual hospital seeking redesignation to another rural area or an urban area.

(a) *General*—(1) *Purpose.* Except as provided in paragraph (a)(5) of this section, an individual hospital may be redesignated from a rural area to an urban area, from a rural area to another rural area, or from an urban area to another urban area for the purposes of using the other area's standardized amount for inpatient operating costs, wage index value, or both.

* * * * *

(5) *Limitations on redesignation.* The following limitations apply to redesignation:

(i) An individual hospital may not be redesignated to another area for purposes of the wage index if the pre-reclassified average hourly wage for that area is lower than the pre-reclassified average hourly wage for the area in which the hospital is located.

(ii) A hospital may not be redesignated for purposes of the standardized amount if the area to which the hospital seeks redesignation does not have a higher standardized amount than the standardized amount the hospital currently receives.

(iii) A hospital may not be redesignated to more than one area.

* * * * *

15. In § 412.232, a new paragraph (a)(4) is added to read as follows:

§ 412.232 Criteria for all hospitals in a rural county seeking urban redesignation.

(a) * * *

(4) The hospitals may be redesignated only if one of the following conditions is met:

(i) The pre-reclassified average hourly wage for the area to which they seek redesignation is higher than the pre-reclassified average hourly wage for the area in which they are currently located.

(ii) The standardized amount for the area to which they seek redesignation is higher than the standardized amount for the area in which they are located.

* * * * *

16. In § 412.234, a new paragraph (a)(4) is added to read as follows:

§ 412.234 Criteria for all hospitals in an urban county seeking redesignation to another urban area.

(a) * * *

(4) The hospitals may be redesignated only if one of the following conditions is met.

(i) The pre-reclassified average hourly wage for the area to which they seek redesignation is higher than the pre-reclassified average hourly wage for the area in which they are currently located.

(ii) The standardized amount for the area to which they seek redesignation is higher than the standardized amount for the area in which they are currently located.

* * * * *

17. Section 412.266 is revised to read as follows:

§ 412.266 Availability of wage data.

A hospital may obtain the average hourly wage data necessary to prepare its application to the MGCRB from **Federal Register** documents published in accordance with the provisions of § 412.8(b).

Subpart M—Prospective Payment System for Inpatient Hospital Capital Costs

18. In § 412.308, a new paragraph (b)(3) is added and paragraph (c)(1)(ii) is revised to read as follows:

§ 412.308 Determining and updating the Federal rate.

* * * * *

(b) * * *

(3) Effective FY 1996, the standard Federal rate used to determine the Federal rate each year under paragraph (c) of this section is reduced by 0.28 percent to account for the effect of the revised policy for payment of transfers under § 412.4(d).

(c) * * *

(1) * * *

(ii) *Effective FY 1996.* Effective FY 1996, the standard Federal rate is updated based on an analytical framework. The framework includes a capital input price index, which measures the annual change in the prices associated with capital-related costs during the year. HCFA adjusts the capital input price index rate of change to take into account forecast errors, changes in the case mix index, the effect of changes to DRG classification and relative weights, and allowable changes in the intensity of hospital services.

* * * * *

19. In § 412.328, a new paragraph (e)(4) is added to read as follows:

§ 412.328 Determining and updating the hospital-specific rate.

* * * * *

(e) * * *

(4) Effective FY 1996, the intermediary reduces the updated amount determined in paragraph (d) of this section by 0.28 percent to account for the effect of the revised policy for payment of transfers under § 412.4(d).

* * * * *

B. Part 413 is amended as follows:

PART 413—PRINCIPLES OF REASONABLE COST REIMBURSEMENT; PAYMENT FOR END-STAGE RENAL DISEASE SERVICES; OPTIONAL PROSPECTIVELY DETERMINED PAYMENT RATES FOR SKILLED NURSING FACILITIES

1. The authority citation for part 413 is revised to read as follows:

Authority: Secs. 1102, 1122, 1814(b), 1815, 1833 (a), (i), and (n), 1861(v), 1871, 1881, 1883, and 1886 of the Social Security Act (42 U.S.C. 1302, 1320a–1, 1395f(b), 1395g, 1395l (a), (i), and (n), 1395x(v), 1395hh, 1395rr, 1395tt, and 1395ww).

Subpart C—Limits on Cost Reimbursement

2. Section 413.30 is amended as follows:

a. Paragraph (e) is revised.

b. In paragraph (f) introductory text, the first sentence is revised.

c. Paragraphs (f)(5), (f)(6), (f)(7), and (f)(9) are removed and paragraph (f)(8) is redesignated as paragraph (f)(5).

The revisions read as follows:

§ 413.30 Limitations on reimbursable costs.

* * * * *

(e) *Exemptions.* Exemptions from the limits imposed under this section may be granted to a new provider. A new provider is a provider of inpatient services that has operated as the type of provider (or the equivalent) for which it is certified for Medicare, under present and previous ownership, for less than three full years. An exemption granted under this paragraph expires at the end of the provider's first cost reporting period beginning at least two years after the provider accepts its first patient.

(f) *Exceptions.* Limits established under this section may be adjusted upward for a provider under the circumstances specified in paragraphs (f)(1) through (f)(5) of this section. * * *

* * * * *

§ 413.35 [Amended]

3. In paragraph (b)(2) of § 413.35, remove the reference "§ 413.30(e)(2)" wherever it appears in the paragraph and add, in its place, the reference "§ 413.30(e)".

4. Section 413.40 is amended as follows:

a. In § 413.40(c)(2), remove the phrase "during the 3 days" wherever it appears in the paragraph and add, in its place, the phrase "on the calendar day".

b. Paragraph (e)(1) is revised.

c. A new sentence is added at the end of paragraph (g)(1).

The revision and addition read as follows:

§ 413.40 Ceiling on the rate of increase in hospital inpatient costs.

* * * * *

(e) *Hospital requests regarding adjustments to the payment allowed under the rate-of-increase ceiling*—(1) *Timing of application.* A hospital may request an adjustment to the rate-of-increase ceiling imposed under this section. The hospital's request must be received by the hospital's fiscal intermediary no later than 180 days after the date on the intermediary's initial notice of amount of program reimbursement (NPR) for the cost reporting period for which the hospital requests an adjustment.

* * * * *

(g) * * *

(1) * * * The amount of payment made to a hospital after an adjustment under paragraph (e) of this section may not exceed the difference between the hospital's operating costs and the payment previously allowed.

* * * * *

Subpart E—Payments to Providers

5. In § 413.70, the first sentence of paragraph (b)(2)(i) is revised to read as follows:

§ 413.70 Payment for services of an RPCH.

* * * * *

(b) * * *

(2) * * * (i) *RPCH services.* Payment under this method for outpatient RPCH services is equal to the amounts described in section 1833(a)(2)(B) of the Act (which describes amounts paid for hospital outpatient services) and subject to the applicable principles of cost reimbursement in this part and in part 405, subpart D of this chapter, except for the principle of the lesser of costs or charges in § 413.13. * * *

* * * * *

C. Part 424 is amended as follows:

PART 424—CONDITIONS FOR MEDICARE PAYMENT

1. The authority citation for part 424 continues to read as follows:

Authority: Secs. 216(j), 1102, 1814, 1815(c), 1835, 1842(b), 1861, 1866(d), 1870(e) and (f), 1871, 1872 and 1883(d) of the Social Security Act (42 U.S.C. 416(j), 1302, 1395f, 1395g(c), 1395n, 1395u(b), 1395x, 1395cc(d), 1395gg(e) and (f), 1395hh, 1395ii and 1395tt(d)).

Subpart B—Physician Certification Requirements

2. In § 424.15, paragraph (a) is revised to read as follows:

§ 424.15 Requirements for inpatient RPCH services.

(a) *Content of certification.* Medicare Part A pays for inpatient RPCH services only if a physician certifies that the individual may reasonably be expected to be discharged or transferred to a hospital within 72 hours after admission to the RPCH.

* * * * *

D. Part 485 is amended as follows:

PART 485—CONDITIONS OF PARTICIPATION: SPECIALIZED PROVIDERS

1. The authority citation for part 485 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

Subpart F—Conditions of Participation: Rural Primary Care Hospitals (RPCHs)

§ 485.603 [Amended]

2. In paragraph (a)(2)(i) of § 485.603, remove the reference "§ 412.109(c)" wherever it appears in the paragraph and add, in its place, the reference "§ 412.109(d)".

3. In § 485.606, paragraphs (a)(1), (b)(1), (b)(3), the paragraph heading of paragraph (c), (c)(1) introductory text, (c)(1)(i), (c)(2) introductory text, and (c)(2)(ii) are revised to read as follows:

§ 485.606 Designation of RPCHs.

(a) *Criteria for State designation*—(1) A State that has received a grant under section 1820(a)(1) of the Act may designate as an RPCH any hospital that—

(i) Is located in the State that has received the grant, or is located in an adjoining State and is a member of a rural health network that also includes one or more facilities located in the State that has received the grant;

(ii) Meets the RPCH conditions of participation in this subpart F; and

(iii) Applies to the State that has received the grant for designation as an RPCH.

* * * * *

(b) *Criteria for HCFA designation*—(1) HCFA designates a hospital as an RPCH if the hospital is designated as an RPCH by the State in which it is located or by an adjoining State that has received a grant.

* * * * *

(3) HCFA may also designate not more than 15 hospitals as RPCHs if the hospitals are not located in States that have received grants under section 1820(a)(1) of the Act and meet the requirements of paragraph (c)(1) of this section.

(c) *Special rule: Hospitals not designated by a State as RPCHs*—(1) HCFA may designate not more than 15 hospitals as RPCHs under this paragraph (c)(1). These hospitals must be located in a State that has not received a grant under section 1820(a)(1) of the Act, must not have been designated as RPCHs by a State that has received a grant under paragraph (a)(1) of this section, and must meet the requirements with regard to location, participation in the Medicare program, and emergency services as defined in §§ 485.610, 485.612, and 485.618, respectively. In designating a hospital as an RPCH under this paragraph (c)(1), HCFA—

(i) Gives preference to a hospital that has entered into an agreement with a rural health network as defined in § 485.603 that is located in a State that has received a grant under section 1820(a)(1) of the Act; and

* * * * *

(2) HCFA may designate a hospital as an RPCH if the hospital is located in a State that has received a grant under section 1820(a)(1) of the Act and is not eligible for State designation under paragraph (a) of this section solely because the hospital—

* * * * *

(ii) Has more than six inpatient beds or does not maintain an average length of stay for inpatients not greater than 72 hours for each 12-month cost reporting period, excluding periods of stays that exceeded 72 hours because transfer was precluded because of inclement weather or other emergency conditions, as described in § 485.620; or

* * * * *

4. Section 485.614 is revised to read as follows:

§ 485.614 Condition of participation: Termination of inpatient care services.

(a) *General rule.* The hospital has ceased providing inpatient hospital care or has agreed to cease providing inpatient hospital care upon approval of its application for designation as an RPCH except to the extent permitted under paragraph (b) of this section.

(b) *Limitations on inpatient care*—(1) If the RPCH does not have a swing-bed agreement under § 485.645, it provides not more than six inpatient beds for providing inpatient RPCH care to patients, but only if—

(i) The patient requires stabilization before discharge or transfer to a hospital;

(ii) The patient's attending physician certifies that the patient may reasonably be expected to be discharged or transferred to a hospital within 72 hours of admission to the facility; and

(iii) The RPCH complies with the limitation on inpatient surgery set forth in paragraph (b)(3) of this section.

(2) If the RPCH has a swing-bed agreement under § 485.645, it provides inpatient RPCH care as described under paragraph (b)(1) of this section and, under the swing-bed agreement, provides posthospital SNF care.

(3) The RPCH does not provide any inpatient hospital services consisting of surgery or any other service requiring the use of general anesthesia (other than surgical procedures specified by HCFA under § 416.65 of this chapter), unless the attending physician certifies that the risk associated with transferring the patient to a hospital for such services outweighs the benefits of transferring the patient to a hospital for such services.

(c) *Exception for RPCHs designated by HCFA.* If an RPCH is designated by HCFA under the specific criteria in § 485.606(c), the RPCH is not subject to the requirements in this section.

5. In § 485.620, paragraph (b) is revised to read as follows:

§ 485.620 Condition of participation: Number of beds and length of stay.

* * * * *

(b) *Standard: Length of stay.* The RPCH maintains an average length of stay for inpatients that is not greater than 72 hours for each 12-month cost reporting period. In determining the average length of stay, periods of stay of inpatients in excess of 72 hours are not taken into account to the extent such periods exceed 72 hours because transfer to a hospital is precluded because of inclement weather or other emergency conditions.

6. A new § 485.639 is added to read as follows:

§ 485.639 Condition of participation: Surgical services.

Surgical procedures must be performed in a safe manner by qualified practitioners who have been granted clinical privileges by the governing body of the RPCH in accordance with the designation requirements under paragraph (a) of this section.

(a) *Designation of qualified practitioners.* The RPCH designates the practitioners who are allowed to perform surgery for RPCH patients, in accordance with its approved policies and procedures, and with State scope of practice laws. Surgery is performed only by—

(1) A doctor of medicine or osteopathy, including an osteopathic practitioner recognized under section 1101(a)(7) of the Act;

(2) A doctor of dental surgery or dental medicine; or

(3) A doctor of podiatric medicine.

(b) *Anesthetic risk and evaluation.* A qualified practitioner, as described in paragraph (a) of this section, must examine the patient immediately before surgery to evaluate the risk of anesthesia and of the procedure to be performed. Before discharge from the RPCH, each patient must be evaluated for proper anesthesia recovery by a qualified practitioner as described in paragraph (a) of this section.

(c) *Administration of anesthesia.* The RPCH designates the person who is allowed to administer anesthesia to RPCH patients in accordance with its approved policies and procedures and with State scope of practice laws.

(1) Anesthetics must be administered only by—

(i) A qualified anesthesiologist;

(ii) A doctor of medicine or osteopathy other than an anesthesiologist, including an osteopathic practitioner recognized under section 1101(a)(7) of the Act;

(iii) A doctor of dental surgery or dental medicine;

(iv) A doctor of podiatric medicine;

(v) A certified registered nurse anesthetist, as defined in § 410.69(b) of this chapter;

(vi) An anesthesiologist's assistant, as defined in § 410.69(b) of this chapter; or

(vii) A supervised trainee in an approved educational program, as described in §§ 413.85 or 413.86 of this chapter.

(2) In those cases in which a certified registered nurse anesthetist administers the anesthesia, the anesthetist must be under the supervision of the operating practitioner. An anesthesiologist's assistant who administers anesthesia must be under the supervision of an anesthesiologist.

(d) *Discharge.* All patients are discharged in the company of a responsible adult, except those exempted by the practitioner who performed the surgical procedure.

7. In § 485.645, the introductory text and paragraph (a) are revised, paragraph (b) is redesignated as paragraph (c), and a new paragraph (b) is added to read as follows:

§ 485.645 Special requirements for RPCH providers of long-term care services.

An RPCH that has a Medicare provider agreement to participate in Medicare as an RPCH must meet the following requirements in order to be granted an approval from HCFA to provide post-hospital SNF care, as specified in § 409.30 of this chapter, and to be paid for SNF-level services, in accordance with paragraph (b) of this section.

(a) *Eligibility.* An RPCH must meet the following eligibility requirements:

(1) Effective October 31, 1994, if an RPCH meets all other requirements of this section, and applies for approval as a provider of post-hospital SNF care, the RPCH uses no more beds for providing post-hospital SNF care than the total number of licensed hospital inpatient beds at the time it applied to the State for RPCH designation, minus the number of beds, not to exceed six, used for providing inpatient RPCH care in accordance with § 485.620(a).

(2) (i) Notwithstanding paragraph (a)(1) of this section, a hospital that applied for RPCH status before October 31, 1994, and was designated by the State (or HCFA), and that applied for swing-bed approval before October 31, 1994, and received approval from HCFA, may continue in that status under the same terms, conditions, and limitations that were applicable at the time those approvals were granted.

(ii) An RPCH that was granted swing-bed approval under paragraph (a)(2)(i) of this section may request that its application to be an RPCH and a swing-bed provider be re-evaluated under paragraph (a)(1) of this section. If this request is approved, the approval is effective not earlier than October 1994. As of the date of approval, the RPCH no longer has any status under paragraph (a)(2)(i) of this section, and may not request re-instatement under paragraph (a)(2)(i) of this section.

(3) Beds used for post-hospital SNF care in a separately participating "distinct part" unit may not be included in any determination under this section.

(b) *Payment.* Payment for inpatient RPCH services to an RPCH that has qualified as an RPCH under the provisions in paragraph (a) of this section is made in accordance with § 413.70(a) of this chapter. Payment for post-hospital SNF-level of care services is made in accordance with the payment provisions in § 413.114 of this chapter.

* * * * *

E. Part 489 is amended as follows:

PART 489—PROVIDER AGREEMENTS AND SUPPLIER APPROVAL

1. The authority citation for part 489 continues to read as follows:

Authority: Secs. 1102, 1819, 1861, 1864(m), 1866, and 1871 of the Social Security Act (42 U.S.C. 1302, 1395i–3, 1395x, 1395aa(m), 1395cc, and 1395hh).

Subpart E—Termination of Agreement and Reinstatement After Termination

2. In § 489.53, a new paragraph (a)(14) is added to read as follows:

§ 489.53 Termination by HCFA.

(a) * * *

(14) In the case of a rural primary care hospital as defined in part 485, subpart F of this chapter, the rural primary care hospital maintains an average length of stay for inpatients in its most recent 12-month cost reporting period that is in excess of 72 hours. In determining the length of stay of a rural primary care hospital for purposes of this paragraph, HCFA does not take into account periods of stay in excess of 72 hours that occurred because transfer to a hospital

was precluded because of inclement weather or other emergency conditions.

[**Editorial Note:** The following addendum and appendixes will not appear in the Code of Federal Regulations.]

Addendum—Schedule of Standardized Amounts Effective with Discharges On or After October 1, 1995 and Update Factors and Rate-of-Increase Percentages Effective With Cost Reporting Periods Beginning On or After October 1, 1995

I. Summary and Background

In this addendum, we are setting forth the amounts and factors for determining prospective payment rates for Medicare inpatient operating costs and Medicare inpatient capital-related costs. We are also setting forth new rate-of-increase percentages for updating the target amounts for hospitals and hospital units excluded from the prospective payment system.

For discharges occurring on or after October 1, 1995, except for sole community hospitals and hospitals located in Puerto Rico, each hospital's payment per discharge under the prospective payment system will be based on 100 percent of the Federal national rate.

Sole community hospitals are paid based on whichever of the following rates yields the greatest aggregate payment: the Federal national rate, the updated hospital-specific rate based on FY 1982 cost per discharge, or the updated hospital-specific rate based on FY 1987 cost per discharge. For hospitals in Puerto Rico, the payment per discharge is based on the sum of 75 percent of a Puerto Rico rate and 25 percent of a national rate (section 1886(d)(9)(A) of the Act).

As discussed below in section II, we are making changes to the prospective payment rates for Medicare inpatient operating costs. The changes, to be applied prospectively, will affect the calculation of the Federal rates. In section III, we discuss changes we are making in determining the prospective payment rates for Medicare inpatient capital-related costs. Section IV sets forth our changes for determining the rate-of-increase limits for hospitals excluded from the prospective payment system. The tables to which we refer in the preamble to the final rule are presented at the end of this addendum in section V.

II. Changes to Prospective Payment Rates For Inpatient Operating Costs for FY 1996

The basic methodology for determining prospective payment rates for inpatient operating costs is set forth at § 412.63 for hospitals located outside of Puerto Rico. The basic methodology for determining the prospective payment rates for inpatient operating costs for hospitals located in Puerto Rico is set forth at §§ 412.210 and 412.212. Below, we discuss the manner in which we are changing some of the factors used for determining the prospective payment rates. The Federal and Puerto Rico rate changes are effective for discharges occurring on or after October 1, 1995. As required by section 1886(d)(4)(C) of the Act, we must also adjust the DRG classifications and weighting factors for discharges in FY 1996.

In summary, the standardized amounts set forth in Tables 1a, 1b, and 1c of section V of this addendum reflect—

- Updates of 1.5 percent for all areas (that is, the market basket percentage increase of 3.5 percent minus 2.0 percentage points);
- An adjustment to ensure budget neutrality as provided for in sections 1886(d)(4)(C)(iii) and (d)(3)(E) of the Act by applying new budget neutrality adjustment factors to the large urban and other standardized amounts;
- An adjustment to ensure budget neutrality as provided for in section 1886(d)(8)(D) of the Act by removing the FY 1995 budget neutrality factor and applying a revised factor;
- An adjustment to apply the revised outlier offset by removing the FY 1995 outlier offsets and applying a new offset; and
- An adjustment to apply a budget neutrality factor for the change in the payment methodology for transfer cases.

A. Calculation of Adjusted Standardized Amounts

1. Standardization of Base-Year Costs or Target Amounts

Section 1886(d)(2)(A) of the Act required the establishment of base-year cost data containing allowable operating costs per discharge of inpatient hospital services for each hospital. The preamble to the September 1, 1983 interim final rule (48 FR 39763) contains a detailed explanation of how base-year cost data were established in the initial development of standardized amounts for the prospective payment system and how they are used in computing the Federal rates.

Section 1886(d)(9)(B)(i) of the Act required that Medicare target amounts be determined for each hospital located in Puerto Rico for its cost reporting period beginning in FY 1987. The September 1, 1987 final rule contains a detailed explanation of how the target amounts were determined and how they are used in computing the Puerto Rico rates (52 FR 33043, 33066).

The standardized amounts are based on per discharge averages of adjusted hospital costs from a base period or, for Puerto Rico, adjusted target amounts from a base period, updated and otherwise adjusted in accordance with the provisions of section 1886(d) of the Act. Sections 1886(d)(2)(C) and (d)(9)(B)(ii) of the Act required that the updated base-year per discharge costs and, for Puerto Rico, the updated target amounts, respectively, be standardized in order to remove from the cost data the effects of certain sources of variation in cost among hospitals. These include case mix, differences in area wage levels, cost of living adjustments for Alaska and Hawaii, indirect medical education costs, and payments to hospitals serving a disproportionate share of low-income patients.

Since the standardized amounts have already been adjusted for differences in case mix, wages, cost-of-living, indirect medical education costs, and payments to hospitals serving a disproportionate share of low-income patients, no additional adjustments for these factors for FY 1996 were made. That is, the standardization adjustments reflected in the FY 1996 standardized amounts are the same as those reflected in the FY 1995 standardized amounts.

Sections 1886(d)(2)(H) and (d)(3)(E) of the Act require that, in making payments under the prospective payment system, the Secretary adjust the proportion (as estimated by the Secretary from time to time) of costs that are wages and wage-related costs. Beginning October 1, 1990, when the market basket was rebased, we have considered 71.40 percent of costs to be labor-related for purposes of the prospective payment system.

2. Computing Large Urban and Other Averages Within Geographic Areas

Section 1886(d)(3) of the Act requires the Secretary to compute two average standardized amounts for discharges occurring in a fiscal year: one for

hospitals located in large urban areas and one for hospitals located in other areas. In addition, under sections 1886(d)(9)(B)(iii) and (C)(i) of the Act, the average standardized amount per discharge must be determined for hospitals located in large urban and other areas in Puerto Rico. Hospitals in Puerto Rico are paid a blend of 75 percent of the applicable Puerto Rico standardized amount and 25 percent of a national standardized payment amount.

Section 1886(d)(2)(D) of the Act defines "urban areas" as those areas within a Metropolitan Statistical Area (MSA). A "large urban area" is defined as an urban area with a population of more than 1,000,000. In addition, section 4009(i) of Public Law 100–203 provides that a New England County Metropolitan Area (NECMA) with a population of more than 970,000 is classified as a large urban area. As required by section 1886(d)(2)(D) of the Act, population size is determined by the Secretary based on the latest population data published by the Bureau of the Census. Urban areas that do not meet the definition of a "large urban area" are referred to as "other urban areas." Areas that are not included in MSAs are considered "rural areas" under section 1886(d)(2)(D). Payment for discharges from hospitals located in large urban areas will be based on the large urban standardized amount. Payment for discharges from hospitals located in other urban and rural areas will be based on the other standardized amount.

Based on 1994 population estimates published by the Bureau of the Census, 57 areas meet the criteria to be defined as large urban areas for FY 1996. These areas are identified by an asterisk in Table 4a.

Table 1a contains the two national standardized amounts that are applicable to most hospitals. Table 1b sets forth the 18 regional standardized amounts that will continue to be applicable for hospitals located in census areas subject to the regional floor. Under section 1886(d)(9)(A)(ii) of the Act, the national standardized payment amount applicable to hospitals in Puerto Rico consists of the discharge-weighted average of the national large urban standardized amount and the national other standardized amount (as set forth in Table 1a). The national average standardized amount for Puerto Rico is set forth in Table 1c. Table 1c also includes the standardized amounts that will be applicable to most hospitals in Puerto Rico.

We note that on June 30, 1995, the Office of Management and Budget announced the designation of the Flagstaff, Arizona-Utah MSA and the Grand Junction, Colorado MSA.

3. Updating the Average Standardized Amounts

In accordance with section 1886(d)(3)(A)(iv) of the Act, we are updating the large urban and the other areas average standardized amounts for FY 1996 using the applicable percentage increases specified in section 1886(b)(3)(B)(i) of the Act. Section 1886(b)(3)(B)(i)(XI) of the Act specifies that, for hospitals in all areas, the update factor for the standardized amounts for FY 1996 is the market basket percentage increase minus 2.0 percentage points.

The percentage change in the market basket reflects the average change in the price of goods and services purchased by hospitals to furnish inpatient care. The most recent forecast of the hospital market basket increase for FY 1996 is 3.5 percent. For FY 1996, this yields an update to the average standardized amounts of 1.5 percent (3.5 percent minus 2.0 percent).

As in the past, we are adjusting the FY 1995 standardized amounts to remove the effects of the FY 1995 geographic reclassifications and outlier payments before applying the FY 1996 updates. That is, we are increasing the standardized amounts to restore the reductions that were made for the effects of geographic reclassification and outliers. After including the FY 1996 offsets to the standardized amounts for outliers and geographic reclassification, we estimate that there will be an actual increase of 1.2 percent to the large urban and other area standardized amounts.

Beginning in FY 1995, we revised the national average standardized amounts based on national average labor/nonlabor shares. In FY 1996, we will continue to adjust the labor and nonlabor proportions of the standardized amount to reflect the national average. As a result, the national average labor share (as reflected in the hospital market basket) will equal 71.4 percent of the standardized payment amounts. (We are revising the Puerto Rico standardized amounts by the average labor share in Puerto Rico of 82.8 percent.)

Although the update factor for FY 1996 is set by law, we were required by section 1886(e)(3)(B) of the Act to report to Congress on our initial recommendation of update factors for FY 1996 for both prospective payment hospitals and hospitals excluded from the prospective payment system. For general information purposes, we published the report to Congress as Appendix C to the proposed rule, as revised in the correction notice published on August 2, 1995 (60 FR 39305). That recommendation was based on an earlier forecast of the market basket increase. Our final recommendation on the update factors (which is required by sections 1886(e)(4)(A) and (e)(5)(A) of the Act) is set forth as Appendix C to this final rule.

Comment: One commenter urged that an add-on adjustment of not less than 7 percent be made to the Puerto Rico standardized amounts to account for the penalty resulting from the use of temporary cost allocation methods by government hospitals in Puerto Rico with a noncharge structure.

Response: At this time, we do not believe it is appropriate to adjust the standardized amounts of Puerto Rico for those government hospitals with a noncharge structure. However, as noted in section III.B.4, we will continue to study the issue of payments to Puerto Rico.

4. Other Adjustments to the Average Standardized Amounts

a. Recalibration of DRG Weights and Updated Wage Index—Budget Neutrality Adjustment.

Section 1886(d)(4)(C)(iii) of the Act specifies that beginning in FY 1991, the annual DRG reclassification and recalibration of the relative weights must be made in a manner that ensures that aggregate payments to hospitals are not affected. As discussed in section II of the preamble, we normalized the recalibrated DRG weights by an adjustment factor, so that the average case weight after recalibration is equal to the average case weight prior to recalibration.

Section 1886(d)(3)(E) of the Act specifies that the hospital wage index must be updated on an annual basis beginning October 1, 1993. This provision also requires that any updates or adjustments to the wage index must be made in a manner that ensures that aggregate payments to hospitals are not affected by the change in the wage index.

To comply with the requirement of section 1886(d)(4)(C)(iii) of the Act that DRG reclassification and recalibration of the relative weights be budget neutral and the requirement in section 1886(d)(3)(E) of the Act that the updated wage index be budget neutral, we compared aggregate payments using the FY 1995 relative weights and the wage index effective October 1, 1994, to aggregate payments using the FY 1996 relative weights and wage index. The same methodology was used for the FYs

1993, 1994, and 1995 budget neutrality adjustment. Based on this comparison, we computed a proposed budget neutrality adjustment factor equal to 0.999174. Based on the final FY 1996 relative weights and wage index, the final budget neutrality adjustment factor is equal to 0.999306. This budget neutrality adjustment factor is applied to the standardized amounts without removing the effects of the FY 1995 budget neutrality adjustment. We do not remove the prior budget neutrality adjustment because estimated aggregate payments after the changes in the DRG relative weights and wage index should equal estimated aggregate payments prior to the changes. If we removed the prior year adjustment, we would not satisfy this condition.

In addition, we will apply the same FY 1996 adjustment factor to the hospital-specific rates that are effective for cost reporting periods beginning on or after October 1, 1995, in order to ensure that we meet the statutory requirement that aggregate payments neither increase nor decrease as a result of the implementation of the FY 1996 DRG weights and updated wage index. (See the discussion in the September 4, 1990 final rule (55 FR 36073).)

Section 1886(d)(5)(I) of the Act, as amended by section 109 of the Social Security Act Amendments of 1994 (Public Law 103–432), authorizes the Secretary to make adjustments to the prospective payment system standardized amounts so that adjustments to the payment policy for transfer cases do not affect aggregate payments. As discussed in section IV.A of the preamble of this final rule, we are revising our payment methodology for transfer cases, so that we will pay double the per diem amount for the first day of a transfer case, and the per diem amount for each day after the first, up to the full DRG amount. For the data that we analyzed, this would result in additional payments for transfer cases of $159 million. To implement this change in a budget neutral manner, we adjusted the standardized amounts by applying a budget neutrality adjustment of 0.997583 in the proposed rule. The final budget neutrality adjustment factor for this transfer change is equal to 0.997575. This adjustment will be applied on a one-time basis to the FY 1996 standardized amounts. After FY 1996, there will be no need for a further budget neutrality adjustment unless or until we make further changes to the transfer payment methodology.

b. Reclassified Hospitals—Budget Neutrality Adjustment.

Section 1886(d)(8)(B) of the Act provides that certain rural hospitals are deemed urban effective with discharges occurring on or after October 1, 1988. In addition, section 1886(d)(10) of the Act provides for the reclassification of hospitals based on determinations by the Medicare Geographic Classification Review Board (MGCRB). Under section 1886(d)(10), a hospital may be reclassified for purposes of the standardized amount or the wage index, or both.

Under section 1886(d)(8)(D) of the Act, the Secretary is required to adjust the standardized amounts so as to ensure that estimated aggregate payments under the prospective payment system after implementation of the provisions of sections 1886(d)(8) (B) and (C) and 1886(d)(10) of the Act are equal to the estimated aggregate prospective payments that would have been made absent these provisions. In the proposed rule, we applied an adjustment of 0.994125 to ensure that the effects of reclassification are budget neutral. The final budget neutrality adjustment factor is 0.994011.

The adjustment factor is applied to the standardized amounts after removing the effects of the FY 1995 budget neutrality adjustment factor. We note that the proposed FY 1996 adjustment reflected wage index and standardized amount reclassifications approved by the MGCRB or the Administrator as of March 14, 1995. The final budget neutrality adjustment factor reflects the effects of all reclassification decisions and changes in these decisions resulting from appeals and reviews of the MGCRB decisions for FY 1996 or from requests for withdrawal of a reclassification.

c. Outliers.

Section 1886(d)(5)(A) of the Act provides that, in addition to the basic prospective payment rates, for discharges occurring before October 1, 1997, payments must be made for discharges involving day outliers and may be made for cost outliers. Section 1886(d)(3)(B) of the Act requires the Secretary to adjust both the large urban and other areas national standardized amounts by the same factor to account for the estimated proportion of total DRG payments made to outlier cases. Section 1886(d)(9)(B)(iv) of the Act requires that the large urban and other standardized amounts applicable to hospitals in Puerto Rico be reduced by the proportion of estimated total DRG payments attributable to estimated outlier payments. Furthermore, under section 1886(d)(5)(A)(iv) of the Act, estimated outlier payments in any year may not be less than 5 percent nor more than 6 percent of total payments projected or estimated to be made based on DRG prospective payment rates.

Beginning with FY 1995, section 1886(d)(5)(A) of the Act requires the Secretary to reduce the proportion of total outlier payments paid under the day outlier methodology. Under the requirements of section 1886(d)(5)(A)(v) of the Act, the proportion of outlier payments made under the day outlier methodology, relative to the proportion of outlier payments made under the day outlier methodology in FY 1994 (which we estimated at 31.3 percent in our September 1, 1993 final rule (58 FR 46348)), will be 75 percent in FY 1995, 50 percent in FY 1996, and 25 percent in FY 1997. For discharges occurring after September 30, 1997, the Secretary will no longer pay for day outliers under the provisions of section 1886(d)(5)(A)(i) of the Act.

i. FY 1996 Outlier Thresholds.

For FY 1995, the day outlier threshold is the geometric mean length of stay for each DRG plus the lesser of 22 days or 3.0 standard deviations. The marginal cost factor for day outliers (or the percent of Medicare's average per diem payment paid for each outlier day) is equal to 47 percent in FY 1995. The fixed loss cost outlier threshold is equal to the prospective payment for the DRG plus $20,500 ($18,800 for hospitals that have not yet entered the prospective payment system for capital-related costs). The marginal cost factor for cost outliers (or the percent of costs paid after costs for the case exceed the threshold) is 80 percent. We applied an outlier adjustment to the FY 1995 standardized amounts of 0.948940 for the large urban and other areas rates and 0.9414 for the capital Federal rate.

For FY 1996, we proposed to set the day outlier threshold at the geometric mean length of stay for each DRG plus the lesser of 23 days or 3.0 standard deviations. We also proposed to reduce the marginal cost factor for each outlier day from 47 percent to 45 percent in FY 1996. The thresholds that we are establishing in this final rule continue to be the geometric mean length of stay for each DRG plus the lesser of 23 days or 3.0 standard deviations. However, based on updated simulations, we are establishing in this final rule a marginal cost factor of 44 percent for each outlier day in FY 1996. We estimate that these policies will reduce the proportion of outlier payments paid to day outliers to approximately 16 percent in accordance with section 1886(d)(5)(A) of the Act.

We proposed a fixed loss cost outlier threshold in FY 1996 equal to the prospective payment rate for the DRG plus $16,700 ($15,200 for hospitals that have not yet entered the prospective

payment system for capital-related costs). In addition, we proposed to maintain the marginal cost factor for cost outliers at 80 percent. In this final rule, based on updated simulations, we are establishing a fixed loss cost outlier threshold in FY 1996 equal to the prospective payment rate for the DRG plus $15,150 ($13,800 for hospitals that have not yet entered the prospective payment system for capital-related costs). We are also establishing a marginal cost factor for cost outliers of 80 percent for FY 1996, as proposed.

As provided in section 1886(d)(5)(A)(iv) of the Act, we calculated outlier thresholds so that estimated outlier payments equal 5.1 percent of estimated total payments based on DRGs. The model that we use to determine the outlier thresholds necessary to meet the estimated outlier payment percentage for FY 1996 uses the June 1995 update of the FY 1994 MedPAR file and the July 1995 update of the provider-specific file used in the PRICER program, which contains information on hospital-specific payment parameters (such as the cost-to-charge ratios).

In simulating payments, we convert billed charges to costs for purposes of estimating cost outlier payments. As we explained in the September 1, 1993 final rule (58 FR 46347), prior to FY 1994, we used a charge inflation factor to adjust charges to costs; beginning with FY 1994, we are using a cost inflation factor to estimate costs. In other words, instead of inflating the FY 1994 charge data by a charge inflation factor for 2 years in order to estimate FY 1996 charge data and then applying the cost-to-charge ratio, we adjust the charges by the cost-to-charge ratio and then inflate the estimated costs for 2 years of cost inflation. In this manner, we automatically adjust for any changes in the cost-to-charge ratios that may occur, since the relevant variable is the costs estimated for a given case.

In setting the proposed FY 1996 outlier thresholds, we used a cost inflation factor of 1.02009. In setting the final FY 1996 outlier thresholds, we used a cost inflation factor of 1.00871. The difference is attributable to the use of the cost per case increase in cost reporting periods beginning in FY 1993 (referred to as PPS–X data) in setting the final FY 1996 outlier thresholds instead of the average increase in cost per case for cost reporting periods beginning in FY 1991 (PPS–VIII) through PPS–X. This modification was introduced after a review of the cost per case increase for 2700 hospitals in cost reporting periods beginning in FY 1994 (PPS–XI). The cost per case increase from PPS–X to PPS–XI was much closer to the increase from PPS–IX to PPS–X than the average increase between PPS–VIII through PPS–X. We believe it is more appropriate to use the increase from PPS–IX to PPS–X as our cost inflation factor in setting the final FY 1996 outlier thresholds. In the future, we still plan to use 2-year averages in computing the cost inflation factors, unless preliminary data from more recent years indicate that the 2-year average may be inaccurate.

When we modeled the combined operating and capital outlier payments, we found that using a common set of thresholds resulted in a lower percentage of outlier payments for capital-related costs than for operating costs. We estimate the final thresholds for FY 1996 will result in outlier payments equal to 5.1 percent of operating DRG payments and 4.6 percent of capital payments based on the Federal rate.

As stated in the September 1, 1993 final rule (58 FR 46348), we have established outlier thresholds that will be applicable to both inpatient operating costs and inpatient capital-related costs. As explained earlier, we are applying a reduction of approximately 5.1 percent to the FY 1996 standardized amounts to account for the estimated proportion of outliers payments. The proposed outlier adjustment factors applied to the standardized amounts and the capital Federal rate for FY 1996 were as follows:

Operating standardized amounts	Capital Federal rate
0.949054	0.9526

The final outlier adjustment factors applied to the standardized amounts and the capital Federal rate for FY 1996 are as follows:

Operating standardized amounts	Capital Federal rate
0.948950	0.9536

As in the proposed rule, we apply the final outlier adjustment factors after removing the effects of the FY 1995 outlier adjustment factors on the standardized amounts and the capital Federal rate.

ii. Other Changes Concerning Outliers.

Table 5 of section V of this addendum contains the DRG relative weights, geometric and arithmetic mean lengths of stay, as well as the day outlier threshold for each DRG. When we recalibrate DRG weights, we set a threshold of 10 cases as the minimum number of cases required to compute a reasonable weight and geometric mean length of stay. DRGs that do not have at least 10 cases are considered to be low volume DRGs. For the low volume DRGs, we use the original geometric mean lengths of stay, because no arithmetic mean length of stay was calculated based on the original data.

Table 8a in section V of this addendum contains the updated Statewide average operating cost-to-charge ratios for urban hospitals and for rural hospitals to be used in calculating cost outlier payments for those hospitals for which the intermediary is unable to compute a reasonable hospital-specific cost-to-charge ratio. Effective October 1, 1995, these Statewide average ratios will replace the ratios published in the September 1, 1994 final rule (59 FR 45480). Table 8b contains comparable Statewide average capital cost-to-charge ratios. These average ratios will be used to calculate cost outlier payments for those hospitals for which the intermediary computes operating cost-to-charge ratios lower than 0.25218 or greater than 1.32569 and capital cost-to-charge ratios lower than 0.012998 or greater than 0.21483. This range represents 3.0 standard deviations (plus or minus) from the mean of the log distribution of cost-to-charge ratios for all hospitals. The cost-to-charge ratios in Tables 8a and 8b will be applied to all hospital-specific cost-to-charge ratios based on cost report settlements occurring during FY 1996.

iii. FY 1994 and FY 1995 Outlier Payments.

In the proposed rule, we estimated that actual FY 1994 outlier payments were approximately 3.5 percent of total DRG payments (60 FR 29260). Our estimates of actual outlier payments and actual total DRG payments were computed by simulating payments using actual FY 1994 bill data available at the time of the proposed rule. Our current estimate remains the same; that is, we estimate that actual FY 1994 outlier payments were approximately 3.5 percent of actual total DRG payments. These estimates are based on simulations using the July 1995 update of the provider-specific file and the June 1995 update of the MedPAR file.

In setting outlier policies for FY 1994, we began using a cost inflation factor rather than a charge inflation factor to update billed charges for purposes of estimating outlier payments. This refinement was made in order to improve our estimation methodology. We believe that actual FY 1994 outlier payments as a percentage of actual total

DRG payments may be lower than estimated because actual hospital costs may be lower than reflected in the estimation methodology. Our most recent data on hospital costs show a significant trend in declining rates of increase. Thus, the cost inflation factor of 8.3 percent used to estimate FY 1994 outlier payments (based on the best available data) appears to have been overstated. For FY 1995, we used a cost inflation factor of 2.5 percent. Based on more recent data, we are using a cost inflation factor of 0.871 percent to calculate outlier payments for FY 1996. Also, although we estimate that FY 1994 outlier payments will approximate 3.5 percent of total DRG payments, we note that the estimate of the market basket rate of increase used to set the FY 1994 rates was 4.3 percentage points, while the latest FY 1994 market basket rate of increase forecast is 2.5 percent. Thus, the net effect is that total FY 1994 payments are higher than they would have been if the market basket rate of increase and the outlier percentage were estimated with precise accuracy.

In the proposed rule (60 FR 29260), we estimated that actual FY 1995 outlier payments would be approximately 4.2 percent of actual FY 1995 total DRG payments. We currently estimate that FY 1995 outlier payments will approximate 4.0 percent of total DRG payment. This current estimate is based on simulations using the July 1995 update of the provider-specific file and the June 1995 update of the FY 1994 MedPAR file.

We believe that there are two main reasons why our current estimate of FY 1995 outlier payments is below 5.1 percent. First, in setting the outlier thresholds for FY 1995, we used 2.5 percent as our cost inflation factor to inflate FY 1993 bills to FY 1995 levels. Our current estimate of cost inflation is 0.871 percent. Thus, the rate of increase in costs continues to slow. We note that this factor is reflected in the estimation methodology used to set thresholds. Thus, the final FY 1996 cost outlier threshold is lower than the proposed cost outlier threshold.

Second, in setting the outlier thresholds for FY 1995, we used cost-to-charge ratios that had a mean value of 0.618. Our current estimate of cost-to-charge ratios for FY 1995 is down to 0.600. Thus, not only are costs not rising as fast as we estimated, but they also make up a lower percentage of charges than we estimated in setting FY 1995 thresholds. We are continuing to explore better ways to forecast the changes in cost inflation.

Comment: We received a number of comments expressing concern that the projected percentages of outlier payments for FYs 1994 and 1995 are lower than estimated when we set the thresholds. Some of the commenters requested that any difference between outlier payments and the amount set aside be used to offset the amount required in the next year. Other commenters requested that we monitor outlier payments during a fiscal year, so that we can change the thresholds in the middle of the year in the event that projected outlier payments are not between 5 and 6 percent of total DRG payments.

Response: We responded to similar comments in the final rules for FY 1993 (57 FR 39784), FY 1994 (58 FR 46347), and FY 1995 (59 FR 45404). In accordance with section 1886(d)(5)(A)(iv) of the Act, we set the FY 1994 and FY 1995 outlier thresholds so that the estimated proportion of outlier payments relative to total DRG payments is 5.1 percent. We used the most recent Medicare discharge and hospital-specific data available to estimate payments. This is necessarily a prospective process and the resulting estimate may prove to be inaccurate.

We believe that it would be inappropriate to revise in midyear any of the payment policies based on estimates. These policies include not only the outlier thresholds, but also factors such as the market basket rate of increase used to establish the update factors, the recalibration of the DRG weights, and the various required budget neutrality provisions. We also believe it would be inappropriate to reduce the standardized amounts to account for outlier cases in a fiscal year by an amount that differs from the estimated proportion of outlier payments in that fiscal year. Section 1886(d)(3)(B) of the Act requires the Secretary to "reduce each of the standardized amounts * * * by the factor *equal to* the proportion of payments under this subsection (as estimated by the Secretary) based on DRG prospective payment amounts which are additional payments described in paragraph (5)(A) (relating to outlier payments)." (Emphasis added.) Thus, if we estimate that outlier payments will be 5.1 percent of total DRG payments in an upcoming fiscal year, we must reduce the standardized amounts by an "equal" percentage, not by some lower or higher percentage.

We believe the more appropriate action is to continue to examine the outlier policy and try to refine the methodology for setting outlier thresholds. To that end, as we did in FY 1995, we have attempted to improve our outlier projections in FY 1996. Normally, we would use the average increase in cost per case between PPS–VIII and PPS–X as the cost inflation factor in setting the FY 1996 outlier thresholds. However, as noted above, after reviewing the preliminary data for 2700 hospitals from PPS–XI, we found the cost per case increase of PPS–XI data to be much closer to the PPS–X data than the PPS–VIII data, indicating a continued downward trend in the rate of increase in hospital costs. Thus, for FY 1996, we have decided to use solely the PPS–X cost per case increase of 0.871 percent.

B. Adjustments for Area Wage Levels and Cost of Living

The adjusted standardized amounts are divided into labor and nonlabor portions. Tables 1a, 1b, and 1c, as set forth in this addendum, contain the labor-related and nonlabor-related shares used to calculate the prospective payment rates for hospitals located in the 50 States, the District of Columbia, and Puerto Rico. This section addresses two types of adjustments to the standardized amounts that are made in determining the prospective payment rates as described in this addendum.

1. Adjustment for Area Wage Levels

Sections 1886(d)(3)(E) and 1886(d)(9)(C)(iv) of the Act require that an adjustment be made to the labor-related portion of the prospective payment rates to account for area differences in hospital wage levels. This adjustment is made by multiplying the labor-related portion of the adjusted standardized amounts by the appropriate wage index for the area in which the hospital is located. In section III of the preamble to this final rule, we discuss certain revisions we are making to the wage index. This index is set forth in Tables 4a through 4e of this addendum.

2. Adjustment for Cost of Living in Alaska and Hawaii

Section 1886(d)(5)(H) of the Act authorizes an adjustment to take into account the unique circumstances of hospitals in Alaska and Hawaii. Higher labor-related costs for these two States are taken into account in the adjustment for area wages described above. For FY 1996, we are adjusting the payments for hospitals in Alaska and Hawaii by multiplying the nonlabor portion of the standardized amounts by the appropriate adjustment factor contained in the table below.

TABLE OF COST-OF-LIVING ADJUSTMENT FACTORS, ALASKA AND HAWAII HOSPITALS

Alaska—All areas	1.25
Hawaii:	
County of Honolulu	1.225
County of Hawaii	1.15
County of Kauai	1.20
County of Maui	1.225
County of Kalawao	1.225

(The above factors are based on data obtained from the U.S. Office of Personnel Management.)

C. DRG Relative Weights

As discussed in section II of the preamble to this final rule, we have developed a classification system for all hospital discharges, assigning them into DRGs, and have calculated relative weights for each DRG that reflect the resource utilization of cases in each DRG relative to Medicare cases in other DRGs.

Table 5 of section V of this addendum contains the relative weights that we will use for discharges occurring in FY 1996. These factors have been recalibrated as explained in section II.C of the preamble to this final rule.

D. Calculation of Prospective Payment Rates for FY 1996

General Formula for Calculation of Prospective Payment Rates for FY 1996

Prospective payment rate for all hospitals located outside Puerto Rico except sole community hospitals = Federal rate.

Prospective payment rate for sole community hospitals = Whichever of the following rates yields the greatest aggregate payment: 100 percent of the Federal rate, 100 percent of the updated FY 1982 hospital-specific rate, or 100 percent of the updated FY 1987 hospital-specific rate.

Prospective payment rate for Puerto Rico = 75 percent of the Puerto Rico rate + 25 percent of a discharge-weighted average of the national large urban standardized amount and the national other standardized amount.

1. Federal Rate

For discharges occurring on or after October 1, 1995 and before October 1, 1996, except for sole community hospitals and hospitals in Puerto Rico, the hospital's payment is based exclusively on the Federal rate. Section 1866(d)(1)(A)(iii) of the Act provides that the Federal rate is comprised of 100 percent of the Federal national rate except for those hospitals in census regions that have a regional rate that is higher than the national rate. The Federal rate for hospitals located in census regions that have a regional rate that is higher than the national rate equals 85 percent of the Federal national rate plus 15 percent of the Federal regional rate. Based on the final rates, for discharges occurring on or after October 1, 1995, hospitals in regions I, IV, and VI are affected by the regional floor.

The Federal rates are determined as follows:

Step 1—Select the appropriate national adjusted standardized amount considering the type of hospital and designation of the hospital as large urban or other (see Tables 1a and 1b, section V of this addendum).

Step 2—Multiply the labor-related portion of the standardized amount by the applicable wage index for the geographic area in which the hospital is located (see Tables 4a, 4b, and 4c, section V of this addendum).

Step 3—For hospitals in Alaska and Hawaii, multiply the nonlabor-related portion of the standardized amount by the appropriate cost-of-living adjustment factor.

Step 4—Add the amount from Step 2 and the nonlabor-related portion of the standardized amount (adjusted if appropriate under Step 3).

Step 5—Multiply the final amount from Step 4 by the relative weight corresponding to the appropriate DRG (see Table 5, section V of this addendum).

2. Hospital-Specific Rate (Applicable Only to Sole Community Hospitals)

Sections 1886(d)(5)(D)(i) and (b)(3)(C) of the Act provide that sole community hospitals are paid based on whichever of the following rates yields the greatest aggregate payment: the Federal rate, the updated hospital-specific rate based on FY 1982 cost per discharge, or the updated hospital-specific rate based on FY 1987 cost per discharge.

Hospital-specific rates have been determined for each of these hospitals based on both the FY 1982 cost per discharge and the FY 1987 cost per discharge. For a more detailed discussion of the calculation of the FY 1982 hospital-specific rate and the FY 1987 hospital-specific rate, we refer the reader to the September 1, 1983 interim final rule (48 FR 39772); the April 20, 1990 final rule with comment (55 FR 15150); and the September 4, 1990 final rule (55 FR 35994).

a. Updating the FY 1982 and FY 1987 Hospital-Specific Rates for FY 1996.

We are increasing the hospital-specific rates by 1.5 percent (the hospital market basket percentage increase minus 2.0 percentage points) for sole community hospitals located in all areas in FY 1996. Section 1886(b)(3)(C)(ii) of the Act provides that the update factor applicable to the hospital-specific rates for sole community hospitals equals the update factor provided under section 1886(b)(3)(B)(ii) of the Act, which, for FY 1996, is the market basket rate of increase minus 2.0 percentage points.

b. Calculation of Hospital-Specific Rate.

For sole community hospitals, the applicable FY 1996 hospital-specific rate will be calculated by multiplying a hospital's hospital-specific rate for the preceding fiscal year by the applicable update factor (1.5 percent), which is the same as the update for all prospective payment hospitals. In addition, the hospital-specific rate will be adjusted by the budget neutrality adjustment factor (that is, 0.999306) as discussed in section II.A.4.a of this addendum. This resulting rate will be used in determining under which rate a sole community hospital is paid for its discharges beginning on or after October 1, 1995, based on the formula set forth above.

3. General Formula for Calculation of Prospective Payment Rates for Hospitals Located in Puerto Rico Beginning On or After October 1, 1995 and Before October 1, 1996

a. Puerto Rico Rate.

The Puerto Rico prospective payment rate is determined as follows:

Step 1—Select the appropriate adjusted average standardized amount considering the large urban or other designation of the hospital (see Table 1c, section V of the addendum).

Step 2—Multiply the labor-related portion of the standardized amount by the appropriate wage index (see Tables 4a and 4b, section V of the addendum).

Step 3—Add the amount from Step 2 and the nonlabor-related portion of the standardized amount.

Step 4—Multiply the result in Step 3 by 75 percent.

Step 5—Multiply the amount from Step 4 by the appropriate DRG relative weight (see Table 5, section V of the addendum).

b. National Rate.

The national prospective payment rate is determined as follows:

Step 1—Multiply the labor-related portion of the national average standardized amount (see Table 1c, section V of the addendum) by the appropriate wage index.

Step 2—Add the amount from Step 1 and the nonlabor-related portion of the national average standardized amount.

Step 3—Multiply the result in Step 2 by 25 percent.

Step 4—Multiply the amount from Step 3 by the appropriate DRG relative weight (see Table 5, section V of the addendum).

The sum of the Puerto Rico rate and the national rate computed above equals the prospective payment for a given discharge for a hospital located in Puerto Rico.

III. Changes to Payment Rates for Inpatient Capital-Related Costs for FY 1996

The prospective payment system for hospital inpatient capital-related costs was implemented for cost reporting periods beginning on or after October 1, 1991. Effective with that cost reporting period and during a 10-year transition period extending through FY 2001, hospital inpatient capital-related costs are paid on the basis of an increasing proportion of the capital prospective payment system Federal rate and a decreasing proportion of the hospital's historical costs for capital.

The basic methodology for determining Federal capital prospective rates is set forth at §§ 412.308 through 412.352. Below we discuss the factors that we used to determine the Federal rate and the hospital-specific rates for FY 1996. The rates will be effective for discharges occurring on or after October 1, 1995.

For FY 1992, we computed the standard Federal payment rate for capital-related costs under the prospective payment system by updating the FY 1989 Medicare inpatient capital cost per case by an actuarial estimate of the increase in Medicare inpatient capital costs per case. Each year after FY 1992 we update the standard Federal rate, as provided in § 412.308(c)(1), to account for capital input price increases and other factors. Also, § 412.308(c)(2) provides that the Federal rate is adjusted annually by a factor equal to the estimated additional payments under the Federal rate for outlier cases, determined as a proportion of total capital payments under the Federal rate. Section 412.308(c)(3) further requires that the Federal rate be reduced by an adjustment factor equal to the estimated additional payments made for exceptions under § 412.348, and § 412.308(c)(4)(ii) requires that the Federal rate be adjusted so that the annual DRG reclassification and the recalibration of DRG weights and changes in the geographic adjustment factor are budget neutral. For FY 1992 through FY 1995, § 412.352 required that the Federal rate also be adjusted by a budget neutrality factor so that estimated aggregate payments for inpatient hospital capital costs will equal 90 percent of the estimated payments that would have been made for capital-related costs on a reasonable cost basis during the fiscal year. As discussed below, that provision has now expired.

The hospital-specific rate for each hospital was calculated by dividing the hospital's Medicare inpatient capital-related costs for a specified base year by its Medicare discharges (adjusted for transfers), and dividing the result by the hospital's case mix index (also adjusted for transfers). The resulting case-mix adjusted average cost per discharge was then updated to FY 1992 based on the national average increase in Medicare's inpatient capital cost per discharge and adjusted by the exceptions payment adjustment factor and the budget neutrality adjustment factor to yield the FY 1992 hospital-specific rate. The hospital-specific rate is updated each year after FY 1992 for inflation and for changes in the exceptions payment adjustment factor. For FY 1992 through FY 1995, the hospital-specific rate was also adjusted by a budget neutrality adjustment factor.

To determine the appropriate budget neutrality adjustment factors and the exceptions payment adjustment factor, we developed a dynamic model of Medicare inpatient capital-related costs, that is, a model that projects changes in Medicare inpatient capital-related costs over time. With the expiration of the budget neutrality provision, the model is still used to estimate the exceptions payment adjustment and other factors. The model and its application are described more fully in Appendix B.

In accordance with section 1886(d)(9)(A) of the Act, under the prospective payment system for inpatient operating costs, hospitals located in Puerto Rico are paid under a special payment formula. These hospitals are paid a blended rate that is comprised of 75 percent of the applicable standardized amount specific to Puerto Rico hospitals and 25 percent of the applicable national average standardized amount. Section 412.374 provides for the use of this blended payment system for payments to Puerto Rico hospitals under the prospective payment system for inpatient capital-related costs. Accordingly, for capital-related costs we compute a separate payment rate specific to Puerto Rico hospitals using the same methodology used to compute the national Federal rate for capital. Hospitals in Puerto Rico are paid based on 75 percent of the Puerto Rico rate and 25 percent of the Federal rate.

A. Determination of Federal Inpatient Capital-Related Prospective Payment Rate Update

For FY 1995, the Federal rate was $376.83. In the proposed rule, we stated that the proposed FY 1996 Federal rate was $457.11. In this final rule, we are establishing an FY 1996 Federal rate of $461.96.

In the discussion that follows, we explain the factors that were used to determine the FY 1996 Federal rate. In particular, we explain why the FY 1996 Federal rate has increased 22.59 percent compared to the FY 1995 Federal rate. We also explain that aggregate payments for capital in FY 1996 are estimated to increase by 20.56 percent.

The major factor contributing to the increase in the FY 1996 rate in comparison to FY 1995 is the expiration of the budget neutrality requirement. Section 412.352 required that estimated payments each year from FY 1992 through FY 1995 for capital costs equal 90 percent of the amount that would have been payable that year on a reasonable cost basis. Accordingly, each year from FY 1992 through FY 1995, we applied an adjustment to the Federal rate and the hospital-specific rate so that estimated capital prospective payments would equal 90 percent of estimated Medicare hospital inpatient capital-related costs.

Based on the most recent data, we now estimate that capital payments equalled 95.77 percent of reasonable costs in FY 1992, 90.99 percent of reasonable costs in FY 1993, 90.43 percent of reasonable costs in FY 1994, and 90.58 percent of reasonable costs in FY 1995. Thus, the data indicate that the budget neutrality adjustment for FY 1992 was not sufficient to meet the 90-percent target and, consequently, the Federal rate for FY 1992 was higher than it should have been. For FY 1993, FY 1994 and FY 1995, however, our estimates are that payments exceeded the budget neutrality target by less than one percentage point. We do not retroactively adjust the budget neutrality factor and the Federal rate for previous years to account for revised estimates. For FY 1996, we estimate that payments will exceed costs by 3.97 percent as a result of the expiration of the budget neutrality provision.

As we explain in section III.A.8 below, the predominant factor in the 22.59 percent increase in the Federal rate, as well as the 20.56 percent increase in payments, is the expiration

of the budget neutrality provision. For FY 1995, the budget neutrality adjustment was 0.8432, a 15.68 percent reduction to the rates. The expiration of that provision alone accounts for an 18.6 percent increase (1.00/.8432 = 1.186, or 18.6 percent) in the rate. The FY 1996 update factor and changes in the outlier and exceptions factors also contribute to the increase in the rate. The factors contributing to the increase in the rate were partially offset by a special adjustment to the rate to account for the effects of the new transfer policy, and by the effect of the DRG/GAF reduction factor.

Total payments to hospitals under the prospective payment system are relatively insensitive even to changes of such magnitude in the capital Federal rate. Since capital payments constitute about 10 percent of hospital payments, a 1 percent change in the capital Federal rate yields only about 0.1 percent change in actual payments to hospitals. Therefore, the large increase in the FY 1996 Federal rate can be expected to increase total payments to hospitals under the prospective payment system by only about 2.06 percent.

1. Special Federal Rate Adjustment for the Effects of the New Transfer Payment Policy

Section 412.312(d) provides that payment under the capital prospective payment system for transfer cases is made under the same rules governing transfer payments under the operating prospective payment system. Transfer cases under the prospective payment system for capital-related costs have been paid on a per diem basis, using the full prospective payment amount for the DRG (both Federal rate and hospital-specific rate, if appropriate) divided by the geometric mean length of stay for the DRG, but not to exceed the full prospective payment. Section IV.A of the preamble describes the implementation of a graduated per diem payment methodology for transfer cases. Beginning in FY 1996, we will pay double the per diem amount for the first day and the per diem amount for subsequent days, up to the full prospective payment amount. Section 109 of the Social Security Amendments of 1994 (Public Law 103–432) authorizes the Secretary to make adjustments to the operating prospective payment system rates so that adjustments to the payment policy for transfer cases do not affect aggregate payments. Section II of the addendum describes the methodology for making the adjustment to the operating rates.

In order to maintain consistency with the prospective payment system for operating costs, we believe that a parallel adjustment to the Federal capital rate and the hospital-specific capital rates is warranted. In this way, revision of the payment policy for transfer cases will not affect aggregate payments under the prospective payment system for capital-related costs. We describe the methodology for making this adjustment in Appendix B of this final rule. Following that methodology, we have determined that a special adjustment of .9972 (−0.28 percent) to the standard Federal rate and the hospital-specific rates is required.

2. Standard Federal Rate Update

Section 412.308(c)(1)(ii) provides that, effective FY 1996, the standard Federal rate is updated on the basis of an analytical framework that takes into account changes in a capital input price index and other factors. We discuss the analytical framework and the derivation of the final FY 1996 update factor under that framework in section V.A of the preamble to this final rule. The final update factor for FY 1996 is 1.2 percent.

3. Outlier Payment Adjustment Factor

Section 412.312(c) establishes a unified outlier methodology for inpatient operating and inpatient capital-related costs. A single set of thresholds is used to identify outlier cases for both inpatient operating and inpatient capital-related payments. Outlier payments are made only on the portion of the Federal rate that is used to calculate the hospital's inpatient capital-related payments (for example, 50 percent for cost reporting periods beginning in FY 1996 for hospitals paid under the fully prospective methodology). Section 412.308(c)(2) provides that the standard Federal rate for inpatient capital-related costs be reduced by an adjustment factor equal to the estimated additional payments under the Federal rate for outlier cases, determined as a proportion of inpatient capital-related payments under the Federal rate. The outlier thresholds are set so that estimated outlier payments are 5.1 percent of estimated total DRG payments. The inpatient capital-related outlier reduction factor is then set according to the estimated inpatient capital-related outlier payments that would be made if all hospitals were paid according to 100 percent of the Federal rate. For purposes of calculating the outlier thresholds and the outlier reduction factor, we model all hospitals as if paid 100 percent of the Federal rate because, as explained above, outlier payments are made only on the portion of the Federal rate that is included in the hospital's inpatient capital-related payments.

In the September 1, 1994 final rule, we estimated that outlier payments for capital in FY 1995 would equal 5.86 percent of inpatient capital-related payments based on the Federal rate. Accordingly, we applied an outlier adjustment factor of 0.9414 to the Federal rate. Based on the thresholds as set forth in section II.A.4.d of the addendum, we estimate that outlier payments will equal 4.64 percent of inpatient capital-related payments based on the Federal rate in FY 1996. We are, therefore, applying an outlier adjustment factor of 0.9536 to the Federal rate. Thus, estimated capital outlier payments for FY 1996 represent a lower percentage of total capital payments than in FY 1995.

The outlier reduction factors are not built permanently into the rates; that is, they are not applied cumulatively in determining the Federal rate. Therefore, the net change in the outlier adjustment to the Federal rate for FY 1996 is 1.0129 (.9536/.9414). Thus, the outlier adjustment increases the FY 1996 Federal rate by 1.29 percent (1.0129–1) compared with the FY 1995 outlier adjustment.

4. Budget Neutrality Adjustment Factor for Changes in DRG Classifications and Weights and the Geographic Adjustment Factor

Section 412.308(c)(4)(ii) requires that the Federal rate be adjusted so that estimated aggregate payments for the fiscal year based on the Federal rate after any changes resulting from the annual DRG reclassification and recalibration and changes in the geographic adjustment factor equal estimated aggregate payments that would have been made on the basis of the Federal rate without such changes. We use the actuarial model described in Appendix B to estimate the aggregate payments that would have been made on the basis of the Federal rate without changes in the DRG classifications and weights and in the geographic adjustment factor. We also use the model to estimate aggregate payments that would be made on the basis of the Federal rate as a result of those changes. We then use these figures to compute the adjustment required to maintain budget neutrality for changes in DRG weights and in the geographic adjustment factor.

For FY 1995, we calculated a GAF/DRG budget neutrality factor of 0.9998. In the proposed rule for FY 1996, we proposed a GAF/DRG budget neutrality factor of 0.9993. In this final rule, based on calculations using updated data, we are applying a factor of 0.9994 to meet this requirement. The GAF/DRG budget neutrality factors are built permanently into the rates; that is, they are applied cumulatively in determining the Federal rate. This follows from the requirement that estimated aggregate payments each year be no more than they would have been in the absence of the annual DRG reclassification and recalibration and changes in the geographic adjustment factor. The incremental change in the adjustment from FY 1995 to FY 1996 is 0.9994. The cumulative change in the rate due to this adjustment is 1.0025 (the product of the incremental factors for FY 1993, FY 1994, FY 1995, and FY 1996: .9980 × 1.0053 × .9998 × .9994 = 1.0025).

This factor accounts for DRG reclassifications and recalibration and for changes in the geographic adjustment factor. It also incorporates the effects on the geographic adjustment factor of FY 1996 geographic reclassification decisions made by the MGCRB compared to FY 1995 decisions. However, it does not account for changes in payments due to changes in the disproportionate share and indirect medical education adjustment factors or in the large urban add-on.

5. Exceptions Payment Adjustment Factor

Section 412.308(c)(3) requires that the standard Federal rate for inpatient capital-related costs be reduced by an adjustment factor equal to the estimated additional payments for exceptions under § 412.348 determined as a proportion of total payments under the hospital-specific rate and Federal rate. We use the model originally developed for determining the budget neutrality adjustment factor to estimate payments under the exceptions payment process and to determine the exceptions payment adjustment factor. We describe that model in Appendix B to this final rule.

For FY 1995, we estimated that exceptions payments would equal 2.66 percent of aggregate payments based on the Federal rate and the hospital-specific rate. Therefore, we applied an exceptions reduction factor of 0.9734 (1–.0266) in determining the Federal rate. For FY 1996, we estimated in the June 2, 1995, proposed rule that exceptions payments would equal 1.60 percent of aggregate payments based on the Federal rate and the hospital-specific rate. Therefore, we proposed to apply an exceptions reduction factor of 0.9840 (1–0.0160) to determine the FY 1996 Federal rate. For this final rule, we estimate that exceptions payments for FY 1996 will equal 1.51 percent of aggregate payments based on the Federal rate and the hospital-specific rate. We are, therefore, applying an exceptions payment reduction factor of 0.9849 to the Federal rate for FY 1996.

The final exceptions reduction factor for FY 1996 is thus 1.18 percent higher than the factor for FY 1995, and 0.09 percent higher than the factor in the FY 1996 proposed rule. The reduced level of estimated exceptions payments for FY 1996 compared to FY 1995 is a result of the significant increases in the capital rates and in aggregate capital payments.

The exceptions reduction factors are not built permanently into the rates; that is, the factors are not applied cumulatively in determining the Federal rate. Therefore, the net adjustment to the FY 1996 Federal rate is .9849/.9734, or 1.0118.

6. Expiration of Budget Neutrality Provision

For FY 1992 through FY 1995, § 412.352 required that the Federal rate also be adjusted by a budget neutrality factor so that estimated aggregate payments for inpatient hospital capital costs would equal 90 percent of the estimated payments that would have been made for capital-related costs on a reasonable cost basis during the fiscal year. That provision has now expired. The expiration of the budget neutrality provision is the predominant factor in the 22.59 percent increase in the Federal rate, as well as the 20.56 percent increase in payments.

For FY 1995, the budget neutrality adjustment was 0.8432, a 15.68 percent reduction to the rates. The budget neutrality factors were not built permanently into the rates; that is, the factors were not applied cumulatively in determining the Federal rate. With the expiration of the budget neutrality provision, the net adjustment to the rate is thus 1.186 (1.00/.8432=1.186), or 18.6 percent. The expiration of the provision, therefore, accounts for an 18.6 percent increase in the rate.

7. Standard Capital Federal Rate for FY 1996

For FY 1995, the capital Federal rate was $376.83. With the changes we proposed to the factors used to establish the Federal rate, we proposed that the FY 1996 Federal rate would be $457.11. In this final rule, we are establishing an FY 1996 Federal rate of $461.96. The final Federal rate for FY 1996 was calculated as follows:

- The FY 1996 special adjustment to the standard Federal rate to account for the change in transfer payment policy is 0.9972.
- The FY 1996 update factor is 1.0120.
- The FY 1996 outlier adjustment factor is 0.9536.
- The FY 1996 budget neutrality adjustment factor that is applied to the standard Federal payment rate for changes in the DRG relative weights and in the geographic adjustment factor is 0.9994.
- The FY 1996 exceptions payments adjustment factor is 0.9849.
- The expiration of the budget neutrality provision requires that the FY 1995 budget neutrality adjustment be removed from the rate without further incremental adjustment.

Since the Federal rate has already been adjusted for differences in case mix, wages, cost of living, indirect medical education costs, and payments to hospitals serving a disproportionate share of low-income patients, we are making no additional adjustments in the standard Federal rate for these factors other than the budget neutrality factor for changes in the DRG relative weights and the geographic adjustment factor.

We are providing a chart that shows how each of the factors and adjustments for FY 1996 affected the computation of the final FY 1996 Federal rate in comparison to the FY 1995 Federal rate. The special adjustment to account for the effects of changes in transfer payment policy has the effect of reducing the rate by 0.28 percent. The final FY 1996 update factor has the effect of increasing the Federal rate 1.20 percent compared to the rate in FY 1995, while the final geographic and DRG budget neutrality factor has the effect of decreasing the Federal rate by 0.06 percent. The final FY 1996 outlier adjustment factor has the effect of increasing the Federal rate by 1.29 percent compared to FY 1995. The final FY 1996 exceptions reduction factor has the effect of increasing the Federal rate by 1.18 percent compared to the exceptions reduction for FY 1995. Finally, the expiration of the budget neutrality provision has the effect of increasing the final FY 1996 rate by 18.60 percent compared to the effect of the budget neutrality reduction in FY 1995. The combined effect of all the changes is to increase the Federal rate by 22.59 percent compared to the Federal rate for FY 1995.

COMPARISON OF FACTORS AND ADJUSTMENTS: FY 1995 FEDERAL RATE AND FY 1996 FEDERAL RATE

		Change	Percent change
Transfer adjustment:			
FY 1995	N/A	....	
FY 1996	0.9972	0.9972	−0.28
Update factor [1]:			
FY 1995	1.0344	....	....
FY 1996	1.0120	1.0120	1.20
GAF/DRG adjustment factor: [1]			
FY 1995	0.9998	....	....
FY 1996	0.9994	0.9994	−0.06
Outlier adjustment factor: [2]			
FY 1995	0.9414	....	....
FY 1996	0.9536	1.0129	1.29
Exceptions adjustment factor: [2]			
FY 1995	0.9734	....	....
FY 1996	0.9849	1.0118	1.18
Budget neutrality adjustment factor: [2]			
FY 1995	0.8432	....	....
FY 1996	1.0000	1.1860	18.60
Federal Rate:			
FY 1995	$376.83	....	....
FY 1996	$461.96	1.2259	22.59

[1] The update factor and the GAF/DRG budget neutrality factors are built permanently into the rates. Thus, for example, the incremental change from FY 1995 to FY 1996 resulting from the application of the 0.9994 GAF/DRG budget neutrality factor for FY 1996 is 0.9994.

[2] The outlier reduction factor and the exceptions reduction factor are not built permanently into the rates; that is, these factors are not applied cumulatively in determining the rates. Thus, for example, the net change resulting from the application of the FY 1996 exceptions reduction factor is 0.9849/0.9734, or 1.0118. The result of the expiration of budget neutrality is that the FY 1995 budget neutrality factor is removed from the rate without further incremental adjustment (i.e., the FY 1996 adjustment of .8432 is divided out of the rate without further adjustment, for a net adjustment of 1.0000/.8432, or 1.1860).

We are also providing a chart that shows how the final FY 1996 Federal rate differs from the proposed FY 1996 Federal rate.

This chart shows that the major factor in the 1.06 percent increase in the rate since the proposed rule is the 1.15 percent increase due to our decision not to implement the proposed tax adjustment factor at this time. We discuss our reasons for this decision in section V.B. of the preamble. As the chart shows, the effect of this change, when compared to the proposed FY 1996 Federal rate, is to increase the rate by 1.15 percent. In addition, there have been small changes in the outlier and exceptions factors that contribute to the small increase in the rate. As the chart also shows, the effect of these changes was partially offset by a decrease in the final update factor compared to the update factor in the proposed rule.

COMPARISON OF FACTORS AND ADJUSTMENTS: PROPOSED FY 1996 FEDERAL RATE AND FINAL FY 1996 FEDERAL RATE

		Net adjustment	Percent change
Update factor:			
Proposed FY 1996	1.0150	....	....
Final FY 1996	1.0120	0.9970	−0.30
Transfer adjustment:			
Proposed FY 1996	0.9972	....	....
Final FY 1996	0.9972	1.0000	0.00
Tax adjustment:			
Proposed FY 1996	0.9886	....	....
Final FY 1996	1.0000	1.0115	1.15
Outlier reduction factor:			
Proposed FY 1996	0.9526	....	....
Final FY 1996	0.9536	1.0010	0.10
GAF/DRG reduction factor:			
Proposed FY 1996	0.9993	....	....
Final FY 1996	0.9994	1.0001	0.01
Exceptions reduction factor:			
Proposed FY 1996	0.9840	....	....
Final FY 1996	0.9849	1.0009	0.09
Budget neutrality adjustment factor:			
Proposed FY 1996	1.0000	....	....
Final FY 1996	1.0000	1.0000	0.00
Federal rate:			
Proposed FY 1996	$457.11	....	....
Final FY 1996	$461.96	1.0106	1.06

8. Special Rate for Puerto Rico Hospitals

For FY 1995, the special rate for Puerto Rico hospitals was $289.87. With the changes we proposed making to the factors used to determine the rate, the proposed FY 1996 special rate for Puerto Rico was $351.61. In this final rule, the FY 1996 capital rate for Puerto Rico is $355.35.

B. Determination of Hospital-Specific Rate Update

Section 412.328(e) of the regulations provides that the hospital-specific rate for FY 1996 be determined by adjusting the FY 1995 hospital-specific rate by the following factors:

1. Special Adjustment for the Effects of the New Transfer Policy

Section 412.312(d) of the regulations provides that payment under the capital prospective payment system for transfer cases is made under the same rules governing transfer payments under the operating prospective payment system. Transfer cases under the prospective payment system for capital-related costs have been paid on a per diem basis, using the full prospective payment amount for the DRG (both Federal rate and hospital-specific rate, if appropriate) divided by the geometric mean length of stay for the DRG, but not to exceed the full prospective payment. Section IV.A of the preamble to this final rule describes our adoption of a graduated per diem payment methodology for transfer cases. Under this policy, we will pay double the per diem amount for the first day and the per diem amount for subsequent days, up to the full prospective payment amount. Section 109 of the Social Security Amendments of 1994 (Public Law 103–432) authorizes the Secretary to make adjustments to the operating prospective payment system rates so that adjustments to the payment policy for transfer cases do not affect aggregate payments. Section II of this Addendum describes the methodology for making the adjustment to the operating rates.

In order to maintain consistency with the prospective payment system for operating costs, we believe that a parallel adjustment to the Federal capital rate and the hospital-specific capital rates is warranted. In this way, revision of the payment policy for transfer cases will not affect aggregate payments under the prospective payment system for capital-related costs. We describe the methodology for making this adjustment in Appendix B of this proposed rule. Following that methodology, we have determined that a special adjustment of 0.9972 (−0.28 percent) to the standard Federal rate and the hospital-specific rates is required. We have revised § 412.328(e) accordingly.

2. Hospital-Specific Rate Update Factor

The hospital-specific rate is updated in accordance with the update factor for the standard Federal rate determined under § 412.308(c)(1). For FY 1996, the hospital-specific rate will be updated by a factor of 1.012.

3. Exceptions Payment Adjustment Factor

For FY 1992 through FY 2001, the updated hospital-specific rate is multiplied by an adjustment factor to account for estimated exceptions payments for capital-related costs under § 412.348, determined as a proportion of the total amount of payments under the hospital-specific rate and the Federal rate. For FY 1996, we estimated in the proposed rule that exceptions payments would be 1.60 percent of aggregate payments based on the Federal rate and the hospital-specific rate. We therefore proposed that the updated hospital-specific rate be reduced by a factor of 0.9840. In this final rule, we estimate that exceptions payments will be 1.51 percent of aggregate payments based on the Federal rate and the hospital-specific rate. We are therefore applying an exceptions reduction factor of 0.9849 to the hospital-specific rate. The exceptions reduction factors are not built permanently into the rates; that is, the factors are not applied cumulatively in determining the hospital-specific rate. Therefore, the proposed net adjustment to the FY 1996 hospital-specific rate is .9849/.9734, or 1.0118.

4. Expiration of the Budget Neutrality Provision

For FY 1992 through FY 1995, the updated hospital-specific rate was adjusted by a budget neutrality adjustment factor determined under § 412.352, so that estimated aggregate payments under the capital prospective payment system would equal 90 percent of estimated payments that would have been made on a reasonable cost basis. (The budget neutrality adjustment for changes in the DRG classifications and relative weights and in the geographic adjustment factor is not applied to the hospital-specific rate.) For FY 1995, the budget neutrality adjustment was 0.8432. The budget neutrality provision has now expired. Therefore, for FY 1996 there is no budget neutrality adjustment. The budget neutrality factor was not built permanently into the rates; that is, the factor was not applied cumulatively in determining the hospital-specific rate. Therefore, the net adjustment to the FY 1996 hospital-specific rate as a result of the expiration of the budget neutrality provision is 1.0000/.8432, or 1.1860.

5. Net Change to Hospital-Specific Rate

We are providing a chart to show the net change to the hospital-specific rate. The chart shows the factors for FY 1995 and FY 1996 and the net adjustment for each factor. It also shows that the proposed cumulative net adjustment from FY 1995 to FY 1996 is 1.2110, which represents an increase of 21.10 percent to the hospital-specific rate. The FY 1996 hospital-specific rate for each hospital is determined by multiplying the FY 1995 hospital-specific rate by the cumulative net adjustment of 1.2110.

FY 1996 UPDATE AND ADJUSTMENTS TO HOSPITAL-SPECIFIC RATES

		Net adjustment	Percent change
Update factor:			
FY 1995	1.0344	....	....
FY 1996	1.0120	1.0120	1.20
Transfer adjustment:			
FY 1995	N/A		
FY 1996	0.9972	0.9972	−0.28
Exceptions payment adjustment factor:			
FY 1995	0.9734	....	....
FY 1996	0.9849	1.0118	1.18
Budget neutrality factor:			
FY 1995	0.8432	....	....
FY 1996	1.0000	1.1860	18.60
Cumulative adjustments:			
FY 1995	0.8457	....	....
FY 1996	1.0241	1.2110	21.10

Note: The update factor for the hospital-specific rate is applied cumulatively in determining the rates. Thus, the incremental increase in the update factor from FY 1995 to FY 1996 is 1.0120. In contrast, the exceptions payment adjustment factor and the budget neutrality factor are not applied cumulatively. Thus, for example, the incremental increase in the exceptions reduction factor from FY 1995 to FY 1996 is .9849/.9734, or 1.0118.

C. Calculation of Inpatient Capital-Related Prospective Payments for FY 1996

During the capital prospective payment system transition period, a hospital is paid for inpatient capital-related costs under one of two alternative payment methodologies: the fully prospective payment methodology or the hold-harmless methodology. The payment methodology applicable to a particular hospital is determined when a hospital comes under the prospective payment system for capital-related costs by comparing its hospital-specific rate to the Federal rate applicable to the hospital's first cost reporting period under the prospective payment system. The applicable Federal rate was determined by adjusting:

- For outliers by dividing the standard Federal rate by the outlier reduction factor for that fiscal year; and,
- For the payment adjustment factors applicable to the hospital (that is, the hospital's geographic adjustment factor, the disproportionate share adjustment factor, and the indirect medical education adjustment factor, when appropriate).

If the hospital-specific rate is above the applicable Federal rate, the hospital is paid under the hold-harmless methodology. If the hospital-specific rate is below the applicable Federal rate, the hospital is paid under the fully prospective methodology.

For purposes of calculating payments for each discharge under both the hold-harmless payment methodology and the fully prospective payment methodology, the standard Federal rate is adjusted as follows:

(Standard Federal Rate) × (DRG weight)
× (Geographic Adjustment Factor) × (Large Urban Add-on, if applicable) × (COLA adjustment for hospitals located in Alaska and Hawaii) × (1 + Disproportionate Share Adjustment Factor + Indirect Medical Education Adjustment Factor, if applicable).

The result is termed the adjusted Federal rate.

Payments under the hold-harmless methodology are determined under one of two formulas. A hold-harmless hospital is paid the higher of:

- 100 percent of the adjusted Federal rate for each discharge; or
- An old capital payment equal to 85 percent (100 percent for sole community hospitals) of the hospital's allowable Medicare inpatient old capital costs per discharge for the cost reporting period plus a new capital payment based on a percentage of the adjusted Federal rate for each discharge. The percentage of the adjusted Federal rate equals the ratio of the hospital's allowable Medicare new capital costs to its total Medicare inpatient capital-related costs in the cost reporting period.

Once a hospital receives payment based on 100 percent of the adjusted Federal rate in a cost reporting period beginning on or after October 1, 1994 (or the first cost reporting period after obligated capital that is recognized as old capital under § 412.302(c) is put in use for patient care, if later), the hospital continues to receive capital prospective payment system payments on that basis for the remainder of the transition period.

Payment for each discharge under the fully prospective methodology is the sum of:

- The hospital-specific rate multiplied by the DRG relative weight for the discharge and by the applicable hospital-specific transition blend percentage for the cost reporting period; and
- The adjusted Federal rate multiplied by the Federal transition blend percentage.

The blend percentages for cost reporting periods beginning in FY 1996 are 50 percent of the adjusted Federal rate and 50 percent of the hospital-specific rate.

Hospitals may also receive outlier payments for those cases that qualify under the thresholds established for each fiscal year. Section 412.312(c) provides for a single set of thresholds to identify outlier cases for both inpatient operating and inpatient capital-related payments. Outlier payments are made only on that portion of the hospital's inpatient capital-related payments that is based on the Federal rate. For fully prospective hospitals, that portion is 50 percent Federal rate for discharges occurring in cost reporting periods beginning during FY 1996. Thus, a fully prospective hospital will receive 50 percent of the capital-related outlier payment calculated for the case for discharges occurring in cost reporting periods beginning in FY 1996. For hold-harmless hospitals paid 85 percent of their reasonable costs for old inpatient capital, the portion of the Federal rate that is included in the hospital's outlier payments is based on the hospital's ratio of Medicare inpatient costs for new capital to total Medicare inpatient capital costs. For hold-harmless hospitals that are paid based on 100 percent of the Federal rate, 100 percent of the Federal rate is included in the hospital's outlier payments.

The outlier thresholds for FY 1996 are published in section II.A.4.c of this Addendum. For FY 1996, a case qualifies as a cost outlier if the cost for the case (after standardization for the indirect teaching adjustment and disproportionate share adjustment) is greater than the prospective payment rate for the DRG plus $15,150. A case qualifies as a day outlier for FY 1996 if the length of stay is greater than the geometric mean length of stay for the DRG plus the lesser of three standard deviations of the length of stay or 23 days.

During the capital prospective payment system transition period, a hospital may also receive an additional payment under an exceptions process if its total inpatient capital-related payments are less than a minimum percentage of its allowable Medicare inpatient capital-related costs. The minimum payment level is established by class of hospital under § 412.348. The minimum payment levels for portions of cost reporting periods occurring in FY 1996 are:

- Sole community hospitals (located in either an urban or rural area), 90 percent;
- Urban hospitals with at least 100 beds and a disproportionate share patient percentage of at least 20.2 percent and urban hospitals with at least 100 beds that qualify for disproportionate share payments under § 412.106(c)(2), 80 percent; and,
- All other hospitals, 70 percent.

Under § 412.348(d), the amount of the exceptions payment is determined by comparing the cumulative payments made to the hospital under the capital prospective payment system to the cumulative minimum payment levels applicable to the hospital for each cost reporting period subject to that system. Any amount by which the hospital's cumulative payments exceed its cumulative minimum payment is deducted from the additional payment that would otherwise be payable for a cost reporting period.

New hospitals are exempted from the capital prospective payment system for their first 2 years of operation and are paid 85 percent of their reasonable costs during that period. A new hospital's old capital costs are its allowable costs for capital assets that were put in use for patient care on or before the later of December 31, 1990 or the last day of the hospital's base year cost reporting period, and are subject to the rules pertaining to old capital and obligated capital as of the applicable date. Effective with the third year of operation, we will pay the hospital under either the fully prospective methodology, using the appropriate transition blend in that Federal fiscal year, or the hold-harmless methodology. If the hold-harmless methodology is applicable, the hold-harmless payment for assets in use during the base period would extend for 8 years, even if the hold-harmless payments extend beyond the normal transition period.

IV. Changes for Excluded Hospitals and Units

A. Rate-of-Increase Percentages for Excluded Hospitals and Units

The inpatient operating costs of hospitals and hospital units excluded from the prospective payment system are subject to rate-of-increase limits established under the authority of section 1886(b) of the Act, which is implemented in § 413.40 of the regulations. Under these limits, an annual target amount (expressed in terms of the inpatient operating cost per discharge) is set for each hospital, based on the hospital's own historical cost experience trended forward by the applicable rate-of-increase percentages (update factors). The target amount is multiplied by the number of Medicare discharges in a hospital's cost reporting period, yielding the ceiling on aggregate Medicare inpatient operating costs for the cost reporting period.

Effective with cost reporting periods beginning on or after October 1, 1991, a hospital that has Medicare inpatient operating costs in excess of its ceiling is paid its ceiling plus 50 percent of its costs in excess of the ceiling. Total payment may not exceed 110 percent of the ceiling. A hospital that has inpatient operating costs less than its ceiling will continue to be paid its costs plus the lower of—

- Fifty percent of the difference between the allowable inpatient operating costs and the ceiling; or
- Five percent of the ceiling.

Each hospital's target amount is adjusted annually, at the beginning of its cost reporting period, by an applicable rate-of-increase percentage. Section 13502 of Public Law 103–66 amended section 1886(b)(3)(B) of the Act to provide that for cost reporting periods beginning on or after October 1, 1993 and before October 1, 1994, the applicable rate-of-increase percentage is the market basket percentage increase minus the lesser of one percentage point, or the percentage point difference between 10 percent and the hospital's "update adjustment percentage" except for hospitals with an "update adjustment percentage" of at least 10 percent. The rate-of-increase percentage for hospitals in the latter case will be the market basket percentage increase. The "update adjustment percentage" is the percentage by which a hospital's allowable inpatient operating costs exceeds the hospital's ceiling for the cost reporting period beginning in Federal fiscal year 1990. For cost reporting periods beginning on or after October 1, 1994 and before October 1, 1997, the update adjustment percentage is the update adjustment percentage from the previous year plus the previous year's applicable reduction. The applicable reduction and applicable rate-of-increase percentage are then determined in the same manner as for FY 1994. The most recent forecasted market basket increase for FY 1996 for hospitals and hospital units excluded from the prospective payment system is 3.4 percent.

B. Wage Index Exceptions for Excluded Hospitals and Units

In the August 30, 1991 final rule (56 FR 43232), we set forth our policy for target amount adjustments for significant wage increases. Effective with cost reporting periods beginning on or after April 1, 1990, significant increases in wages since the base period are recognized as a basis for an adjustment in the target amount under § 413.40(g).

To qualify for an adjustment, the excluded hospital or hospital unit must be located in a labor market area for which the average hourly wage increased significantly more than the national average hourly wage between the hospital's base period and the period subject to the ceiling. We use the hospital wage index for prospective payment hospitals to determine the rate of increase in the average hourly wage in the labor market area. For a hospital to qualify for an adjustment, the wage index value for the cost reporting period subject to the ceiling must be at least 8 percent higher than the wage index based on wage survey data collected for the base year cost reporting period. If survey data are not available for one (or both) of the cost reporting periods used in the comparison, the wage index based on the latest available survey data collected before that cost reporting period will be used. For example, to make the comparison between a 1983 base period and a hospital's cost reporting period beginning in FY 1993, we would use the rate of increase between the wage index based on 1982 wage data and the wage index based on the FY 1992 data, since the FY 1992 data are the most recent data that are currently available. Further, the comparison is made without regard to geographic reclassifications made by the MGCRB under sections 1886(d) (8) and (10) of the Act. Therefore, the comparison is made based on the wage index value of the labor market area in which the hospital is actually located.

We determine the amount of the adjustment for wage increases by considering three factors for the time between the base period and the period for which an adjustment is requested: the rate of increase in the hospital's average hourly wage; the rate of increase in the average hourly wage in the labor market area in which the hospital is located; and, the rate of increase in the national average hourly wage for hospital workers. The adjustment is limited to the amount by which the lower of the hospital's or the labor market area's rate of increase in average hourly wages significantly exceeds the national increase (that is, exceeds the national rate of increase by more than 8 percent). For purposes of computing the adjustment, the relative rate of increase in the average hourly wage for the labor market area is assumed to have been the

same over each of the intervening years between the wage surveys.

To determine the rate of increase in the national average hourly wage, we use the average hourly earnings (AHE) component of the wages and salaries portion of the market basket. This measure is derived from the 1982-based market basket since the 1987-based market basket uses the employment cost index (ECI) for hospital workers as the price proxy for this component. Unlike the AHE, the ECI for hospital workers can be measured historically only back to 1986. In addition, the ECI does not adjust for skill-mix shifts and, therefore, measures only the change in wage rates per hour.

The average hourly earnings for hospital workers as measured by the market basket show the following increases:

1992 = 4.8 percent
1993 = 3.7 percent
1994 = 2.8 percent
1995 = 3.4 percent
1996 = 4.3 percent

We note that this section merely provides updated information with respect to areas that would qualify for the wage index adjustment under § 413.30(g). This information was calculated in accordance with established policy and does not reflect any change in that policy. The geographic areas in which the percentage difference in wage indexes was sufficient to qualify for a wage index adjustment are listed in Table 10 of section V of the addendum to this final rule. The table is constructed with old MSAs instead of the revised MSAs effective October 1, 1993 because current adjustment requests are for years prior to FY 1995.

V. Tables

This section contains the tables referred to throughout the preamble to this final rule and in this addendum. For purposes of this final rule, and to avoid confusion, we have retained the designations of Tables 1 through 5 that were first used in the September 1, 1983 initial prospective payment final rule (48 FR 39844). Tables 1a, 1b, 1c, 1d, 3C, 4a, 4b, 4c, 4d, 4e, 5, 6a, 6b, 6c, 6d, 6e, 6f, 6G, 6H, 7A, 7B, 8A, 8B, and 10 are presented below. The tables presented below are as follows:

* Medicare data have been supplemented by data from 19 states for low volume DRGS.

** DRGS 469 and 470 contain cases which could not be assigned to valid DRGS.

Note: Geometric mean is used only to determine payment for transfer cases.

Note: Arithmetic mean is used only to determine payment for outlier cases.

Note: Relative weights are based on Medicare patient data and may not be appropriate for other patients.

690	Erythematosquamous dermatosis	N	9	283, 284
787.9	Other symptoms involving digestive system	N	6	182, 183, 184
989.8	Toxic effect of other substances, chiefly nonmedicinal as to source	N	21	449, 450, 451
997.0	Central nervous system complications	Y	1	34, 35
			15	387, 389
997.9	Complications affecting other specified body systems, not elsewhere classified.	Y	21	452, 453
V12.5	Personal history of diseases of circulatory system	N	23	467
V43.8	Organ or tissue replaced by other means, not elsewhere classified	N	23	467
V59.0	Blood donor	N	23	467

TABLE 6D.—INVALID PROCEDURE CODES

Procedure code	Description	OR	MDC	DRG
33.5	Lung transplant	Y	Pre	495
39.7	Periarterial sympathectomy	Y	5	478, 479
60.2	Transurethral prostatectomy	Y	11	306, 307
			12	336, 337, 476

TABLE 6E.—REVISED DIAGNOSIS CODE TITLES

Diagnosis code	Description	CC	MDC	DRG
441.00	Dissection of aorta, unspecified site	Y	5	121, 130, 131
441.01	Dissection of aorta, thoracic	Y	5	121, 130, 131
441.02	Dissection of aorta, abdominal	Y	5	121, 130, 131
441.03	Dissection of aorta, thoracoabdominal	Y	5	121, 130, 131
560.81	Intestinal or peritoneal adhesions with obstruction (postoperative) (postinfection).	Y	6	180, 181
568.0	Peritoneal adhesions (postoperative) (postinfection)	N	6	188, 189, 190
614.6	Pelvic peritoneal adhesions, female (postoperative) (postinfection)	N	13	358, 359, 369
650	Normal delivery	N	14	370, 371, 372, 373, 374, 375
780.6	Fever	N	18	419, 420, 422
997.4	Digestive system complication	Y	6	188, 189, 190
V52.4	Fitting and adjustment of breast prosthesis and implant	N	23	467
V53.5	Fitting and adjustment of other intestinal appliance	N	6	188, 189, 190
V58.81	Fitting and adjustment of vascular catheter	N	23	465, 466
V67.51	Follow-up examination following completed treatment with high-risk medications, not elsewhere classified.	N	23	467

TABLE 6F.—REVISED PROCEDURE CODE TITLES

Procedure code	Description	OR	MDC	DRG
99.02	Transfusion of previously collected autologous blood	N	....

Appendix A—Regulatory Impact Analysis

I. Introduction

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Secretary certifies that a final rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we consider all hospitals to be small entities.

Also, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis for any final rule that may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 603 of the RFA. With the exception of hospitals located in certain New England counties, for purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 100 beds that is located outside of a Metropolitan Statistical Area (MSAs) or New England County Metropolitan Area (NECMA). Section 601(g) of the Social Security Amendments of 1983 (Public Law 98–21) designated hospitals in certain New England counties as belonging to the adjacent NECMA. Thus, for purposes of the prospective payment system, we classified these hospitals as urban hospitals.

It is clear that the changes discussed in this document will affect both a substantial number of small rural hospitals as well as other classes of hospitals, and the effects on some may be significant. Therefore, the discussion below, in combination with the rest of this final rule, constitutes a combined regulatory impact analysis and regulatory flexibility analysis.

II. Changes in the Final Rule

With respect to the prospective payment system for capital-related costs, the major change in this final rule compared to the proposed rule is our decision not to proceed with the adjustment for capital-related taxes. We discuss the reasons for that decision in section V.B of the preamble to this final rule. With respect to the prospective payment system for operating costs, there are no significant policy changes in this final rule compared to the proposed rule.

Otherwise, the differences in the impact analysis of this final rule compared to that in the proposed rule are the result of using more recent or more complete hospital data. For example, a more complete FY 1994 MedPAR file (June 1995 update) is now available compared to the one available at the time of the proposed rule. In addition, more recent hospital-specific data, including cost reports, are used in this analysis. Finally, the final geographic reclassifications are included.

Our most recent hospital market basket forecast for prospective payment system hospitals, 3.5 percent, is unchanged from that reported in the proposed rule. However, the latest forecast for the excluded hospital market basket has decreased from 3.6 percent to 3.4 percent. Therefore, the applicable update factor for prospective payment hospital operating payments is unchanged from the proposed rule while the update factor for excluded hospitals and units has decreased by 0.2 percentage points from the proposed.

III. Limitations of Our Analysis

As has been the case in previously published regulatory impact analyses, the following quantitative analysis presents the projected effects of our policy changes, as well as statutory changes effective for FY 1996, on various hospital groups. We estimate the effects of each policy change by estimating payments while holding all other payment variables constant. We use the best data available, but we do not attempt to predict behavioral responses to our policy changes, and we do not make adjustments for future changes in such variables as admissions, lengths of stay, or case mix.

We received no comments on the methodology used for the impact analysis in the proposed rule.

IV. Hospitals Included In and Excluded From the Prospective Payment System

The prospective payment systems for hospital inpatient operating and capital-related costs encompass nearly all general, short-term, acute care hospitals that participate in the Medicare program. There were 46 Indian Health Service Hospitals in our database, which we excluded from the analysis due to the special characteristics of the payment method for these hospitals. We also excluded the 49 short-term, acute care hospitals in Maryland from our analysis. These hospitals remain excluded from the prospective payment system under the waiver at section 1814(b)(3) of the Act. (As of January 1, 1995, the hospitals participating in the New York Finger Lakes demonstration project began to be paid under the prospective payment system.) Thus, as of August 1995, just over 5,200 hospitals were receiving prospectively based payments for furnishing inpatient services. This represents about 82 percent of all Medicare-participating hospitals. The majority of this impact analysis focuses on this set of hospitals.

The remaining 18 percent are specialty hospitals that are excluded from the prospective payment system and continue to be paid on the basis of their reasonable costs, subject to a rate-of-increase ceiling on their inpatient operating costs per discharge. These hospitals include psychiatric, rehabilitation, long-term care, children's, and cancer hospitals. The impact on these hospitals of the changes implemented in this final rule is discussed below.

V. Impact on Excluded Hospitals and Units

As of August 1995, just over 1,100 specialty hospitals are excluded from the prospective payment system and are instead paid on a reasonable cost basis subject to the rate-of-increase ceiling under § 413.40. In addition, approximately 2,250 psychiatric and rehabilitation units in hospitals that are subject to the prospective payment system are excluded from the prospective payment system and paid in accordance with § 413.40.

In accordance with section 1886(b)(3)(B)(ii)(V) of the Act, the update factor applicable to the rate-of-increase limit for excluded hospitals and units for FY 1996 is the hospital market basket minus 1.0 percentage point, adjusted to account for the relationship between the hospital's allowable operating cost per case and its target amounts. We are currently projecting an increase in the excluded hospital market basket of 3.4 percent.

The impact on excluded hospitals and units of the proposed update in the rate-of-increase limit depends on the cumulative cost increases experienced by each excluded hospital and excluded unit since its applicable base period. For excluded hospitals and units that have maintained their cost increases at a level below the percentage increases in the rate-of-increase limits since their base period, the major effect will be on the level of incentive payments these hospitals and units receive. Conversely, for excluded hospitals and units with per-case cost increases above the cumulative update in their rate-of-increase limit, the major effect will be the amount of excess costs that the hospitals would have to absorb.

In this context, we note that, under § 413.40(d)(3), an excluded hospital or unit whose costs exceed the rate-of-increase limit may receive the lower of its rate-of-increase ceiling plus 50 percent of reasonable costs in excess of the ceiling, or 110 percent of its ceiling. In addition, under the various provisions set forth in § 413.40, excluded hospitals and units may obtain payment adjustments for significant, yet justifiable, increases in operating costs that exceed the limit. At the same time, however, by generally limiting payment increases, we continue to provide an incentive for excluded hospitals and units to restrain the growth in their spending for patient services.

VI. Impact of Changes In the Operating Prospective Payment System

A. Basis and Methodology of Estimates

In this final rule, we are implementing policy changes and payment rate updates for the prospective payment systems for operating and capital-related costs. We have prepared separate analyses of the changes to each system, beginning with changes to the operating prospective payment system.

The data used in developing the quantitative analyses presented below are taken from the FY 1994 MedPAR file (updated through June 1995) and the most current provider-specific file that is used for payment purposes. Although the analyses of the changes to the operating prospective payment system do not incorporate any actual cost data, the most recently available hospital cost report data were used to create some of the variables by which hospitals are categorized. Our analysis has several qualifications. First, we do not make adjustments for behavioral changes that hospitals may adopt in response to these policy changes. Second, due to the interdependent nature of the prospective payment system, it is very difficult to precisely quantify the impact associated with a given change. Third, we draw upon various sources for the data used to categorize hospitals in the tables. In some cases, particularly the number of beds, there is a fair degree of variation in the data from different sources. We have attempted to construct these variables with the best available source overall. For individual hospitals, however, some miscategorizations are possible.

Using cases in the FY 1994 MedPAR file, we simulated payments under the operating prospective payment system given various combinations of payment parameters. Any short-term, acute care hospitals not paid under the general prospective payment systems (Indian Health Service Hospitals and hospitals in Maryland) are excluded from the simulations. Payments under the capital prospective payment system, or payments for costs other than inpatient operating costs, are not analyzed here. Estimated payment impacts of the FY 1996 changes to the capital prospective payment system are discussed below in section VII of Appendix A.

The changes discussed separately below are the following:

- The effects of the annual reclassification of diagnoses and procedures and the recalibration of the diagnosis-related group (DRG) relative weights required by section 1886(d)(4)(C) of the Act.
- The effects of changes in hospital wage index values reflecting the wage index update.
- The effects of changing the transfer payment policy to a graduated per diem payment methodology.
- The effects of geographic reclassifications by the Medicare Geographic Classification Review Board (MGCRB) that are effective in FY 1996.
- The effects of phasing out payments for extraordinarily lengthy cases (day outlier cases) (with a corresponding increase in payments for extraordinarily costly cases (cost outliers)), in accordance with section 1886(d)(5)(A)(v) of the Act.
- The total change in payments based on FY 1996 policies relative to payments based on FY 1995 policies.

To illustrate the impacts of the FY 1996 changes, our FY 1996 baseline simulation model uses: the FY 1995 GROUPER (version 12.0); the FY 1995 wage indexes; the current uniform per diem transfer payment policy; no effects of FY 1996 reclassifications; and current outlier policy (25 percent phase-out of day outlier payments). Outliers are estimated to be 5.1 percent of total DRG payments.

Each policy change is then added incrementally to this baseline model, finally arriving at an FY 1996 model incorporating all of the changes. This allows us to isolate the effects of each change.

Our final comparison illustrates the percent change in payments per case from FY 1995 to FY 1996. Three factors not displayed in the previous five columns have significant impacts here. First is the update to the standardized amounts. In accordance with section 1886(d)(3)(A)(iv) of the Act, we are updating the large urban and the other areas average standardized amounts for FY 1996 using the most recent forecasted hospital market basket increase for FY 1996 of 3.5 percent, minus 2.0 percentage points. Thus, the update to the large urban and other areas' standardized amounts is 1.5 percent. Similarly, section 1886(b)(3)(C)(ii) of the Act provides that the update factor applicable to the hospital-specific rates for sole community hospitals (SCHs) and essential access community hospitals (EACHs) (which are treated as SCHs for payment purposes) is also the market basket increase minus 2.0 percent, or 1.5 percent.

A second significant factor impacting upon changes in payments per case from FY 1995 to FY 1996 is a change in MGCRB reclassification status from one year to the next. That is, hospitals reclassified in FY 1995 that are no longer reclassified in FY 1996 may have a negative payment impact going from FY 1995 to FY 1996; conversely, hospitals not reclassified in FY 1995 and reclassified in FY 1996 may have a positive payment impact from FY 1995 to FY 1996. In some cases these impacts can be quite substantial, so that a relatively few number of hospitals in a particular category that lost their reclassification status can hold the average percentage change for the category below the mean.

Third, when comparing our estimated FY 1995 payments to FY 1996 payments, another significant consideration is that we currently estimate that actual outlier payments during FY 1995 will be 4.0 percent of actual total DRG payments. When the FY 1995 final rule was published September 1, 1994 (59 FR 45330), we estimated that FY 1995 outlier payments would be 5.1 percent of total DRG payments, and the standardized amounts were reduced correspondingly. The effects of the lower than expected outlier payments during FY 1995 are reflected in the analyses below comparing our current estimates of FY 1995 total payments to estimated FY 1996 payments.

Table I demonstrates the results of our analysis. The table categorizes hospitals by various geographic and special payment consideration groups to illustrate the varying impacts on different types of hospitals. The top row of the table shows the overall impact on the 5,207 hospitals included in the analysis. This is 47 fewer hospitals than were included in the impact analysis in the FY 1995 final rule (59 FR 45496). Data for 106 hospitals that were included in last year's analysis were not available for analysis this year; however, data were available this year for 54 hospitals for which data were not available last year. In addition, 5 hospitals previously excluded from our analysis because they were participating in the Finger Lakes demonstration project are included in our analysis this year because the demonstration authority has expired and these hospitals are now being paid under the prospective payment system.

The next four rows of Table I contain hospitals categorized according to their geographic location (all urbans as well as large urban and other urban or rural). There are 2,942 hospitals located in urban areas (MSAs or NECMAs) included in our analysis. Among these, there are 1,647 hospitals located in large urban areas (populations over 1 million), and 1,295 hospitals in other urban areas (populations of 1 million or fewer). In addition, there are 2,265 hospitals in rural areas. The next two groupings are by bed size categories, shown separately for urban and rural hospitals. The final groupings by geographic location are by census divisions, also shown separately for urban and rural hospitals.

The second part of Table I shows changes in payments based on hospitals' FY 1996 payment classifications, including any reclassifications under section 1886(d)(10) of the Act. For example, the rows labeled urban, large urban, other urban, and rural show the numbers of hospitals being paid based on these categorizations, after consideration of geographic reclassifications, are 3,152; 1,835; 1,317; and 2,055, respectively.

The next three groupings examine the impacts of the changes on hospitals grouped by whether or not they have residency programs (teaching hospitals that receive an indirect medical education (IME) adjustment), receive disproportionate share (DSH) payments, or both. There are 4,135 nonteaching hospitals in our analysis, 841 with fewer than 100 residents, and 231 with 100 or more residents.

In the DSH categories, hospitals are grouped according to their DSH payment status. In the past, we have included as urban hospitals those that are located in a rural area but were reclassified as urban by the MGCRB for purposes of the standardized amount, since they have been considered urban in determining the amount of their DSH adjustment. This year, however, we have isolated these hospitals in separate rows to identify the payment impacts of reclassification solely for DSH. In these rows, labeled "Large Urban and DSH" and "DSH Only," under the heading "Reclassified Rural DSH," we group reclassified rural hospitals that receive DSH after reclassification based on whether they also receive the higher large urban amount, or are only benefitting from reclassification to an other urban area by receiving higher DSH payments. Hospitals in the rural DSH categories, therefore, including those in the rural referral center (RRC) and SCH categories, represent hospitals that were not reclassified for purposes of the standardized amount. They may, however, have been reclassified for purposes of assigning the wage index. The next category groups hospitals paid on the basis of the urban standardized amount in terms of whether they receive the IME adjustment, the DSH adjustment, both, or neither.

The next four rows examine the impacts of the changes on rural hospitals by special payment groups (SCHs, RRCs, and EACHs). Rural hospitals reclassified for FY 1996 for purposes of the standardized amount are not included here.

The RRCs (91), SCH/EACHs (623), and SCH/EACHs and RRCs (39) shown here were not reclassified for purposes of the standardized amount. There are 5 SCH/EACHs included in our analysis and 4 EACH/RRCs.

There are 7 RRCs and 12 SCHs that will be reclassified for the standardized amount in FY 1996 and are therefore not included in these rows. In addition, two hospitals that are SCH/RRCs will be reclassified for the standardized amount (one of these hospitals will also be reclassified for the wage index).

The next two groupings are based on type of ownership and the hospital's Medicare utilization expressed as a percent of total patient days. These data are taken from the FY 1993 Medicare cost report files, the latest available. Data needed to calculate Medicare utilization percentages were unavailable for 122 hospitals. For the most part, these are either new hospitals or hospitals filing manual cost reports that are not yet entered into the data base.

The next series of groupings concern the geographic reclassication status of hospitals. The first three groupings display hospitals that were reclassified by the MGCRB for either FY 1995 or FY 1996, or for both years, by urban/rural status. The next rows illustrate the overall number of reclassifications, as well as the numbers of reclassified hospitals grouped by urban and rural location. The final row in Table I contains hospitals located in rural counties but deemed to be urban under section 1886(d)(8)(B) of the Act.

[1] Because data necessary to classify some hospitals by category were missing, the total number of hospitals in each category may not equal the national total. Discharge data are from FY 1994, and hospital cost report data are from reporting periods beginning in FY 1992 and FY 1993.

[2] This column displays the payment impacts of the recalibration of the DRG weights, based on FY 1994 MedPAR data and the DRG classification changes, in accordance with section 1886(d)(4)(C) of the Act.

[3] This column shows the payment effects of updating the data used to calculate the wage index with data from the FY 1992 cost reports.

[4] This column displays the payment impacts of revising the per diem methodology for transfer cases from the current flat per diem methodology to a graduated per diem methodology.

[5] Shown here are the combined effects of geographic reclassification by the Medicare Geographic Classification Review Board (MGCRB). The effects shown here demonstrate the FY 1996 payment impacts of going from no reclassifications to the reclassifications scheduled to be in effect for FY 1996. Reclassification for prior years has no bearing on the payment impacts shown here.

[6] This column illustrates the payment impacts of our changes affecting payments for outliers, in accordance with section 1886(d)(5) of the Act.

[7] This column shows changes in payments from FY 1995 to FY 1996. It incorporates all of the changes displayed in columns 1 through 5. It also displays the impacts of the updates to the FY 1996 standardized amounts, changes in hospitals' reclassification status in FY 1996 compared to FY 1995, and the difference in outlier payments from FY 1995 to FY 1996. The sum of the first five columns plus these effects may be slightly different from the percentage changes shown here, due to rounding errors and interactive effects.

B. The Impact of the Changes to the DRG Weights (Column 1)

In column 1 of Table I, we present the combined effects of the revised DRG classification system, and the subsequent recalibration of the DRG weights incorporating these revised DRGs, as discussed in section II of the preamble to this final rule. Section 1886(d)(4)(C)(i) of the Act requires us each year to make appropriate classification changes and to recalibrate the DRG weights in order to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources. The impact of reclassification and recalibration on aggregate payments is required by section 1886(d)(4)(C)(iii) of the Act to be budget neutral.

The first row of Table I shows that the overall effect of these changes is budget neutral. That is, the percentage change when adding the FY 1996 GROUPER (version 13.0) to the FY 1996 baseline is 0.0. As described previously, all of the other payment parameters are held constant for the comparison in column 1, only the version of the GROUPER is different.

Consistent with the minor changes we are making to the FY 1996 GROUPER, the redistributional impacts across hospital groups are very small (an increase of 0.1 for large urban and 0.2 for rural hospitals and a decrease of 0.1 for other urban hospitals). Among other hospital categories, the net effects are positive changes for small and medium-size (up to 200 beds) rural hospitals and slightly positive changes for small (up to 200 beds) urban hospitals.

The largest single effect on any of the hospital categories examined is a 0.5 percent increase for rural hospitals in the Middle Atlantic census division. We note that urban hospitals in this census division also show a positive increase, 0.4 percent. We attribute this to the changes in our methodology for identifying the statistical outliers that are eliminated from the data used to recalibrate the DRG weights (described in section II.C of the preamble to this final rule). In previous recalibrations, we eliminated all cases outside 3.0 standard deviations from the geometric mean of standardized charges per case for each DRG. In the DRG recalibration set forth in this final rule, we eliminated only cases that met both this current criterion and an additional criterion that the cases fall outside 3.0 standard deviations from the geometric mean of standardized charges *per day* for each DRG. Because hospitals in the Middle Atlantic census division have longer lengths of stay (as demonstrated by the impacts of phasing out the day outliers—see the discussion below concerning column 5), they would be likely to have cases that exceed the 3.0 standard deviation threshold for average charges per case but not the per day threshold. Thus, costly cases previously eliminated would be left in the recalibration, thereby influencing the weights of the DRGs to which they are assigned.

We also note that rural hospitals in Puerto Rico experience a 0.4 increase in payments. This is a function of the fact that only five hospitals are included in this category, making it susceptible to the influence of two hospitals whose case-mix index values increased by 0.8 percent.

Rural hospitals overall exhibit a positive effect in column 1. Because rural hospitals send out relatively more transfers, this effect is probably a reflection of the modification in the way we count transfer cases in the recalibration methodology (see section II.C of the preamble to this final rule). A study by the RAND Corporation for HCFA, "An Evaluation of Medicare Payments for Transfer Cases" (Contract Number 500–92–0023), identified 10 DRGs that account for more than half of all transfer cases. These DRGs experience, on average, almost an 8 percent increase in their relative weights under the recalibration, which contributes to the increases experienced by rural hospitals and select urban hospitals. In comparison, the average absolute change in the weights of all DRGs from FY 1994 to FY 1995 is approximately 1 percent.

C. The Impact of Updating the Wage Data (Column 2)

Section 1886(d)(3)(E) of the Act requires that, beginning October 1, 1993, we annually update the wage data used to calculate the wage index. In accordance with this requirement, the wage index for FY 1996 is based on data submitted for hospital cost reporting periods beginning on or after October 1, 1991 and before October 1, 1992. As with the previous column, the impact of the new data on hospital payments is isolated by holding the other payment parameters constant in the two simulations. That is, column 2 shows the percentage changes in payments when going from our FY 1996 baseline—using the FY 1995 wage index (based on 1991 wage data) before geographic reclassifications and incorporating the FY 1996 GROUPER—to a model substituting the FY 1996 prereclassification wage index (based on FY 1992 data).

Section 1886(d)(3)(E) of the Act also requires that any updates or adjustments to the wage index be made in a manner that ensures that aggregate payments to hospitals are not affected by the change in the wage index. To comply with the requirements that the DRG and wage index changes must be implemented in a budget neutral manner, we compute a budget neutrality adjustment factor to apply to the standardized amounts. For the FY 1996 standardized amounts, this adjustment factor is 0.999306. This factor is applied to the standardized amounts reflected in this column to ensure that the overall effect of the wage index changes are budget neutral.

The results indicate that the new wage data do not have a significant overall impact on urban and rural hospitals. Virtually all prospective payment system hospitals (94 percent) would experience a change in their wage index of less than 5 percent. This column demonstrates that hospitals with significant changes in their wage indexes are not concentrated within any particular hospital group. For FY 1996, some of the largest changes are evident among both urban and rural hospitals grouped by census division. More census divisions experience payment increases, of greater magnitude, for rural hospitals than for urban hospitals. With the exception of urban Puerto Rico, all payments change by less than 1.0 percent. Although a degree of variation across census categories is evident in this column, our review of the wage data (as described below) indicates that most of the significant changes were attributable to improved reporting.

Besides urban Puerto Rico, the greatest increases are for rural hospitals in the East South Central division, 0.8 percent, and urban hospitals in West South Central, 0.7 percent. The greatest decreases are 0.7 and 0.6 percent for urban hospitals in the West North Central and Middle Atlantic regions, respectively, as well as 0.6 percent for rural Puerto Rico. This effect contributes to the 0.4 percent decline among major teaching hospitals—New York City's wage index falls by nearly 2.0 percent. The Middle Atlantic region also experiences a payment decrease of 0.5 percent for its rural hospitals. The Pacific region experiences an increase in payments to both urban and rural hospitals, with increases of 0.4 and 0.6 percent, respectively. The most dramatic shift occurs in urban Puerto Rico, where payments increase 2.7 percent. Of the six urban areas in Puerto Rico, five experience large increases in wage while only one experiences a slight decline. We note that while rural Puerto Rico had a decrease of 6.9 percent in the impact for the proposed rule, better reporting of data has greatly improved the rural Puerto Rico wage index values so the decrease is only 0.6 percent in the impact analysis for this final rule.

The FY 1996 wage index represents the third annual update to the wage data, and continues to include salaries, fringe benefits, home office salaries, and certain contract labor salaries. In the past, updates to the wage data have resulted in significant payment shifts among hospitals. Since the wage index is now updated annually and there are no changes to the types of costs included in the wage index data, we expect these payment fluctuations will be minimized.

Based on the FY 1996 wage index calculation (after reclassifications under sections 1886(d)(8)(B) and 1886(d)(10) of the Act) compared to the FY 1995 wage index, there are more labor markets that experience an increase of 5 percent or more in their wage index values, and fewer labor markets that experience a significant decrease of 5 percent or more. We reviewed the data for any area that experiences a wage index change of 10 percent or more to determine the reason for the fluctuation. When necessary, we contacted the intermediaries to determine the validity of the data or to obtain an explanation for the change. The following chart compares the shifts in wage index values (after reclassifications) for labor markets for FY 1996 with those experienced as a result of last year's wage index update.

Percentage change in area wage index values	Number of labor market areas	
	FY 1996	FY 1995
Increase more than 10 percent	10	5
Increase between 5 and 10 percent	21	17
Decrease between 5 and 10 percent	6	13
Decrease more than 10 percent	0	10

Under the FY 1996 wage index, 92.7 percent of rural prospective payment hospitals and 95.0 percent of urban hospitals experience a change in their wage index value of less than 5.0 percent. Approximately 3.4 percent (2.1 percent of rural hospitals and 4.4 percent of urban hospitals) experience a change of between 5 and 10 percent, and 2.6 percent (5.3 percent of rural hospitals and 0.6 percent of urban hospitals) experience a change of more than 10 percent. The following chart shows the projected impact for urban and rural hospitals.

Percentage change in area wage index values	Percent of hospitals (by urban/rural)	
	Rural	Urban
Decrease more than 10 percent	1.5	0.1
Decrease between 5 and 10 percent	1.1	1.6
Change between −5 and +5 percent	92.7	95.0
Increase between 5 and 10 percent	1.0	2.8
Increase more than 10 percent	3.8	0.5

D. Transfer Changes (Column 3)

Column 3 of Table I shows the impacts of the change we are implementing in transfer payment policy. This change revises our methodology for payment for transfer cases under the prospective payment system to more appropriately compensate transferring hospitals for the higher costs they incur, on average, on the first day of a hospital stay prior to transfer. Our previous transfer policy paid a flat per diem amount for each day prior to transfer up to the full DRG amount. The per diem was calculated by dividing the full DRG amount by the geometric mean length of stay for that DRG. We are replacing this flat per diem methodology with a graduated methodology that pays twice the per diem amount for the first day, and the per diem amount for each day beyond the first up to the full DRG amount.

The payment impacts shown in column 3 illustrate the effects of this change, relative to the baseline simulation based on previous policy (a flat per diem transfer payment methodology). In order to simulate the effects of the changes, it was first necessary to identify current transfer cases. Current transfers are identifiable by the discharge destination code on the patient bill (see the RAND study for a thorough discussion of identifying transfer cases on the MedPAR file).

Next, to determine whether payment would be made under the per diem methodology, we compared the actual length of stay prior to transfer to the geometric mean length of stay for the DRG to which the case is assigned. A full discharge or a transfer case that received the full discharge payment would be counted as 1.0, while, under our current transfer policy, a transfer case that stayed 2 days in a DRG with a geometric mean length of stay of 5 days would count as 0.4 of a discharge, and would be paid 40 percent of the full DRG amount. In this manner, transfer cases are counted only to the extent that the transferring hospital received payment for them. To simulate our change to the per diem payment methodology, we added 1 day to the actual length of stay for transfer cases, thereby replicating paying double the per diem for the first stay and the flat per diem, up to the full DRG amount, for subsequent days.

Finally, we calculated transfer-adjusted case-mix indexes for each hospital. The adjusted case-mix indexes are calculated by summing the transfer-adjusted DRG weights and dividing by the transfer-adjusted number of cases. The transfer-adjusted DRG weights are calculated by multiplying the DRG weight by the lesser of 1 or the fraction of the length of stay for the case divided by the geometric mean length of stay for the DRG. By adjusting the DRG weights, nontransfer cases and transfer cases that have a length of stay at least as long as the geometric mean length of stay will be represented by the full DRG weight, while transfer cases with lengths of stay below the geometric mean length of stay for the DRG will be represented by a lower number, reflective of their payment.

The FY 1996 baseline model reflected in columns 1 and 2 incorporates transfer-adjusted discharges and case-mix indexes based on current policies. That is, cases transferred prior to reaching the geometric mean length of stay received payments based on the flat per diem. In column 3, our model substitutes transfer-adjusted discharges and case-mix indexes that reflect our policy change.

The first row in column 3 shows that the net effect of our change is budget neutral compared to total payments under current transfer policy. As specified in section 109 of the Social Security Act Amendments of 1994 (Pub. L. 103–432), the Secretary is authorized to make adjustments to the standardized amounts so that adjustments to the payment policy for transfer cases do not affect aggregate payments. As described in section II.A.4.a of the Addendum to this final rule, we applied a budget neutrality factor of 0.997575 to the standardized amounts to account for the higher payments going to transfer cases based on our new payment policy.

The distributional effects of these changes are to increase payments to rural hospitals by 0.3 percent and decrease urban hospitals' payments by less than 0.1 percent (the overall change is 0.0 percent). Rural hospitals clearly benefit from the change in transfer payment methodology. RAND found that rural hospitals as a whole transfer 4.5 percent of their patients, compared to 1.7 percent in large urban hospitals and 1.6 percent in other urban hospitals. Therefore, one would expect rural hospitals to benefit from the change in the transfer payment methodology.

The impact on small hospitals is also positive, consistent with RAND's finding that hospitals with fewer than 50 beds transfer 6.1 percent of their cases, and hospitals with 50 to 99 beds transfer 4.9 percent of cases. Rural hospitals with fewer than 50 beds receive a 0.6 percent increase in per case payments, and rural hospitals with 50 to 99 beds receive a 0.4 percent increase. Urban hospitals with fewer than 100 beds experience a 0.3 percent rise in payments. Among rural hospital groups, nonspecial status hospitals benefit by 0.6 percent and hospitals receiving DSH payments that are not SCHs or RRCs receive increases of 0.4 percent for hospitals with 100 or more beds and 0.7 percent for hospitals with fewer than 100 beds.

E. Impacts of MGCRB Reclassifications (Column 4)

By March 30 of each year, the MGCRB makes reclassification decisions that will be effective for the next fiscal year, which begins on October 1. The MGCRB may reclassify a hospital for the purposes of using the other area's standardized amount, wage index value, or both.

To this point, all of the simulation models have assumed hospitals are paid on the basis of their geographic location (with the exception of ongoing policies that provide that certain hospitals receive payments on bases other than where they are geographically located, such as RRCs and hospitals in rural counties that are deemed urban under section 1886(d)(8)(B) of the Act). The changes in column 4 reflect the per case payment impact of moving from this baseline to a simulation incorporating the MGCRB decisions for FY 1996. As noted above, these decisions affect hospitals' standardized amount and wage index area assignments. In addition, hospitals reclassified for the standardized amount also qualify to be treated as urban for purposes of the DSH adjustment.

The FY 1996 standardized payment amounts and wage index values incorporate all of the MGCRB reclassification decisions that will be effective for FY 1996. The wage index values also reflect any decisions made by the HCFA Administrator through the appeals and review process for MGCRB decisions and any reclassification withdrawal requests that were received by the MGCRB. These Administrator decisions and withdrawals may affect the number of reclassified hospitals relative to those shown in the June 2, 1995 proposed rule. They may also determine whether a redesignated hospital receives the wage index of the area to which it is redesignated or a combined wage index that includes the data for both the hospitals already in the area and the redesignated hospitals.

The overall effect of geographic reclassification is required to be budget neutral by section 1886(d)(8)(D) of the Act. Therefore, we applied an adjustment of 0.994011 to ensure that the effects of reclassification are budget neutral. (See section II.A.4.b. of the Addendum to this final rule).

Rural hospitals benefit from geographic reclassification. Their payments rise 2.3 percent, while payments to urban hospitals decline 0.4 percent. Large urban hospitals lose 0.5 percent because, as a group, they have the smallest percentage of hospitals that are reclassified, approximately 4 percent. Enough hospitals in other urban areas are reclassified to limit the decline in payments stemming from the budget neutrality offset to 0.1 percent. Among urban hospitals grouped by bedsize, payments fall between 0.3 and 0.5 percent.

Rural hospitals that reclassify for purposes of the standardized amount and receive DSH payments experience a significant increase in payments as a result of receiving higher DSH payments as urban hospitals. Rural hospitals reclassifying to large urban areas and also receiving DSH receive an 11.1 percent increase in payments. The difference between the large urban standardized amount and the other urban amount is 1.6 percent, and the remainder is due to DSH payments and to any wage index increase that hospitals reclassified for both the wage index and the standardized amount receive.

Rural hospitals reclassifying to other urban areas for purposes of the standardized amount receive an 8.6 percent increase in payments. Since there are no longer separate rural and other urban standardized amounts, this large increase is attributable to the higher DSH payments these 69 hospitals receive as a result of being classified as urban (as well as any increase in their wage index for those hospitals reclassified for both the wage index and standardized amount). Under our revised rules for MGCRB reclassification, these hospitals will no longer be eligible to reclassify solely to receive higher DSH payments effective with reclassifications for FY 1997.

Among rural hospitals designated as RRCs, 57 hospitals are reclassified for the wage index only and experience a 4.9 percent increase in payments overall. This positive impact on RRCs also appears in the category of rural hospitals with 200 or more beds, which have a 5.4 percent increase in payments.

Rural hospitals reclassified for FY 1995 and FY 1996 experience an 8.0 percent increase in payments, the greatest of any group in the category. This may be due to the fact that these hospitals have the most to gain from reclassification and have been reclassified for a period of years. Rural hospitals reclassified for FY 1996 alone experience a 5.6 percent increase in payments. Urban hospitals reclassified for FY 1995 but not FY 1996 experience a 1.8 percent decline in payments overall. This appears to be due to the combined impacts of the budget neutrality adjustment and a number of hospitals in this category that experience a 6 percent drop in their wage index after reclassification. Urban hospitals reclassified for FY 1996 but not for FY 1995 experience a 2.1 percent increase in payments.

The FY 1996 reclassification section of Table I shows the changes in payments per case for all FY 1996 reclassified and nonreclassified hospitals in urban and rural locations for each of the three reclassification categories (standardized amount only, wage index only, or both). It illustrates that the large impact for reclassified rural hospitals is due to reclassifications for both the [illegible]zed amount and the wage ind[illegible]e hospitals receive a 13.1 percent increase. In addition, rural hospitals reclassified for the wage index only receive a 7.9 percent payment increase. The overall impact on reclassified hospitals is to increase their payments per case by an average of 4.7 percent for FY 1996.

The reclassification of hospitals primarily affects payment to nonreclassified hospitals through changes in the wage index and the geographic reclassification budget neutrality adjustment required by section 1886(d)(8)(D) of the Act. Among hospitals that are not reclassified, the overall impact of hospital reclassifications is an average decrease in payments per case of about 0.6 percent, approximately the geographic reclassification budget neutrality factor. Rural nonreclassified hospitals decrease slightly less, experiencing a 0.4 percent decrease. This occurs because the wage index values in some rural areas increase after reclassified hospitals are excluded from the calculation of those values.

The number of reclassifications for the standardized amount, or for both the standardized amount and the wage index, has declined from 496 in FY 1995 to 344 in FY 1996. This is not surprising because the rural standardized amount is now equal to the standardized amount for other urban areas. Some rural hospitals are reclassifying for purposes of the large urban amount, thereby receiving a payment rate even higher than they would receive from the other national amount. Rural hospitals also may be reclassifying for the standardized amount even though they are only eligible to reclassify to an other urban area in order to either meet the lower eligibility requirements for DSH payments, or to receive higher DSH payments. The payment impact upon hospitals reclassified for the standardized amount only, however, is significantly lower than it is for hospitals reclassifying for either the wage index alone, or for both the wage index and the standardized amount.

F. Outlier Changes (Column 5)

Medicare provides extra payment in addition to the regular DRG payment amount for extremely costly or extraordinarily lengthy cases (cost outliers and day outliers, respectively). Section 1886(d)(5)(A)(v) of the Act requires the Secretary to phase out payment for day outliers in 25 percent increments beginning in FY 1995 from FY 1994 day outlier levels. Day outliers in FY 1996 will account for approximately 16 percent of total outlier payments (50 percent of 1994 levels). This reduction in day outlier payments will be offset by an increase in payments for cost outliers. For FY 1996, we are setting the day outlier threshold equal to the geometric mean length of stay for each DRG, plus the lesser of 23 days or 3.0 standard deviations. The marginal cost factor for day outliers will be 44 percent.

The statute also authorizes the Secretary to set a fixed loss per case threshold for cost outliers. For FY 1996, a case will receive cost outlier payments if its costs exceed the DRG amount plus $15,150. We are also maintaining the marginal cost factor for cost outliers at 80 percent.

The payment impacts of these changes are minimal. The largest impacts appear to be related to geographic location in terms of census divisions. Urban hospitals in the Middle Atlantic census division have payment reductions of 0.8 percent per case. Rural Middle Atlantic hospitals have a 0.3 percent decline. In New England, urban hospitals experience decreases of 0.2 percent. Since the changes to outlier policy result in a shift in payments from cases paid as day outliers to cases paid as cost outliers, this indicates that these areas have higher percentages of day outliers. This is consistent with our previous analysis indicating above average impacts related to day outlier policy changes in the northeastern portion of the country. (See the June 4, 1992 proposed rule (57 FR 23824).)

The largest negative impact occurs among hospitals for which we could not determine Medicare utilization rates. This group experiences a 1.2 percent fall in payments per case. The bulk of the decline is attributable to a group of New York hospitals included in this category that experience significant drops in outlier payments.

G. All Changes (Column 6)

Column 6 compares our estimate of payments per case for FY 1996 to our estimate of payments per case in FY 1995. It includes the 1.5 percent update to the standardized amounts and the hospital-specific rates for SCHs and EACHs, and the 1.1 percent lower than estimated outlier payments during FY 1995, as described in the introduction and the Addendum.

A single geographic reclassification budget neutrality factor of 0.994011 was applied to the FY 1996 standardized amounts, compared to the FY 1995 factor of 0.994055. The budget neutrality adjustment factor for the updated wage index and the DRG recalibration is 0.999306, compared to the FY 1995 factor of 0.998050. Although the net effect of these changes is small, they are reflected in the payment differences shown in this column.

There may also be interactive effects among the various factors comprising the payment system that we are not able to isolate. For these reasons, the values in column 6 may not equal the sum of the previous columns plus the other impacts that we are able to identify.

We also note that column 6 includes the impacts of FY 1995 geographic reclassifications compared to the payment impacts of FY 1996 reclassifications. Therefore, the percent changes due to FY 1996 reclassifications shown in column 4 may be offset by the effects of reclassification on hospitals' FY 1995 payments. For example, the impact of MGCRB reclassifications on rural hospitals' FY 1995 payments was a 2.2 percent increase, compared to a 2.3 percent increase for FY 1996. Therefore, the net increase for rural hospitals in FY 1996 payments due to reclassification is 0.1 percent.

The overall payment increase from FY 1995 to FY 1996 for all hospitals is a 2.6 percent increase. This reflects the 0.0 percent net change in total payments due to the changes for FY 1996 shown in columns 1 through 5, the 1.5 percent update for FY 1996, and the 1.1 percent higher outlier payments in FY 1996 compared to FY 1995, as discussed above.

Hospitals in rural areas experience the largest payment increase, a 3.1 percent rise in payments per case over FY 1995. The increase in estimated outlier payments over FY 1995 for rural hospitals is 0.7 percent, below the 1.1 percent difference for all hospitals. As noted above, the net increase for rural hospitals in FY 1996 due to geographic reclassification is 0.1 percent. They also benefit from DRG recalibration, the new wage index, and the change in the transfer payment policy.

Urban hospitals' overall payments increase 2.5 percent. Hospitals in large and other urban areas experience 2.2 percent and 3.0 percent increases, respectively. Both large and other urban hospitals experience 1.1 percent increases in payments for FY 1996 due to the larger outlier payout, plus the 1.5 percent update. In addition, large urban hospitals' 0.5 percent decline due to reclassification is identical to the FY 1995 impact of reclassification, thus the net impact is 0.0. The FY 1995 reclassification impact on other urban hospitals was also 0.0 percent, compared to the 0.1 percent decline in column 4 of Table I, for a net decrease of 0.1 percent from FY 1995 to FY 1996.

Among urban bed size groups, column 6 shows changes in payments are higher for the smallest urban hospitals compared to larger urban hospitals. The relatively smaller increases for the larger urban hospitals appears to be due to the negative impacts of the new wage data, as shown in column 2, and to the new transfer policy (column 4). Among rural bed size groups the impacts are less varied, ranging from 2.6 percent to 3.4 percent.

Two census divisions are well below the average payment increase: urban Middle Atlantic and urban West North Central (both increase less than 2.0 percent). The reason for the relatively small increase for urban hospitals in the Middle Atlantic is that they have sizeable negative impacts due to the new wage data and the phase-out of day outliers. Urban hospitals in the West North Central division also experience a negative impact from the new wage data.

Conversely, rural New England hospitals experience a 3.8 percent increase, and urban West South Central hospitals see a 3.7 percent payment increase. By far the largest increase among all of the census divisions is in urban Puerto Rico, with a 5.5 percent increase. This large increase is primarily attributable to the effects of the new wage data, as discussed above.

The only hospital groups with negative payment impacts from FY 1995 to FY 1996 are hospitals that were reclassified for FY 1995 and are not reclassified for FY 1996. Overall, these hospitals lose 0.7 percent, with 112 urban hospitals in this category losing 0.4 percent and 172 rural hospitals losing 1.5 percent. On the other hand, hospitals reclassified for FY 1996 that were not reclassified for FY 1995 would experience the greatest payment increase: 7.7 percent for 31 urban hospitals in this category and 9.0 percent for 116 rural hospitals.

Reclassification appears to be a significant factor influencing the payment increases for a number of rural hospital groups with above average overall payment increases in column 6. For example, among hospital groups identified in the discussion of the impacts of MGCRB reclassifications for FY 1996 (column 4), almost all have overall increases of 3.0 or greater. This outcome highlights the redistributive effects of reclassification decisions upon hospital payments. This impact is illustrated even more clearly when one examines the rows categorizing hospitals by their reclassification status for FY 1996. All nonreclassified hospitals have an average payment increase of 2.4 percent. The average

payment increase for all reclassified hospitals is 4.0 percent.

Major teaching hospitals with 100 or more residents have a payment increase of only 1.8 percent. This is attributable to the combined negative impacts of the new wage data, reclassification, and the continued phase-out of day outliers. As discussed above, teaching hospitals located in New York City account for much of this impact. (They also account for much of the below average increase for hospitals for which we do not have Medicare utilization data (1.7 percent increase), along with several Puerto Rico hospitals.)

Finally, among hospitals that are SCH/EACHs, and those that are both SCH/EACH and RRCs, the payment increase is 2.2 percent. The primary reason for this below average increase is the minimal impact upon these hospitals of the higher FY 1996 outlier payments. Because these hospital groups receive their hospital-specific rate if it exceeds the applicable Federal amount (including outliers), there is less of an impact due to changes in outlier payment levels, which are not applied to the hospital-specific rate.

[1] These payment amounts per case do not reflect any estimates of annual case mix increase.

Table II presents the projected average payments per case under the changes for FY 1996 for urban and rural hospitals and for the different categories of hospitals shown in Table I. It compares the projected payments per case for FY 1996 with the average estimated per case payments for FY 1995. Thus, this table presents, in terms of the average dollar amounts paid per discharge, the combined effects of the changes presented in Table I. The percentage changes shown in the last column of Table II equal the percentage changes in average payments from column 6 of Table I.

VII. Impact of Changes in the Capital Prospective Payment System

A. General Considerations

We now have data that were unavailable for analyzing the impact changes in the capital prospective payment system for previous fiscal years. Specifically, we have cost report data for the second year of the capital prospective payment system (cost reports beginning in FY 1993) available through the June 1995 update of the Hospital Cost Report Information System (HCRIS). We also have information on the projected aggregate amount of obligated capital approved by the fiscal intermediaries. However, our impact analysis of payment changes for capital-related costs is still limited by the lack of hospital-specific data on several items. These are the hospital's projected new capital costs for each year, its projected old capital costs for each year, and the actual amounts of obligated capital that will be put in use for patient care and recognized as Medicare old capital costs in each year. The lack of such information affects our impact analysis in the following ways:

- Major investment in hospital capital assets (for example in building and major fixed equipment) occurs at irregular intervals. As a result, there can be significant variation in the growth rates of Medicare capital-related costs per case among hospitals. We do not have the necessary hospital-specific budget data to project the hospital capital growth rate for an individual hospital.
- Moreover, our policy of recognizing certain obligated capital as old capital makes it difficult to project future capital-related costs for individual hospitals. Under § 412.302(c), a hospital is required to notify its intermediary that it has obligated capital by the later of October 1, 1992, or 90 days after the beginning of the hospital's first cost reporting period under the capital prospective payment system. The intermediary must then notify the hospital of its determination whether the criteria for recognition of obligated capital have been met by the later of the end of the hospital's first cost reporting period subject to the capital prospective payment system or 9 months after the receipt of the hospital's notification. The amount that is recognized as old capital is limited to the lesser of the actual allowable costs when the asset is put in use for patient care or the estimated costs of the capital expenditure at the time it was obligated. We have substantial information regarding intermediary determinations of projected aggregate obligated capital amounts. However, we still do not know when these projects will actually be put into use for patient care, the amount that will be recognized as obligated capital when the project is put into use, or the Medicare share of the recognized costs. Therefore, we do not know actual obligated capital commitments to be used in the FY 1996 capital cost projections. We discuss in Appendix B the assumptions and computations we employ to generate the amount of obligated capital commitments for use in the FY 1996 capital cost projections.

In Table III of this appendix, we present the redistributive effects that are expected to occur between "hold-harmless" hospitals and "fully prospective" hospitals in FY 1996. In addition, we have integrated sufficient hospital-specific information into our actuarial model to project the impact of FY 1996 capital payment policies by the standard prospective payment system hospital groupings. We caution that while we now have actual information on the effects of the transition payment methodology and interim payments under the capital prospective payment system and cost report data for most hospitals, we need to randomly generate numbers for the change in old capital costs, new capital costs for each year, and obligated amounts that will be put in use for patient care services and recognized as old capital each year. This means that we continue to be unable to predict accurately an individual hospital's FY 1996 capital costs; however, with the more recent data on the experience to date under the capital prospective payment system, there is adequate information to estimate the aggregate impact on most hospital groupings.

We present the transition payment methodology by hospital grouping in Table IV. In Table V we present the results of the cross-sectional analysis using the results of our actuarial model. This table presents the aggregate impact of the FY 1996 payment policies.

B. Projected Impact Based on the FY 1996 Actuarial Model

1. Assumptions

In this impact analysis, we model dynamically the impact of the capital prospective payment system from FY 1995 to FY 1996 using a capital acquisition model. The FY 1996 model, described in Appendix B of this final rule, integrates actual data from individual hospitals with randomly generated capital cost amounts. We have capital cost data from cost reports beginning in FY 1989 through FY 1993 received through the June 1995 HCRIS update, interim payment data for hospitals already receiving capital prospective payments through PRICER, and data reported by the intermediaries that include the hospital-specific rate determinations that have been made through July 1, 1995 in the Provider-Specific file. We used this data to determine the FY 1996 capital rates. However, we do not have individual hospital data on old capital changes, new capital formation, and actual obligated capital costs. We have data on costs for capital in use in FY 1993, and we age that capital by a formula described in Appendix B. We therefore need to randomly generate only new capital acquisitions for any year after FY 1993. All Federal rate payment parameters are assigned to the applicable hospital.

For purposes of this impact analysis, the FY 1996 actuarial model includes the following assumptions:

- Medicare inpatient capital costs per discharge will increase at the following rates during these periods:

Average Percentage Increase in Capital

Fiscal year	Costs per discharge
1995	4.91
1996	5.03

- The Medicare case-mix index will increase by 1.4 percent in FY 1995 and 0.8 percent in FY 1996.
- The Federal capital rate as well as the hospital-specific rate will be updated by an analytical framework that considers changes in the prices associated with capital-related costs, and adjustments to account for forecast error, changes in the case-mix index, allowable changes in intensity, and other factors. The proposed FY 1996 update factor was 1.50 percent. In this final rule, the FY 1996 update factor is 1.20 percent (see section V.A of the preamble to this final rule).

2. Results

We have used the actuarial model to estimate the change in payment for capital-related costs from FY 1995 to FY 1996. Table III shows the effect of the capital prospective payment system on low capital cost hospitals and high capital cost hospitals. We consider a hospital to be a low capital cost hospital if, based on a comparison of its initial hospital-specific rate and the applicable Federal rate, it will be paid under the fully prospective payment methodology. A high capital cost hospital is a hospital that, based on its initial hospital-specific rate, will be paid under the hold-harmless payment methodology. Based on our actuarial model, the breakdown of hospitals is as follows:

CAPITAL TRANSITION PAYMENT METHODOLOGY

Type of hospital	Percent of hospitals	FY 1996 percent of discharges	FY 1996 percent of capital costs	FY 1996 percent of capital payments
Low Cost Hospital	65	62	51	55
High Cost Hospital	35	38	49	45

A low capital cost hospital may request to have its hospital-specific rate redetermined based on old capital costs in the current year, through the later of the hospital's cost reporting period beginning in FY 1994 or the first cost reporting period beginning after obligated capital comes into use (within the limits established in § 412.302(e) for putting obligated capital in use for patient care). If the redetermined hospital-specific rate is greater than the adjusted Federal rate, these hospitals will be paid under the hold-harmless payment methodology. Regardless of whether the hospital became a hold-harmless payment hospital as a result of a redetermination, we have continued to show these hospitals as low capital cost hospitals in Table III.

Assuming no behavioral changes in capital expenditures, Table III displays the percentage change in payments from FY 1995 to FY 1996 using the above described actuarial model.

TABLE III.—IMPACT OF FINAL RULE CHANGES FOR FY 1996 ON PAYMENTS PER DISCHARGE

[FY 1995 Payments Per Discharge]

	Number of hospitals	Discharges	Adjusted Federal payment	Average Federal percent	Hospital specific payment	Hold harmless payment	Exceptions payment	Total payment
Low Cost Hospitals	3,400	6,602,508	$259.45	43.00	$195.17	$45.18	$14.62	$514.42

[FY 1996 Payments Per Discharge]

	Number of hospitals	Discharges	Adjusted Federal payment	Average Federal percent	Hospital specific payment	Hold harmless payment	Exceptions payment	Total payment	Percent change
Low Cost Hospitals	3,400	6,602,508	$401.00	53.74	$198.52	$33.50	$12.90	$645.93	25.56
Fully Prospective	1,703	3,344,802	371.28	50.00	234.90		5.11	611.29	28.50
Rebase—Fully Prosp.	1,352	2,385,894	370.33	50.00	220.06		26.10	616.49	26.17
Rebase—100% Fed Rate	214	594,762	791.33	100.00			7.35	799.08	21.54
Rebase—Hold Harmless	131	277,050	185.05	24.97		798.45	5.31	988.81	22.52
High Cost Hospitals	1,797	4,116,329	577.66	74.25		277.19	2.86	857.71	15.02
100% Federal Rate	1,027	2,631,255	783.04	100.00			0.48	783.52	20.40
Hold Harmless	770	1,485,074	213.78	27.80		768.33	7.07	989.18	21.38
Total Hospitals	5,197	10,718,837	468.84	61.82	122.28	127.09	9.05	727.26	20.56

Under section 1886(g)(1)(A) of the Act, estimated aggregate payments under the capital prospective payment system for FY 1992 through 1995 respectively, were to equal 90 percent of estimated payments that would have been payable on a reasonable cost basis in each year. With the expiration of the capital budget neutrality provision, we

estimate that there will be an aggregate 20.56 percent increase in FY 1996 Medicare capital payments over the FY 1995 payments.

We project that low capital cost hospitals will experience an average increase in payments per case of 25.56 percent, and high capital cost hospitals will experience an average increase of 15.02 percent.

For hospitals paid under the fully prospective payment methodology, the Federal rate payment percentage will increase from 40 percent to 50 percent and the hospital-specific rate payment percentage will decrease from 60 to 50 percent in FY 1996.

The Federal rate payment percentage for a hospital paid under the hold-harmless payment methodology is based on the hospital's ratio of new capital costs to total capital costs. The average Federal rate payment percentage for hospitals receiving a hold-harmless payment for old capital will increase from 23.40 percent to 27.80 percent.

Despite the reduction in the hospital-specific rate blend percentage from 60 percent in FY 1995 to 50 percent in FY 1996, we expect that the average hospital-specific rate payment per discharge will increase from $120.22 in FY 1995 to $122.28 in FY 1996. This is due to the large increase (21.10 percent) in the FY 1996 hospital-specific rate compared to FY 1995.

We proposed no changes in our exceptions policies for FY 1996. As a result, the minimum payment levels will be:

- 90 percent for sole community hospitals;
- 80 percent for urban hospitals with 100 or beds and a disproportionate share patient percentage of 20.2 percent or more; or,
- 70 percent for all other hospitals.

We estimate that exceptions payments will decrease from 1.71 percent of total capital payments in FY 1995 to 1.24 percent of payments in FY 1996. This is due to the large increase in the rates—as rate-based payments increase, exceptions payments decrease. The projected distribution of the payments is shown in the table below:

ESTIMATED FY 1996 EXCEPTIONS PAYMENTS

Type of hospital	No. of hospitals	Percent of exceptions payments
Low Capital Cost	217	88
High Capital Cost	118	12
Total	335	100

C. Cross-Sectional Comparison of Capital Prospective Payment Methodologies

Table IV presents a cross-sectional summary of hospital groupings by capital prospective payment methodology. This distribution is generated by our actuarial model.

Over 65	1,245	13.9	18.7	67.4

As we explain in Appendix B, we were not able to determine a hospital-specific rate for 10 of the 5,207 hospitals in our data base. Consequently, the payment methodology distribution is based on 5,197 hospitals. This data should be fully representative of the payment methodologies that will be applicable to hospitals.

The cross-sectional distribution of hospital by payment methodology is presented by: (1) geographic location, (2) region, and (3) payment classification. This provides an indication of the percentage of hospitals within a particular hospital grouping that will be paid under the fully prospective payment methodology and under the hold-harmless methodology.

The percentage of hospitals paid fully Federal (100 percent of Federal rate) is expected to increase to 23.9 percent in FY 1996. As noted above, these hospitals constitute approximately 58 percent of all hold-harmless hospitals. In comparison, only 16.6 percent of hospitals were paid fully Federal in FY 1995, representing only about 39 percent of all hold-harmless hospitals. The cause of this increase is the expiration of the budget neutrality provision, which resulted in a large rate increase in the capital Federal rate. Due to the increase in the Federal rate, more hold-harmless hospitals will fare better under the fully Federal payment method.

Table IV indicates that 58.8 percent of hospitals are paid under the fully prospective payment methodology. (This figure, unlike the figure of 65 percent for low cost capital hospitals in the previous section, takes account of the effects of redeterminations. In other words, this figure does not include low cost hospitals that, following a hospital-specific rate redetermination, are now paid under the hold-harmless methodology.) As expected, a relatively higher percentage of rural and governmental hospitals (72.4 percent and 74.0 percent, respectively by payment classification) are being paid under the fully prospective methodology. This is a reflection of their lower than average capital costs per case. In contrast, only 30.4 percent of proprietary hospitals are being paid under the fully prospective methodology. This is a reflection of their higher than average capital costs per case. (We found at the time of the August 30, 1991 final rule (56 FR 43430) that 62.7 percent of proprietary hospitals had a capital cost per case above the national average cost per case.)

D. Cross-Sectional Analysis of Changes in Aggregate Payments

We used our FY 1996 actuarial model to estimate the potential impact of our changes for FY 1996 on total capital payments per case, using a universe of 5,197 hospitals. The individual hospital payment parameters are taken from the best available data, including: the July 1, 1995 update to the Provider-Specific file, cost report data, and audit information supplied by intermediaries. Table V presents estimates of payments per case for FY 1995 and FY 1996 (columns 2 and 3). Column 4 shows the total percentage change in payments from FY 1995 to FY 1996. Column 5 presents the percentage change in payments that can be attributed to Federal rate changes alone.

Federal rate changes represented in Column 5 include the 22.6 percent increase in the Federal rate, a 0.8 percent increase in case mix, changes in the adjustments to the Federal rate (for example, the effect of the new hospital wage index on the geographic adjustment factor), and reclassifications by the Medicare Geographic Classification Review Board. Column 4 includes the effects of the Federal rate changes represented in column 3. Column 4 also includes the effects of all other changes. Those other changes include: the change from 40 percent to 50 percent in the portion of the Federal rate for fully prospective hospitals, the hospital-specific rate update, changes in the proportion of new to total capital for hold-harmless hospitals, changes in old capital (for example, obligated capital put in use), hospital-specific rate redeterminations, and exceptions. The comparisons are provided by: (1) geographic location and (2) payment classification and payment region.

The simulation results show that, on average, capital payments per case can be expected to increase 20.6 percent in FY 1996. The results show that the effect of the Federal rate changes alone is to increase payments by 11.7 percent. In addition to the increase attributable to the Federal rate changes, an 8.9 percent increase is attributable to the effects of all other changes.

Our comparison by geographic location shows that urban hospitals will gain slightly less than rural hospitals from the final rule changes (rates of increase of 20.4 percent and 21.6 percent, respectively). Urban hospitals will gain at approximately the same rate as rural hospitals (11.7 and 11.6 percent) from the Federal rate changes. Urban hospitals will gain slightly less than rural hospitals (8.7 percent compared to 10.0 percent) from the effects of all other changes.

By region, there is relatively little variation compared to some previous years. All regions are estimated to receive large increases in total capital payments per case, due to the expiration of the budget neutrality provision. Increases by region vary from a low of 15.3 and 16.0 percent (rural Mountain and urban East South Central regions respectively) to a high of 26.1 and 25.9 percent (rural hospitals of the New England and Middle Atlantic regions respectively).

By type of ownership, proprietary hospitals are projected to have the lowest rate of increase (16.7 percent, of which 11.7 percent is due to Federal rate changes and 5.0 percent to the effects of all other changes). In our proposed rule, proprietary hospitals had the highest rate of increase. We believe that one factor contributing to the higher estimated rate of increase for proprietary hospitals in the proposed rule was the treatment of tax costs. Proportionately more proprietary hospitals are subject to capital-related taxes than other categories of hospitals. Proprietary hospitals experience the same rate of increase attributable to Federal rate changes as all other hospitals (11.7 percent). Since this final rule does not incorporate the proposed adjustment to the Federal rate for capital-related taxes, the estimated rate of increase for proprietary hospitals is lower than that in the proposed rule. Payments to voluntary hospitals will increase 21.0 percent (11.6 percent due to the Federal rate changes and 9.4 percent due to the effects of all other changes) and payments to government hospitals will increase 21.5 percent (12.3 percent due to Federal rate changes and 9.2 percent due to the effects of all other changes).

Section 1886(d)(10) of the Act established the Medicare Geographic Classification Review Board (MGCRB). Hospitals may apply for reclassification for purposes of the wage index, standardized amount, or both. Although the Federal capital rate is not affected, a hospital's geographic classification for purposes of the operating standardized amount does affect a hospital's capital payments as a result of the large urban adjustment factor and the disproportionate share adjustment for urban hospitals with 100 or more beds. Reclassification for wage index purposes affects the geographic adjustment factor since that factor is constructed from the hospital wage index.

To present the effects of reclassification on the hospitals being reclassified for FY 1996 compared to the effects of reclassification for FY 1995, we show the average payment percentage increase for hospitals reclassified in each fiscal year and in total. For FY 1996 reclassifications, we indicate those hospitals reclassified for standardized amount purposes only, for wage index purposes only, and for both purposes. The reclassified groups are compared to all other nonreclassified hospitals. These categories are further identified by urban and rural designation.

As a whole, hospitals reclassified during FY 1996 are projected to experience a 22.5 percent increase in payments (12.2 percent attributable to Federal rate changes and 10.3 percent attributable to the effects of all other changes). Nonreclassified hospitals will gain less (20.3 percent) than reclassified hospitals (22.5 percent) overall. Nonreclassified hospitals will gain slightly less than reclassified hospitals from the Federal rate changes (11.6 percent compared to 12.2 percent); they will also gain slightly less from the effects of all other changes (8.7 percent compared to 10.3 percent).

In the proposed rule, Table V included two additional categories of hospitals, according to whether they paid property taxes. We showed these two additional categories of hospitals because of the expected differences in the impact on each category of hospital of our proposed changes with regard to capital-related taxes. Since we are not implementing the proposed change concerning capital-related taxes, we are not showing these categories of hospitals in Table V of this final rule.

TABLE V.—COMPARISON OF TOTAL PAYMENTS PER CASE

[FY 1995 Payments Compared to FY 1996 Payments]

	Number of hospitals	Average FY 1995 payments/case	Average FY 1996 payments/case	All changes	Portion attributable to Federal rate change
By Geographic Location					
All hospitals	5,197	603	727	20.6	11.7
Large urban areas (populations over 1 million)	1,640	690	835	21.1	12.0
Other urban areas (populations of 1 million or fewer)	1,294	605	721	19.3	11.2
Rural areas	2,263	396	482	21.6	11.6
Urban hospitals	2,934	654	787	20.4	11.7
0–99 beds	749	501	596	18.9	10.6
100–199 beds	923	597	709	18.8	11.1
200–299 beds	595	615	739	20.2	12.1
300–499 beds	489	668	810	21.1	12.0
500 or more beds	178	806	978	21.4	11.5
Rural hospitals	2,263	396	482	21.6	11.6
0–49 beds	1,177	298	373	25.4	12.0
50–99 beds	665	362	440	21.7	11.9
100–149 beds	227	429	517	20.4	12.1
150–199 beds	109	429	520	21.1	10.7
200 or more beds	85	510	616	20.7	11.1
By Region					
Urban by Region	2,934	654	787	20.4	11.7
New England	163	633	778	22.8	12.9

Over 65	1,245	500	600	20.2	11.9

Appendix B—Technical Appendix on the Capital Acquisition Model and Required Adjustments

Section 1886(g)(1)(A) of the Act requires that for FY 1992 through FY 1995 aggregate prospective payments for operating costs under section 1886(d) of the Act and prospective payments for capital costs under section 1886(g) of the Act be reduced each year in a manner that results in a 10 percent reduction of the amount that would have been payable on a reasonable cost basis for capital-related costs in that year. To implement this requirement, we developed the capital acquisition model to determine the budget neutrality adjustment factor. Even though the budget neutrality requirement expires effective with FY 1996, we must continue to determine the recalibration and geographic reclassification budget neutrality adjustment factor, and the reduction in the Federal and hospital-specific rates for exceptions payments. We continue to use the capital acquisition model to determine these factors.

The following data are used in the capital acquisition model: the June 1995 update of the PPS–IX (cost reporting periods beginning in FY 1992) and PPS–X (cost reporting periods beginning in FY 1993) cost reports, the July 1, 1995 update of the provider-specific file, and the March 1994 update of the intermediary audit file. The available data still lack certain items that were required for the determination of budget neutrality, including each hospital's projected new capital costs for each year, its projected old capital costs for each year, and the projected obligated capital amounts that will be put in use for patient care services and recognized as old capital each year.

Since hospitals under alternative payment system waivers (that is, hospitals in Maryland) are currently excluded from the capital prospective payment system, we excluded these hospitals from our model.

We then developed FY 1992, FY 1993, FY 1994, and FY 1995 hospital-specific rates using the provider-specific file, the intermediary audit file, and when available, cost reports. (We used the cumulative provider-specific file, which includes all updates to each hospital's records, and chose the latest record for each fiscal year.) We checked the consistency between the provider-specific file and the intermediary audit file. We also ensured that the FY 1993 increase in the hospital-specific rate was at least 0.62 percent (the net FY 1993 update), that the FY 1994 hospital-specific rate was at least as large as the FY 1993 hospital-specific rate decreased by 2.16 percent (the net FY 1994 update), and that the FY 1995 increase in the hospital-specific rate was at least 0.05 percent (the net FY 1995 update). We were able to match hospitals to the files as shown in the following table.

Source	Number of hospitals
Provider-Specific File Only	97
Provider-Specific and Audit File	5109
Neither File	1
Total	5207

Seventy-one of these hospitals had unusable or missing data. We were able to backfill a hospital-specific rate for 61 of these hospitals from the cost reports as shown in the following table.

Source	Number of hospitals
PPS–V Cost Reports	3
PPS–VII Cost Reports	2
PPS–VIII Cost Reports	1
PPS–IX Cost Reports	9
PPS–X Cost Reports	21

Source	Number of hospitals
PPS–XI Cost Reports	25
Total	61

We did not have data for 10 hospitals, and had to eliminate them from the capital analysis. These hospitals likely are new hospitals or hospitals with very few Medicare admissions. This leaves us with 5197 hospitals and should not affect the precision of the required adjustment factors.

Next, we determined old and new capital amounts for FY 1992 using the PPS–IX cost reports as the first source of data. For FY 1993 we used PPS–IX and PPS–X cost reports as the first source of data, weighting each cost report by the number of days in FY 1993. We were able to match 5,125 PPS–IX cost reports and 5,090 PPS–X cost reports. In cases where cost reports could not be matched, we used the provider-specific file for old capital information. Even in cases where a cost report was available, the breakout of old and new capital was not always available. In these cases, we used the old capital amounts and new capital ratios from the provider-specific file. If these were missing, we derived the old capital amount from the hospital-specific rate.

Finally, we used the intermediary audit file to develop obligated capital amounts. Since the obligated amounts are aggregate projected amounts, we computed a Medicare capital cost per admission associated with these amounts. We adjusted the aggregate amounts by the following factors:

(1) Medicare inpatient share of capital. This was derived from cost reports and was limited to the Medicare share of total inpatient days. It was necessary to limit the Medicare share because of data integrity problems. Medicare share of inpatient days is a reasonably good proxy for allocating capital. However, it may be understated if Medicare utilization is high, and may be overstated because it does not reflect the outpatient share of capital.

(2) Capitalization factor. This factor allocates the aggregate amount of obligated capital to depreciation and interest amounts. Consistent with the assumptions in the capital input price index, we used a 25-year life for fixed capital and a 10-year life for movable capital, and an average projected interest rate of 6.7 percent. We also assumed that fixed capital acquisitions are about one-half of total capital. In conjunction with the useful life and interest rate assumptions, the resulting capitalized fixed capital is about one-half of total capitalization. This is consistent with the allocations between fixed and movable capital found on the cost reports. The ratio we developed is 0.137, which produces the first year capitalization based on the aggregate amount.

(3) A divisor of Medicare admissions to derive the capital per discharge amount. Since we must project capital amounts for each hospital, we continued to use a Monte Carlo simulation to develop these amounts. (This model is described in detail in the August 30, 1991 final rule (56 FR 43517).) The Monte Carlo simulation is now used only to project capital costs per discharge amounts for each hospital. We analyzed the distributions of capital increases, and noted a slightly negative correlation between the dollar level of capital cost per admission, and the rate of increase in capital. To determine the rate of increase in capital cost per admission, we multiplied the lesser of $3,000 or the capital cost per admission by .00006 and subtracted this result from 1.2. (Increases for capital levels over $3,000 were not influenced by the level of capital, so this part of the calculation was capped at $3,000.) We selected a random number from the normal distribution, multiplied it by 0.17 (the standard deviation) and added it to −0.04 (the mean) and then added 1 to create a multiplier. This random result was multiplied by the previous result to assign a rate of increase factor which was multiplied by the prior year's capital per discharge amount to develop a capital per discharge amount for the projected year.

To model a projected year, we used the old and new capital for the prior year multiplied by 0.96 (aging factor). The 0.96 aging factor is the average of changes in capital over its life. The aged new and old capital is subtracted from the projected capital described in the previous paragraph. The difference represents newly acquired capital. We assume that the hospital would accrue only a half year of costs for newly acquired capital in the year in which the capital comes on line. This is because, on average, new capital will come on line in the middle of the year. We make the same assumption for obligated capital. If the hospital has obligated capital, the lesser of one half of the adjusted costs (as described in the succeeding paragraph) for newly acquired capital or one half of the costs (for FY 1993, all of the costs) for obligated capital are deemed to apply to the current year. The full year's costs for new or obligated capital are assumed to apply for the following year. For FY 1994, one half of the costs for any outstanding obligated capital were deemed to apply to FY 1994; a full year's costs were deemed to apply to FY 1995. With the exception of certain hospitals about whom we have information to the contrary, we assume that hospitals would meet the expiration dates provided under the obligated capital provision. The on-line obligated amounts are added to old capital and subtracted from the newly acquired capital to yield residual newly acquired capital, which is then added to new capital. The residual newly acquired capital is never permitted to be less than zero.

Next, we computed the average total capital cost per discharge from the capital costs that were generated by the model and compared the results to total capital costs per discharge that we had projected independently of the model. We adjusted the newly acquired capital amounts proportionately, so that the total capital costs per discharge generated by the model match the independently projected capital costs per discharge.

Once each hospital's capital-related costs are generated, the model projects capital payments. We use the actual payment parameters (for example, the case-mix index and the geographic adjustment factor) that are applicable to the specific hospital.

To project capital payments, the model first assigns the applicable payment methodology (fully prospective or hold-harmless) to the hospital. If available, the model uses the payment methodology indicated in the PPS–IX cost reports or the provider-specific file. Otherwise, the model determines the methodology by comparing the hospital's FY 1992 hospital-specific rate to the adjusted Federal rate applicable to the hospital. The model simulates Federal rate payments using the assigned payment parameters and hospital-specific estimated outlier payments. The case-mix index for a hospital is derived from the FY 1994 MedPAR file using the FY 1996 DRG relative weights published in this rule. The case-mix index is increased each year after FY 1994 consistent with the continuing trend in case-mix increase.

We analyzed the case-mix increases for the recent past and found that case-mix increases have decelerated to about 1.53 percent in FY 1992, 0.80 percent in FY 1993, and 0.75 percent in FY 1994. It appears that the case-mix increase for FY 1995 will be around 1.4 percent. It is too early to determine if the FY 1995 increase is a one time event, or if it is the start of an accelerating trend. Because case-mix increases have been

decelerating, we expect future case-mix increases to be moderate. Therefore, in the model we have used a case-mix increase of 1.4 percent in FY 1995 and a projected case-mix increase of 0.8 percent in FY 1996. (Since we are using FY 1994 cases for our analysis, the FY 1994 increase in case mix has no effect on projected capital payments.)

Changes in geographic classification and revisions to the hospital wage data used to establish the hospital wage index affect the geographic adjustment factor. Changes in the DRG classification system and the relative weights affect the case-mix index.

Section 1886(g)(1)(A) of the Act requires that, for discharges occurring after September 30, 1993, the unadjusted standard Federal rate be reduced by 7.4 percent. Consequently, the model reduces the unadjusted standard Federal rate by 7.4 percent effective in FY 1994. Since budget neutrality expires effective with FY 1996, this adjustment affects the Federal rate starting in FY 1996.

The change in the method of paying transfer cases affects total capital payments. We are making the effect of this change budget neutral. To determine the budget neutrality adjustment factor for transfers, we followed the methodology described in section VI.D of Appendix A to this proposed rule. We computed the transfer-adjusted number of discharges and case-mix under the current transfer policy, and the proposed transfer policy for each hospital. We multiplied the corresponding number of discharges and case-mix numbers for each hospital and added all hospitals together. The number computed under the current transfer policy divided by the number computed under the proposed transfer policy yielded the transfer adjustment factor of 0.9972. This adjustment factor is applied to both the hospital-specific rate and the Federal rate.

Section 412.308(c)(4)(ii) requires that the estimated aggregate payments for the fiscal year, based on the Federal rate after any changes resulting from DRG reclassifications and recalibration and the geographic adjustment factor, equal the estimated aggregate payments based on the Federal rate that would have been made without such changes. For FY 1995, the budget neutrality adjustment factor was 1.0031. To determine the factor for FY 1996, we first determined the portion of the Federal rate that would be paid for each hospital in FY 1996 based on its applicable payment methodology. We then compared estimated aggregate Federal rate payments based on the FY 1995 DRG relative weights and FY 1995 geographic adjustment factor to estimated aggregate Federal rate payments based on the FY 1996 relative weights and the FY 1996 geographic adjustment factor. In making the comparison, we held the FY 1996 Federal rate portion constant and set the other budget neutrality adjustment factor and exceptions reduction factor to 1.00. We determined that to achieve budget neutrality for the changes in the geographic adjustment factor and DRG classifications and relative weights, an incremental budget neutrality adjustment of 0.9994 for FY 1996 should be applied to the previous cumulative FY 1995 adjustment of 1.0031 (the product of the FY 1993 incremental adjustment of 0.9980, the FY 1994 incremental adjustment of 1.0053, and the FY 1995 incremental adjustment of 0.9998), yielding a cumulative adjustment of 1.0025 through FY 1996.

The methodology used to determine the recalibration and geographic (DRG/GAF) budget neutrality adjustment factor is similar to that used in establishing budget neutrality adjustments under the prospective payment system for operating costs. One difference is that under the operating prospective payment system, the budget neutrality adjustments for the effect of geographic reclassifications are determined separately from the effects of other changes in the hospital wage index and the DRG weights. Under the capital prospective payment system, there is a single DRG/GAF budget neutrality adjustment factor for changes in the geographic adjustment factor (including geographic reclassification) and the DRG relative weights. In addition, there is no adjustment for the effects that geographic reclassification has on the other payment parameters, such as the payments for serving low income patients or the large urban add-on.

In addition to computing the DRG/GAF budget neutrality adjustment factor, we used the model to simulate total payments under the prospective payment system.

Additional payments under the exceptions process are accounted for through a reduction in the Federal and hospital-specific rates. Therefore, we used the model to calculate estimated exceptions payments and the exceptions reduction factor. This exceptions reduction factor ensures that estimated aggregate payments under the capital prospective payment system, including exceptions payments, equal estimated aggregate payments under the capital prospective payment system without an exceptions process. Since changes in the level of the payment rates change the level of payments under the exceptions process, the exceptions reduction factor must be determined through iteration.

In the August 30, 1991 final rule (56 FR 43517), we indicated that we would publish each year the estimated payment factors generated by the model to determine payments for the next 5 years. The table below provides the actual factors for FY 1992, FY 1993, FY 1994, FY 1995, FY 1996, and the estimated factors that would be applicable through FY 2000. We caution that, except with respect to FY 1992, FY 1993, FY 1994, FY 1995 and FY 1996, these are estimates only, and are subject to revisions resulting from continued methodological refinements, more recent data, and any payment policy changes that may occur. In this regard, we note that in making these projections we have assumed that the cumulative DRG/GAF adjustment factor will remain at 1.0025 for FY 1996 and later because we do not have sufficient information to estimate the change that will occur in the factor for years after FY 1996.

The projections are as follows:

Fiscal year	Update factor	Exceptions reduction factor	Budget neutrality factor	Federal rate (after outlier reduction)
1992	N/A	0.9813	0.9602	415.59
1993	6.07	.9756	.9162	[1] 417.29
1994	3.04	.9485	.8947	[2] 378.34
1995	3.44	.9734	.8432	[3] 376.83
1996	1.20	.9849	N/A	[4] 461.96
1997	1.70	.9822	N/A	468.53
1998	1.90	.9747	N/A	473.78
1999	1.90	.9608	N/A	475.90

Fiscal year	Update factor	Exceptions reduction factor	Budget neutrality factor	Federal rate (after outlier reduction)
2000	1.90	.9406	N/A	474.75

[1] Note: Includes the DRG/GAF adjustment factor of 0.9980 and the change in the outlier adjustment from 0.9497 in FY 1992 to 0.9496 in FY 1993.

[2] Note: Includes the 7.4 percent reduction in the unadjusted standard Federal rate. Also includes the DRG/GAF adjustment factor of 1.0033 and the change in the outlier adjustment from 0.9496 in FY 1993 to 0.9454 in FY 1994.

[3] Note: Includes the DRG/GAF adjustment factor of 1.0031 and the change in the outlier adjustment from 0.9454 in FY 1994 to 0.9414 in FY 1995.

[4] Note: Includes the transfer adjustment of .9972. Also includes the DRG/GAF adjustment factor of 1.0025 and the change in the outlier adjustment from 0.9414 in FY 1995 to 0.9536 in FY 1996. Future adjustments are, for purposes of this projection, assumed to remain at the same level.

Appendix C—Recommendation of Update Factors for Operating Cost Rates of Payment for Inpatient Hospital Services

I. Background

Several provisions of the Social Security Act (the Act) address the setting of update factors for services furnished in FY 1996 by hospitals subject to the prospective payment system and those excluded from the prospective payment system. Section 1886(b)(3)(B)(i)(XI) of the Act sets the FY 1996 percentage increase in the operating cost standardized amounts equal to the rate of increase in the hospital market basket minus 2.0 percentage points for prospective payment hospitals in all areas. Section 1886(b)(3)(B)(iv) of the Act sets the FY 1996 percentage increase to the hospital-specific rate applicable to sole community hospitals equal to the rate set forth in section 1886(b)(3)(B)(i) of the Act, that is, the same update factor as all other hospitals subject to the prospective payment system, or the rate of increase in the market basket minus 2.0 percentage points. Section 1886(b)(3)(B)(ii) of the Act sets the FY 1996 percentage increase in the rate of increase limits for hospitals excluded from the prospective payment system equal to the rate of increase in the excluded hospital market basket minus the applicable reduction or, in the case of a hospital in a fiscal year for which the hospital's update adjustment percentage is at least 10 percent, the excluded hospital market basket percentage increase. Under section 1886(b)(3)(B)(v) of the Act, a hospital's update percentage increase for FY 1996 is the percentage increase by which the hospital's allowable operating costs of inpatient hospital services recognized under this title for the cost reporting period beginning in FY 1990 exceed the hospital's target amount for such cost reporting period, increased for each fiscal year (beginning with FY 1994) by the sum of any of the hospital's applicable reductions for previous years. The applicable reduction with respect to a hospital for FY 1996 is the lesser of 1 percentage point or the percentage point difference between 10 percent and the hospital's update adjustment percentage for FY 1996.

In accordance with section 1886(d)(3)(A) of the Act, we are updating the standardized amounts, the hospital-specific rates, and the rate-of-increase limits for hospitals excluded for the prospective payment system as provided in section 1886(b)(3)(B) of the Act. Based on the second quarter 1995 forecasted market basket increase of 3.5 percent for hospitals subject to the prospective payment system, the updates in the standardized amounts are 1.5 percent for hospitals in both large urban and other areas. The update in the hospital-specific rate applicable to sole community hospitals is 1.5 percent (that is, the market basket rate of increase of 3.5 percent minus 2.0 percentage points). The update for hospitals excluded from the prospective payment system is based on the percentage increase in the excluded hospital market basket (currently estimated at 3.4 percent) minus the applicable reduction factor. The applicable reduction factor is the lesser of 1 percentage point or the percentage point difference between 10 percent and the hospital's update adjustment percentage. Therefore, for excluded hospitals, the hospital-specific update can vary between 2.4 and 3.4 percent.

Sections 1886(e) (2)(A) and (3)(A) of the Act require that the Prospective Payment Assessment Commission (ProPAC) recommend to the Congress by March 1 of each year an update factor that takes into account changes in the market basket rate of increase index, hospital productivity, technological and scientific advances, the quality of health care provided in hospitals, and long-term cost effectiveness in the provision of inpatient hospital services.

Section 1886(e)(4) of the Act requires that the Secretary, taking into consideration the recommendations of ProPAC, recommend update factors for each fiscal year that take into account the amounts necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality. Under section 1886(e)(5) of the Act, we published the FY 1996 update factors recommended pursuant to section 1886(e)(4) of the Act as Appendix D of the June 2, 1995 proposed rule (60 FR 29380).

II. Secretary's Final Recommendations for Updating the Prospective Payment System Standardized Amounts

We received several public comments concerning our proposed recommendations. After consideration of the arguments presented, we have decided that our final recommendation will be the same as our proposed recommendation. That is, we are recommending that the standardized amounts be increased by an amount equal to the market basket rate of increase minus 2.0 percentage points for hospitals located in large urban and other areas. We are also recommending an update of the market basket rate of increase minus 2.0 percentage points to the hospital-specific rate for sole community hospitals. These figures are consistent with the President's budget recommendation.

In recommending these increases, we have followed section 1886(e)(4) of the Act, which requires that we take into account the amounts necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality. In addition, as required by section 1886(e)(4) of the Act, we have taken into consideration the recommendations of ProPAC. We believe our analyses, which measure changes in hospital productivity, scientific and technological advances, practice pattern changes, and changes in case mix, support our recommendations.

Comment: One commenter expressed concern with what appears to be a systematic bias in estimation of the market basket forecast. Because we have overestimated the market basket for several years, the commenter believes that our model is likely to be incorrect in its parameters or methodology and suggested that we continue to revise the model or change the underlying estimation methodology.

Response: We agree with the commenter that there has been a pattern of high forecasts over the past few years in the market basket estimation. We have been working with our contractor during the past year to thoroughly review the forecast equations for the hospital input price indexes. This review produced substantial improvements in both the forecast equations and the processes used to forecast. HCFA and its contractor will closely monitor the future forecasts for accuracy. In this final rule, we present input price indexes that are forecasted using the improved forecast equations.

Comment: We received one comment recommending an adjustment to the market basket for new technologies. The commenter stated that this adjustment would reflect the change in the use of new resources that may increase costs and productivity.

Response: The hospital market basket is an input price index that measures changes in the prices paid for a fixed set of goods and services. We do not believe an adjustment to the market basket for changes resulting from use of new technology is appropriate. Although we do not adjust the hospital market basket for new technology, the update framework accounts for the role of new technologies in two ways. First, we account for cost-increasing, quality-enhancing new technologies in the intensity component of our update recommendation (which is an add-on to the market basket rate of increase). Second, we account for cost-decreasing new technologies through a productivity adjustment. This adjustment allows for those technologies that permit hospitals to treat their patients at lower cost.

Comment: We received two comments strongly urging us to consider how hospital-specific wages and benefits are incorporated into the market basket. They suggest increasing the internal hospital wage and benefit shares to 50 percent.

Response: We responded to a similar comment in detail in the September 4, 1990 final rule (55 FR 36047), when the current hospital market basket was implemented. We prefer to use 100 percent economy-wide proxies for those occupations that are generally employed inside and outside hospitals, such as managers, administrators, clerical, and maintenance workers. We believe that the economy-wide rate of increase is the more appropriate measure for these types of employees, since that is the relevant labor market for these employees. In contrast, we use a 50/50 blend of hospital-industry proxies and economy-wide proxies for professional and technical workers. We believe this is appropriate because the group includes workers, such as registered nurses, that are not hired in large numbers in other sectors of the economy.

Comment: ProPAC's comment stated several concerns about the single intensity adjustment included in HCFA's update framework and believes that each element should be quantified separately.

Response: We continue to disagree with ProPAC that accounting separately for changes in within-DRG complexity, science and technology changes, and practice patterns would be more accurate. In view of the interactive nature of these elements, we believe it is difficult to measure accurately the effects of each element separately. Instead, we believe that it is more appropriate and accurate to account for all three elements in a single measure. Thus, our intensity measure is designed to encompass the net effect of all three changes. With regard to practice pattern changes, which are also reflected in our intensity adjustment, we do not adjust for changes that have not taken place.

Comment: ProPAC questioned HCFA's continued use of projected case-mix change in the update formula instead of actual case-mix change.

Response: Our update analysis takes into account changes in case mix adjusted for changes attributable to improved coding practices and DRG reclassification and recalibration. In the past, we used the observed increase in case mix for the most recent year available. For example, we based our FY 1994 update on the observed increase in case mix from FY 1992. Recent data on case-mix change demonstrates that the growth of case-mix severity has slowed.

The use of projected case mix allows us to take into account emerging trends in case mix more quickly. We note that ProPAC uses an estimate of the total case-mix index in the year prior to the update as part of its update framework. We have decided it is best to use our estimate of what case-mix change will be in the year of the update. This is consistent with the use of the forecasted value of change in the market basket over the coming year.

Comment: ProPAC believes it is inappropriate to adjust the prospective payment amounts separately for case-mix changes that HCFA attributes to reclassification or recalibration, either through changing the weights or the standardized amounts.

Response: We believe that it is appropriate to account for case-mix index changes attributed to reclassification or recalibration within the update framework. This adjustment is determined by comparing the average case weight for the actual cases in a given year based on the DRG relative weights for that year with the average case weight for the same cases based on the DRG relative weights for the previous year. Since the same cases are used on both sides of the comparison, the difference in case-mix index reflects the change in aggregate payments attributable solely to the new GROUPER and relative weights.

III. Secretary's Final Recommendation for Updating the Rate-of-Increase Limits for Excluded Hospitals and Units

Our final recommendation will be that hospitals and hospital units excluded from the prospective payment system receive an update equal to the percentage increase in the market basket that measures input price increases for services furnished by excluded hospitals minus 1.0 percentage point. Thus, given the current estimate of the change in rate of increase in the market basket for excluded hospitals of 3.4 percent (compared with an earlier estimate of 3.6 percent used in the proposed rule), our final recommendation is for an update of 2.4 percent. We note that the updates for hospitals and units excluded from the prospective payment system as set in Public Law 103–66 is the market basket rate of increase minus 1.0 percentage point, adjusted to account for the relationship between the provider's allowable operating cost per case and its target amount.

We received the following comments concerning our proposed recommendation on the update factor for excluded hospitals and hospital units.

Comment: One commenter states that the Secretary provides no explicit framework to support her recommendation beyond what is included in current law. This commenter is concerned about forecasting errors that have resulted in updates that are too high and believes an explicit framework should be used in developing future recommendations. Another commenter recommends that we include an upward adjustment to the market basket rate of increase to account for new technology.

Response: The update for the prospective payment system for inpatient operating costs adjusts the market basket for a number of factors including case mix, productivity and intensity. Currently, in the absence of any adjustment for patient severity, there is no mechanism for determining case mix for excluded hospitals and units. Nevertheless, we will examine the feasibility of establishing a framework for an appropriate rate-of-increase limit for services paid on the basis of reasonable costs. Changes in some factors, such as new services or more resources, may be more appropriately accommodated through the exceptions process. As we study developing an update framework for excluded hospitals and units, we will consider an adjustment for technology, if its impact on hospital costs can be accurately measured.

With regard to forecasting errors, as discussed above, we have been working with our contractor to review and make improvements in hospital input price indices. This review has produced substantial improvements in forecast equations and procedures, and we have implemented these changes in developing the input price indices used in this final rule.

National Emission Standards for Hazardous Air Pollutants for Source Categories; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 9 and 63

[AD-FRL-5273-9]

RIN 2060-AE02

National Emission Standards for Hazardous Air Pollutants for Source Categories: Aerospace Manufacturing and Rework Facilities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: National emission standards for hazardous air pollutants (NESHAP) for aerospace manufacturing and rework facilities were proposed in the **Federal Register** on June 6, 1994. This **Federal Register** action announces the EPA's final decisions on the rule and promulgates the NESHAP for aerospace manufacturing and rework facilities. Aerospace manufacturing and rework operations emit many of the pollutants identified in the Clean Air Act (Act) list of 189 hazardous air pollutants (HAP). The intent of the standards is to protect public health by requiring existing and new major sources to control emissions to the level achievable by the maximum achievable control technology (MACT) consistent with section 112(d) of the Act.

The HAP listed in Section 112(b)(1) emitted by aerospace facilities that would be covered by this final rule include, chromium, cadmium, methylene chloride, toluene, xylene, methyl ethyl ketone, ethylene glycol and glycol ethers. This rule will reduce nationwide emissions of HAP from at least 2,869 major source aerospace manufacturing and rework facilities by approximately 112,600 Mg (123,700 tons).

DATES: This regulation is effective on September 1, 1995. The incorporation by reference of certain publications listed in the regulation is approved by the Office of the Federal Register as of September 1, 1995. See the **SUPPLEMENTARY INFORMATION** section concerning judicial review.

ADDRESSES: *Background Information Document.* The background information document (BID) for the promulgated standards may be obtained from the U.S. Department of Commerce, National Technical Information Service (NTIS), Springfield, Virginia 22161, telephone (703) 487-4650. Please refer to "Hazardous Air Pollutant Emissions from Aerospace Manufacturing and Rework Operations—Background Information for Promulgated Standards" (EPA-453/R-94-036b). The BID contains: (1) a summary of all the public comments made on the proposed standards and the Administrator's responses to the comments, and (2) a summary of the changes made to the standards since proposal.

An electronic version of the promulgation BID as well as this preamble and final rule are available for download from the EPA's Technology Transfer Network (TTN), a network of electronic bulletin boards developed and operated by the Office of Air Quality Planning and Standards. The TTN provides information and technology exchange in various areas of air pollution control. The service is free, except for the cost of a phone call. Dial (919) 541-5742 for data transfer of up to a 14,400 bits per second (bps) modem. If more information on the TTN is needed, contact the systems operator at (919) 541-5384.

Docket. Docket No. A-92-20, containing supporting information used in developing the promulgated standards, is available for public inspection and copying from 8 a.m. to 4 p.m., Monday through Friday, including all non-Government holidays, at the EPA's Air and Radiation Docket and Information Center (formerly known as the Air Docket), Waterside Mall, room M-1500, Ground Floor, 401 M Street, S.W., Washington, DC 20460; telephone (202) 260-7548. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: For general or technical information concerning the standards, contact Ms. Vickie Boothe, Emission Standards Division (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone (919) 541-0164.

SUPPLEMENTARY INFORMATION: Under section 307(b)(1) of the Act, judicial review of NESHAP is available only by filing a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this final rule. Under section 307(b)(2) of the Act, the requirements that are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by the EPA to enforce these requirements. The information presented in this preamble is organized as follows:

I. The Standards
II. Summary of Considerations in Developing the Rule
A. Purpose of Regulation
B. Summary of Impacts
III. Significant Changes to the Proposed Standards
A. Public Participation
B. Comments on the Proposed Standards
C. Significant Changes
IV. Administrative Requirements
A. Docket
B. Paperwork Reduction Act
C. Executive Order 12866
D. Regulatory Flexibility Act
E. Regulatory Review
F. Unfunded Mandate Act

I. The Standards

National emission standards for hazardous air pollutants established under section 112 of the Act must

> reflect the maximum degree of reduction in emissions of the hazardous air pollutants subject to this section (including a prohibition on such emissions, where achievable) that the Administrator, taking into consideration the cost of achieving such emission reduction, and any nonair quality health and environmental impacts and energy requirements, determines is achievable for new or existing sources in the category or subcategory to which such emission standard applies . . . [section 112(d)(2)].

The promulgated standards include multiple alternatives to allow owners or operators maximum compliance flexibility. A summary of the final standards is contained in Table 1.

TABLE 1. SUMMARY OF SUBPART GG OF 40 CFR PART 63—NATIONAL EMISSION STANDARDS FOR AEROSPACE MANUFACTURING AND REWORK FACILITIES

Affected Source and Requirement	Description
Aerospace Facilities	
Applicability:	
General Information	This rule applies to facilities engaged in original equipment manufacture and/or rework of aerospace components and assemblies and that are major sources as defined in 40 CFR part 63. Specific operations are covered by the rule. (63.741)
Estimated Number of Facilities.	Over 2,800 facilities are expected to be affected by the rule. Applicable SIC codes include 3720, 3721, 3724, 3728, 3760, 3761, 3764, 3765, and 4581.

TABLE 1. SUMMARY OF SUBPART GG OF 40 CFR PART 63—NATIONAL EMISSION STANDARDS FOR AEROSPACE MANUFACTURING AND REWORK FACILITIES—Continued

Affected Source and Requirement	Description
Permit Requirements	Major sources required to obtain operating permit in State where facility is located according to procedures in 40 CFR part 70 and applicable State regulations. (63.741(d))
All Affected Sources	
Standards	1. Comply with §63.4 through §63.6 of the General Provisions of 40 CFR part 63, subpart A.[a] (63.743(a)) 2. Submit an operation and maintenance plan, except for new sources or filter systems operated per manufacturer's instructions. (63.743(b)) 3. Obtain approval to use control device not listed in this subpart. (63.743(c))
Compliance Dates	As provided for in the General Provisions, within 3 years after the effective date for existing sources and no later than the standards' effective date or upon startup, as appropriate, for new and reconstructed sources. (63.749(a))
Test Methods and Procedures.	See individual affected sources. Also, comply with §63.7 of the General Provisions. (63.750(o))
Monitoring Requirements	See individual affected sources. Also, generally same as in §63.8(f) and (g) of the General Provisions. (63.751(e) and (f))
Recordkeeping Requirements.	Comply with parts of §63.10 of the General Provisions. (63.752(a))
Reporting Requirements	1. See individual affected sources. Comply with parts of §63.9 and §63.10 of the General Provisions. Semiannual reports or annual if compliant. (63.753(a)(1) and (3)) 2. Operating permit application can be used for initial notification. (63.753(a)(2))
Cleaning Operations:	
Standards	Housekeeping measures for all cleaning operations at a facility subject to this subpart. Measures address placing solvent laden cloth or paper in closed containers, storing fresh and used cleaning solvent in closed containers, and minimizing spills during handling and transfer. (63.744(a))
Test Methods and Procedures.	See individual affected sources.
Monitoring Requirements	See individual affected sources.
Recordkeeping Requirements.	The name and vapor pressure of each cleaning solvent, and supporting documentation. (63.752(b)(1))
Hand-Wipe Cleaning Operations:	
Standards	1. Except for spray gun and flush cleaning, all HAP or VOC hand-wipe cleaning solvents must meet a composition requirement, have a vapor pressure less than 45 mm Hg at 20°C, or meet the requirements specified in an alternative compliance plan administered by the permitting authority and approved under Section 112(l) of the Clean Air Act. (63.744(b)) 2. List of cleaning operations exempt from composition and vapor pressure requirements. (63.744(e))
Test Methods and Procedures.	1. Composition determination through manufacturer's data. (63.750(a)) 2. Vapor pressure determination through readily available sources if single component; ASTM E 260-91 and composite vapor pressure determination procedure for multiple component solvents. (63.750(b))
Monitoring Requirements	None.
Recordkeeping Requirements.	1. If complying with composition requirements, name, data/calculations, and annual volumes. (63.752(b)(2)) 2. If complying with vapor pressure limit, the name, vapor pressure, data/calculations/test results, and monthly volumes. (63.752(b)(3)) 3. For noncompliant cleaning solvents used in exempt operations, monthly volumes by operation, and master list of processes. (63.752(b)(4))
Reporting Requirements	*Semiannual* 1. Noncompliant solvent usage. (63.753(b)(1)(ii)) 2. New solvents and vapor pressure or composition. (63.753(b)(1)(iii))
Hand-Wipe Cleaning Operations (cont.)Reporting Requirements (cont.) 3. Statement certifying everything is in compliance. (63.753(b)(2))	
Spray Gun Cleaning:	
Standards	1. Use one of four specified techniques or an equivalent. (63.744(c)) 2. For enclosed spray gun cleaners, repair as soon as practicable, but within 15 days. (63.744(c)(1)(ii))
Test Methods and Procedures.	None.
Monitoring Requirements	Visual inspection for leaks at least once per month. (63.751(a))
Recordkeeping Requirements.	Record all leaks, including source identification and dates leaks found and repaired. (63.752(b)(5))
Reporting Requirements	Semiannual 1. Noncompliant spray gun cleaning method used. (63.753(b)(1)(iii)) 2. Leaks of enclosed spray gun cleaners not repaired within 15 days of detection. (63.753(b)(1)(iv)) 3. Statement certifying everything is in compliance. (63.753(b)(1)(v))
Flush Cleaning:	
Standards	Operating procedures specify emptying into enclosed container, collection system, or equivalent. (63.744(d)) Flush Cleaning (cont.)
Test Methods and Procedures.	None.

TABLE 1. SUMMARY OF SUBPART GG OF 40 CFR PART 63—NATIONAL EMISSION STANDARDS FOR AEROSPACE MANUFACTURING AND REWORK FACILITIES—Continued

Affected Source and Requirement	Description
Monitoring Requirements	None.
Recordkeeping Requirements.	None.
Reporting Requirements	Semiannual Statement certifying everything is in compliance. (63.753(b)(2))
Primer and Topcoat Application Operations:	
Standards	Minimize spills during handling and transfer. (63.745(b)) Uncontrolled Primers 1. Organic HAP content limit: 350 g/l (2.9 lb/gal) (less water) as applied. (63.745(c)(1)) 2. VOC content limit: 350 g/l (2.9 lb/gal) (less water and exempt solvents) as applied. (63.745(c)(2)) 3. Achieve compliance through: (1) use coatings below content limits, or (2) use monthly volume-weighted averaging to meet content limits. (63.745(e)) *Uncontrolled Topcoats* 4. Organic HAP content limit: 420 g/l (3.5 lb/gal) (less water) as applied. (63.745(c)(3)) 5. VOC content limit: 420 g/l (3.5 lb/gal) (less water and exempt solvents). (63.745(c)(4))6. 6. Achieve compliance as in 3. above. (63.745(e)) *Controlled Primers and Topcoats* 7. If control system is used, must be designed to capture and control all emissions from the application operation and must achieve an overall control efficiency of at least 81%. (63.745(d)) *All Primers and Topcoats* 8. Specific application techniques must be used. If alternative is sought, can only be used if emissions are less than or equal to HVLP or electrostatic spray application techniques. (63.745(f)(1)) 9. All application equipment must be operated according to manufacturer's specifications, company procedures, or locally specified operating procedures. (63.745(f)(2)) 10. Exemptions from No. 8 above provided for in certain situations. (63.745(f)(3)) 11. Operating requirements for the application of primers or topcoats that contain inorganic HAP, including control with either particulate filters or waterwash, and shutdown if operated outside manufacturer's specified limits. (63.745(g)(1) through (3)) 12. Exemptions from No. 11 provided for certain application operations. (63.745(g)(4))
Performance Test Periods and Tests.	1. For "compliant" coatings: each 30-day period. For "averaged" coatings: each 30-day period. For "controlled" coatings, non-carbon adsorber: three 1-hour runs. For "controlled" coatings, carbon adsorber: each rolling period. (63.749(e)(1)) 2. Initial performance test for all control devices to demonstrate compliance with overall control efficiency requirement. (63.749(e)(2))
Test Methods and Procedures.	1. Organic HAP level determination procedures. (63.750(c) and (d)) 2. VOC level determination procedures. (63.750(e) and (f)) 3. Overall control efficiency of carbon adsorber system determined using provided procedures; for other control devices, determine capture efficiency and destruction efficiency. For capture efficiency, use Procedure T in Appendix B to 40 CFR 52.741 for total enclosures and 40 CFR 52.741(a)(4)(iii) procedures for all other enclosures. (63.750(g) and (h)) 4. For alternative application methods, first determine emission levels for initial 30-day period or five aircraft using only HVLP or electrostatic, or a time period specified by the permitting agency. Then use alternative application method for period of time necessary to coat equivalent amount of parts with same coatings. Alternative application method may be used when emissions generated during the test period are less than or equal to the emissions generated during the initial 30-day period or five aircraft. Dried film thickness must be within specification for initial 30-day period or five aircraft as demonstrated under actual production conditions. (63.750(i))
Monitoring Requirements	1. Temperature sensors with continuous recorders for incinerators, and install, calibrate, maintain, and operate temperature monitors according to manufacturer's specifications. Use CEMS as an alternative. (63.751(b)) 2. Continuously monitor pressure drop across filter or water flow rate through waterwash. (63.751(c))
Recordkeeping Requirements.	1. Name and VOC content for all primers and topcoats. If coating contains exempt solvents, calculate total HAP content. (63.752(c)(1)) 2. For "compliant" coatings, organic HAP and VOC contents as applied, data/calculations or Method 24 used to determine them, and monthly usage. (63.752(c)(2)) 3. For "low-HAP/VOC" primers, annual purchase records, and data/calculations or Method 24 used to determine H_i. (63.752(c)(3)) 4. For "averaged" coatings, monthly values of VOC content (H_a and G_a), and data/calculations or Method 24 used to calculate H_a and G_a. (63.752(c)(4)) 5. For "controlled" coatings (incinerator), overall control efficiency and incinerator temperature(s). (63.752(c)(5)) 6. For "controlled" coatings (carbon adsorber), overall control efficiency and length of rolling period and all supporting data/calculations. (63.752(c)(6)) 7. Pressure drop across filter or water flow rate through waterwash once per shift, and acceptable limits. (63.752(d) (1) through (3)) 8. For new sources with chromated coatings, documentation that filters meet multistage or HEPA requirements. (63.752(d)(4))
Reporting Requirements	Semiannual

TABLE 1. SUMMARY OF SUBPART GG OF 40 CFR PART 63—NATIONAL EMISSION STANDARDS FOR AEROSPACE MANUFACTURING AND REWORK FACILITIES—Continued

Affected Source and Requirement	Description
	1. All instances where organic HAP/VOC limits were exceeded. (63.753(c)(1)(i), (ii), and (viii)) 2. Control device exceedances (out-of-compliance). (63.753(c)(1)(iii), (iv), and (v)) 3. Periods when operation not immediately shut down due to pressure drop or water flow rate being outside limits. (63.753(c)(1)(vi)) 4. Statement certifying everything is in compliance. (63.753(c)(vii)) Annual 5. Number of times the pressure drop or water flow rate limits were exceeded. (63.753(c)(2))
Depainting Operations:	
Applicability	Applies to the outer surface of aerospace vehicles. Does not apply to parts or units normally removed. Fuselage, wings, and stabilizers always covered. Radomes, parts normally removed are exempt. (63.746(a))
Standards	1. Unless exempted, no organic HAP are to be emitted from chemical strippers or softeners. (63.746(b)(1)) 2. Minimize inorganic HAP emissions during periods of non-chemical based equipment malfunction. (63.746(b)(2)) 3. Use of organic HAP-containing strippers for spot stripping and decal removal limited to 26 gallons per aircraft per year for commercial aircraft and 50 gallons per aircraft per year for military aircraft. (63.746(b)(3)) 4. Operating requirements for depainting operations generating airborne inorganic HAP, including control with particulate filters or waterwash systems. Mechanical and hand sanding are exempt. (63.746(b)(4) and (b)(5)) 5. Non-exempt organic HAP emissions controlled at 81% efficiency for systems installed before effective date. For newer systems, control at 95%. (63.746(c))
Performance Test Periods and Tests.	1. For demonstrating no organic HAP emissions: each 24-hour period. (63.749(g)(1)) 2. For spot stripping and decal removal usage limits: each calendar year. (63.749(g)(1)) 3. Initial performance test for all control devices to demonstrate compliance with overall control efficiency requirement. (63.749 (g)(1), (g)(2), and (g)(3))
Test Methods and Procedures.	1. Procedures provided for determining gallons of HAP-containing stripper used for aircraft. (63.750(j))
....	2. Overall control efficiency of carbon adsorber system determined using specified procedures; for other control devices, determine capture efficiency and destruction efficiency. For capture efficiency, use Procedure T in Appendix B to 40 CFR 52.741 for total enclosures and 40 CFR 52.741(a)(4)(iii) procedures for all other enclosures. (63.750 (g) and (h))
Monitoring Requirements	Continuously monitor pressure drop across filter or water flow rate through waterwash. (63.751(d))
Recordkeeping Requirements.	1. Name and monthly volume of all organic HAP-containing chemical strippers. (63.752(e)(1)) 2. For controlled chemical strippers (carbon adsorber), overall control efficiency and length of rolling period and all supporting data/calculations. (63.752(e)(2)) 3. For controlled chemical strippers (other control devices), overall control efficiency and supporting documentation. (63.752(e)(3)) 4. List of parts/assemblies normally removed. (63.752(e)(4))
Recordkeeping Requirements.	5. For non-chemical based equipment, name and type, and malfunction information including dates, description, and alternative methods used. (63.752(e)(5)) 6. For spot stripping and decal removal, annual volume used, annual average volume per aircraft, and all data/calculations used to calculate volume per aircraft. (63.752(e)(6)) 7. Pressure drop across filter or water flow rate through waterwash once per shift and acceptable limits. (63.752(e)(7))
Reporting Requirements	Semiannual 1. 24-hour periods where organic HAP were emitted from depainting operations in violation of rule. (63.753(d)(1)(i)) 2. New and reformulated chemical strippers and HAP contents. (63.753(d)(1)(ii), (iii), and (iv)) 3. New non-chemical based depainting techniques. (63.753(d)(1)(v)) 4. Malfunction information on non-chemical based techniques including da.es, description, and alternative methods used. (63.753(d)(1)(vi)) 5. Periods when operation not immediately shut down due to pressure drop or water flow rate being outside limits. (63.753(d)(1)(vii)) 6. List of new/discontinued aircraft models and, for new models, list of parts normally removed for depainting. (63.753(d)(1)(viii)) 7. Organic HAP control device exceedances. (63.753(d)(3)) 8. Statement certifying everything is in compliance. (63.753(d)(2)(ii)) Annual 9. Exceedances of average annual volume limits for spot stripping and decal removal. (63.753(d)(2)(i)) 10. Number of times the pressure drop or water flow rate limits were exceeded. (63.753(d)(2)(iii))
Chemical Milling Maskant Application Operations:	
Applicability	Applies only to operations using Type II chemical milling etchants. (63.747(a))
Standards	Minimize spills during handling and transfer. (63.747(b)) Uncontrolled Maskants

TABLE 1. SUMMARY OF SUBPART GG OF 40 CFR PART 63—NATIONAL EMISSION STANDARDS FOR AEROSPACE MANUFACTURING AND REWORK FACILITIES—Continued

Affected Source and Requirement	Description
	1. Organic HAP emissions: ≤ 160 g/l (1.3 lb/gal) (less water) as applied. (63.747(c)(1)) 2. VOC emissions: ≤ 160 g/l (1.3 lb/gal) (less water and exempt solvents) as applied. (63.747(c)(2)) 3. Achieve compliance through: (1) use maskants below content limits, or (2) use monthly volume-weighted averaging to meet content limits. (63.747(e)) Controlled Maskants 4. If control device is used, system must be designed to capture and control all emissions from maskant operation and must achieve an overall control efficiency of at least 81% for systems installed before effective date. For new systems, control at 95%. (63.747(d))
Performance Test Periods and Tests.	1. For compliant maskants: each 30-day period. For averaged maskants: each 30-day period. For controlled coatings, carbon adsorber: each rolling period. For controlled coatings, non-carbon adsorber: three 1-hour runs. (63.749(i)(1)) 2. Initial performance test required for all control devices to demonstrate compliance with overall control efficiency requirement. (63.749 (i)(2) and (i)(3))
Test Methods and Procedures.	Procedures provided essentially identical to those for primers and topcoats for organic HAP and VOC content levels. (63.750 (g), (h), and (k)–(n))
Monitoring Requirements	Same as for primers and topcoats if incinerators are used. (63.751(b))
Recordkeeping Requirements.	Same as for primers and topcoats. (63.752(f))
Reporting Requirements	*Semiannual* 1. Exceedances of organic HAP/VOC limits. (63.753(e)(1), (2) and (7)) 2. Control device exceedances (out of compliance). (63.753(e)(3)) 3. New maskants. (63.753(e)(4)) 4. New control devices. (63.753(e)(5)) 5. Everything is in compliance. (63.753(e)(6))
Waste Handling and Storage Operations:	
Standards	Minimize spills during handling and transfer. (63.748)
Test Methods and Procedures.	None.
Monitoring Requirements	None.
Recordkeeping Requirements.	None.
Reporting Requirements	None.

[a] The EPA promulgated regulations for subpart A of 40 CFR part 63, which were published in the **Federal Register** on March 16, 1994 at 59 FR 12408.

Section 114(a)(3) of the Act requires enhanced monitoring and compliance certifications of all major stationary sources. The annual compliance certifications certify whether compliance has been continuous or intermittent. Enhanced monitoring shall be capable of detecting deviations from each applicable emission limitation or standard with sufficient representativeness, accuracy, precision, reliability, frequency, and timeliness to determine if compliance is continuous during a reporting period. The monitoring in this regulation satisfies the requirements of enhanced monitoring.

Owners or operators of all commercial, civil, or military aerospace original equipment manufacturing (OEM) and rework operations with an initial startup date before September 1, 1998 that are subject to the emission standards are required to achieve compliance with the control requirements of the standards within 3 years from September 1, 1995. Owners or operators of new commercial, civil, or military aerospace OEM and rework operations with initial startup after September 1, 1998 will be required to comply with all requirements upon startup.

II. Summary of Considerations in Developing the Rule

A. Purpose of Regulation

The Act was developed, in part,

> to protect and enhance the quality of the Nation's air resources so as to promote the public health and welfare and the productive capacity of its population [the Act, section 101(b)(1)].

Aerospace facilities are major sources of HAP emissions. The HAP listed in Section 112(b)(1) emitted by aerospace facilities that would be covered by this final rule include, chromium, cadmium, methylene chloride, toluene, xylene, methyl ethyl ketone, ethylene glycol and glycol ethers. All of these pollutants can cause reversible or irreversible toxic effects following exposure. The range of adverse health effects include cancer and a number of other chronic health disorders (e.g., aplastic anemia, pancytopenia, pernicious anemia, pulmonary (lung) structural changes) and a number of acute health disorders (e.g., dyspnea (difficulty in breathing) upper respiratory tract irritation with cough, conjunctivitis, neurotoxic effects (e.g., visual blurring, tremors, delirium, unconsciousness, coma, convulsions). These adverse health effects are associated with a wide range of ambient concentrations and exposure times and are influenced by source-specific characteristics such as emission rates and local meteorological conditions. Health impacts are also dependent on multiple factors that affect human variability such as genetics, age, health status (e.g., the presence of pre-existing disease) and lifestyle.

B. Summary of Impacts

These standards will reduce nationwide emissions of HAP from at least 2,869 major source aerospace manufacturing and rework facilities by approximately 112,600 Mg (123,700 tons), or 59 percent, in 1998 compared to the emissions that would occur in the absence of the standards. No significant adverse secondary air, water, solid waste, or energy impacts are anticipated from the promulgation of these standards.

Capital costs will be incurred due to implementation of the required control measures. The EPA performed a capital equipment cost analysis based on a 15-year equipment life and a 7 percent annual interest rate, and calculated annualized capital costs for equipment expenditures. It is estimated that implementation of this regulation will result in nationwide annual operating and equipment costs for existing aerospace manufacturing and rework facilities of $15.3 million for control of hand-wipe and flush cleaning, $164 million for solvent-based chemical milling maskants controlled by a carbon adsorber, $146 million for water-reducible chemical milling maskants, $622 million for depainting with dry media blasting (or a net savings of $38.8 million if all affected sources use chemical strippers that contain no organic HAP), $2.3 million for control of inorganic HAP emissions from primer and topcoat spray application, and $7.8 million for control of inorganic HAP emissions from blast depainting operations.

Total nationwide annual costs, depending on the specific mix of control options chosen, are estimated to range from a net savings of $49.2 million per year to a net cost of $660 million per year. The higher cost figure shown reflects a scenario in which all affected sources use blast depainting methods rather than chemical strippers that contain no organic HAP. However, due to the high capital cost of blast depainting equipment, very few facilities are expected to use this option other than those that already own the equipment. Therefore, the EPA anticipates the total annual cost of the final rule to be approximately $21 million.

III. Significant Changes to the Proposed Standards

A. Public Participation

Throughout the rulemaking process, the EPA sought and received information and views from a broad representation of the public on all aspects of the regulation. On May 4 and 5, July 20 and 21, and October 5 and 6, 1993, and March 7 and 8, 1995, public meetings were held to discuss results of the Agency's analysis of control options and associated impacts.

The standards were proposed and the preamble was published in the **Federal Register** on June 6, 1994 (59 FR 29216). The preamble to the proposed standards discussed the availability of the regulatory text and proposal BID, which described the regulatory alternatives considered and the impacts of those alternatives. Public comments were solicited at the time of proposal, and copies of the regulatory text and BID were distributed to interested parties. Electronic versions of the preamble, regulation, and BID were made available to interested parties via the EPA's TTN (see ADDRESSES section of this preamble).

To provide interested persons the opportunity for oral presentation of data, views, and arguments concerning the proposed standards, a public hearing was offered at proposal. A public hearing was requested and was held August 15, 1994. Eleven industry sources presented comments at the hearing. The public comment period extended from June 6, 1994 to September 15, 1994.

In addition to the original proposal, the EPA also requested supplemental information and comment in a **Federal Register** notice on November 22, 1994 (59 FR 60101). The issues on which additional information was solicited included the level of control for chemical depainting operations, applicability to general aviation facilities, VOC and HAP content of exterior primers for commercial aircraft, the rolling material balance period for proposed EPA Method 309, regulation of chemical milling maskants used with Type I etchants, use of HEPA filters to control inorganic HAP emissions from primer and topcoat application operations, and reduced recordkeeping requirements for facilities using a 2.1 lb/gal or lower organic HAP content primer.

B. Comments on the Proposed Standards

Comments on the proposed standards and the November 22, 1994 notice were received from 57 commenters composed mainly of States, environmental groups, control device vendors, industry, and trade associations. Most of the 80 comment letters contained multiple comments. A detailed discussion of these comments and responses can be found in the promulgation BID, which is referred to in the ADDRESSES section of this preamble. The summary of comments and responses in the BID served as the basis for the revisions that have been made to the standards between proposal and promulgation. The comments have been divided into the following areas:

(1) Clarification of and additions to rule applicability and exemptions.

(2) Identification of the specialty coatings that are exempt from the rule.

(3) Exemption of non-HAP, non-VOC cleaning solvents from the rule requirements.

(4) Addition of organic HAP and VOC limitations for self-priming topcoats.

(5) Addition of a low-usage exemption for non-compliant primers, topcoats, and chemical milling maskants.

(6) Acceptable primer/topcoat application techniques.

(7) New source MACT for inorganic HAP control for application of chromium-containing coatings.

(8) Operating procedures for coating application equipment and inorganic HAP control systems.

(9) Monitoring requirements for organic or inorganic HAP control systems.

(10) Addition of organic HAP emission control requirements for HAP-containing chemical strippers used in depainting operations.

(11) Deletion of 99 percent control requirement and EPA Method 5 test requirement for non-chemical based depainting operations.

(12) Deletion of waste storage provision for non-RCRA HAP-containing waste because it was a duplication of RCRA requirements.

(13) Reduction in recordkeeping for exempt cleaning solvent usage from daily to monthly.

C. Significant Changes

Several changes have been made to these standards since the time they were proposed to the public. The majority of the changes have been made to clarify portions of the rule that were unclear to the commenters. Other changes to the rule were made after reviewing the data and arguments submitted by commenters. A summary of the major changes is presented below.

(1) To clarify the coverage of the NESHAP and to respond to comments requesting additional exemptions for specialized operations, several changes have been made to the rule. While major HAP sources containing any degree of aerospace activity are still covered, § 63.741 now explicitly states that only aerospace operations at these facilities are covered. This section also now clarifies that vehicles designed to operate outside the limit of the earth's atmosphere will not be covered. Further, only parts and assemblies of aerospace vehicles that are critical to structural integrity or flight performance are regulated. (This excludes non-flight items such as tray tables, etc.) Additional items and processes exempted from the final rule include aircraft transparencies, electronic parts and assemblies, research and development activities as identified in

Section 112(c)(7), and wastewater treatment operations. These items were exempted because they are currently regulated under an existing EPA regulation or will be covered in a separate NESHAP.

Comments were received requesting that cleaning solvents containing no HAP or VOC be exempted from the housekeeping and composition requirements of the standard for cleaning operations. The EPA agrees that these formulations should not be covered and has exempted them from the rule.

The inorganic HAP control requirements will not be applicable to the painting of non-operational vehicles and components meant for display purposes. Additional exemptions will be granted for the painting of specific parts that the permitting authority (through a 40 CFR part 70 permit) has determined cannot be painted in a spray booth. The EPA has deleted the proposed exemption cutoff of 4 ft^2/vehicle for touch-up painting and spot stripping with chemical based paint removers, due to the difficulty of determining the exact surface areas processed on vehicles within a facility. In lieu of the exemption, a more specific definition of touch-up and repair painting has been adopted such that these operations will be easily identifiable.

Hand and mechanical sanding depainting operations have been specifically deleted from the inorganic HAP control requirements for non-chemical depainting.

For chemical milling maskant operations, the rule will continue to cover only those maskants used in Type II etchants (Type I operations exempted). The data and information received indicate that compliant maskants are not suitable for use in the Type I etchants. Touch-up maskants are also now excluded from coverage by the rule. The control techniques guideline (CTG) for aerospace operations will address all exempted maskants.

(2) Several commenters requested that the EPA clarify which specialty coatings would be exempt from the NESHAP requirements, and also asked that definitions be provided in the final rule. The EPA has added Appendix B to the rule, which includes definitions for the principal specialty coatings that have been identified. The aerospace control techniques guideline (CTG) under development by the EPA will contain recommended VOC content limits for these coatings.

(3) The housekeeping, composition, and vapor pressure requirements of the cleaning operations standard will now not apply to cleaning solvents that do not contain any HAP or VOC. This change will clarify that non-polluting cleaners, such as plain water, will not be subject to these requirements.

(4) Self-priming topcoats have been added as a distinct subcategory of topcoats with their own HAP and VOC content limits (which are the same as for general topcoats). Commenters were concerned that the technology for these coatings could proceed at a different rate than for other topcoats, necessitating that different limits be set for the two classes of topcoats.

(5) The EPA has added a low-usage exemption to § 63.741 for non-compliant primers, topcoats, and maskants. This is expected to relieve the burden on facilities that have small usage requirements for certain non-compliant coatings that are not already exempted as "specialty coatings." This exemption allows an annual use of up to 189 l (50 gal) per separate formulation, with a combined facility cap of 757 l (200 gal) per year.

(6) Electrodeposition dip coating, a high transfer efficiency coating process, has been added to the list of acceptable application techniques in § 63.745. Additional techniques now deemed acceptable due to the difficulty of control and to their very small emissions are cotton-tipped swab application, certain airbrush applications, and use of hand-held spray (aerosol) cans.

(7) Data available on advanced filtration techniques indicate that the new source MACT control level for application of chromium-containing coatings consists of either a 3-stage filter system, high efficiency particulate air (HEPA) filters, or approved equivalent control. These control technologies will be required for spray application of chromium-containing coatings at new facilities.

(8) The proposal contained a requirement to operate coating application equipment and inorganic HAP control equipment (dry filters and waterwash systems) according to the manufacturer's specifications. To respond to comments that many manufacturers' instructions are not complete, the EPA has revised these provisions to also allow use of either the facility's own procedures or local specified operating procedures. Dry filter systems will be exempt from the requirement for a startup, shutdown, and malfunction plan. Any painting equipment modified by the facility must maintain a transfer efficiency equivalent to HVLP and electrostatic spray equipment.

(9) The proposed monitoring requirement for incinerators in § 63.751 has been revised in response to comments to allow the alternative of a CEMS in addition to the proposed requirement for a temperature monitor. The requirement to monitor the pressure drop across waterwash particulate control systems has been deleted because this would not provide an indication of performance. Instead, a means of continuously monitoring the water flow rate must be installed on the system and operated during paint application or removal operations. Once per operating shift, the operator must record the flow rate and perform a visual check of the continuity and flow characteristics of the water curtain, and then shut down the operation immediately if problems are noted and take corrective action before restarting the operation. Alternative monitoring methods may be approved if the source is infrequently operated or the alternative provides a sufficiently accurate indication of performance.

(10) A provision has been added to the final rule that allows the use of chemical strippers containing HAP when the emissions are reduced by the use of a control system (such as a carbon adsorber). Control systems installed before September 1, 1995 will be required to reduce HAP and VOC emissions by 81 percent or greater. Systems installed on or after this date must achieve a control efficiency of 95 percent or greater. These percentage reductions take into account capture and destruction or removal efficiencies, as well as the volume of chemical stripper used (i.e., a reduction in stripper usage from baseline levels will be counted as a credit in determining the effective control efficiency of the control system).

(11) The proposal contained a 99 percent particulate control requirement for dry filter systems used to control inorganic HAP emissions from depainting. Several commenters took issue with the basis for this requirement. The proposal to use EPA Method 5 to verify compliance with the requirement was also disputed on the basis that the effluent grain loading from these filter systems cannot be measured. The EPA agrees with these arguments and has deleted both the 99 percent requirement and the use of Method 5. Work practice standards have been substituted for these requirements which include maintaining the system in good working order, installing a differential pressure gauge across the filter media, and replacing the media when the pressure drop is outside of the manufacturer's recommended limits.

(12) In response to numerous comments that the proposed requirement to store all HAP-containing waste in closed containers was duplicative in light of existing RCRA requirements, the EPA has deleted this provision. However, the "housekeeping" provision requiring handling of waste so as to minimize spills has been retained in § 63.748.

(13) In response to comments, the records pertaining to non-compliant cleaning solvents used in the specified exempt cleaning operations now need not list the parts and assemblies cleaned, but only the exempt processes where these solvents were used.

Three additional issues are being addressed in a supplemental rulemaking. They include an expanded emissions averaging scheme that would encompass topcoats, primers and maskants; inorganic particulate controls; and emission limitations for certain maskants which were originally exempt from the proposed NESHAP. Additionally, EPA is working with the South Coast Air Quality Management District (SCAQMD) and Region IX to ensure that this regulation does not interfere with SCAQMD's volatile organic compound trading program. Any revisions to Aerospace NESHAP that may be required to mesh the regulation with the trading program will also be included in the supplemental rulemaking. The proposal for the supplemental notice should appear in the **Federal Register** no later than November, 1995.

IV. Administrative Requirements

A. Docket

The docket is an organized and complete file of all of the information submitted to or otherwise considered by the EPA in the development of this rulemaking. The docket is a dynamic file, since material is added throughout the rulemaking development. The docketing system is intended to allow members of the public and industries involved to readily identify and locate documents so that they can effectively participate in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated standards and the EPA responses to significant comments, the contents of the docket will serve as the record in case of judicial review (except for interagency review materials) [section 307(d)(7)(A) of the Act].

B. Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. and have been assigned OMB control number (2060–0341). An Information Collection Request (ICR) document has been prepared by the EPA (ICR No. 1687.02) to reflect the changed information requirements of the final rule.

This collection of information has an estimated reporting burden per affected facility of about 73 hours for the first year. In subsequent years, the burden will be approximately 55 hours per affected facility. These burden estimates include time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Regulatory Information Division; U.S. Environmental Protection Agency (Mail code 2136); 401 M Street, SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA."

C. Executive Order 12866

Under Executive Order 12866 (58 FR 51735 (October 4, 1993)), the EPA is required to determine whether a regulation is "significant" and therefore subject to OMB review and the requirements of this Executive Order to prepare a regulatory impact analysis (RIA). The Order defines "significant regulatory action" as one that is likely to result in a rule that may: (1) Have an annual effect on the economy of $100 million or more, or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, it has been determined that this rule is a "significant regulatory action" within the meaning of the Executive Order.

D. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 et seq.) requires the EPA to consider potential impacts of regulations on small business "entities." If a preliminary analysis indicates that a regulation would have a significant economic impact on 20 percent or more of small entities, a regulatory flexibility analysis must be prepared. Since the final rule applies only to major sources as defined in section 112(a) of the Act, the EPA certifies that there will not be a significant impact on a substantial number of small entities. Consequently, a regulatory flexibility analysis is not required and has not been prepared.

E. Regulatory Review

In accordance with sections 112(d)(6) and 112(f)(2) of the Act, this regulation will be reviewed within 8 years from the date of promulgation. This review may include an assessment of such factors as evaluation of the residual health risk, any overlap with other programs, the existence of alternative methods of control, enforceability, improvements in emission control technology and health data, and the recordkeeping and reporting requirements.

F. Unfunded Mandate Act

The economic impact analysis performed prior to proposal showed that the economic impacts from implementation of the proposed standards would not be "significant" as defined in Executive Order 12866 (see Section IV.C). No changes have been made to the proposed rule that would increase the economic impacts to a level that would be considered significant.

This final rule is estimated to result in a total cost of $21 million per year, however, expenditures by State, local, and tribal governments or the private sector are estimated at more than $100 million in any one year. The lower costs are the result of the savings incurred by the pollution prevention measures used as the basis for the rule.

The Agency has prepared the following statement of impact to be considered in response to the requirements of the Unfunded Mandates Act.

There are no federal funds available to assist State, local, and tribal governments in meeting these costs. There are important benefits from VOC and HAP emission reductions because these compounds have significant, adverse impacts on human health and welfare and on the environment. The rule does not have any disproportionate budgetary effects on any particular region of the nation, any State, local, or tribal government, or urban or rural or other type of community. On the contrary, the rule will result in only a minimal increase in the average product rates (less than 1 percent). Moreover, the rule will not have a material effect on the national economy.

Prior to issuing this rule, the EPA provided numerous opportunities (e.g. public comment period; public hearing; Roundtable meetings with industry, trade associations, state and local air pollution representatives; environmental groups; State, local, and tribal governments; and concerned citizens) for consultation with interested parties. In general, State and local environmental agencies advocated that EPA adopt more stringent environmental controls. The Agency evaluated the comments and concerns, and the final rule reflects, to the extent consistent with section 112 of the Act, those comments and concerns. While small governments are not significantly or uniquely affected by the rule, these procedures, as well as additional public conferences and meetings, gave small governments an opportunity to give meaningful and timely input and obtain information, education, and advice on compliance.

The Agency considered several regulatory options in developing the rule. The options selected in the final rule are the least costly and least burdensome alternatives currently available for achieving the objectives of section 112 of the Act. The cost effectiveness for this regulation is $170 per ton and all but one of the regulatory options selected are based on pollution prevention measures. Finally, after careful consideration of the costs, the environmental impacts and the comments, the Agency decided that the MACT floor was the appropriate level of control for this regulation.

List of Subjects

40 CFR Part 9

Environmental protection, Reporting and recordkeeping requirements.

40 CFR Part 63

Environmental protection, Air pollution control, Hazardous substances, Incorporation by reference, Reporting and recordkeeping requirements.

Dated: July 31, 1995.

Carol M. Browner,

Administrator.

For reasons set out in the preamble, parts 9 and 63 of title 40, chapter I, of the Code of Federal Regulations are amended as follows:

PART 9—[AMENDED]

1. The authority citation for part 9 continues to read as follows:

Authority: 7 U.S.C. 135 *et seq.*, 136–136y; 15 U.S.C. 2001, 2003, 2005, 2006, 2601–2671; 21 U.S.C 331j, 346a, 348; 31 U.S.C. 9701; 33 U.S.C. 1251 *et seq.*, 1311, 1313d, 1314, 1321, 1326, 1330, 1344, 1345 (d) and (e), 1361; E.O. 11735, 38 FR 21243, 3 CFR 1971–1975 Comp., p. 973; 42 U.S.C. 241, 242b, 243, 246, 300f, 300g, 300g–1, 300g–2, 300g–3, 300g–4, 300g–5, 300g–6, 300j–1, 300j–2, 300j–3, 300j–4, 300j–9, 1857 *et seq.*, 6901–6992k, 7401–7671q, 7542, 9601–9657, 11023, 11048.

2. Section 9.1 is amended by adding a new entry to the table under the indicated heading to read as follows:

§ 9.1 OMB approvals under the Paperwork Reduction Act.

* * * * *

40 CFR citation	OMB control No.
* * * * *	* *
National Emission Standards for Hazardous Air Pollutants for Source Categories.	
* * * * *	* *
63.752–63.753	2060–0341
* * * * *	* *

PART 63—[AMENDED]

3. The authority citation for part 63 continues to read as follows:

Authority: 42 U.S.C. 7401, et seq.

4. Part 63 is amended by adding a new subpart GG consisting of §§ 63.740 through 63.759 to read as follows:

Subpart GG—National Emission Standards for Aerospace Manufacturing and Rework Facilities

Sec.

63.741 Applicability and designation of affected sources.
63.742 Definitions.
63.743 Standards: General.
63.744 Standards: Cleaning operations.
63.745 Standards: Primer and topcoat application operations.
63.746 Standards: Depainting operations.
63.747 Standards: Chemical milling maskant application operations.
63.748 Standards: Handling and storage of waste.
63.749 Compliance dates and determinations.
63.750 Test methods and procedures.
63.751 Monitoring requirements.
63.752 Recordkeeping requirements.
63.753 Reporting requirements.
63.754–63.759 Reserved.

SUBPART GG—NATIONAL EMISSION STANDARDS FOR AEROSPACE MANUFACTURING AND REWORK FACILITIES

§ 63.741 Applicability and designation of affected sources.

(a) This subpart applies to facilities that are engaged, either in part or in whole, in the manufacture or rework of commercial, civil, or military aerospace vehicles or components and that are major sources as defined in § 63.2.

(b) The owner or operator of an affected source shall comply with the requirements of this subpart and of subpart A of this part, except as specified in § 63.743(a).

(c) *Affected sources.* The affected sources to which the provisions of this subpart apply are specified in § 63.741(c)(1) through (6). The activities subject to this subpart are limited to the manufacture or rework of aerospace vehicles or components as defined in this subpart, except for requirements pertaining to cleaning solvents. Paragraphs (c)(2) through (c)(6) of this section are not applicable to non-aerospace activities.

(1) Each cleaning operation as follows:

(i) All hand-wipe cleaning operations constitute an affected source.

(ii) Each spray gun cleaning operation constitutes an affected source.

(iii) All flush cleaning operations constitute an affected source.

(2) Each primer application operation, which is the total of all primer applications at the facility.

(3) Each topcoat application operation, which is the total of all topcoat applications at the facility.

(4) Each depainting operation, which is the total of all depainting at the facility.

(5) Each chemical milling maskant application operation, which is the total of all chemical milling maskant applications at the facility.

---

(6) Each waste storage and handling operation, which is the total of all waste handling and storage at the facility.

(d) An owner or operator of an affected source subject to this subpart shall obtain an operating permit from the permitting authority in the State in which the source is located. The owner or operator shall apply for and obtain such permit in accordance with the regulations contained in part 70 of this chapter and in applicable State regulations.

(e) All wastes that are determined to be hazardous wastes under the Resource Conservation and Recovery Act of 1976 (PL 94–580) (RCRA) as implemented by 40 CFR parts 260 and 261, and that are subject to RCRA requirements as implemented in 40 CFR parts 262 through 268, are exempt from the requirements of this subpart.

(f) This subpart does not contain control requirements for use of specialty coatings, adhesives, adhesive bonding primers, or sealants at aerospace facilities. It also does not regulate research and development, quality control, and laboratory testing activities, chemical milling, metal finishing, electrodeposition (except for electrodeposition of paints), composites processing (except for cleaning and coating of composite parts or components that become part of an aerospace vehicle or component as well as composite tooling that comes in contact with such composite parts or components prior to cure), electronic parts and assemblies (except for cleaning and topcoating of completed assemblies), manufacture of aircraft transparencies, and wastewater operations at aerospace facilities. These requirements also do not apply to parts and assemblies not critical to the vehicle's structural integrity or flight performance or to vehicles that are designed to travel beyond the limit of the earth's atmosphere. The requirements of this subpart also do not apply to primers, topcoats, chemical milling maskants, strippers, and cleaning solvents containing HAP or VOC at a concentration less than 0.1% for carcinogens or 1.0% for noncarcinogens, as determined from manufacturer's representations. Additional specific exemptions from regulatory coverage are set forth in § 63.741(e), .744(a)(1), (b), (e), .745(a), (f)(3), (g)(4), .746(a), (b)(5), .747(c)(3), and .749(d).

(g) The requirements for primers, topcoats, and chemical milling maskants in § 63.745 and § 63.747 do not apply to the use of low-volume coatings in these categories for which the annual total of each separate formulation used at a facility does not exceed 189 l (50 gal), and the combined annual total of all such primers, topcoats, and chemical milling maskants used at a facility does not exceed 757 l (200 gal). Primers and topcoats exempted under paragraph (f) of this section and under § 63.745(f)(3) and (g)(4) are not included in the 50 and 200 gal limits. Chemical milling maskants exempted under § 63.747(c)(3) are also not included in these limits.

§ 63.742 Definitions.

Terms used in this subpart are defined in the Act, in subpart A of this part, or in this section as follows:

Aerospace facility means any facility that produces, reworks, or repairs in any amount any commercial, civil, or military aerospace vehicle or component.

Aerospace vehicle or component means any fabricated part, processed part, assembly of parts, or completed unit, with the exception of electronic components, of any aircraft including but not limited to airplanes, helicopters, missiles, rockets, and space vehicles.

Aircraft fluid systems means those systems that handle hydraulic fluids, fuel, cooling fluids, or oils.

Aircraft transparency means the aircraft windshield, which is typically constructed of laminated layers of glass and other transparent materials.

Carbon adsorber means one vessel in a series of vessels in a carbon adsorption system that contains carbon and is used to remove gaseous pollutants from a gaseous emission source.

Carbon Adsorber control efficiency means the total efficiency of the control system, determined by the product of the capture efficiency and the control device efficiency.

Chemical milling maskant means a coating that is applied directly to aluminum components to protect surface areas when chemical milling the component with a Type II etchant. This does not include maskants used with Type I etchants, bonding maskants, line sealers, and critical use and seal coat maskants. Additionally, maskants that must be used on an individual part or subassembly with a combination of Type II etchants and any of the above types of maskants (e.g. Type I compatible, bonding, line sealers, and critical use and seal coat) are also exempt from this subpart.

Chemical milling maskant application operation means application of chemical milling maskant for use in Type II chemical milling etchants.

Cleaning operation means collectively spray gun, hand-wipe, and flush cleaning operations.

Cleaning solvent means a liquid material used for hand-wipe, spray gun, or flush cleaning. This definition does not include solutions that contain no HAP or VOC.

Coating means a material that is applied to the surface of an aerospace vehicle or component to form a decorative or functional solid film, or the solid film itself.

Coating operation means the use of a spray booth, tank, or other enclosure or any area, such as a hangar, for the application of a single type of coating (e.g., primer); the use of the same spray booth for the application of another type of coating (e.g., topcoat) constitutes a separate coating operation for which compliance determinations are performed separately.

Coating unit means a series of one or more coating applicators and any associated drying area and/or oven wherein a coating is applied, dried, and/or cured. A coating unit ends at the point where the coating is dried or cured, or prior to any subsequent application of a different coating. It is not necessary to have an oven or flashoff area in order to be included in this definition.

Confined space means a space that: (1) Is large enough and so configured that an employee can bodily enter and perform assigned work; (2) has limited or restricted means for entry or exit (for example, fuel tanks, fuel vessels, and other spaces that have limited means of entry); and (3) is not suitable for continuous employee occupancy.

Control device means destruction and/or recovery equipment used to destroy or recover HAP or VOC emissions generated by a regulated operation.

Control system means a combination of pollutant capture system(s) and control device(s) used to reduce discharge to the atmosphere of HAP or VOC emissions generated by a regulated operation.

Depainting means the removal of a permanent coating from the outer surface of an aerospace vehicle or component, whether by chemical or non-chemical means. For non-chemical means, this definition excludes hand and mechanical sanding, and any other non-chemical removal processes that do not involve blast media or other mechanisms that would result in airborne particle movement at high velocity.

Depainting operation means the use of a chemical agent, media blasting, or any other technique to remove permanent coatings from the outer surface of an aerospace vehicle or components. The depainting operation includes washing of the aerospace vehicle or component to remove residual stripper, media, or coating residue.

Electrodeposition of paint means the application of a coating using a water-based electrochemical bath process. The component being coated is immersed in a bath of the coating. An electric potential is applied between the component and an oppositely charged electrode hanging in the bath. The electric potential causes the ionized coating to be electrically attracted, migrated, and deposited on the component being coated.

Electrostatic spray means a method of applying a spray coating in which an electrical charge is applied to the coating and the substrate is grounded. The coating is attracted to the substrate by the electrostatic potential between them.

Exempt solvent means specified organic compounds that have been determined by the EPA to have negligible photochemical reactivity and are listed in 40 CFR 51.100.

Flush cleaning means the removal of contaminants such as dirt, grease, oil, and coatings from an aerospace vehicle or component or coating equipment by passing solvent over, into, or through the item being cleaned. The solvent may simply be poured into the item being cleaned and then drained, or be assisted by air or hydraulic pressure, or by pumping. Hand-wipe cleaning operations where wiping, scrubbing, mopping, or other hand action are used are not included.

Hand-wipe cleaning operation means the removal of contaminants such as dirt, grease, oil, and coatings from an aerospace vehicle or component by physically rubbing it with a material such as a rag, paper, or cotton swab that has been moistened with a cleaning solvent.

Hazardous air pollutant (HAP) means any air pollutant listed in or pursuant to section 112(b) of the Act.

High efficiency particulate air (HEPA) filter means a filter that has a 99.97 percent reduction efficiency for 0.3 micron aerosol.

High volume low pressure (HVLP) spray equipment means spray equipment that is used to apply coating by means of a spray gun that operates at 10.0 psig or less at the air cap and a fluid delivery pressure of 100 psig or less.

Inorganic hazardous air pollutant (HAP) means any HAP that is not organic.

Leak means any visible leakage, including misting and clouding.

Limited access space means internal surfaces or passages of an aerospace vehicle or component that cannot be reached without the aid of an airbrush or a spray gun extension for the application of coatings.

Mechanical sanding means aerospace vehicle or component surface conditioning which uses directional and random orbital abrasive tools and aluminum oxide or nylon abrasive pads for the purpose of corrosion rework, substrate repair, prepaint surface preparation, and other maintenance activities.

Natural draft opening means any opening in a room, building, or total enclosure that remains open during operation of the facility and that is not connected to a duct in which a fan is installed. The rate and direction of the natural draft through such an opening is a consequence of the difference in pressures on either side of the wall containing the opening.

Non-chemical based depainting equipment means any depainting equipment or technique, including, but not limited to, media blasting equipment, that can depaint an aerospace vehicle or component in the absence of a chemical stripper. This definition does not include mechanical sanding or hand sanding.

Nonregenerative carbon adsorber means a carbon adsorber vessel in which the spent carbon bed does not undergo carbon regeneration in the adsorption vessel.

Operating parameter value means a minimum or maximum value established for a control device or process parameter which, if achieved by itself or in combination with one or more other operating parameter values, determines that an owner or operator has complied with an applicable emission limitation.

Organic hazardous air pollutant (HAP) means any HAP that is organic.

Primer means the first layer and any subsequent layers of identically formulated coating applied to the surface of an aerospace vehicle or component. Primers are typically used for corrosion prevention, protection from the environment, functional fluid resistance, and adhesion of subsequent coatings. Coatings that are defined as specialty coatings are not included under this definition.

Radome means the non-metallic protective housing for electromagnetic transmitters and receivers (e.g., radar, electronic countermeasures, etc.).

Research and Development means an operation whose primary purpose is for research and development of new processes and products, that is conducted under the close supervision of technically trained personnel, and is not involved in the manufacture of final or intermediate products for commerical purposes, except in a de mimnimis manner.

Self-priming topcoat means a topcoat that is applied directly to an uncoated aerospace vehicle or component for purposes of corrosion prevention, environmental protection, and functional fluid resistance. More than one layer of identical coating formulation may be applied to the vehicle or component. The coating is not subsequently topcoated with any other product formulation.

Semi-aqueous cleaning solvent means a solution in which water is a primary ingredient (″ 60 percent of the solvent solution as applied must be water.)

Softener means a liquid that is applied to an aerospace vehicle or component to degrade coatings such as primers and topcoats specifically as a preparatory step to subsequent depainting by non-chemical based depainting equipment. Softeners may contain VOC but shall not contain any HAP as determined from MSDS's or manufacturer supplied information.

Solids means the non-volatile portion of the coating which after drying makes up the dry film.

Space vehicle means a man-made device, either manned or unmanned, designed for operation beyond earth's atmosphere. This definition includes integral equipment such as models, mock-ups, prototypes, molds, jigs, tooling, hardware jackets, and test coupons. Also included is auxiliary equipment associated with test, transport, and storage, which through contamination can compromise the space vehicle performance.

Specialty coating means a coating that, even though it meets the definition of a primer, topcoat, or self-priming topcoat, has additional performance criteria beyond those of primers, topcoats, and self-priming topcoats for specific applications. These performance criteria may include, but are not limited to, temperature or fire resistance, substrate compatibility, antireflection, temporary protection or marking, sealing, adhesively joining substrates, or enhanced corrosion protection.

Spot stripping means the depainting of an area where it is not technically feasible to use a non-chemical depainting technique.

Spray gun means a device that atomizes a coating or other material and projects the particulates or other material onto a substrate.

Stripper means a liquid that is applied to an aerospace vehicle or component to remove permanent coatings such as primers and topcoats.

Surface preparation means the removal of contaminants from the surface of an aerospace vehicle or component, or the activation or reactivation of the surface in preparation for the application of a coating.

Temporary total enclosure means a total enclosure that is constructed for the sole purpose of measuring the emissions from an affected source that are not delivered to an emission control device. A temporary total enclosure must be constructed and ventilated (through stacks suitable for testing) so that it has minimal impact on the performance of the permanent emission capture system. A temporary total enclosure will be assumed to achieve total capture of fugitive emissions if it conforms to the requirements found in § 63.750(g)(4) and if all natural draft openings are at least four duct or hood equivalent diameters away from each exhaust duct or hood. Alternatively, the owner or operator may apply to the Administrator for approval of a temporary enclosure on a case-by-case basis.

Topcoat means a coating that is applied over a primer on an aerospace vehicle or component for appearance, identification, camouflage, or protection. Coatings that are defined as specialty coatings are not included under this definition.

Total enclosure means a permanent structure that is constructed around a gaseous emission source so that all gaseous pollutants emitted from the source are collected and ducted through a control device, such that 100% capture efficiency is achieved. There are no fugitive emissions from a total enclosure. The only openings in a total enclosure are forced makeup air and exhaust ducts and any natural draft openings such as those that allow raw materials to enter and exit the enclosure for processing. All access doors or windows are closed during routine operation of the enclosed source. Brief, occasional openings of such doors or windows to accommodate process equipment adjustments are acceptable, but if such openings are routine or if an access door remains open during the entire operation, the access door must be considered a natural draft opening. The average inward face velocity across the natural draft openings of the enclosure must be calculated including the area of such access doors. The drying oven itself may be part of the total enclosure. An enclosure that meets the requirements found in § 63.750(g)(4) is a permanent total enclosure.

Touch-up and repair operation means that portion of the coating operation that is the incidental application of coating used to cover minor imperfections in the coating finish or to achieve complete coverage. This definition includes out-of-sequence or out-of-cycle coating.

Two-stage filter system means a dry particulate filter system using two layers of filter media to remove particulate. The first stage is designed to remove the bulk of the particulate and a higher efficiency second stage is designed to remove smaller particulate.

Type II etchant means a chemical milling etchant that is a strong sodium hydroxide solution containing amines (Type I etchants contain varying amounts of dissolved sulfur and do not contain amines).

Volatile organic compound (VOC) means any compound defined as VOC in 40 CFR 51.100. This includes any organic compound other than those determined by the EPA to be an exempt solvent. For purposes of determining compliance with emission limits, VOC will be measured by the approved test methods. Where such a method also inadvertently measures compounds that are exempt solvent, an owner or operator may exclude these exempt solvents when determining compliance with an emission standard.

Waterwash system means a control system that utilizes flowing water to remove particulate emissions from the exhaust air stream in spray coating application or dry media blast depainting operations.

Nomenclature for determining carbon adsorber efficiency—The nomenclature defined below is used in § 63.750(g):

(1) A_k = the area of each natural draft opening (k) in a total enclosure, in square meters.

(2) C_{aj} = the concentration of HAP or VOC in each gas stream (j) exiting the emission control device, in parts per million by volume.

(3) C_{bi} = the concentration of HAP or VOC in each gas stream (i) entering the emission control device, in parts per million by volume.

(4) C_{di} = the concentration of HAP or VOC in each gas stream (i) entering the emission control device from the affected source, in parts per million by volume.

(5) C_{fk} = the concentration of HAP or VOC in each uncontrolled gas stream (k) emitted directly to the atmosphere from the affected source, in parts per million by volume.

(6) C_{gv} = the concentration of HAP or VOC in each uncontrolled gas stream entering each individual carbon adsorber vessel (v), in parts per million by volume. For the purposes of calculating the efficiency of the individual carbon adsorber vessel, C_{gv} may be measured in the carbon adsorption system's common inlet duct prior to the branching of individual inlet ducts to the individual carbon adsorber vessels.

(7) C_{hv} = the concentration of HAP or VOC in the gas stream exiting each individual carbon adsorber vessel (v), in parts per million by volume.

(8) E = the control device efficiency achieved for the duration of the emission test (expressed as a fraction).

(9) F = the HAP or VOC emission capture efficiency of the HAP or VOC capture system achieved for the duration of the emission test (expressed as a fraction).

(10) FV = the average inward face velocity across all natural draft openings in a total enclosure, in meters per hour.

(11) H_v = the individual carbon adsorber vessel (v) efficiency achieved for the duration of the emission test (expressed as a fraction).

(12) H_{sys} = the efficiency of the carbon adsorption system calculated when each carbon adsorber vessel has an individual exhaust stack (expressed as a fraction).

(13) M_{ci} = the total mass in kilograms of each batch of coating (i) applied, or of each coating applied at an affected coating operation during a 7 to 30-day period, as appropriate, as determined from records at the affected source. This quantity shall be determined at a time and location in the process after all ingredients (including any dilution solvent) have been added to the coating, or if ingredients are added after the mass of the coating has been determined, appropriate adjustments shall be made to account for them.

(14) M_r = the total mass in kilograms of HAP or VOC recovered for a 7 to 30-day period.

(15) Q_{aj} = the volumetric flow rate of each gas stream (j) exiting the emission control device in either dry standard cubic meters per hour when EPA Method 18 in appendix A of part 60 is used to measure HAP or VOC concentration or in standard cubic meters per hour (wet basis) when EPA Method 25A is used to measure HAP or VOC concentration.

(16) Q_{bi} = the volumetric flow rate of each gas stream (i) entering the emission control device, in dry standard cubic meters per hour when EPA Method 18 is used to measure HAP or VOC concentration or in standard cubic meters per hour (wet basis) when EPA Method 25A is used to measure HAP or VOC concentration.

(17) Q_{di} = the volumetric flow rate of each gas stream (i) entering the emission control device from the affected source in either dry standard cubic meters per hour when EPA Method 18 is used to measure HAP or VOC concentration or in standard cubic meters per hour (wet basis) when EPA Method 25A is used to measure HAP or VOC concentration.

(18) Q_{fk} = the volumetric flow rate of each uncontrolled gas stream (k) emitted directly to the atmosphere from the affected source in either dry standard cubic meters per hour when EPA Method 18 is used to measure HAP or VOC concentration or in standard cubic meters per hour (wet basis) when EPA Method 25A is used to measure HAP or VOC concentration.

(19) Q_{gv} = the volumetric flow rate of each gas stream entering each individual carbon adsorber vessel (v) in either dry standard cubic meters per hour when EPA Method 18 is used to measure HAP or VOC concentration or in standard cubic meters per hour (wet basis) when EPA Method 25A is used to measure HAP or VOC concentration. For purposes of calculating the efficiency of the individual carbon adsorber vessel, the value of Q_{gv} can be assumed to equal the value of Q_{hv} measured for that carbon adsorber vessel.

(20) Q_{hv} = the volumetric flow rate of each gas stream exiting each individual carbon adsorber vessel (v) in either dry standard cubic meters per hour when EPA Method 18 is used to measure HAP or VOC concentration or in standard cubic meters per hour (wet basis) when EPA Method 25A is used to measure HAP or VOC concentration.

(21) Q_{ini} = the volumetric flow rate of each gas stream (i) entering the total enclosure through a forced makeup air duct in standard cubic meters per hour (wet basis).

(22) Q_{outj} = the volumetric flow rate of each gas stream (j) exiting the total enclosure through an exhaust duct or hood in standard cubic meters per hour (wet basis).

(23) R = the overall HAP or VOC emission reduction achieved for the duration of the emission test (expressed as a percentage).

(24) RS_i = the total mass in kilograms of HAP or VOC retained in the coating after drying.

(25) W_{oi} = the weight fraction of VOC in each batch of coating (i) applied, or of each coating applied at an affected coating operation during a 7- to 30-day period, as appropriate, as determined by EPA Method 24 or formulation data. This value shall be determined at a time and location in the process after all ingredients (including any dilution solvent) have been added to the coating, or if ingredients are added after the weight fraction of HAP or VOC in the coating has been determined, appropriate adjustments shall be made to account for them.

§ 63.743 Standards: General.

(a) Except as provided in paragraphs (a)(4) through (a)(9) of this section and in Table 2 (included in Appendix B to this subpart), each owner or operator of an affected source subject to this subpart is also subject to the following sections of subpart A of this part:

(1) § 63.4, Prohibited activities and circumvention;

(2) § 63.5, Construction and reconstruction; and

(3) § 63.6, Compliance with standards and maintenance requirements.

(4) For the purposes of this subpart, all affected sources shall submit any request for an extension of compliance not later than 120 days before the affected source's compliance date. The extension request should be requested for the shortest time necessary to attain compliance, but in no case shall exceed 1 year.

(5)(i) For the purposes of this subpart, the Administrator (or the State with an approved permit program) will notify the owner or operator in writing of his/her intention to deny approval of a request for an extension of compliance submitted under either § 63.6(i)(4) or § 63.6(i)(5) within 60 calendar days after receipt of sufficient information to evaluate the request.

(ii) In addition, for purposes of this subpart, if the Administrator does not notify the owner or operator in writing of his/her intention to deny approval within 60 calendar days after receipt of sufficient information to evaluate a request for an extension of compliance, then the request shall be considered approved.

(6)(i) For the purposes of this subpart, the Administrator (or the State) will notify the owner or operator in writing of the status of his/her application submitted under § 63.6(i)(4)(ii) (that is, whether the application contains sufficient information to make a determination) within 30 calendar days after receipt of the original application and within 30 calendar days after receipt of any supplementary information that is submitted, rather than 15 calendar days as provided for in § 63.6(i)(13)(i).

(ii) In addition, for the purposes of this subpart, if the Administrator does not notify the owner or operator in writing of the status of his/her application within 30 calendar days after receipt of the original application and within 30 calendar days after receipt of any supplementary information that is submitted, then the information in the application or the supplementary information is to be considered sufficient upon which to make a determination.

(7) For the purposes of this subpart, each owner or operator who has submitted an extension request application under § 63.6(i)(5) is to be provided 30 calendar days to present additional information or arguments to the Administrator after he/she is notified that the application is not complete, rather than 15 calendar days as provided for in § 63.6(i)(13)(ii).

(8) For the purposes of this subpart, each owner or operator is to be provided 30 calendar days to present additional information to the Administrator after he/she is notified of the intended denial of a compliance extension request submitted under either § 63.6(i)(4) or § 63.6(i)(5), rather than 15 calendar days as provided for in § 63.6(1)(12)(iii)(B) and § 63.6(i)(13)(iii)(B).

(9) For the purposes of this subpart, a final determination to deny any request for an extension submitted under either § 63.6(i)(4) or § 63.6(i)(5) will be made within 60 calendar days after presentation of additional information or argument (if the application is complete), or within 60 calendar days after the final date specified for the presentation if no presentation is made, rather than 30 calendar days as provided for in § 63.6(i)(12)(iv) and § 63.6(i)(13)(iv).

(b) *Operation and maintenance plan.* Each owner or operator that uses an air pollution control device or equipment to control HAP emissions shall prepare and operate in accordance with a startup, shutdown, and malfunction plan in accordance with § 63.6. Dry particulate filter systems operated per the manufacturer's instructions are exempt from a startup and shutdown plan. A startup and shutdown plan shall be prepared for facilities using locally prepared operating procedures. In addition to the information required in § 63.6, this plan shall also include the following provisions:

(1) The plan shall specify the operation and maintenance criteria for each air pollution control device or equipment and shall include a standardized checklist to document the operation and maintenance of the equipment;

(2) The plan shall include a systematic procedure for identifying malfunctions and for reporting them immediately to supervisory personnel; and

(3) The plan shall specify procedures to be followed to ensure that equipment or process malfunctions due to poor maintenance or other preventable conditions do not occur.

(c) An owner or operator who uses an air pollution control device or equipment not listed in this subpart shall submit a description of the device or equipment, test data verifying the performance of the device or equipment in controlling organic HAP and/or VOC emissions, as appropriate, specific operating parameters that will be monitored to establish compliance with the standards, and a copy of the operation and maintenance plan referenced in paragraph (b) of this section to the Administrator for approval.

§ 63.744 Standards: Cleaning operations.

(a) *Housekeeping measures.* Each owner or operator of a new or existing cleaning operation subject to this subpart shall comply with the requirements in this paragraphs unless the solvent used is classified as a cleaning solvent that contains no organic HAP or VOC as identified in Table 3.

TABLE 3.—COMPOSITION REQUIREMENTS FOR APPROVED CLEANING SOLVENTS

Cleaning solvent type	Composition requirements
Aqueous	Cleaning solvents in which water is the primary ingredient (≥80 percent of solvent solution as applied must be water). Detergents, surfactants, and bioenzyme mixtures and nutrients may be combined with the water along with a variety of additives such as organic solvents (e.g., high boiling point alcohols), builders, saponifiers, inhibitors, emulsifiers, pH buffers, and antifoaming agents. Aqueous solutions must have a flash point greater than 93 °C (200 °F) (as reported by the manufacturer) and the solution must be miscible with water.
Hydrocarbon-Based	Cleaners that are composed of a mixture of photochemically reactive hydrocarbons and oxygenated hydrocarbons and have a maximum vapor pressure of 7 mm Hg at 20 °C (3.75 in. H_2O at 68 °F). These cleaners also contain no HAP or ozone depleting compounds.

(1) Place solvent-laden cloth, paper, or any other absorbent applicators used for cleaning aerospace vehicles or components in bags or other closed containers immediately after use. Ensure that these bags and containers are kept closed at all times except when depositing or removing these materials from the container. Use bags and containers of such design so as to contain the vapors of the cleaning solvent. Cotton-tipped swabs used for very small cleaning operations are exempt from this requirement.

(2) Store fresh and spent cleaning solvents used in aerospace cleaning operations in closed containers.

(3) Conduct the handling and transfer of cleaning solvents to or from enclosed systems, vats, waste containers, and other cleaning operation equipment that hold or store fresh or spent cleaning solvents in such a manner that minimizes spills.

(b) *Hand-wipe cleaning.* Each owner or operator of a new or existing hand-wipe cleaning operation (excluding cleaning of spray gun equipment performed in accordance with paragraph (c)(3) of this section) subject to this subpart shall use cleaning solvents that meet one of the requirements specified in paragraphs (b)(1), (b)(2), and (b)(3) of this section. Cleaning solvent solutions that contain no HAP or VOC are exempt from the requirements in paragraphs (b)(1), (b)(2), and (b)(3).

(1) Meet one of the composition requirements in Table 3;

(2) Have a composite vapor pressure of 45 mm Hg (24.1 in. H_2O) or less at 20 °C (68 °F); or

(3) Demonstrate that the volume of hand-wipe solvents used in cleaning operations has been reduced by at least 60% from a baseline adjusted for production. The baseline shall be established as part of an approved alternative plan administered by the State. The alternative plan shall be submitted by the State under section 112(l) of the Act and approved by the Administrator, and shall demonstrate that the 60% volume reduction in cleaning solvents provides equivalent reductions to the requirements in paragraph (b)(1) or (b)(2).

(c) *Spray gun cleaning.* Each owner or operator of a new or existing spray gun cleaning operation subject to this subpart in which spray guns are used for the application of coatings or any other materials that require the spray guns to be cleaned shall use one or more of the techniques, or their equivalent, specified in paragraphs (c)(1) through (c)(4) of this section.

(1)(i) Enclosed system. Clean the spray gun in an enclosed system that is closed at all times except when inserting or removing the spray gun. Cleaning shall consist of forcing solvent through the gun.

(ii) If leaks are found during the monthly inspection required in § 63.751(a), repairs shall be made as soon as practicable, but no later than 15 days after the leak was found. If the leak is not repaired by the 15th day after detection, the solvent shall be removed and the enclosed cleaner shall be shut down until the leak is repaired or its use is permanently discontinued.

(2) Nonatomized cleaning. Clean the spray gun by placing solvent in the pressure pot and forcing it through the gun with the atomizing cap in place. No atomizing air is to be used. Direct the solvent from the spray gun into a vat, drum, or other waste container that is closed when not in use.

(3) Disassembled spray gun cleaning. Disassemble the spray gun and clean the components by hand in a vat, which shall remain closed at all times except when in use. Alternatively, soak the components in a vat, which shall remain closed during the soaking period and when not inserting or removing components.

(4) Atomizing cleaning. Clean the spray gun by forcing the solvent through the gun and direct the resulting atomized spray into a waste container that is fitted with a device designed to capture the atomized solvent emissions.

(d) *Flush cleaning.* Each owner or operator of a flush cleaning operation subject to this subpart (excluding those in which Table 3 or semi-aqueous cleaning solvents are used) shall empty the used cleaning solvent each time an aerospace part or assembly, or a component of a coating unit (with the exception of spray guns) is flush cleaned into an enclosed container or collection system that is kept closed when not in use or into a system with equivalent emission control.

(e) *Exempt cleaning operations.* The following cleaning operations are exempt from the requirements of paragraph (b) of this section:

(1) Cleaning during the manufacture, assembly, installation, or testing of components of breathing oxygen systems that are exposed to the breathing oxygen;

(2) Cleaning during the manufacture, assembly, installation, or testing of parts, subassemblies, or assemblies that are exposed to strong oxidizers or reducers (e.g., nitrogen tetroxide, liquid oxygen, or hydrazine);

(3) Cleaning and surface activation prior to adhesive bonding;

(4) Cleaning of electronic parts and assemblies containing electronic parts;

(5) Cleaning of aircraft and ground support equipment fluid systems that are exposed to the fluid, including air-to-air heat exchangers and hydraulic fluid systems;

(6) Cleaning of fuel cells, fuel tanks, and confined spaces;

(7) Surface cleaning of solar cells, coated optics, and thermal control surfaces;

(8) Cleaning during fabrication, assembly, installation, and maintenance of upholstery, curtains, carpet, and other textile materials used in the interior of the aircraft;

(9) Cleaning of metallic and non-metallic materials used in honeycomb cores during the manufacture of these cores, and cleaning of the completed cores used in the manufacture of aerospace vehicles or components;

(10) Cleaning of polycarbonate or glass substrates; and

(11) Cleaning and solvent usage associated with research and development, quality control, and laboratory testing.

(12) Cleaning operations, using nonflamable liquids, conducted within five feet of energized electrical systems. Energized electrical systems means any AC or DC electrical circuit on an assembled aircraft once electrical power is connected, including interior passenger and cargo areas, wheel wells and tail sections.

§ 63.745 Standards: Primer and topcoat application operations.

(a) Each owner or operator of a new or existing primer or topcoat application operation subject to this subpart shall comply with the requirements specified in paragraph (c) of this section for those coatings that are uncontrolled (no control device is used to reduce organic HAP emissions from the operation), and in paragraph (d) of this section for those coatings that are controlled (organic HAP emissions from the operation are reduced by the use of a control device). Aerospace equipment that is no longer operational, intended for public display, and not easily capable of being moved is exempt from the requirements of this section.

(b) Each owner or operator shall conduct the handling and transfer of primers and topcoats to or from containers, tanks, vats, vessels, and piping systems in such a manner that minimizes spills.

(c) *Uncontrolled coatings—organic HAP and VOC content levels.* Each owner or operator shall comply with the organic HAP and VOC content limits specified in paragraphs (c)(1) through (c)(4) of this section for those coatings that are uncontrolled.

(1) Organic HAP emissions from primers shall be limited to an organic HAP content level of no more than 350 g/l (2.9 lb/gal) of primer (less water) as applied.

(2) VOC emissions from primers shall be limited to an VOC content level of no more than 350 g/l (2.9 lb/gal) of primer (less water and exempt solvents) as applied.

(3) Organic HAP emissions from topcoats shall be limited to an organic HAP content level of no more than 420 g/l (3.5 lb/gal) of coating (less water) as applied. Organic HAP emissions from self-priming topcoats shall be limited to an organic HAP content level of no more than 420 g/l (3.5 lb/gal) of self-priming topcoat (less water) as applied.

(4) VOC emissions from topcoats shall be limited to a VOC content level of no more than 420 g/l (3.5 lb/gal) of coating (less water and exempt solvents) as applied. VOC emissions from self-priming topcoats shall be limited to a VOC content level of no more than 420 g/l (3.5 lb/gal) of self-priming topcoat (less water and exempt solvents) as applied.

(d) *Controlled coatings—control system requirements.* Each control system shall reduce the operation's organic HAP and VOC emissions to the atmosphere by 81% or greater, taking into account capture and destruction or removal efficiencies, as determined using the procedures in § 63.750(g) when a carbon adsorber is used and in § 63.750(h) when a control device other than a carbon adsorber is used.

(e) *Compliance methods.* Compliance with the organic HAP and VOC content limits specified in paragraphs (c)(1) through (c)(4) of this section shall be accomplished by using the methods specified in paragraphs (e)(1) and (e)(2) of this section either by themselves or in conjunction with one another.

(1) Use primers and topcoats with HAP and VOC content levels equal to or less than the limits specified in paragraphs (c)(1) through (c)(4) of this section.

(2)(i) Use any combination of primers or topcoats such that the monthly volume-weighted average organic HAP and VOC contents of the combination of primers or topcoats comply with the specified content limits, unless the permitting agency specifies a shorter averaging period as part of an ambient ozone control program.

(ii) Averaging primers together with topcoats is prohibited under this subsection.

(iii) Averaging is allowed only for uncontrolled primers or topcoats.

(iv) Each averaging scheme shall be approved in advance by the permitting agency and be adopted as part of the facility's title V permit.

(f) *Application Equipment.* Except as provided in paragraph (f)(3) of this section, each owner or operator of a new or existing primer or topcoat application operation subject to this subpart in which any of the coatings contain organic HAP or VOC shall comply with the requirements specified in paragraphs (f)(1) and (f)(2) of this section.

(1) All primers and topcoats shall be applied using one or more of the application techniques specified in paragraphs (f)(1)(i) through (f)(1)(viii) of this section.

(i) Flow/curtain coat application;

(ii) Dip coat application;

(iii) Roll coating;

(iv) Brush coating;

(v) Cotton-tipped swab application;

(vi) Electrodeposition (dip) coating;

(vii) High volume low pressure (HVLP) spraying;

(viii) Electrostatic spray application; or

(ix) Other coating application methods that achieve emission reductions equivalent to HVLP or electrostatic spray application methods, as determined according to the requirements in § 63.750(i).

(2) All application devices used to apply primers or topcoats shall be operated according to company procedures, local specified operating procedures, and/or the manufacturer's specifications, whichever is most stringent, at all times. Equipment modified by the facility shall maintain a transfer efficiency equivalent to HVLP and electrostatic spray application techniques.

(3) The following situations are exempt from the requirements of paragraph (f)(1) of this section:

(i) Any situation that normally requires the use of an airbrush or an extension on the spray gun to properly reach limited access spaces;

(ii) The application of coatings that contain fillers that adversely affect atomization with HVLP spray guns and that the permitting agency has determined cannot be applied by any of the application methods specified in paragraph (f)(1) of this section;

(iii) The application of coatings that normally have a dried film thickness of

less than 0.0013 centimeter (0.0005 in.) and that the permitting agency has determined cannot be applied by any of the application methods specified in paragraph (f)(1) of this section;

(iv) The use of airbrush application methods for stenciling, lettering, and other identification markings;

(v) The use of hand-held spray can application methods; and

(vi) Touch-up and repair operations.

(g) *Inorganic HAP emissions.* Except as provided in paragraph (g)(4) of this section, each owner or operator of a new or existing primer or topcoat application operation subject to this subpart in which any of the coatings that are spray applied contain inorganic HAP, shall comply with the applicable requirements in paragraphs (g)(1) through (g)(3) of this section.

(1) Apply these coatings in a booth or hangar in which air flow is directed downward onto or across the part or assembly being coated and exhausted through one or more outlets.

(2) Control the air stream from this operation as follows:

(i) For existing sources, pass the air stream through either a dry particulate filter system or a waterwash system before exhausting it to the atmosphere.

(ii) Waterwash booths shall remain in operation during all coating application operations.

(iii) Dry filter booths shall include two-stage filter systems or the equivalent, as determined by the permitting agency.

(iv) For new sources, pass the air stream through either a two-stage dry particulate filter system or a waterwash system before exhausting it to the atmosphere. If the primer or topcoat contains chromium or cadmium, control shall consist of either a three-stage filter system, HEPA filter system, or other equivalent control system as approved by the permitting agency.

(v) If a dry particulate filter system is used, the following requirements shall be met:

(A) Maintain the system in good working order;

(B) Install a differential pressure gauge across the filter banks;

(C) Continuously monitor the pressure drop across the filter; and

(D) Take corrective action when the pressure drop exceeds or falls below the filter manufacturer's recommended limit(s).

(vi) If a waterwash system is used, continuously monitor the water flow rate.

(3) If the pressure drop across the dry particulate filter system, as recorded pursuant to § 63.752(d)(1), is outside the limit(s) specified by the filter manufacturer or in locally prepared operating procedures, shut down the operation immediately and take corrective action. If the water path in the waterwash system fails the visual continuity/flow characteristics check, or the water flow rate recorded pursuant to § 63.752(d)(2) exceeds the limit(s) specified by the booth manufacturer or in locally prepared operating procedures, or the booth manufacturer's or locally prepared maintenance procedures for the filter or waterwash system have not been performed as scheduled, shut down the operation immediately and take corrective action. The operation shall not be resumed until the pressure drop or water flow rate is returned within the specified limit(s).

(4) The requirements of paragraphs (g)(1) through (g)(3) of this section do not apply to the following:

(i) Touch-up of scratched surfaces or damaged paint;

(ii) Hole daubing for fasteners;

(iii) Touch-up of trimmed edges;

(iv) Coating prior to joining dissimilar metal components;

(v) Stencil operations performed by brush or air brush;

(vi) Section joining;

(vii) Touch-up of bushings and other similar parts;

(viii) Sealant detackifying; and

(ix) Painting parts in an area identified in a title V permit, where the permitting authority has determined that it is not technically feasible to paint the parts in a booth.

§ 63.746 Standards: Depainting Operations.

(a) *Applicability.* Each owner or operator of a new or existing depainting operation subject to this subpart shall comply with the requirements in paragraphs (a)(1) through (a)(3) of this section, and with the requirements specified in paragraph (b) where there are no controls for organic HAP, or paragraph (c) where organic HAP are controlled using a control system. This subpart does not apply to an aerospace manufacturing facility that depaints 6 or less completed aerospace vehicles in a calendar year.

(1) The provisions of this section apply to the depainting of the outer surface areas of completed aerospace vehicles, including the fuselage, wings, and vertical and horizontal stabilizers of the aircraft, and the outer casing and stabilizers of missiles and rockets. These provisions do not apply to the depainting of parts or units normally removed from the aerospace vehicle for depainting. However, depainting of wings and stabilizers is always subject to the requirements of this section regardless of whether their removal is considered by the owner or operator to be normal practice for depainting.

(2) Aerospace vehicles or components that are intended for public display, no longer operational, and not easily capable of being moved are exempt from the requirements of this section.

(3) The following depainting operations are exempt from the requirements of this section:

(i) Depainting of radomes; and

(ii) Depainting of parts, subassemblies, and assemblies normally removed from the primary aircraft structure before depainting.

(b)(1) *HAP emissions—non-HAP chemical strippers and technologies.* Except as provided in paragraph (b)(3) of this section, each owner or operator of a new or existing aerospace depainting operation subject to this subpart shall emit no organic HAP from chemical stripping formulations and agents or chemical paint softeners.

(2) Where non-chemical based equipment is used to comply with paragraph (b)(1) of this section, either in total or in part, each owner or operator shall operate and maintain the equipment according to the manufacturer's specifications or locally prepared operating procedures. During periods of malfunctions of such equipment, each owner or operator may use substitute materials during the repair period provided the substitute materials used are those available that minimize organic HAP emissions. In no event shall substitute materials be used for more than 15 days annually, unless such materials are organic HAP-free.

(3) Each owner or operator of a new or existing depainting operation complying with paragraph (b)(1) shall not, on an annual average basis, use more than 26 gallons of organic HAP-containing chemical strippers per commercial aircraft depainted or more than 50 gallons of organic HAP-containing chemical strippers per military aircraft depainted for spot stripping and decal removal.

(4) Each owner or operator of a new or existing depainting operation complying with paragraph (b)(2), that generates airborne inorganic HAP emissions from dry media blasting equipment, shall also comply with the requirements specified in paragraphs (b)(4)(i) through (b)(4)(v) of this section.

(i) Perform the depainting operation in an enclosed area.

(ii) Pass any air stream removed from the enclosed area through a dry particulate filter system, baghouse, or waterwash system before exhausting it to the atmosphere.

(iii) If a dry particulate filter system is used, the following requirements shall be met:

(A) Maintain the system in good working order;

(B) Install a differential pressure gauge across the filter banks;

(C) Continuously monitor the pressure drop across the filter; and

(D) Take corrective action when the pressure drop exceeds or falls below the filter manufacturer's recommended limits.

(iv) If a waterwash system is used, continuously monitor the water flow rate.

(v) If the pressure drop, as recorded pursuant to § 63.752(e)(7), is outside the limit(s) specified by the filter manufacturer or in locally prepared operating procedures, whichever is more stringent, shut down the operation immediately and take corrective action. If the water path in the waterwash system fails the visual continuity/flow characteristics check as recorded pursuant to § 63.752(e)(7), or the water flow rate, as recorded pursuant to § 63.752(d)(2), exceeds the limit(s) specified by the booth manufacturer or in locally prepared operating procedures, or the booth manufacturer's or locally prepared maintenance procedures for the filter or waterwash system have not been performed as scheduled, shut down the operation immediately and take corrective action. The operation shall not be resumed until the pressure drop or water flow rate is returned within the specified limit(s).

(5) Mechanical and hand sanding operations are exempt from the requirements in paragraph (b)(4) of this section.

(c) *Organic HAP emissions—organic HAP-containing chemical strippers.* Each owner or operator of a new or existing organic HAP-containing chemical stripper depainting operation subject to this subpart shall comply with the requirements specified in this paragraph.

(1) All organic HAP emissions from the operation shall be reduced by the use of a control system. Each control system that was installed before the effective date shall reduce the operations' organic HAP emissions to the atmosphere by 81% or greater, taking into account capture and destruction or removal efficiencies, as determined using the procedures in § 63.750(g) when a carbon adsorber is used or § 63.750(h) when a control device other than a carbon adsorber is used. Each control system installed on or after the effective date shall reduce organic HAP emissions to the atmosphere by 95% or greater. Reduction shall take into account capture and destruction or removal efficiencies, and the volume of chemical stripper used (e.g., the 95% efficiency may be achieved by controlling emissions at 81% efficiency with a control system and using 74% less stripper than in baseline applications). The baseline shall be calculated using data from 1996 and 1997, which shall be on a usage per aircraft or usage per square foot of surface basis.

§ 63.747 Standards: Chemical milling maskant application operations.

(a) Each owner or operator of a new or existing chemical milling maskant operation subject to this subpart shall comply with the requirements specified in paragraph (c) of this section for those chemical milling maskants that are uncontrolled (no control device is used to reduce organic HAP emissions from the operation) and in paragraph (d) of this section for those chemical milling maskants that are controlled (organic HAP emissions from the operation are reduced by the use of a control device).

(b) Each owner or operator shall conduct the handling and transfer of chemical milling maskants to or from containers, tanks, vats, vessels, and piping systems in such a manner that minimizes spills.

(c) *Uncontrolled maskants—organic HAP and VOC content levels.* Each owner or operator shall comply with the organic HAP and VOC content limits specified in paragraphs (c)(1) and (c)(2) of this section for each chemical milling maskant that is uncontrolled.

(1) Organic HAP emissions from chemical milling maskants shall be limited to an organic HAP content level of no more than 160 grams of organic HAP per liter (1.3 lb/gal) of chemical milling maskant (less water) as applied.

(2) VOC emissions from chemical milling maskants shall be limited to a VOC content level of no more than 160 grams of VOC per liter (1.3 lb/gal) of chemical milling maskant (less water and exempt solvents) as applied.

(3) The requirements of paragraphs (c)(1) and (c)(2) of this section do not apply to the following:

(i) Touch-up of scratched surfaces or damaged maskant; and

(ii) Touch-up of trimmed edges.

(d) *Controlled maskants—control system requirements.* Each control system shall reduce the operation's organic HAP and VOC emissions to the atmosphere by 81% or greater, taking into account capture and destruction or removal efficiencies, as determined using the procedures in § 63.750(g) when a carbon adsorber is used and in § 63.750(h) when a control device other than a carbon adsorber is used.

(e) *Compliance methods.* Compliance with the organic HAP and VOC content limits specified in paragraphs (c)(1) and (c)(2) of this section may be accomplished by using the methods specified in paragraphs (e)(1) and (e)(2) of this section either by themselves or in conjunction with one another.

(1) Use chemical milling maskants with HAP and VOC content levels equal to or less than the limits specified in paragraphs (c)(1) and (c)(2) of this section.

(2)(i) Use any combination of chemical milling maskants such that the monthly volume-weighted average organic HAP and VOC contents of the maskants comply with the specified content limits, unless the permitting agency specifies a shorter averaging period as part of an ambient ozone control program.

(ii) Averaging is allowed only for uncontrolled chemical milling maskants.

(iii) Each averaging scheme shall be approved in advance by the permitting agency and be adopted as part of the facility's title V permit.

§ 63.748 Standards: Handling and storage of waste.

Except as provided in § 63.741(e), the owner or operator of each facility subject to this subpart that produces a waste that contains HAP shall conduct the handling and transfer of the waste to or from containers, tanks, vats, vessels, and piping systems in such a manner that minimizes spills.

§ 63.749 Compliance dates and determinations.

(a) *Compliance dates.* Each owner or operator of an existing source subject to this subpart shall comply with the requirements of this subpart within 3 years after the effective date. Owners or operators of new sources subject to this subpart shall comply on the effective date or upon startup, whichever is later. In addition, each owner or operator shall comply with the compliance dates specified in § 63.6(b) and § 63.6(c).

(b) *General.* Each facility subject to this subpart shall be considered in noncompliance if the owner or operator fails to submit an operation and maintenance plan as required by § 63.743(b) or uses a control device other than one specified in this subpart that has not been approved by the Administrator, as required by § 63.743(c).

(c) *Cleaning operations.* Each cleaning operation subject to this subpart shall be considered in noncompliance if the owner or operator fails to institute and carry out the housekeeping measures required under § 63.744(a). Incidental emissions resulting from the activation of pressure release vents and valves on enclosed cleaning systems are exempt from this paragraph.

(1) *Hand-wipe cleaning.* An affected hand-wipe cleaning operation shall be considered in compliance when all hand-wipe cleaning solvents, excluding those used for hand cleaning of spray gun equipment under § 63.744(c)(3), meet either the composition requirements specified in § 63.744(b)(1) or the vapor pressure requirement specified in § 63.744(b)(2).

(2) *Spray gun cleaning.* An affected spray gun cleaning operation shall be considered in compliance when each of the following conditions is met:

(i) One of the four techniques specified in § 63.744 (c)(1) through (c)(4) is used;

(ii) The technique selected is operated according to the procedures specified in § 63.744 (c)(1) through (c)(4) as appropriate; and

(iii) If an enclosed system is used, monthly visual inspections are conducted and any leak detected is repaired within 15 days after detection. If the leak is not repaired by the 15th day after detection, the solvent shall be removed and the enclosed cleaner shall be shut down until the cleaner is repaired or its use is permanently discontinued.

(3) *Flush cleaning.* An affected flush cleaning operation shall be considered in compliance if the operating requirements specified in § 63.744(d) are implemented and carried out.

(d) *Organic HAP and VOC content levels—primer and topcoat application operations.*

(1) *Performance test periods.* For uncontrolled coatings that are not averaged, each 24 hours is considered a performance test. For compliant and non-compliant coatings that are averaged together, each 30-day period is considered a performance test, unless the permitting agency specifies a shorter averaging period as part of an ambient ozone control program. When using a control device other than a carbon adsorber, three 1-hour runs constitute the test period for the initial and any subsequent performance test. When using a carbon adsorber, each rolling material balance period is considered a performance test.

(2) *Initial performance tests.* If a control device is used, each owner or operator shall conduct an initial performance test to demonstrate compliance with the overall reduction efficiency specified in paragraph § 63.745, unless a waiver is obtained under either § 63.7(e)(2)(iv) or § 63.7(h). The initial performance test shall be conducted according to the procedures and test methods specified in § 63.7 and § 63.750(g) for carbon adsorbers and in § 63.750(h) for control devices other than carbon adsorbers. For carbon adsorbers, the initial performance test shall be used to establish the appropriate rolling material balance period for determining compliance. The procedures in paragraphs (d)(2)(i) through (d)(2)(vi) of this section shall be used in determining initial compliance with the provisions of this subpart for carbon adsorbers.

(i)(A) When either EPA Method 18 or EPA Method 25A is to be used in the determination of the efficiency of a fixed-bed carbon adsorption system with a common exhaust stack for all the individual carbon adsorber vessels pursuant to § 63.750(g) (2) or (4), the test shall consist of three separate runs, each coinciding with one or more complete sequences through the adsorption cycles of all of the individual carbon adsorber vessels.

(B) When either EPA Method 18 or EPA Method 25A is to be used in the determination of the efficiency of a fixed-bed carbon adsorption system with individual exhaust stacks for each carbon adsorber vessel pursuant to § 63.750(g) (3) or (4), each carbon adsorber vessel shall be tested individually. The test for each carbon adsorber vessel shall consist of three separate runs. Each run shall coincide with one or more complete adsorption cycles.

(ii) EPA Method 1 or 1A of appendix A of part 60 is used for sample and velocity traverses.

(iii) EPA Method 2, 2A, 2C, or 2D of appendix A of part 60 is used for velocity and volumetric flow rates.

(iv) EPA Method 3 of appendix A of part 60 is used for gas analysis.

(v) EPA Method 4 of appendix A of part 60 is used for stack gas moisture.

(vi) EPA Methods 2, 2A, 2C, 2D, 3, and 4 shall be performed, as applicable, at least twice during each test period.

(3) The primer application operation is considered in compliance when the conditions specified in paragraphs (d)(3)(i) through (d)(3)(iv) of this section, as applicable, and in paragraph (e) of this section are met. Failure to meet any one of the conditions identified in these paragraphs shall constitute noncompliance.

(i) For all uncontrolled primers, all values of H_i and H_a (as determined using the procedures specified in § 63.750 (c) and (d)) are less than or equal to 350 grams of organic HAP per liter (2.9 lb/gal) of primer (less water) as applied, and all values of G_i and G_a (as determined using the procedures specified in § 63.750 (e) and (f)) are less than or equal to 350 grams of organic VOC per liter (2.9 lb/gal) of primer (less water and exempt solvents) as applied.

(ii) If a control device is used:

(A) The overall control system efficiency, E_k, as determined using the procedures specified in § 63.750(g) for control systems containing carbon adsorbers and in § 63.750(h) for control systems with other control devices, is equal to or greater than 81% during the initial performance test and any subsequent performance test;

(B) If an incinerator other than a catalytic incinerator is used, the average combustion temperature for all 3-hour periods is greater than or equal to the average combustion temperature established under § 63.751(b)(11); and

(C) If a catalytic incinerator is used, the average combustion temperatures for all 3-hour periods are greater than or equal to the average combustion temperatures established under § 63.751(b)(12).

(iii)(A) Uses an application technique specified in § 63.745 (f)(1)(i) through (f)(1)(viii), or

(B) Uses an alternative application technique, as allowed under § 63.745(f)(1)(ix), such that the emissions of both organic HAP and VOC for the implementation period of the alternative application method are less than or equal to the emissions generated during the initial 30-day period, the period of time required to apply primer to five completely assembled aircraft, or a time period approved by the permitting agency, using HVLP or electrostatic spray application methods as determined using the procedures specified in § 63.750(i).

(iv) Operates all application techniques in accordance with the manufacturer's specifications or locally prepared operating procedures, whichever is more stringent.

(4) The topcoat application operation is considered in compliance when the conditions specified in paragraphs (e)(4)(i) through (e)(4)(iv) of this section, as applicable, and in paragraph (f) of this section are met. Failure to meet any of the conditions identified in these paragraphs shall constitute noncompliance.

(i) For all uncontrolled topcoats, all values of H_i and H_a(as determined using the procedures specified in § 63.750(c) and (d)) are less than or equal to 420 grams organic HAP per liter (3.5 lb/gal) of topcoat (less water) as applied, and all values of G_i and G_a (as determined using the procedures specified in

§ 63.750(e) and (f)) are less than or equal to 420 grams organic VOC per liter (3.5 lb/gal) of topcoat (less water and exempt solvents) as applied.

(ii) If a control device is used,

(A) The overall control system efficiency, E_k, as determined using the procedures specified in § 63.750(g) for control systems containing carbon adsorbers and in § 63.750(h) for control systems with other control devices, is equal to or greater than 81% during the initial performance test and any subsequent performance test;

(B) If an incinerator other than a catalytic incinerator is used, the average combustion temperature for all 3-hour periods is greater than or equal to the average combustion temperature established under § 63.751(b)(11); and

(C) If a catalytic incinerator is used, the average combustion temperatures for all 3-hour periods are greater than or equal to the average combustion temperatures established under § 63.751(b)(12).

(iii)(A) Uses an application technique specified in § 63.745(f)(1)(i) through (f)(1)(ix) or

(B) Uses an alternative application technique as allowed under § 63.745(f)(1)(ix) such that the emissions of both organic HAP and VOC for the implementation period of the alternative application method are less than or equal to the emissions generated during the initial 30-day period, the period of time required to apply topcoat to five completely assembled aircraft, or a time period approved by the permitting agency, using HVLP or electrostatic spray application methods as determined using the procedures specified in § 63.750(i).

(iv) Operates all application techniques in accordance with the manufacturer's specifications or locally prepared operating procedures.

(e) *Inorganic HAP emissions—primer and topcoat application operations.* For each primer or topcoat application operation that emits inorganic HAP, the operation is in compliance when:

(1) It is operated according to the requirements specified in § 63.745(g)(1) through (g)(3); and

(2) It is shut down immediately whenever the pressure drop or water flow rate is outside the limit(s) established for them and is not restarted until the pressure drop or water flow rate is returned within these limit(s), as required under § 63.745(g)(3).

(f) *Organic HAP emissions—Depainting operations.*

(1) *Performance test periods.* When using a control device other than a carbon adsorber, three 1-hour runs constitute the test period for the initial and any subsequent performance test. When a carbon adsorber is used, each rolling material balance period is considered a performance test. Each 24-hour period is considered a performance test period for determining compliance with § 63.746(b)(1). For uncontrolled organic emissions from depainting operations, each calendar year is considered a performance test period for determining compliance with the HAP limits for organic HAP-containing chemical strippers used for spot stripping and decal removal.

(2) *Initial performance tests.* If a control device is used, each owner or operator shall conduct an initial performance test to demonstrate compliance with the overall reduction efficiency specified in § 63.746(c), unless a waiver is obtained under either § 63.7(e)(2)(iv) or § 63.7(h). The initial performance test shall be conducted according to the procedures and test methods specified in § 63.7 and § 63.750(g) for carbon adsorbers and in § 63.750(h) for control devices other than carbon adsorbers. For carbon adsorbers, the initial performance test shall be used to establish the appropriate rolling material balance period for determining compliance. The procedures in paragraphs (2)(i) through (2)(vi) of this section shall be used in determining initial compliance with the provisions of this subpart for carbon adsorbers.

(i)(A) When either EPA Method 18 or EPA Method 25A is to be used in the determination of the efficiency of a fixed-bed carbon adsorption system with a common exhaust stack for all the individual carbon adsorber vessels pursuant to § 63.750(g)(2) or (4), the test shall consist of three separate runs, each coinciding with one or more complete sequences through the adsorption cycles of all of the individual carbon adsorber vessels.

(B) When either EPA Method 18 or EPA Method 25A is to be used in the determination of the efficiency of a fixed-bed carbon adsorption system with individual exhaust stacks for each carbon adsorber vessel pursuant to § 63.750(g) (3) or (4), each carbon adsorber vessel shall be tested individually. The test for each carbon adsorber vessel shall consist of three separate runs. Each run shall coincide with one or more complete adsorption cycles.

(ii) EPA Method 1 or 1A of appendix A of part 60 is used for sample and velocity traverses.

(iii) EPA Method 2, 2A, 2C, or 2D of appendix A of part 60 is used for velocity and volumetric flow rates.

(iv) EPA Method 3 of appendix A of part 60 is used for gas analysis.

(v) EPA Method 4 of appendix A of part 60 is used for stack gas moisture.

(vi) EPA Methods 2, 2A, 2C, 2D, 3, and 4 shall be performed, as applicable, at least twice during each test period.

(3) An organic HAP-containing chemical stripper depainting operation is considered in compliance when the conditions specified in paragraph (g)(3)(i) of this section are met.

(i) If a carbon adsorber (or other control device) is used, the overall control efficiency of the control system, as determined using the procedures specified in § 63.750(g) (or other control device as determined using the procedures specified in § 63.750(h)), is equal to or greater than 81% for control systems installed before the effective date, or equal to or greater than 95% for control systems installed on or after the effective date, during the initial performance test and all subsequent material balances (or performance tests, as appropriate).

(ii) For non-HAP depainting operations complying with § 63.746(b)(1);

(A) For any spot stripping and decal removal, the value of C, as determined using the procedures specified in § 63.750(j), is less than or equal to 26 gallons of organic HAP-containing chemical stripper per aircraft depainted for commercial aircraft and is less than or equal to 50 gallons of organic HAP-containing chemical stripper per aircraft depainted for military aircraft calculated on a yearly average; and

(B) The requirements of § 63.746(b)(2) are carried out during malfunctions of non-chemical based equipment.

(g) *Inorganic HAP emissions—depainting operations.* Each depainting operation is in compliance when:

(1) The operating requirements specified in § 63.746(b)(4) are followed; and

(2) It is shut down immediately whenever the pressure drop or water flow rate is outside the limit(s) established for them and is not restarted until the pressure drop or water flow rate is returned within these limit(s), as required under § 63.746(b)(4)(v).

(h) *Chemical milling maskant application operations.*—(1) *Performance test periods.* For uncontrolled chemical milling maskants that are not averaged, each 24-hour period is considered a performance test. For compliant and noncompliant chemical milling maskants that are averaged together, each 30-day period is considered a performance test, unless the permitting agency specifies a shorter period as part of an ambient ozone

control program. When using a control device other than a carbon adsorber, three 1-hour runs constitute the test period for the initial and any subsequent performance test. When a carbon adsorber is used, each rolling material balance period is considered a performance test.

(2) *Initial performance tests.* If a control device is used, each owner or operator shall conduct an initial performance test to demonstrate compliance with the overall reduction efficiency specified in § 63.747(d), unless a waiver is obtained under either § 63.7(e)(2)(iv) or § 63.7(h). The initial performance test shall be conducted according to the procedures and test methods specified in § 63.7 and § 63.750(g) for carbon adsorbers and in § 63.750(h) for control devices other than carbon adsorbers. For carbon adsorbers, the initial performance test shall be used to establish the appropriate rolling material balance period for determining compliance. The procedures in paragraphs (h)(2) (i) through (vi) of this section shall be used in determining initial compliance with the provisions of this subpart for carbon adsorbers.

(i)(A) When either EPA Method 18 or EPA Method 25A is to be used in the determination of the efficiency of a fixed-bed carbon adsorption system with a common exhaust stack for all the individual carbon adsorber vessels pursuant to § 63.750(g) (2) or (4), the test shall consist of three separate runs, each coinciding with one or more complete sequences through the adsorption cycles of all of the individual carbon adsorber vessels.

(B) When either EPA Method 18 or EPA Method 25A is to be used in the determination of the efficiency of a fixed-bed carbon adsorption system with individual exhaust stacks for each carbon adsorber vessel pursuant to § 63.750(g) (3) or (4), each carbon adsorber vessel shall be tested individually. The test for each carbon adsorber vessel shall consist of three separate runs. Each run shall coincide with one or more complete adsorption cycles.

(ii) EPA Method 1 or 1A of appendix A of part 60 is used for sample and velocity traverses.

(iii) EPA Method 2, 2A, 2C, or 2D of appendix A of part 60 is used for velocity and volumetric flow rates.

(iv) EPA Method 3 of appendix A of part 60 is used for gas analysis.

(v) EPA Method 4 of appendix A of part 60 is used for stack gas moisture.

(vi) EPA Methods 2, 2A, 2C, 2D, 3, and 4 shall be performed, as applicable, at least twice during each test period.

(3) The chemical milling maskant application operation is considered in compliance when the conditions specified in paragraphs (i)(3)(i) and (i)(3)(ii) of this section are met.

(i) For all uncontrolled chemical milling maskants, all values of H_i and H_a (as determined using the procedures specified in § 63.750 (k) and (l)) are less than or equal to 160 grams of organic HAP per liter (1.3 lb/gal) as applied (less water) and all values of G_i and G_a (as determined using the procedures specified in § 63.750 (m) and (n)) are less than or equal to 160 grams of VOC per liter (1.3 lb/gal) of chemical milling maskant (less water and exempt solvents) as applied.

(ii) If a carbon adsorber (or other control device) is used, the overall control efficiency of the control system, as determined using the procedures specified in § 63.750(g) (or systems with other control devices as determined using the procedures specified in § 63.750(h)), is equal to or greater than 81% during the initial performance test period and all subsequent material balances (or performance tests, as appropriate).

(i) *Handling and storage of waste.* For those wastes subject to this subpart, failure to comply with the requirements specified in § 63.748 shall be considered a violation.

§ 63.750 Test methods and procedures.

(a) *Composition determination.* Compliance with the hand-wipe cleaning solvent approved composition list specified in § 63.744(b)(1) for hand-wipe cleaning solvents shall be demonstrated using data supplied by the manufacturer of the cleaning solvent. The data shall identify all components of the cleaning solvent and shall demonstrate that one of the approved composition definitions is met.

(b) *Vapor pressure determination.* The composite vapor pressure of hand-wipe cleaning solvents used in a cleaning operation subject to this subpart shall be determined as follows:

(1) For single-component hand-wipe cleaning solvents, the vapor pressure shall be determined using MSDS or other manufacturer's data, standard engineering reference texts, or other equivalent methods.

(2) The composite vapor pressure of a blended hand-wipe solvent shall be determined by quantifying the amount of each organic compound in the blend using manufacturer's supplied data or a gas chromatographic analysis in accordance with ASTM E 260–91 (incorporated by reference as specified in § 63.14 of subpart A of this part) and by calculating the composite vapor pressure of the solvent by summing the partial pressures of each component. The vapor pressure of each component shall be determined using manufacturer's data, standard engineering reference texts, or other equivalent methods. The following equation shall be used to determine the composite vapor pressure:

$$PP_c=\sum_{i=1}^{n}\frac{(W_i)(VP_i)/MW_i}{\dfrac{W_w}{MW_w}+\dfrac{W_e}{MW_e}+\sum_{i=1}^{n}\dfrac{W_i}{MW_i}}$$

where:

W_i=Weight of the "i"th VOC compound, grams.
W_w=Weight of water, grams.
W_e=Weight of non-HAP, nonVOC compound, grams.
MW_i=Molecular weight of the "i"th VOC compound, g/g-mole.
MW_w=Molecular weight of water, g/g-mole.
MW_e=Molecular weight of exempt compound, g/g-mole.
PP_c=VOC composite partial pressure at 20 °C, mm Hg.
VP_i=Vapor pressure of the "i"th VOC compound at 20 °C, mm Hg.

(c) *Organic HAP content level determination—compliant primers and topcoats.* For those uncontrolled primers and topcoats complying with the primer and topcoat organic HAP content limits specified in § 63.745(c) without being averaged, the following procedures shall be used to determine the mass of organic HAP emitted per volume of coating (less water) as applied.

(1) For coatings that contain no exempt solvents, determine the total organic HAP content using manufacturer's supplied data or Method 24 of 40 CFR part 60, appendix A to determine the VOC content. The VOC content shall be used as a surrogate for total HAP content for coatings that contain no exempt solvent. If there is a discrepancy between the manufacturer's formulation data and the results of the Method 24 analysis, compliance shall be based on the results from the Method 24 analysis.

When Method 24 is used to determine the VOC content of water-reducible coatings, the precision adjustment factors in Reference Method 24 shall be used. If the adjusted analytical VOC content is less than the formulation solvent content, then the analytical VOC content should be set equal to the formulation solvent content.

(2) For each coating formulation as applied, determine the organic HAP weight fraction, water weight fraction (if

applicable), and density from manufacturer's data. If these values cannot be determined using the manufacturer's data, the owner or operator shall submit an alternative procedure for determining their values for approval by the Administrator. Recalculation is required only when a change occurs in the coating formulation.

(3) For each coating as applied, calculate the mass of organic HAP emitted per volume of coating (lb/gal) less water as applied using equations 1, 2, and 3:

$$V_{wi} = \frac{D_{ci} W_{wi}}{D_w} \qquad \text{Eq. 1}$$

where

V_{wi}=volume (gal) of water in one gal of coating i.
D_{ci}=density (lb of coating per gal of coating) of coating i.
W_{wi}=weight fraction (expressed as a decimal) of water in coating i.
D_w=density of water, 8.33 lb/gal.

$$M_{Hi} = D_{ci} W_{Hi} \qquad \text{Eq. 2}$$

where

M_{Hi}=mass (lb) of organic HAP in one gal of coating i.
D_{ci}=density (lb of coating per gal of coating) of coating i.
W_{Hi}=weight fraction (expressed as a decimal) of organic HAP in coating i.

$$H_i = \frac{M_{Hi}}{(1 - V_{wi})} \qquad \text{Eq. 3}$$

where

H_i=mass of organic HAP emitted per volume of coating i (lb/gal) less water as applied.
M_{Hi}=mass (lb) of organic HAP in one gal of coating i.
V_{wi}=volume (gal) of water in one gal of coating i.

(d) *Organic HAP content level determination—averaged primers and topcoats.* For those uncontrolled primers and topcoats that are averaged together in order to comply with the primer and topcoat organic HAP content limits specified in § 63.745(c), the following procedure shall be used to determine the monthly volume-weighted average mass of organic HAP emitted per volume of coating (less water) as applied, unless the permitting agency specifies a shorter averaging period as part of an ambient ozone control program.

(1)(i) Determine the total organic HAP weight fraction as applied of each coating. If any ingredients, including diluent solvent, are added to a coating prior to its application, the organic HAP weight fraction of the coating shall be determined at a time and location in the process after all ingredients have been added.

(ii) Determine the total organic HAP weight fraction of each coating as applied each month.

(A) If no changes have been made to a coating, either as supplied or as applied, or if a change has been made that has a minimal effect on the organic HAP content of the coating, the value previously determined may continue to be used until a change in formulation has been made by either the manufacturer or the user.

(B) If a change in formulation or a change in the ingredients added to the coating takes place, including the ratio of coating to diluent solvent, prior to its application, either of which results in a more than minimal effect on the organic HAP content of the coating, the total organic HAP weight fraction of the coating shall be redetermined.

(iii) Manufacturer's formulation data may be used to determine the total organic HAP content of each coating and any ingredients added to the coating prior to its application. If the total organic HAP content cannot be determined using the manufacturer's data, the owner or operator shall submit an alternative procedure for determining the total organic HAP weight fraction for approval by the Administrator.

(2)(i) Determine the volume both in total gallons as applied and in total gallons (less water) as applied of each coating. If any ingredients, including diluent solvents, are added prior to its application, the volume of each coating shall be determined at a time and location in the process after all ingredients (including any diluent solvent) have been added.

(ii) Determine the volume of each coating (less water) as applied each month, unless the permitting agency specifies a shorter period as part of an ambient ozone control program.

(iii) The volume applied may be determined from company records.

(3)(i) Determine the density of each coating as applied. If any ingredients, including diluent solvent, are added to a coating prior to its application, the density of the coating shall be determined at a time and location in the process after all ingredients have been added.

(ii) Determine the density of each coating as applied each month, unless the permitting agency specifies a shorter period as part of an ambient ozone control program.

(A) If no changes have been made to a coating, either as supplied or as applied, or if a change has been made that has a minimal effect on the density of the coating, then the value previously determined may continue to be used until a change in formulation has been made by either the manufacturer or the user.

(B) If a change in formulation or a change in the ingredients added to the coating takes place, including the ratio of coating to diluent solvent, prior to its application, either of which results in a more than minimal effect on the density of the coating, then the density of the coating shall be redetermined.

(iii) The density may be determined from company records, including manufacturer's data sheets. If the density of the coating cannot be determined using the company's records, including the manufacturer's data, then the owner or operator shall submit an alternative procedure for determining the density for approval by the Administrator.

(4) Calculate the total volume in gallons as applied (less water) by summing the individual volumes of each coating (less water) as applied, which were determined under paragraph (d)(2) of this section.

(5) Calculate the volume-weighted average mass of organic HAP in coatings emitted per unit volume (lb/gal) of coating (less water) as applied during each 30-day period using equation 4:

$$H_a = \frac{\sum_{i=1}^{n} W_{Hi} D_{ci} V_{ci}}{C_{lw}} \qquad \text{Eq. 4}$$

where

H_a=volume-weighted average mass of organic HAP emitted per unit volume of coating (lb/gal) (less water) as applied during each 30-day period for those coatings being averaged.
n=number of coatings being averaged.
W_{Hi}=weight fraction (expressed as a decimal) of organic HAP in coating i as applied that is being averaged during each 30-day period.
D_{ci}=density (lb of coating per gal of coating) of coating i as applied that is being averaged during each 30-day period.
V_{ci}=volume (gal) of coating i as applied that is being averaged during the 30-day period.
C_{lw}=total volume (gal) of all coatings (less water) as applied that are being averaged during each 30-day period.

(e) *VOC content level determination—compliant primers and topcoats.* For those uncontrolled primers and topcoats complying with the primer and topcoat VOC content levels specified in § 63.745(c) without being averaged, the following procedure shall be used to determine the mass of VOC emitted per volume of coating (less water and exempt solvents) as applied.

(1) Determine the VOC content of each formulation (less water and exempt solvents) as applied using manufacturer's supplied data or Method 24 of 40 CFR part 60, appendix A to determine the VOC content. The VOC content shall be used as a surrogate for total HAP content for coatings that contain no exempt solvent. If there is a discrepancy between the manufacturer's formulation data and the results of the Method 24 analysis, compliance shall be based on the results from the Method 24 analysis.

When Method 24 is used to determine the VOC content of water-reducible coatings, the precision adjustment factors in Reference Method 24 shall be used. If the adjusted analytical VOC content is less than the formulation solvent content, then the analytical VOC content should be set equal to the formulation solvent content.

(2) For each coating applied, calculate the mass of VOC emitted per volume of coating (lb/gal) (less water and exempt solvents) as applied using equations 5, 6, and 7:

$$V_{wi} = \frac{D_{ci} W_{wi}}{D_w} \qquad \text{Eq. 5}$$

where

V_{wi}=volume (gal) of water in one gal of coating i.
D_{ci}=density (lb of coating per gal of coating) of coating i.
W_{wi}=weight fraction (expressed as a decimal) of water in coating i.
D_w=density of water, 8.33 lb/gal.

$$M_{Vi} = D_{ci} W_{Vi} \qquad \text{Eq. 6}$$

where

M_{Vi}=mass (lb) of VOC in one gal of coating i.
D_{ci}=density (lb of coating per gal of coating) of coating i.
W_{Vi}=weight fraction (expressed as a decimal) of VOC in coating i.

$$G_i = \frac{M_{Vi}}{(1 - V_{wi})} \qquad \text{Eq. 7}$$

where

G_i=mass of VOC emitted per volume of coating i (lb/gal) (less water and exempt solvents) as applied.
M_{Vi}=mass (lb) of VOC in one gal of coating i.
V_{wi}=volume (gal) of water in one gal of coating i.
V_{Xi}=volume (gal) of exempt solvents in one gal of coating i.

(3)(i) If the VOC content is found to be different when EPA Method 24 is used during an enforcement inspection from that used by the owner or operator in calculating G_a, compliance shall be based, except as provided in paragraph (e)(3)(ii) of this section, upon the VOC content obtained using EPA Method 24.

(ii) If the VOC content of a coating obtained using Method 24 would indicate noncompliance as determined under either § 63.749 (d)(3)(i) or (d)(4)(i), an owner or operator may elect to average the coating with other uncontrolled coatings and (re)calculate G_i (using the procedure specified in paragraph (f) of this section), provided appropriate and sufficient records were maintained for all coatings included in the average (re)calculation. The (re)calculated value of G_i (G_a in paragraph (f)) for the averaged coatings shall then be used to determine compliance.

(f) *VOC content level determination—averaged primers and topcoats.* For those uncontrolled primers and topcoats that are averaged within their respective coating category in order to comply with the primer and topcoat VOC content limits specified in § 63.745 (c)(2) and (c)(4), the following procedure shall be used to determine the monthly volume-weighted average mass of VOC emitted per volume of coating (less water and exempt solvents) as applied, unless the permitting agency specifies a shorter averaging period as part of an ambient ozone control program.

(1)(i) Determine the VOC content (lb/gal) as applied of each coating. If any ingredients, including diluent solvent, are added to a coating prior to its application, the VOC content of the coating shall be determined at a time and location in the process after all ingredients have been added.

(ii) Determine the VOC content of each coating as applied each month, unless the permitting agency specifies a shorter period as part of an ambient ozone control program.

(A) If no changes have been made to a coating, either as supplied or as applied, or if a change has been made that has a minimal effect on the VOC content of the coating, the value previously determined may continue to be used until a change in formulation has been made by either the manufacturer or the user.

(B) If a change in formulation or a change in the ingredients added to the coating takes place, including the ratio of coating to diluent solvent, prior to its application, either of which results in a more than minimal effect on the VOC content of the coating, the VOC content of the coating shall be redetermined.

(iii) Determine the VOC content of each primer and topcoat formulation (less water and exempt solvents) as applied using EPA Method 24 or from manufacturer's data.

(2)(i) Determine the volume both in total gallons as applied and in total gallons (less water and exempt solvents) as applied of each coating. If any ingredients, including diluent solvents, are added prior to its application, the volume of each coating shall be determined at a time and location in the process after all ingredients (including any diluent solvent) have been added.

(ii) Determine the volume of each coating (less water and exempt solvents) as applied each day.

(iii) The volume applied may be determined from company records.

(3) Calculate the total volume in gallons (less water and exempt solvents) as applied by summing the individual volumes of each coating (less water and exempt solvents) as applied, which were determined under paragraph (f)(2) of this section.

(4) Calculate the volume-weighted average mass of VOC emitted per unit volume (lb/gal) of coating (less water and exempt solvents) as applied for each coating category during each 30-day period using equation 8:

$$G_a = \frac{\sum_{i=1}^{n} (VOC)_{ci} V_{ci}}{C_{lwes}} \qquad \text{Eq. 8}$$

where

G_a=volume weighted average mass of VOC per unit volume of coating (lb/gal) (less water and exempt solvents) as applied during each 30-day period for those coatings being averaged.
n=number of coatings being averaged.
$(VOC)_{ci}$=VOC content (lb/gal) of coating i (less water and exempt solvents) as applied (as determined using the procedures specified in paragraph (f)(1) of this section) that is being averaged during the 30-day period.
V_{ci}=volume (gal) of coating i (less water and exempt solvents) as applied that is being averaged during the 30-day period.
C_{lwes}=total volume (gal) of all coatings (less water and exempt solvents) as applied during each 30-day period for those coatings being averaged.

(5)(i) If the VOC content is found to be different when EPA Method 24 is used during an enforcement inspection from that used by the owner or operator in calculating G_a, recalculation of G_a is required using the new value. If more than one coating is involved, the recalculation shall be made once using all of the new values.

(ii) If recalculation is required, an owner or operator may elect to include in the recalculation of G_a uncontrolled coatings that were not previously included provided appropriate and sufficient records were maintained for these other coatings to allow daily recalculations.

(iii) The recalculated value of G_a under either paragraph (f)(5)(i) or (f)(5)(ii) of this section shall be used to determine compliance.

(g) *Overall VOC and/or organic HAP control efficiency—carbon adsorber.* Each owner or operator subject to the requirements of § 63.745(d), § 63.746(c), or § 63.747(d) shall demonstrate initial compliance with the requirements of this subpart by following the procedures of paragraph (g)(1), (2), (3), (4), or (5) as applicable and paragraphs (6), (7), and (8) of this section. When an initial compliance demonstration is required by this subpart, the procedures in paragraphs (g)(9) through (g)(14) of this section shall be used in determining initial compliance with the provisions of this subpart.

(1) To demonstrate initial and continuous compliance with § 63.745(d), § 63.746(c), or § 63.747(d) when emissions are controlled by a dedicated solvent recovery device, each owner or operator of the affected operation may perform a liquid-liquid HAP or VOC material balance over rolling 7- to 30-day periods in lieu of demonstrating compliance through the methods in paragraph (g)(2), (g)(3), or (g)(4) of this section. Results of the material balance calculations performed to demonstrate initial compliance shall be submitted to the Administrator with the notification of compliance status required by § 63.9(h) and by § 63.753 (c)(1)(iv), (d)(3)(i), and (e)(3). When demonstrating compliance by this procedure, § 63.7(e)(3) of subpart A does not apply. The amount of liquid HAP or VOC applied and recovered shall be determined as discussed in paragraph (g)(1)(iii) of this section. The overall HAP or VOC emission reduction (R) is calculated using equation 9:

$$R = \frac{M_r}{\sum_{i=1}^{n} [W_{oi} M_{ci} - RS_i]} \times 100 \qquad \text{Eq. 9}$$

(i) The value of RS_i is zero unless the owner or operator submits the following information to the Administrator for approval of a measured RS_i value that is greater than zero:

(A) Measurement techniques; and

(B) Documentation that the measured value of RS_i exceeds zero.

(ii) The measurement techniques of paragraph (g)(1)(i)(A) of this section shall be submitted to the Administrator for approval with the notification of performance test required under § 63.7(b).

(iii) Each owner or operator demonstrating compliance by the test method described in paragraph (g)(1) of this section shall:

(A) Measure the amount of coating or stripper as applied;

(B) Determine the VOC or HAP content of all coating and stripper applied using the test method specified in § 63.750(c) (1) through (3) or (e) (1) and (2) of this section;

(C) Install, calibrate, maintain, and operate, according to the manufacturer's specifications, a device that indicates the amount of HAP or VOC recovered by the solvent recovery device over rolling 7- to 30-day periods; the device shall be certified by the manufacturer to be accurate to within ±2.0 percent, and this certification shall be kept on record;

(D) Measure the amount of HAP or VOC recovered; and

(E) Calculate the overall HAP or VOC emission reduction (R) for rolling 7- to 30-day periods using equation 9.

(F) Compliance is demonstrated if the value of R is equal to or greater than the overall HAP control efficiencies required by § 63.745(d), § 63.746(c), or § 63.747(d).
